o **REGISTRATION STATEMENT PURSUANT TO SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934**

OR

þ **ANNUAL REPORT PURSUANT TO SECTION 13(a) OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2006

Commission file number 0-21080

ENBRIDGE INC.

(Exact name of Registrant as specified in its charter)

Not Applicable
(Translation of Registrant's Name into English (if applicable))

Canada	**4923**	**None**
(Province or other jurisdiction of incorporation or organization)	*(Primary Standard Industrial Classification Code Number (if applicable))*	*(I.R.S. Employer Identification Number (if applicable))*

3000 Fifth Avenue Place
425 — 1st Street S.W.
Calgary, Alberta, Canada T2P 3L8
Telephone Number: (403) 231-3900
(Address and telephone number of Registrant's principal executive offices)

Enbridge (U.S.) Inc.
1100 Louisiana, Suite 3200
Houston, Texas 77002
Telephone Number: (713) 650-8900
(Name, address (including zip code) and telephone number *(including area code) of agent for service in the United States)*

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Shares	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

For annual reports, indicate by check mark the information filed with this Form:

þ Annual Information Form þ Audited annual financial statements

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

351,841,865 Common shares (as at December 31, 2006)

Indicate by check mark whether the Registrant by filing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934 (the "Exchange Act"). If "Yes" is marked, indicate the filing number assigned to the Registrant in connection with such Rule.

o Yes þ No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

þ Yes o No

DISCLOSURE CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was carried out under the supervision of and with the participation of the Registrant's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operations of the Registrant's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective in ensuring that information required to be disclosed by the Registrant in reports that it files with or submits to the Securities and Exchange Commission is recorded, processed, summarized and reported within the time periods required.

No significant changes were made in the Registrant's internal control over financial reporting or in other factors during the period covered by this annual report on Form 40-F that have materially affected or are reasonably likely to materially affect the Registrant's internal control over financial reporting.

INTERNAL CONTROL OVER FINANCIAL REPORTING

The information provided under the heading "Internal Control over Financial Reporting" contained in the Management's Discussion and Analysis, filed as exhibit 99.5 to this annual report on Form 40-F, is incorporated herein by reference.

AUDIT COMMITTEE FINANCIAL EXPERT

The Registrant's Board of Directors has determined that Mr. D.A. Leslie, a member of the Audit Committee, qualifies as an audit committee financial expert (as defined in Form 40-F under the Securities Exchange Act of 1934) and is independent as defined by the New York Stock Exchange corporate governance rules applicable to foreign private issuers. The SEC has indicated that the designation of Mr. Leslie as an audit committee financial expert does not make him an "expert" for any purpose, impose any duties, obligations or liability on him that are greater than those imposed on members of the audit committee and board of directors who do not carry this designation or affect the duties, obligations or liability of any other member of the audit committee.

CODE OF ETHICS

The Registrant has adopted a code of ethics (the "Statement on Business Conduct") that applies to all employees and officers, including its principal executive officer, principal financial officer and principal accounting officer. The Statement on Business Conduct is available at the Registrant's Internet website, www.enbridge.com.

PRINCIPAL ACCOUNTANT FEES AND SERVICES

PricewaterhouseCoopers LLP (or a predecessor firm, Price Waterhouse) ("PWC") have been the auditors of the Registrant since 1992.

In response to legislative and regulatory requirements regarding auditor independence, the Registrant's Audit, Finance & Risk Committee adopted a policy that requires pre-approval by the Audit, Finance & Risk Committee of any services to be provided by the auditors, whether audit or non-audit services. During the years ended December 31, 2005 and 2006, all audit and non-audit services were pre-approved by the Audit, Finance & Risk Committee.

The following table sets forth all services rendered by the auditors by category, together with the corresponding fees billed by the auditors for each category of service for the financial years ended December 31, 2006 and 2005.

	Years ended December 31	
	2006	2005
Audit Fees(1)	$3,688,620	$1,658,869
Audit-Related Fees(2)	248,645	166,552
Tax Fees(3)	310,599	210,490
All Other Fees(4)	388,444	32,360
Total Fees	$4,636,308	$2,068,271

Notes:

1 Represents the aggregate fees billed by the Corporation's auditors for audit services.

2 Represents the aggregate fees billed for assurance and related services by the Corporation's auditors that are reasonably related to the performance of the audit or review of the Corporation's financial statements and are not included under "Audit Fees". These items include technical support and procedures related to financing and pension plans.

3 Represents the aggregate fees billed for professional services rendered by the Corporation's auditors for tax compliance, tax advice, tax planning, and international tax services.

4 Represents the aggregate fees billed for products and services provided by the Corporation's auditors other than those services reported under "Audit Fees", "Audit Related Fees" and "Tax Fees".

OFF-BALANCE SHEET ARRANGEMENTS

The Registrant has no off-balance sheet arrangements as defined by Form 40-F under the Securities Act of 1934.

TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS

Payments due for contractual obligations, excluding interest, of the Registrant over the next five years and thereafter are as follows:

(millions of Canadian dollars)	Total	Less than 1 year	1-3 years	3-5 years	After 5 years
Long-term debt	7,574.4	535.3	800.0	748.4	5,490.7
Non-recourse long-term debt	1,566.9	58.4	301.3	180.0	1,027.2
Long-term contracts	1,306.1	454.2	309.1	256.6	286.2
Capital and operating leases	85.6	7.4	14.2	12.3	51.7
Totals	10,533.0	1,055.3	1,424.6	1,197.3	6,855.8

IDENTIFICATION OF THE AUDIT COMMITTEE

The Registrant is required by Canadian law to have an audit committee. The Chair of the Audit, Finance & Risk Committee is R.W. Martin and the other members are D.A. Leslie, G.K. Petty and C. E. Shultz.

FORWARD-LOOKING STATEMENTS

A number of statements in the documents incorporated by reference in this Form 40-F constitute “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Please refer to the last paragraph on the Table of Contents in the Annual Information Form of Enbridge Inc. for the year ended December 31, 2006, dated February 21, 2007, incorporated herein and forming an integral part of this document, for a discussion of risks, uncertainties and assumptions that could cause actual results to vary from those forward-looking statements.

UNDERTAKING

The Registrant undertakes to make available, in person or by telephone, representatives to respond to inquiries made by the Commission staff, and to furnish promptly, when requested to do so by the Commission staff, information relating to the securities in relation to which the obligation to file an annual report on Form 40-F arises or transactions in said securities.

SIGNATURES

Pursuant to the requirements of the Exchange Act, the Registrant certifies that it meets all of the requirements for filing on Form 40-F and has duly caused this Annual Report to be signed on its behalf by the undersigned, thereunto duly authorized.

ENBRIDGE INC.

EXHIBIT INDEX

99.1. Certificates of the Chief Executive Officer and Chief Financial Officer under Section 302 of the *Sarbanes-Oxley Act of 2002*.

99.2. Certificates of the Chief Executive Officer and Chief Financial Officer under Section 906 of the *Sarbanes-Oxley Act of 2002*.

99.3. Annual Information Form of the Registrant dated February 21, 2007.

99.4. Audited financial statements of the Registrant and notes thereto for the fiscal years ended December 31, 2005 and 2006 and Auditor's Report thereon.

99.5. Management's Discussion and Analysis of the Registrant for the year ended December 31, 2006 dated February 21, 2007.

99.6. Consent of PricewaterhouseCoopers LLP, independent auditors of the Registrant.

EXHIBIT 99.1

CERTIFICATIONS

Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Patrick D. Daniel, Chief Executive Officer of Enbridge Inc., certify that:

1. I have reviewed this annual report on Form 40-F of Enbridge Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the issuer as of, and for, the periods presented in this report;

4. The issuer's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the issuer and have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the issuer, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the issuer's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) disclosed in this report any change in the issuer's internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the issuer's internal control over financial reporting; and

5. The issuer's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the issuer's auditors and the audit committee of issuer's board of directors (or persons performing the equivalent functions):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the issuer's ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the issuer's internal control over financial reporting.

In the interest of providing Enbridge shareholders and potential investors with information about the Company and its subsidiaries, including management's assessment of Enbridge's and its subsidiaries' future plans and operations, certain information provided in this Annual Information Form (AIF) constitutes forward-looking statements or information (collectively, "forward-looking statements"). Forward-looking statements are typically identified by words such as "anticipate", "expect", "project", "estimate", "forecast", "plan", "intend", "target", "believe" and similar words suggesting future outcomes or statements regarding an outlook. Although Enbridge believes that these forward-looking statements

are reasonable based on the information available on the date such statements are made, such statements are not guarantees of future performance and readers are cautioned against placing undue reliance on forward-looking statements. By their nature, these statements involve a variety of assumptions, known and unknown risks and uncertainties and other factors, which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements.

Enbridge's forward-looking statements are subject to risks and uncertainties pertaining to operating performance, regulatory parameters, weather, economic conditions, exchange rates, interest rates and commodity prices, including but not limited to those risks and uncertainties discussed in this AIF and in the Company's other filings with Canadian and United States securities regulators. The impact of any one risk, uncertainty or factor on a particular forward-looking statement is not determinable with certainty as these are interdependent and Enbridge's future course of action depends on management's assessment of all information available at the relevant time. Except to the extent required by law, Enbridge assumes no obligation to publicly update or revise any forward-looking statements made in this AIF or otherwise, whether as a result of new information, future events or otherwise. All subsequent forward-looking statements, whether written or oral, attributable to Enbridge or persons acting on the Company's behalf, are expressly qualified in their entirety by these cautionary statements.

CORPORATE STRUCTURE

INCORPORATION

Enbridge Inc. (Enbridge or the Company) was incorporated on April 13, 1970 under the Companies Act of the Northwest Territories as Gallery Holdings Ltd. and was continued under the Canada Business Corporations Act (the CBCA) on December 15, 1987 under the name 159569 Canada Ltd. The Articles of Continuance were amended on August 2, 1989 to change the registered office to Calgary, Alberta; on April 30, 1992 to change the number of shares authorized for issuance to an unlimited number of common and preferred shares, to change the name to Interprovincial Pipe Line System Inc. (Interprovincial), and to change the registered office to Edmonton, Alberta; on July 2, 1992 to change the French version of the name to Réseau de Pipelines Interprovincial Inc.; and on August 6, 1992 to change the number of directors to a minimum of 1 and a maximum of 15, as fixed by the Board of Directors.

The Company, formerly a wholly-owned subsidiary of Interprovincial, became the parent company of Interprovincial on December 18, 1992, pursuant to a Plan of Arrangement implementing a corporate reorganization approved by Interprovincial's shareholders at the Annual and Special Meeting of Shareholders held on May 6, 1992. As a result of the reorganization, each common share of Interprovincial was deemed to be exchanged for one common share of the Company. The shares of Interprovincial, which was incorporated in 1949 by a special act of Parliament, were listed for trading on the Toronto and Montreal stock exchanges in 1953.

The Articles of Continuance were further amended on May 5, 1994 to change the name of the Company to IPL Energy Inc. and to change the registered office to Calgary. On October 6, 1998, the Articles of Continuance were amended to change the name of the Company to Enbridge Inc. On November 24, 1998, the Articles of Continuance were amended to increase the capital of the Company by designating a new series of preference shares as 5.5% Cumulative Redeemable Preference Shares, Series A. On April 29, 1999, the Articles of Continuance were further amended to divide each issued and outstanding common share on a two for one basis and to provide the Board of Directors with a process to add directors between meetings of the shareholders. On May 20, 2005, the Articles of Continuance were further amended to divide each issued and outstanding common share on a two for one basis.

The Company's head office is located at 3000, 425-1 st Street SW in Calgary, Alberta.

SUBSIDIARIES

Each subsidiary listed below is 100% owned by the Company unless otherwise noted. Numerous subsidiaries, many of which are inactive, are omitted from the following list. Individually the total revenue and assets for each of these excluded subsidiaries is less than 10% of the consolidated revenue and

consolidated assets of the Company. In the aggregate, for excluded subsidiaries, total revenue and total assets are less than 20% of the consolidated revenue and consolidated assets of the Company.

Name	Jurisdiction of Incorporation
IPL System Inc.	Alberta
Enbridge Pipelines Inc.	Canada
Enbridge Energy Company Inc .	Delaware
Enbridge Pipelines (NW) Inc	Canada
Enbridge Energy Distribution Inc.	Canada
Enbridge Gas Distribution Inc.	Ontario
Enbridge (U.S.) Inc.	Delaware
Enbridge Gas Services (U.S.) Inc.	Delaware
IPL AP Holdings (U.S.A.) Inc.[1]	Delaware
Enbridge Gas Services Inc.	Canada
Enbridge Pipelines (Athabasca) Inc	Alberta
Enbridge Capital ApS	Denmark
Enbridge Income Fund[2]	Alberta
Tidal Energy Marketing Inc.	Canada

1 IPL AP Holdings (U.S.A.) Inc. owns the Company's 50% joint venture interest in Alliance Pipeline US.

2 The Company owns 41.9% of Enbridge Income Fund (EIF) and is the primary beneficiary of EIF through a combination of voting interest and an investment in preferred units and as such, starting January 1, 2005, EIF is consolidated under Variable Interest Entity accounting rules.

GENERAL DEVELOPMENT OF THE BUSINESS

Enbridge's primary business activities are the transportation and distribution of crude oil and natural gas. Enbridge conducts its business through five operating segments: Liquids Pipelines, Gas Pipelines, Sponsored Investments, Gas Distribution and Services, and International.

- Liquids Pipelines includes the operation of Enbridge's Canadian common carrier pipeline and feeder pipelines that transport crude oil and other liquid hydrocarbons.
- Gas Pipelines consists of proportionately consolidated investments in pipelines that transport natural gas including the United States portion of the Alliance Pipeline, Vector Pipeline and transmission and gathering pipelines in the Gulf of Mexico.
- Sponsored Investments consists of the Company's investments in Enbridge Energy Partners, L.P. (EEP), Enbridge Energy Management, L.L.C. (EEM) (collectively, the Partnership) and Enbridge Income Fund (EIF). The Partnership transports crude oil and other liquid hydrocarbons through common carrier and feeder pipelines and transports, gathers, processes and markets natural gas and natural gas liquids in the United States. EIF is a publicly traded income fund whose primary operations include a 50% interest in the Canadian portion of the Alliance Pipeline and a 100% interest in a crude oil and liquids pipeline and gathering system.
- Gas Distribution and Services consists of gas utility operations which serve residential, commercial, industrial and transportation customers, primarily in Central and Eastern Ontario. It also includes natural gas distribution activities in Quebec, New Brunswick and New York State, and the Company's proportionately consolidated investments in CustomerWorks Limited Partnership, a customer care provider serving natural gas distribution companies, and Aux Sable, a natural gas fractionation and extraction business. The Company's commodity marketing businesses are also included in Gas Distribution and Services. These businesses manage the Company's volume commitments on Alliance and Vector Pipelines as well as offering commodity storage, transport, and supply management services.
- The Company's International business consists of investments in energy delivery businesses, Compañía Logística de Hidrocarburos CLH, S.A. (CLH) in Spain and Oleoducto Central, S.A. (OCENSA) in Colombia.

THREE YEAR HISTORY

Significant events and transactions in the development of the Company's business over the last three years include completion of the Spearhead Pipeline reversal which commenced operations in the first quarter of 2006, the acquisition of Olympic Pipeline in February of 2006, the negotiation of an Incentive Tolling Settlement (ITS) with the Canadian Association of Petroleum Producers (CAPP) on the Enbridge System (described under Liquids Pipelines) in 2005 and the initiation of a number of strategic organic growth projects and acquisitions. Certain organic growth projects are described in detail in the Company's Management's Discussion and Analysis for the year ended December 31, 2006, filed on SEDAR (www.sedar.com). The projects which are expected to meaningfully influence the general development of the business are described below.

2006 Transactions and Events

Olympic Pipe Line

In February 2006, Enbridge acquired a 65% interest in the Olympic Pipeline from BP Pipelines. Olympic is the largest refined products pipeline in the State of Washington, transporting approximately 290,000 bpd of gasoline, diesel and jet fuel. The pipeline system extends approximately 480 kilometres (300 miles) from Blaine, Washington to Portland, Oregon, connecting four Puget Sound refineries to terminals in Washington and Portland. The system consists of 640 kilometres (400 miles) of 6 to 20 inch diameter pipe, a 500,000-barrel terminal, 9 pumping stations and 21 delivery facilities. BP will continue to operate the pipeline system.

Investment in EEP

In 2006, the Company acquired 5.4 million Class C units of EEP for $280.2 million (US$250 million), increasing the Company's combined ownership from 10.9% to 16.6% (2004 – 11.6%). The Class C units have the same voting rights as Class A and B units of EEP and holders of the Class C units are entitled to quarterly distributions equal to those paid to Class A and B units. Prior to August 15, 2009, distributions are paid in additional Class C units, where Class C units are valued at the market value of Class A units. After August 15, 2009, distributions will be paid in cash and, subject to the approval of existing holders of Class A and Class B units, the Class C units will convert to Class A units on a one-to-one basis. If approval of the conversion is not received, the holders of Class C units will receive cash distributions equal to 115% of those paid to holders of Class A units.

Spearhead Pipeline

The Company reversed the flow of the Spearhead Pipeline, which previously operated from Cushing, Oklahoma to Chicago, Illinois to bring crude oil from Chicago to Cushing. The reversed pipeline went into service in March 2006. Enbridge acquired 90% of the Spearhead Pipeline in 2003 and the remaining 10% in 2005.

Progress on Projects Under Development

Southern Access Mainline Expansion Project

The Southern Access Mainline Expansion project is currently under construction and will ultimately add a total of 400,000 bpd incremental capacity to the mainline system from Hardisty, Alberta to Flanagan, Illinois, near Chicago. The United States portion of the expansion is being undertaken by EEP and Enbridge is undertaking the Canadian segment.

The Canadian segment expansion schedule has been expedited with 120,000 bpd added in 2006, an additional 63,000 bpd expected in 2008 and another 85,000 bpd expected in 2009 in order to match the total additional capacity of 400,000 bpd being provided in the United States. With the support of industry, the proposed diameter of the Southern Access Expansion from Superior, Wisconsin to Flanagan, Illinois has been increased to 42 inches, increasing the estimated cost to US$1.3 billion on the United States segment. The estimated cost of the Canadian segment is $0.2 billion.

Alberta Clipper Project

The Alberta Clipper Project involves the construction of a new 36-inch diameter pipeline from Hardisty, Alberta to Superior, Wisconsin, in conjunction with additional pumping power applied to the new 42-inch pipe from Superior to Flanagan, Illinois, described above under Southern Access Expansion. The Alberta Clipper Project will interconnect with the existing mainline system in Superior where it will provide access to

Enbridge's full range of delivery points and storage options, including Chicago, Toledo, Sarnia, Patoka, Wood River and Cushing.

The expected capacity of the pipeline has been increased from 400,000 bpd to 450,000 bpd. The Canadian segment of the line is expected to cost $1.5 billion (in 2006 dollars) and the U.S. segment, which will be undertaken by EEP, is expected to cost US$0.8 billion.

In January 2007, industry confirmed its support for the Alberta Clipper project. Regulatory applications will be filed once commercial terms are finalized, which is expected to occur in the first quarter of 2007. The Alberta Clipper Project is expected to be in service in late 2009 or 2010.

Waupisoo Pipeline Project

The 30-inch diameter, 380-kilometre (236 mile) pipeline will transport crude oil from the Cheecham terminal, currently under construction on the Athabasca System, to the Edmonton area. The initial capacity of the line will be 350,000 bpd and is expandable to a maximum of 600,000 bpd through the addition of pumping units. Enbridge has filed an application for regulatory approval with the Alberta Energy and Utilities Board (AEUB) and other provincial government departments. Following regulatory approvals, which are expected in the first quarter of 2007, Enbridge will begin construction on the approximately $0.5 billion pipeline in 2007, with an expected in-service date of mid-2008. The previously announced 16-inch, 150,000 bpd diluent return line from the Edmonton area refinery hub north to the oil sands has been removed from the regulatory filing in order to expedite the crude oil line.

Southern Access Extension

The Southern Access Extension involves the construction of a new 36-inch diameter, 400,000 bpd pipeline extending the mainline from Flanagan to Patoka, Illinois, at a cost of approximately US$0.4 billion to Enbridge. Discussions with shippers have been finalized and, with industry support for this project, a Federal Energy Regulatory Commission (FERC) Offer of Settlement was filed on September 1, 2006.

The initial Offer of Settlement proposing a rolled in toll design was not approved by the FERC. However, support for the project remains strong and Enbridge is working with industry representatives on an alternative tolling structure to address the initial opposition from the intervening parties. The Company expects that a second application will be filed with the FERC in the first quarter of 2007 to allow the project to continue on schedule, with an estimated 2009 in-service date.

The Gateway Project

The Gateway Project includes both a condensate import pipeline and a petroleum export pipeline. The condensate line would transport imported diluent from Kitimat, British Columbia to the Edmonton area. The petroleum export line would transport crude oil from the Edmonton area to Kitimat. The condensate line is expected have a 20-inch diameter and an initial capacity of 193,000 bpd. The petroleum export line would have a 36-inch diameter and an initial capacity of 525,000 bpd. Capital cost estimates will be completed once commercial terms are finalized.

Current shipper preferences to accelerate the development of capacity to traditional United States markets will likely result in the acceleration of the Alberta Clipper Project, such that it precedes the Gateway Pipeline project. The Company now estimates that the Gateway in-service date will be in the 2012 to 2014 timeframe. The decision to proceed with the regulatory filing for either pipeline is subject to commercial considerations, including satisfactory completion of shipper agreements, environmental assessment as well as public and Aboriginal consultation.

Southern Lights Pipeline

Following the successful completion of a binding open season in July 2006, Enbridge announced plans in December 2006 to proceed with the Southern Lights Pipeline to increase the availability of diluent in Alberta. When completed, this 180,000 barrels per day (bpd), 20-inch diameter pipeline will transport diluent from Chicago to Edmonton and is expected to be in service in mid 2010.

The Southern Lights Pipeline project involves reversing the flow of a portion of Enbridge's Line 13, an existing crude oil pipeline, from Clearbrook, Minnesota to Edmonton. The Canadian portion of Line 13 is currently part of the mainline system and the United States portion of Line 13 is owned by EEP. In order to replace the light crude capacity that would be lost through the reversal of Line 13, the Southern Lights Project also includes the construction of a new 20-inch diameter crude oil pipeline from Cromer, Manitoba to Clearbrook, and the expansion of existing Line 2. These changes to the existing crude oil system will ultimately increase southbound light crude system capacity by 45,000 bpd. The capital cost of the Southern Lights Project, including the new 20-inch diameter diluent pipeline, is estimated to be approximately US$1.3 billion.

In the fourth quarter of 2006, Enbridge received industry endorsement for the Southern Lights Pipeline including an acceleration of the light crude capacity replacement and a delay in the transfer of Line 13 from the mainline system to the Southern Lights Pipeline Project. This change will increase the light crude capacity on the mainline system by 215,000 bpd until Line 13 is transferred. Line 13 will be transferred to the Southern Lights Pipeline Project on the earlier of the completion of construction of new light crude capacity or the middle of 2010. Also during the fourth quarter, EEP approved the exchange of its portion of Line 13 for a portion of the Cromer to Clearbrook crude oil pipeline to be constructed. Remaining regulatory applications are expected to be filed in the first quarter of 2007.

Hardisty Terminal

The Company plans to proceed with the construction of a new crude oil terminal at Hardisty, Alberta. The terminal is expected to have a capacity of 7.5 million barrels and will cost approximately $0.4 billion. Enbridge has executed contracts for over 80% of the capacity and is close to closing contracts for the balance of the capacity. It is anticipated that the terminal will start to come into service early in 2008, with tanks being commissioned throughout 2008 and into 2009. An additional phase of development, which will increase the terminal's capacity by up to 3.4 million barrels, is planned and the Company is in discussions with customers who are seeking this additional capacity. Once complete, the Hardisty Terminal will be one of the largest crude oil terminals in North America.

Stonefell Terminal

BA Energy Inc. is building a bitumen upgrader near Fort Saskatchewan, Alberta for which Enbridge has agreed to provide pipeline and terminaling services. Based on initial scope and cost estimates, Enbridge expects to invest approximately $0.1 billion in new facilities to provide storage services at a new satellite terminal to be developed adjacent to the upgrader. Enbridge will also provide pipeline transportation for the upgrader's output from the new terminal to a refinery hub near Edmonton. These facilities are expected to be in service in mid-2008.

The Stonefell Terminal is also strategically located adjacent to several other proposed or operating upgrading facilities and pipeline systems and will be a focus for further development of contract terminaling infrastructure.

East Texas Clarity

The East Texas Clarity project, undertaken by EEP, is a US$0.6 billion expansion of EEP's East Texas system and is progressing on schedule to add 0.7 billion cubic feet (bcf) per day of natural gas transportation capacity to the Texas intrastate market in 2007. The Clarity project will be completed in phases during the year with the first phase scheduled for completion in early 2007. This phase involves the construction of a natural gas treating facility and related mainline expansion. Additional phases will be complete in mid-2007 and end of year 2007. When complete, the Clarity project will link growing natural gas production in East Texas, and third party storage assets in East Texas, with major third party pipelines and markets in the Beaumont, Texas area.

Ontario Wind Project

Enbridge is developing approximately 182 megawatts of wind power in the Municipality of Kincardine on the eastern shore of Lake Huron in Ontario. Construction will commence when final environmental and zoning approvals are obtained. The project is waiting for its Environmental Screening Report to be passed by the Ontario Ministry of Environment and its zoning laws to be approved by the Ontario Municipal Board. Total

capital expenditures are expected to be approximately $0.5 billion. Enbridge has entered into a 20-year electricity purchase agreement with the Ontario Power Authority for all the power produced by the project. The Company expects the Ontario Wind Project to be in service in late 2008.

2005 Transactions and Events

ITS

The ITS, negotiated in 2005, defines the methodology for calculating tolls on the core component of the Enbridge System in Canada. The new ITS is in effect from January 1, 2005 to December 31, 2009 and excludes minor pipelines that have their own tolling arrangements as well as expansions to the Enbridge System, known as the SEP I, SEP II and Terrace expansions, which have separate tolling arrangements described under Liquids Pipelines.

Enbridge Offshore Pipelines

During 2005, the Company acquired further interests in Neptune Pipeline and Garden Banks Gas Pipeline, businesses included in Enbridge Offshore Pipelines. The Company also initiated a project to construct and operate both a natural gas lateral and a crude oil lateral to connect the deepwater Neptune oil and gas field to existing Enbridge Offshore Pipelines infrastructure. The project is expected to cost approximately US$0.1 billion and is expected to be completed in 2007.

2004 Transactions and Events

Enbridge Offshore Pipelines

On December 31, 2004, the Company completed the purchase of ownership interests ranging from 22% to 80% in natural gas pipeline systems in the Gulf of Mexico from Shell for approximately $754 million. The assets, referred to as Enbridge Offshore Pipelines, include ownership interests in 11 transmission and gathering pipelines that can transport approximately 3 bcf/d of natural gas. The assets, which currently transport more than 50% of all deepwater production in the Gulf of Mexico, are held primarily through joint venture interests.

North Texas Natural Gas System

EEP acquired the North Texas Natural Gas System on January 6, 2005, for approximately US$165.0 million, which consists of approximately 3,540 kilometres (2,200 miles) of gas gathering pipelines and three processing plants. EEP acquired the Mid-Continent System on March 1, 2004 for US$117.0 million. The Mid-Continent System consists of over 770 kilometres (480 miles) of crude oil pipelines and 9.5 million barrels of storage capacity, primarily located in Cushing.

In 2004, Enbridge sold its investment in AltaGas Income Trust resulting in an after-tax gain of $97.8 million.

DESCRIPTION OF THE BUSINESS

REVENUES BY SEGMENT

(Canadian dollars in millions)	**2006**	2005	2004
Liquids Pipelines	1,048.1	881.0	872.7
Gas Pipelines	345.9	364.3	271.7
Sponsored Investments[1]	254.7	249.0	—
Gas Distribution and Services[2]	8,981.6	6,947.1	6,631.1
International	14.2	11.7	32.3
Corporate	—	—	—
Total Revenues	10,644.5	8,453.1	7,807.8

Notes:

1 Prior to 2005, earnings from EIF were accounted for as investment income and were therefore not included in revenues. Starting in 2005, the Company consolidated EIF under Variable Interest Entity accounting guidelines.

2 Gas Distribution and Services included 15 months of revenues in 2004 for Enbridge Gas Distribution and other gas distribution businesses, all of which changed their year end to December 31 from September 30, in 2004.

LIQUIDS PIPELINES

Enbridge is the primary transporter of Western Canadian crude oil production. The mainline system (the System) consists of the Enbridge System (the portion of the System located in Canada) and the Lakehead System (the portion of the System located in the United States), which is owned by EEP. The Company has an equity investment in EEP that is included in Sponsored Investments. The Athabasca System transports synthetic and heavy crude oil from the Athabasca and Cold Lake regions of Alberta to Hardisty. The Norman Wells System (NW System) transports crude oil from the Northwest Territories to Zama, Alberta. In addition, Enbridge has interests in various feeder pipeline systems (Frontier, Olympic, Toledo, Mustang and Chicap) and liquid storage facilities (Patoka), which operate in the United States, as well as the Spearhead Pipeline, which began transporting Canadian crude oil from the Lakehead System at Chicago to Cushing in March 2006.

Enbridge System

The Enbridge System extends from Edmonton, Alberta, across the Canadian prairies to the U.S. border near Gretna, Manitoba. It continues from the United States border near Sarnia, Ontario, to Toronto, Ontario, and Montreal, Quebec, with lateral lines to Nanticoke, Ontario, and Niagara Falls, Ontario. The total length of pipeline right-of-way is approximately 2,300 kilometres (1,400 miles). The Enbridge System is regulated by the National Energy Board (NEB).

Services

The Enbridge System regularly transports up to 70 different types of liquid hydrocarbons including light, medium and heavy crude oil (including bitumen), condensate, synthetic crudes, natural gas liquids (NGL) and refined products.

The Enbridge System consists of a number of separate segments:

(i) a mainline segment that consists of five pipelines, with a capacity of 1,930,000 bpd from Edmonton to the United States border near Gretna, Manitoba.

(ii) a Sarnia to Toronto segment that consists of two lines with a capacity of 150,000 bpd. The Sarnia to Toronto segment includes lateral lines from Westover, Ontario, to Nanticoke and Niagara Falls.

(iii) a Montreal, Quebec to Sarnia segment, Line 9, with a capacity of 240,000 bpd.

The annual capacities noted above take into account estimated crude receipt and delivery patterns and ongoing pipeline maintenance and reflect achievable pipeline capacity over long periods of time.

Significant Contracts — Tolling Agreements and Tariffs

The NEB has regulatory authority in Canada over the construction and operation of pipelines for the interprovincial transportation of liquid hydrocarbons and over matters relating to the accounting and rates of such pipelines.

Enbridge System tolls have been based on an incentive model since 1995. The main objective of this methodology is to more closely align the interests of the Company with the interests of its shippers. It provides for the sharing with customers of the results of operating efficiencies and cost savings achieved above certain thresholds on an annual basis.

In 2005, Enbridge and CAPP approved the key terms of a new negotiated ITS, effective for January 1, 2005 to December 31, 2009. In January 2006, the NEB approved the new ITS. The new ITS continues the sharing of earnings in excess of a stipulated threshold and provides a fixed annual mainline integrity allowance. In conjunction with the Terrace Agreement, the new ITS continues the throughput protection provisions ensuring the Company is insulated from volume fluctuations beyond its control. In addition to the incentive-based provisions in prior agreements, service and reliability metrics, collectively referred to as performance metrics, have been added to the new ITS to further align the Company's interests with its shippers. The Company has the opportunity to increase earnings by achieving performance targets under the new service and reliability performance metric provisions. Service metrics establish financial bonuses and penalties for prescribed performance targets related to crude oil quality management and predictability of scheduled deliveries. The reliability metric provides for bonuses and penalties associated with optimization of system capacity, which are calculated relative to annual capacity targets.

Tariffs

Tolls are calculated in accordance with various agreements. Under published tariffs for the Enbridge System, the tolls for transportation, including terminaling charges where applicable, of light crude oil from Edmonton to principal delivery points, at December 31, 2006 are set forth below.

	Canadian Toll Per Barrel
Regina, Saskatchewan	$ 0.842
U.S. border near Gretna, Manitoba	$ 1.199
Sarnia, Ontario	$ 1.315

The rates for medium and heavy crude oils are higher, while those for refined products and NGL are lower than the rates set forth in the above table to compensate for differences in costs for shipping different types and grades of liquid hydrocarbons. The Canadian portion of the Terrace Agreement toll surcharge, described below, is included in the tolls listed in the table above.

SEP II Risk Sharing Agreement

Enbridge, EEP and CAPP entered into a Risk Sharing Agreement, effective for 15 years, with respect to SEP II, a 100,000 bpd expansion completed in 1998. The Risk Sharing Agreement provides that the rate of return on the SEP II investment will be based, in part, on the utilization level of the additional capacity constructed. Higher utilization is expected to result in a greater return, subject to a minimum and maximum rate of return of 7.5% and 15.0%, respectively. During 2006, Enbridge and EEP earned the minimum rate of return on SEP II.

Terrace Agreement Toll Surcharge

As part of the Terrace Agreement, Enbridge, EEP and CAPP agreed to a fixed toll surcharge of $0.05 per barrel for the movement of light crude from Edmonton to the Chicago area. This toll surcharge commenced on April 1, 1999, when Terrace Phase I was completed. The incremental toll is allocated between Enbridge and EEP. Unused capacity under the Terrace Agreement is incorporated in tolls in the following year.

Principal Markets

The System (comprised of Enbridge System and Lakehead) is the primary transporter of crude oil from Western Canada to the United States. It is the only pipeline that transports crude oil from Western Canada to Eastern Canada, serving all of the major refining centres in Ontario, as well as the Midwest region of the United States. Shipments delivered to the Enbridge System originate in oilfields and oil sands in Alberta, Saskatchewan, Manitoba, British Columbia and the Northwest Territories, and reach the Enbridge System through the NW and Athabasca Systems owned by Enbridge, as well as pipelines owned and operated by others. These pipelines connect with the Enbridge System at two receiving points in Alberta, two in Saskatchewan and one in Manitoba. In addition, the Enbridge System receives offshore crude oil through connecting pipelines at Montreal, Quebec.

Supply and Reserves

Generally, development of the oil sands has more than offset declining conventional production. The NEB estimates that total Western Canada production was 2.5 million bpd[1] at the end of 2006 (2005 – 2.3 million bpd). At the end of 2005, remaining established conventional oil reserves in Western Canada were estimated to be 3.8 billion barrels[2] and remaining established reserves from oil sands were estimated at 174 billion barrels[3]. Combined conventional and oil sands reserves put Canada second only to Saudi Arabia with 14% of the worldwide estimated proved reserves[4].

Deliveries and Demand for Western Canadian Sedimentary Basin Crude

The Company's liquids pipelines are dependent upon the demand for crude oil and other liquid hydrocarbons produced from Western Canada. Deliveries from the System are made in the prairie provinces, the Province of Ontario and in the Great Lakes and Midwest regions of the United States, principally to refineries, either directly or through the connecting pipelines of other companies. Within these regions are located major refining centres near Sarnia, Nanticoke, and Toronto, Ontario; the Minneapolis-St. Paul area of Minnesota; Superior; Chicago; the Patoka/Wood River, Illinois area; Detroit, Michigan; and Toledo, Ohio. Through Company initiatives, Canadian crude oil has begun to penetrate southern markets in the United States Midwest (PADD II) with the Spearhead Pipeline as well as the United States Gulf Coast (PADD III) via a third party pipeline system.

Historically, Canada has been the third largest supplier of crude to the United States. However, for the past three years, Canada has surpassed both Mexico and Saudi Arabia to become the largest exporter of crude oil to the United States. Western Canada demand is served by local supply and has remained relatively flat over the last two years. During 2006, greater volumes of Western Canadian crude were transported to Ontario, pushing back Atlantic Basin crude oil. Deliveries of WCSB crude into PADD II increased by 64,300 bpd over the last two years with increased WCSB crude oil supply in 2006[2]. Over the same two-year period, deliveries into PADD IV (the U.S. Rocky Mountains) have increased by 6,700 bpd, PADD V (the Western U.S.) deliveries have increased by 6,000 bpd, and PADD III deliveries have increased by 63,800 bpd[2].

(2) "Disposition of Domestic Light and Heavy Crude Oil and Imports – 2006", National Energy Board

(3) "2006 Estimated Production of Canadian Crude Oil and Equivalent", National Energy Board

The following table sets forth the information related to deliveries and other distance-related operating data of the Enbridge System for each of the years in the three-year period ended December 31, 2006.

(thousands of barrels per day)	Deliveries 2006	2005	2004
Prairie Provinces			
Light crude oil	**190**	182	194
Medium and heavy crude oil	**138**	132	126
Refined products	**79**	79	83
	407	393	403
United States			
Light crude oil	**276**	198	261
Medium and heavy crude oil	**871**	783	748
Natural gas liquids	**4**	4	4
	1,151	985	1,013
Ontario[1]			
Light crude oil	**302**	338	403
Medium and heavy crude oil	**63**	58	79
Natural gas liquids	**90**	98	103
	455	494	585
	2,013	1,872	2,001
Barrel Miles (billions)	**388**	350	383
Average Haul (miles)	**529**	513	523

1 Enbridge System average deliveries include Line 9 volumes of 141,000 bpd (2005 – 190,000; 2004 – 227,000).

Competitive Conditions

Competition among common carrier pipelines is based primarily upon the cost of transportation, access to supply, batch shipping integrity, interconnectivity with storage and proximity to markets. Kinder Morgan Canada's Trans Mountain and Express Pipeline systems, as well as other common carriers, can be used by producers to ship Western Canadian crude oil to refineries in either Western Canada or the United States. Although the Company does not compete directly in the regions served by these other pipelines, producers can elect to have their crude oil refined at delivery points that are not on the Enbridge System. Competition may also arise from pipeline proposals that provide access to market areas currently served by the Company's liquids pipelines. One such proposal is the Keystone Project put forward by TransCanada Corporation (TransCanada) to ship Western Canadian crude oil into PADD II starting in 2009. The Company believes that its liquids pipelines are currently serving key markets and provide attractive options to producers in the WCSB due to their competitive tolls and flexibility.

Other Liquids Pipelines

Athabasca System

The Athabasca System, which is owned and operated by Enbridge, has a design capacity of 570,000 bpd and extends approximately 630 kilometres (391 miles) from north of Fort McMurray in Northern Alberta, south to the pipeline hub at Hardisty. At Hardisty, it accesses the Enbridge System and other carriers for transportation to Canadian and United States refineries. The Athabasca System also includes the Athabasca Terminal with 1.6 million barrels of receipt tankage, as well as the MacKay River and Christina Lake lateral feeder lines and tankage facilities. Enbridge has a 30-year take-or-pay transportation arrangement with Suncor Energy Inc., the initial shipper on the Athabasca System. The agreement also provides the shipper with options to increase and extend the life of the agreement beyond the initial 30-year term. Enbridge has also contracted to provide transportation services for EnCana Corporation and Petro-Canada Oil and Gas and, starting in early 2007, for ConocoPhillips Surmont Partnership and Total E&P Canada Ltd. (the Surmont Shippers) and Nexen Inc. and OPTI Canada Inc. (the Long Lake Shippers). The Athabasca System is regulated by the AEUB.

NW System

The NW System extends approximately 870 kilometres (540 miles) between Norman Wells, Northwest Territories and Zama, Alberta. The NW System is regulated by the NEB and is subject to a negotiated settlement and throughput agreement with its main shipper.

Spearhead Pipeline

The Spearhead Pipeline, which went into service in March 2006, has a capacity of 125,000 bpd and extends approximately 1,058 kilometres (657 miles) from Chicago to Cushing. The Company has 10-year shipper commitments for 108,000 bpd. The Spearhead Pipeline is regulated by the FERC.

Other United States Liquids Pipelines

Other United States Liquids Pipelines are regulated by the FERC and include a 77.8% interest in the Frontier System, a 65% joint venture interest in the Olympic System, a 30% joint venture interest in the Mustang System, a 22.8% interest in the Chicap System as well as the wholly-owned Toledo System and the Patoka West Tank Farm Facility.

Safety and Environmental Protection

Enbridge has appropriate mechanisms in place to monitor and address the safety and environmental aspects of its operations. Enbridge has health, safety and environmental management systems and has established policies, programs and practices for conducting safe and environmentally sound operations.

Spills of crude oil and petroleum products are not unusual within the liquids pipeline industry and the Company has experienced such spills in the past. A comprehensive methodology for managing environmental aspects of hydrocarbon spills is in place. Historic spills along the pipeline system may have resulted in soil or groundwater contamination where further remediation may be required. Enbridge continues to voluntarily investigate past leak sites to assess whether any remediation of contaminated lands is required in light of current legislation, in consultation with regulatory agencies and landowners.

The environmental protection requirements applicable to the Company's pipeline operations do not adversely affect the pipeline operations' competitive position, capital expenditures program or level of earnings. However, the risk of substantial liabilities is inherent in pipeline operations and there can be no assurance that such liabilities will not be incurred. Regular internal reviews and audits are conducted to assess compliance with legislation and company policy. To the best of the Management's knowledge, its pipeline operations are in material compliance with all applicable safety and environmental regulations governing their operations.

Pipeline Integrity

The focus of Enbridge's integrity management program is to monitor the condition of the pipeline system and apply preventative maintenance programs. In 2006, in-line inspections for corrosion, cracks and pipe deformities such as dents were conducted in various lines throughout the pipeline system. Investigative excavations were conducted to evaluate anomalies detected by the inspections and repairs were conducted as needed. All work plans and implementation procedures meet or exceed regulatory requirements and are regularly reviewed and continuously improved to ensure best technologies are utilized and integrity management processes are optimised.

Employees

Approximately 1,100 individuals are employed in the Liquids Pipelines segment within Enbridge.

GAS PIPELINES

Gas Pipelines consists of investments in Alliance Pipeline US, Vector Pipeline and Enbridge Offshore Pipelines. Enbridge has joint control over these investments with one or more other owners. Enbridge owns a 50% interest in the United States portion of the Alliance System, a 60% interest in Vector Pipeline and interests ranging from 22% to 100% in the pipelines comprising the Enbridge Offshore Pipelines.

Alliance Pipeline

The Alliance Pipeline is a natural gas pipeline extending 3,000 kilometres (1,875 miles) from supply areas in Northwestern Alberta and Northeastern British Columbia to Chicago. The Canadian portion of the Alliance Pipeline is 50% owned by EIF, which is included in the Sponsored Investments business segment.

The Alliance Pipeline has a firm delivery capacity of approximately 1.305 bcf/d of natural gas or 98.5% of the total contracted capacity. Alliance has 20 mmcf/d of natural gas contracted on a short-term basis. Additional transportation capacity of approximately 0.3 bcf/d is available to shippers at no additional cost other than the cost of the associated fuel requirements. The contracts permit Alliance to recover the cost of service, which includes operating and maintenance costs, cost of financing, an allowance for income tax, an annual allowance for depreciation, and an allowed return on equity. Each contract may be renewed upon five years notice for successive one-year terms beyond the original 15-year primary term ending in 2015. The rates and tariff for Alliance Pipeline US are regulated by the FERC.

The Alliance Pipeline connects with two local natural gas distribution systems and five interstate natural gas pipelines in the Chicago area, which provide shippers access to natural gas markets in the Midwestern and Northeastern United States and Eastern Canada. It also interconnects with a pipeline in North Dakota. The Alliance Pipeline connects with Aux Sable, a NGL extraction facility in Channahon, Illinois near the terminus of the Alliance Pipeline.

Vector Pipeline

Enbridge provides operating services to the 560 kilometres (348 miles) Vector Pipeline, which transports natural gas from Chicago to Dawn, Ontario. The primary source of natural gas for Vector Pipeline is through interconnection facilities established with Alliance Pipeline and Northern Border Pipeline. Vector Pipeline has a nominal delivery capacity of 1.0 bcf/d of natural gas and is expandable to 1.5 bcf/d with additional compression stations. Approximately 70% of the long haul capacity of Vector is committed to firm transportation contracts that expire in 2015 at rates negotiated with the shippers and approved by the FERC. The remaining capacity is sold at market rates and various term lengths under firm and interruptible transportation service agreements. Vector Pipeline is currently operating at or near capacity. In 2006, Vector Pipeline received approval from the FERC to construct two additional compressor stations, which would expand Vector Pipeline's nominal capacity to 1.2 bcf/d. The projected in service date for the additional compressor stations is November 1, 2007 and supported by 10 year, binding agreements with various shippers.

Enbridge Offshore Pipelines

Enbridge Offshore Pipelines (EOP) is comprised of 11 natural gas gathering and FERC-regulated transmission pipelines in five major corridors in the Gulf of Mexico, extending to deepwater frontiers. These pipelines include almost 2,400 kilometres (1,500 miles) of underwater pipe and onshore facilities and transport more than half of all current deepwater Gulf of Mexico natural gas production. Approximately 2.0 bcf/d is transported currently on these pipelines.

The primary shippers on the EOP systems are producers who execute life-of-lease commitments in connection with transmission and gathering service contracts. In exchange, EOP provides firm capacity for the contract term at an agreed upon rate. The throughput volume generally reflects the lease's maximum sustainable production.

The transportation contracts allow the shippers to define a maximum daily quantity (MDQ), which corresponds with the expected production life. The contracts typically have minimum throughput volumes which are subject to take-or-pay criteria but also provide the shippers with flexibility given advance notice criteria to modify the projected MDQ schedule to match current deliverability expectations.

The long-term transport rates established in the gathering and transmission service agreements are generally market-based but are established utilizing a cost-of-service methodology, which includes operating cost, projected revenue generation directly tied to production deliverability and the appropriate cost of capital.

All natural gas pipelines are subject to federal, state or local laws and regulations related to environmental protection and operational safety. To the best of the Company's knowledge, the operations of all affiliated systems are in material compliance with applicable environmental and safety regulations.

Employees

Approximately 73 individuals are directly employed by Enbridge to provide operating service to EOP. The Alliance Pipeline is operated and administered entirely by employees of Alliance Pipeline. The Vector Pipeline is operated and administered in part by employees of Vector Pipelines, and in part through operating and administrative services provided by Enbridge.

SPONSORED INVESTMENTS

Sponsored Investments includes the Company's interests in EEP and EIF. Enbridge manages the day-to-day operations of, and develops and assesses opportunities for each, including both organic growth and acquisition opportunities.

Enbridge Energy Partners

Enbridge has a combined 16.6% ownership in EEP, through a 2.0% interest in general partner units, a 5.0% interest in Class B units, a 6.9% interest in Class C units, and a 2.7% interest in EEP via a 17.2% investment in EEM, which owns 100% of EEP's i-units.

EEP owns and operates crude oil and liquid petroleum transmission pipeline systems, natural gas gathering and related facilities and marketing assets in the United States. Significant assets include the Lakehead System, which is the extension of the Enbridge System in the United States, natural gas gathering and processing assets in Texas, the mid-continent crude oil system, various interstate and intrastate natural gas pipelines and a crude oil feeder pipeline in North Dakota.

EEP makes quarterly cash distributions of all of its available cash to the holders of its common units, including Enbridge. Under the Partnership Agreement, Enbridge receives incremental incentive cash distributions, which represent incentive income, on the portion of cash distributions, on a per unit basis, that exceed certain target thresholds.

Enbridge Income Fund

EIF's primary assets include a 50% interest in Alliance Pipeline Canada, and a 100% interest in the Enbridge Saskatchewan System. A subsidiary of Enbridge acts as EIF's manager. Enbridge holds a 41.9% interest in EIF in the form of subordinated units of EIF and 100% of the non-voting, preferred units of Enbridge Commercial Trust, a direct subsidiary of EIF.

Alliance Pipeline Canada consists of approximately 1,560 kilometres (970 miles) high-pressure, natural gas transmission system and an approximately 700 kilometres (435 miles) lateral pipeline system. The Saskatchewan System's primary business activity is the transportation of crude oil and other liquid hydrocarbons by pipeline through the ownership and operation of the Saskatchewan, Westspur and Weyburn pipeline systems located primarily in Saskatchewan and the Virden pipeline system located in Manitoba.

EIF also owns interests in three wind power generation projects purchased from Enbridge in October, 2006 and a business that develops waste-heat power generation projects at Alliance Pipeline Canada compressor stations.

Tax Fairness Plan

On October 31, 2006, the Canadian Government announced a "Tax Fairness Plan" that would, among other things, create a new tax regime for publicly traded income trusts including EIF. Under the proposed rules, the taxable portion of an income trust's distributions would be subject to taxation in a manner similar to the treatment of taxable income within a corporation. For existing income trusts, the new rules would not become applicable until 2011 provided they limit their expansion to "normal growth" prior to that year. On December 15, 2006 the Government issued guidelines with respect to what it would consider "normal growth" for existing income trusts that wish to ensure that they do not become subject to the proposed tax rules until 2011. Under

these guidelines, the amount of equity units that an income trust can issue to finance growth up to 2011 may not exceed the value of its publicly traded equity units on October 31, 2007 (subject to annual limits).

On December 21, 2006, the Government released draft legislation for comment. Considerable uncertainty still exists as the draft legislation does not fully address all aspects of the tax regime introduced in the Tax Fairness Plan (including the "normal growth" guidelines). Further, the proposed legislation is now subject to review by a Parliamentary committee through an expedited public hearing process. Timing for enactment of the legislation by Parliament remains uncertain.

If enacted in their present form, the proposed tax changes would, all other things being equal, likely result in a reduction of cash available for distribution by EIF commencing in 2011.

Employees

Enbridge employs approximately 1,624 individuals who provide services to Sponsored Investments.

Each of EEP and EEM has filed an Annual Report on Form 10-K for the year ended December 31, 2006 with the Securities and Exchange Commission in the United States. These documents contain detailed disclosure with respect to each entity and are publicly available from the Securities and Exchange Commission and through www.sec.gov/edgar.shtml. No part of the Form 10-K filed by EEP or by EEM is intended to be incorporated by reference in this Annual Information Form.

EIF has filed an Annual Report and a renewal Annual Information Form (AIF) for the year ended December 31, 2006 with Canadian Securities Administrators in Canada. The AIF and the Annual Report, which includes consolidated financial statements and Management's Discussion and Analysis, contain detailed disclosure with respect to the Enbridge Income Fund and are publicly available through www.sedar.com. No part of EIF's Annual Report, consolidated financial statements, Management's Discussion and Analysis or AIF is intended to be incorporated by reference in this Annual Information Form.

GAS DISTRIBUTION AND SERVICES

The primary component of Gas Distribution and Services is the gas distribution operations of Enbridge Gas Distribution (EGD). This segment also includes Noverco, CustomerWorks, the gas services business, which manages the Company's merchant capacity commitments on Alliance and Vector, and the Company's investment in Aux Sable.

Enbridge Gas Distribution

There are four principal interrelated aspects of the natural gas distribution business in which the EGD is directly involved: Distribution Service, Gas Supply, Transportation and Storage.

Distribution Service

EGD's principal source of revenue is from distribution of natural gas to customers. The services provided to residential and small commercial and industrial heating customers are primarily on a general service basis (without a specific fixed term or fixed price contract). The services provided to larger commercial and industrial customers are usually on an annual contract basis under firm or interruptible service contracts. Under a "firm" contract, EGD is obligated to deliver natural gas to the customer up to a maximum daily volume. The service provided under an "interruptible" contract is similar to that of a firm contract, except that it allows for service interruption at EGD's option to meet seasonal or peak demands. The Ontario Energy Board (OEB) approves rates for both contract and general services.

Customers have a choice with respect to gas supply. One choice is a sales service option, whereby the customer purchases gas from EGD's supply portfolio (system supply). EGD does not earn income on the gas commodity it provides to customers. Alternatively, a gas user may select a direct purchase option, which is a transportation service arrangement. Under the transportation service arrangement, a customer supplies natural gas at a TransCanada receipt point in Western Canada or at a TransCanada delivery point in Ontario, and EGD redelivers an equivalent amount of gas to the customer's end-use location. This arrangement is billed under the OEB approved rate schedules.

Gas Supply

To acquire the necessary volume of gas to service its customers, EGD maintains a diversified gas supply portfolio. During the year ended December 31, 2006, EGD acquired approximately 156.9 bcf (2005 – 183.3 bcf; 2006 – 4.4 billion cubic metres, 2005 – 5.0 billion cubic metres) of natural gas, of which 23.8% (2005 – 29.4%) was acquired from Western Canadian producers, 53.8% (2005 – 44.1%) was acquired from suppliers in Chicago and 22.4% (2005 – 26.5%) was acquired on a delivered basis in Ontario. EGD also transported 258 bcf (2005 – 265 bcf; 2006 – 7.3 billion cubic metres, 2005 – 7.5 billion cubic metres) of natural gas on behalf of direct purchase customers operating under a transportation service arrangement.

EGD's system supply gas contracts have pricing structures responsive to supply and demand conditions in the North American natural gas market. The prices in these contracts are indexed to either Alberta, Chicago or New York based prices. EGD uses natural gas financial derivatives such as price swaps, calls and collars to manage the customers' exposure to natural gas price volatility.

Transportation

EGD relies primarily upon TransCanada for transportation service to bring its diversified gas supply from Western Canada to its franchise area. EGD has long term firm transportation service contracts with TransCanada, over varying time periods, for annual deliveries of approximately 271.9 bcf (7.7 billion cubic metres) of natural gas. This includes deliveries by direct purchase customers via TransCanada capacity that has been assigned by EGD to the direct purchase customer or capacity that has been contracted directly with TransCanada by the direct purchase customer.

The transportation service contracts are not directly linked with any particular source of gas supply. Separating transportation contracts from gas supply allows EGD flexibility in obtaining its own gas supply and accommodating the transportation of gas purchased directly by end-use customers. EGD continues to forecast the gas supply needs of all its customers including the associated transportation and storage requirements.

TransCanada's transportation tolls, which are approved by the NEB, consist of a demand component (to recover fixed costs) and a commodity component (to recover variable costs) for Firm Transportation (FT) service. A FT shipper (such as EGD) must pay the demand component regardless of the volume of gas that TransCanada actually transports for the FT shipper. Consequently, if an FT shipper does not utilize all of its FT capacity rights, the FT shipper would incur unabsorbed demand charges in respect of the unutilized portion.

EGD also has contracts for firm transportation service on the pipelines of Alliance Pipeline Canada, Alliance Pipeline U.S. and Vector Pipeline. The Alliance network of pipelines extends over 3,000 kilometres and runs from Northeastern British Columbia to the Chicago area hub, where it interconnects with the North American pipeline grid. Vector is a 550 kilometre pipeline that connects the hub facilities at the Chicago area to Dawn, Ontario. Enbridge has joint venture interests in all of these pipeline facilities.

EGD relies on its long-term contracts with Union Gas Limited (Union) for transportation of gas from Dawn to EGD's major market in the Greater Toronto Area. The contracts effectively provide EGD with access to United States sourced gas at Dawn by the Vector Pipeline. The contracts also provide transportation for gas stored at the EGD's and Union's storage pools in the Sarnia area to the market area.

EGD is also a participant in the Link Project, which involved the construction of connecting pipelines in Southwestern Ontario by Niagara Gas Transmission Limited (Niagara Gas), a wholly-owned subsidiary of Enbridge Energy Distribution Inc., and in Southwestern Michigan by ANR Pipeline Company (ANR). These pipelines link ANR's Southeast and Southwest mainlines, which access major United States supply basins, and MichCon's transportation system, which accesses Michigan supplies, directly to the EGD's principal storage facilities near Dawn (see "Storage" below) and indirectly to Union's transmission system at Dawn. EGD has entered into long-term contracts for transportation service with ANR and MichCon and a one year contract for transportation service with Niagara Gas.

Storage

The business of EGD is highly seasonal as daily market demand for gas fluctuates with changes in weather, with peak consumption occurring in the winter months. Utilization of storage facilities permits EGD to take delivery of gas on favourable terms during off-peak summer periods for subsequent use during the winter heating season. This practice permits EGD to minimize the annual cost of transportation of gas from Western Canada, assists in reducing its overall cost of gas supply and adds a measure of security in the event of short-term interruption of transportation of gas from Western Canada to EGD's franchise area.

EGD's principal storage facilities are located near Dawn, and have a total working capacity of approximately 95.3 bcf (2.7 billion cubic metres.) Approximately 88.2 bcf (2.5 billion cubic metres) of the total working capacity are available to EGD. Further, EGD has storage contracts with Union for 19.9 bcf (0.564 billion cubic metres) of storage capacity, with terms varying from two to four years.

EGD operated storage facilities are connected to the Dawn storage and transmission hub by two 30-inch pipelines owned by EGD. In the summer, gas is delivered to Dawn for injection into storage through the transmission facilities of TransCanada and Vector pipelines. In the winter, gas is withdrawn from storage and delivered to Dawn and transported from there to EGD's major market area of Toronto through the transmission facilities of Union. EGD has transportation contracts with TransCanada, Vector and Union for the delivery of gas to and from storage.

Pursuant to a Notice of Proceeding issued by the OEB on December 29, 2005 the OEB indicated its intention to examine two issues involving gas storage under the Natural Gas Electricity Interface Review (NGEIR). The first issue related to rates for gas-fired electricity generators (and other qualified customers). The second issue involved storage regulation in Ontario and, more specifically, whether the OEB should refrain, in whole or in part, from exercising its power to regulate the rates charged for the storage of gas in Ontario. Both of these issues were identified in a 2005 report of the OEB entitled "Natural Gas Regulation in Ontario: A Renewed Policy Framework".

On November 7, 2006, the OEB issued its Decision with Reasons in the NGEIR proceeding. In its decision, the OEB recognized that the gas storage market in Ontario is subject to competition sufficient to protect the public interest, and the OEB will not regulate new storage prices or storage prices outside the franchise area. As such, new storage services developed by EGD will be subject to competitive market conditions and priced accordingly.

On November 28, 2006, EGD announced that it is conducting a binding open season for high deliverability natural gas storage service at its existing facility near Dawn. The binding open season is for services totalling a daily maximum of 2,124,600 gigajoules (GJ), or approximately 2 bcf, of storage capacity, including 10 or 20-day storage service with firm year-round withdrawal and injection levels. The service is expected to be in place between April 2008 and April 2009, depending on customer needs. If EGD determines, through this open season, that sufficient demand exists for its storage services, and can be contracted on terms acceptable to EGD, it will proceed with the necessary investment to meet this market need.

HISTORICAL OPERATING STATISTICS

The following tables present certain statistics relating to the past three years of operations of Enbridge Gas Distribution:

	Year ended December 31, 2006	Year ended December 31, 2005	15 months ended December 31, 2004
Gas supply and sendout (mmcf)			
Natural gas purchased	156,850	183,333	214,853
Gas into storage	(75,224)	(105,097)	(104,435)
Gas out of storage	74,602	96,381	126,699
Total gas sendout	156,228	174,617	237,117
Transportation of gas	250,445	264,034	337,775
	406,673	438,651	574,892
Gas sales to customers (mmcf)	159,503	174,515	223,343
Transportation of gas	248,389	264,182	352,047
Total sales	407,892	438,652	575,390
Used by EGD	141	170	265
Other volumetric variations	(1,360)	(215)	(763)
	406,673	438,652	574,892
Average daily sendout (mmcf)	1,109	1,194	1,264
Average use per residential customer (mcf)	93	104	126
Degree day deficiency [1]			
Actual	3,355	3,750	5,052
Forecast based on normal weather	3,745	3,747	4,849
Number of active customers – year end [2]	1,819,765	1,774,067	1,726,856
Number of employees – end of period	1,914	1,765	1,633

	Year ended December 31, 2006	Year ended December 31, 2005	15 months ended December 31, 2004
Number of active customers – end of period			
Residential	1,007,058	1,047,350	976,384
Commercial	92,053	93,686	85,338
Industrial	3,549	3,763	3,441
Wholesale	1	1	1
Transportation	717,104	629,267	661,692
Total active customers [2]	1,819,765	1,774,067	1,726,856
New customer additions [3]	47,622	50,697	74,307

Notes:

1 Degree day deficiency is a measure of coldness which is indicative of volumetric requirements of natural gas utilized for heating purposes in EGD's franchise area. It is calculated by accumulating, for the fiscal period, the total number of degrees each day by which the daily mean temperature falls below 18 degrees Celsius. The figures given are those accumulated in the Greater Toronto Area.

2 Active customers relate to the count of gas-consuming customers at the end of the period. The number of active customers includes gas sales and transportation service customers. As the commodity cost of gas is flowed through to gas sales customers with no mark up, the composition of customers between gas sales and transportation service has no material impact on EGD's earnings.

3 New customer additions relate to new service lines installed during the period.

Regulation

In March 2005, the OEB released its renewed policy framework with respect to natural gas regulation in Ontario, the subject matter of an OEB proceeding known as the Natural Gas Forum. The OEB expressed its belief that a multi-year incentive regulation (IR) plan will meet its objectives. IR is a method of government regulation of monopoly firms, with an objective of achieving socially desired outcomes through the provision of incentives.

Fiscal 2007 Rate Application

The EGD's 2007 rate application was filed with the OEB in August 2006 and consisted of a traditional cost of service application. In January 2007, the Company arrived at an agreement to settle certain major issues in its rate application with key stakeholders. This settlement was approved by the OEB on January 29, 2007 and will allow the Company to continue operating within its current environment. A final decision on the remaining issues of the 2007 rate application is expected during the second quarter of 2007. The key elements of the application are summarized below:

Regulatory year ended	Requested for December 31, 2007	Approved for December 31, 2006	Approved for September 30, 2005
Rate base (millions)	$ 3,801.3	$ 3,633.6	$ 3,422.1
Rate of return on rate base	7.76%	7.74%	8.10%
Deemed common equity for regulatory purposes	38.00%	35.00%	35.00%
Rate of return on common equity	8.39%	8.74%	9.57%

As part of its 2007 rate application, the EGD has requested an increase in the equity component of its deemed capital structure. The requested 38% equity level reflects changes in EGD's current business risk environment and financial risk position relative to the current approved deemed equity level of 35%. The rate of return on common equity is calculated with reference to a formula approved by the OEB that incorporates the long bond yield forecast. The rate of return of 8.74% used in the 2007 rate application was a placeholder, and reflected the OEB approved return embedded within 2006 rates. The allowed rate of return on common equity for 2007, calculated in accordance with the OEB's formula, is 8.39%. This rate of return on common equity will replace the placeholder used by EGD in its 2007 rate application and will be embedded in 2007 rates.

Incentive Regulation

Improving the regulatory environment is also a key strategic thrust to provide greater operational and organizational flexibility. EGD will remain in a cost of service environment in 2007 but a change to Incentive Regulation (IR), is expected in 2008, with 2007 as the base year for a potential four to five year plan. Consultation with the OEB has commenced with respect to potential implementation of IR methodology for setting rates for services provided by EGD, which differs from the existing cost of service methodology. The potential impact on the future operating environment of EGD is not currently known, however EGD expects to obtain details on a proposed IR plan in the fourth quarter of 2007.

The following are the key anticipated parameters of IR:

- Inclusion of an appropriate annual adjustment mechanism to give effect to cost changes and productivity improvements, to ensure that benefits of efficiencies are shared with customers during the term of the plan;
- Mandatory cost of service rebasing at the end of each IR plan term and before a new plan is put in place to ensure that efficiency improvements will be identified and the benefits are passed onto customers through base rates for the following IR plan period;

- Earnings sharing mechanisms will not form part of IR plans, in order to provide a strong incentive to achieve sustainable efficiencies that can be shared with customers through the annual adjustment mechanism and rebasing; and
- IR term plans are expected to run between four and five years.

The objectives of IR are as follows:

- Reduce regulatory costs with less frequent hearings (maximum every 3 to 5 years) rather than every year under the current cost of service mechanism;
- Provide incentives for improved efficiency;
- Provide more flexibility for utility management; and
- Provide more stable rates.

2006 Rates

On February 9, 2006, the OEB released its decision relating to EGD's 2006 rate application. See the above table for the details of the decision.

Competitive Conditions

Natural gas is the predominant fuel of choice in the residential heating market throughout EGD's franchise area. The primary competition for natural gas remains domestic fuel oil and electricity. Natural gas has continued to provide both environmental and price advantages, and this is expected to continue. During 2006, natural gas in the residential market experienced, on average, a price advantage on an equivalent annual volume basis of 38% (2005 – 40%) against electricity and 30% (2005 – 32%) against domestic fuel oil.

The Ontario franchise area remains one of the most rapidly growing regions in North America. While customer growth results in increased distribution volumes, this increase is limited by the partially offsetting impact of lower average annual consumption, resulting from increased adoption of energy efficient technology and more energy efficient building construction. In addition, conservation efforts by customers to partially mitigate the impact of higher natural gas commodity prices further contribute to the decline in annual average consumption.

Energy Efficiency and Demand Side Management (DSM)

EGD is pursuing relationships to increase the penetration of natural gas products and to encourage fuel switching from electricity to natural gas. EGD continues to develop and introduce new end-use technologies that add volume and offer energy efficient alternatives to customers. EGD's DSM initiatives cover a broad range of end-uses, from traditional water heating and space heating to fuel-cell power generation, commercial cooking and industrial processes.

In 2006, EGD successfully negotiated an update to the regulatory arrangements relating to DSM. The new DSM provides an accelerated financial incentive from the first unit of net savings. The financial incentive is in addition to the cost recovery and lost revenue adjustment mechanisms that were already in place to offset the costs of supporting DSM.

Environment and Safety

The impact of energy use on the environment is a significant concern with attention being focused on the environmental impacts associated with the production, transmission, delivery of energy, and air emissions, including greenhouse gases (GHG's). The use of fossil fuels results in air emissions including carbon dioxide, sulphur dioxide, nitrogen oxides, total suspended particulates, and to a lesser extent, carbon monoxide and methane. However, the levels of these emissions are not the same for all fossil fuel types. Natural gas has the lowest emissions profile of any of the fossil fuels, emitting less carbon dioxide than conventional coal-fired generation and no sulfur dioxides. For these reasons, natural gas offers a substantial comparative environmental benefit for energy delivery.

Methane, the principal component of natural gas, is a GHG and is understood to contribute to global warming. Although small atmospheric releases of methane during the production, processing, transmission and

distribution of natural gas are inevitable, methane emissions from the natural gas industry in Canada, relative to natural sources such as wetlands, are low.

EGD performs on-going leak detection studies to identify potential sources of methane emissions and the specific measures to reduce these emissions. Further, EGD is participating in the Canadian Energy Partnership for Environmental Innovation study to identify where the largest emission sources occur in the system. EGD has also been recognized by Canada's GHG Challenge Registry (formerly the Climate Change Voluntary Challenge and Registry Program) for its leadership and quality reporting.

Between 1995 and the end of 2006 EGD was successful in helping its customers reduce their natural gas consumption by 102.4 bcf (2.9 billion cubic metres) through participation in its DSM programs. This translates into the avoidance of 5.5 million tonnes of GHG emissions being released into the atmosphere. Each of these measures moves EGD closer to the realization of its emission reduction targets, despite the pressures of significant growth in EGD's customer base. EGD's emission reductions are documented in the GHG Challenge Registry reports.

Programs have been implemented to ensure adherence to Enbridge Inc.'s Environment, Health and Safety policy. These include environmental training for specific employee groups, implementation of environmentally sound construction practices, production of environmental communication materials to increase awareness of key issues, on-site environmental auditing, and a continuing focus on corporate due diligence. None of the environmental protection requirements applicable to EGD are expected to significantly adversely affect EGD's competitive position, capital expenditure program or level of earnings.

Employees

EGD has 1,914 employees, 38% of whom are unionized. All of EGD's unionized employees are represented by the Communications, Energy and Paperworkers Union, Local 975. The current collective agreement expires in December 2008.

EGD has filed an Annual Information Form, Financial Statements, and Management's Discussion and Analysis with Canadian Securities Regulatory Authorities. These documents contain detailed disclosure about EGD and are publicly available through www.sedar.com. No part of EGD's AIF, Financial Statements or Management's Discussion and Analysis is incorporated by reference in this AIF.

Other Gas Distribution and Services Businesses

Gazifère is a gas distribution utility located in Southwestern Quebec. Niagara Gas provides transmission services to EGD, Gazifère, St. Lawrence and MichCon (an unrelated company). Enbridge Gas Services manages the Company's merchant capacity commitments on the Alliance and Vector pipelines.

Enbridge has a 70% joint venture interest in CustomerWorks, which provides service covering the entire meter-to-cash process, including information technology, fleet services, call management centre, customer care and billing. CustomerWorks provides services to more than 2.4 million customers including customers of Terasen and EGD. In August 2002, CustomerWorks outsourced the provision of its customer care services to a new entity owned and operated by Accenture Inc.

Enbridge owns an equity interest in Noverco through ownership of common shares and a cost investment through ownership of preferred shares. Noverco is a holding company that owns a 75% interest in Gaz Metro L.P., a gas distribution company operating in the province of Quebec and the state of Vermont. Gaz Metro L.P. has a 50% interest in TQM Pipeline, which transports natural gas in Quebec.

The Company owns 70% of and operates EGNB, the natural gas distribution franchise in the province of New Brunswick. EGNB constructed a new distribution system and has approximately 5,600 customers. Approximately 565 kilometres (351 miles) of distribution main has been installed with the capability of attaching 27,000 customers. EGNB is regulated by the New Brunswick Board of Commissioners of Public Utilities.

Enbridge also holds a 42.7% interest in the Aux Sable natural gas liquids extraction and fractionation facility at its facilities near Chicago. This facility processes up to 1.6 bcf of natural gas per day delivered through

the Alliance Pipeline and recovers ethane, propane, butane and pentane. In 2006, Aux Sable entered into an agreement with BP Products North America Inc. to sell all of its NGL production to BP. Aux Sable receives a fixed annual fee and a share of any net margin generated from the business in excess of specified thresholds. In addition, BP reimburses Aux Sable for all operating, maintenance and certain capital costs. BP supplies, at its cost, all make-up gas and fuel supply gas to the Aux Sable facilities and assumes responsibility for capacity on the Alliance Pipeline held by an Aux Sable affiliate, at market rates. The agreement is for an initial term of 20 years, commencing December 31, 2005 and may be extended by mutual agreement for 10 year terms. If cumulative losses exceed a certain limit, BP will have the option to terminate the agreement, however Aux Sable has the right to reduce such losses to avoid termination.

Tidal Energy provides commodity marketing services for the Company and its customers in a full range of crude oil types including light sweet, light and medium sours and several heavy grades and natural gas liquids. Tidal Energy transacts at many of the major North American market hubs and provides its customers with a variety of programs including flexible pricing arrangements, hedging programs, product exchanges, physical storage programs and total supply management, through the analysis and implementation of different transportation options, reduced quality differentials and tariff structures, and utilizing Risk Management Pricing options. Tidal Energy's business involves buying, selling and storing large quantities of crude oil and gas at low margins. Tidal Energy's business includes the purchase and sale of crude oil and in the course these activities, physical receipt or delivery shortfalls can create modest commodity exposures. Any open positions created from this physical business are tightly monitored by, and must comply with, the Company's formal risk management policies.

Employees

Enbridge employs approximately 264 individuals in its Other Gas Distribution and Services businesses.

INTERNATIONAL

The Company's International business invests in energy transportation and related energy projects outside of Canada and the United States. The Company has a 25% interest in a Spanish pipeline company, Compañía Logística de Hidrocarburos CLH, S.A. (CLH), a 24.7% investment in the Colombian crude oil pipeline, Oleoducto Central S.A. (OCENSA), and a 100% interest in CIT Colombiana S.A. (CITCol), which provides technical and management services in connection with the operation of the OCENSA pipeline. The Company also has a 100% interest in Enbridge Technology Inc., which provides advisory, consulting and training services related to proprietary pipeline operating technologies.

CLH

The primary activity of CLH is the storage and shipment of refined products through a comprehensive distribution network located throughout Spain. Earnings are based on a fee for service tariff, adjusted annually for inflation, and are dependent on throughput volumes and storage levels.

CLH is the primary basic logistics distribution network for refined products in Spain and provides services on an open access non-discriminatory basis. The system consists of over 3,400 (2,100 miles) kilometres of pipelines and 38 storage facilities located throughout the country. CLH's pipeline facilities are connected to the country's eight crude oil refineries and to major coastal port locations where crude oil and refined products are imported. CLH receives refined products from customers at the refineries or ports and transports them, mainly by pipeline, to its storage facilities located throughout the Spanish mainland and the Balearic Islands. The network of pipelines and storage facilities are the primary means by which the Spanish refiners and other market players supply their commercial and retail customers. CLH customers' product destinations are located, on average, less than 60 kilometres via highway from a CLH terminal. CLH provides product distribution to locations not connected to the pipeline system through its own fleet of tanker trucks and chartered tanker ships.

Based on the extensive network of pipelines and storage facilities, and its tariff structure, CLH has a dominant market position in Spain, with a total market share in 2006 of 82% for gasoline and diesel, and transports 100% of aviation fuel. Most of the competition comes from storage services provided by other companies. CLH has approximately 70% of the total refined products storage capacity in Spain (excluding refineries). CLH also offers secondary distribution services, the most significant being the services provided through CLH

Aviation, which handles aviation fuel at airport locations throughout Spain. This business includes the storage of aviation fuel, loading of aircraft refuelling units and the refuelling of aircraft. New policies issued by the Spanish airport authority (AENA) to promote competition allow for new non-CLH operators to enter the aircraft-refueling segment of this business. While CLH's share of this segment of the market may reduce over time, the aviation fuel business will continue.

Earnings from CLH are directly impacted by the demand for refined products. Economic growth in Spain over the last decade has been one of the highest in the European Union, which has led to increasing demand for energy, including refined products. The central region of the country, in and around Madrid, has seen the largest growth in demand. CLH is in the process of expanding its system over the next several years in order to meet the continued growth expected in this region. This expansion, which includes an increase in storage capacity and looping of both the northern and southern main lines, will be constructed in stages to match the expected growth in volumes.

OCENSA

The OCENSA pipeline consists of 829 kilometres (515 miles) of 30-inch and 36-inch pipeline, pumping units, tankage and marine loading facilities, with a capacity to transport 550,000 bpd of crude oil. The pipeline links the Cuisiana and Cupiagua oilfields in the central interior of Colombia to the Port of Coveñas on the Caribbean coast. The Company earns a fixed rate of return on the OCENSA pipeline investment, as well as operating fees, through its 100% interest in CITCol.

Environmental Protection

The international operations of Enbridge are subject to applicable laws and regulations relating to environmental protection and operational safety. To the best of the Company's knowledge, all international operations are in material compliance with applicable environmental and safety regulations. Risks of significant costs and liabilities, however, are inherent in the nature of the operations, and there can be no assurances that such costs and liabilities will not be incurred.

Employees

Enbridge International operations directly employ 20 employees.

CORPORATE

Corporate activities are limited to business development activities not attributable to a specific business segment, corporate financing costs and various support personnel costs. In addition, business activities in the development stage or those that may represent an emerging technology may be included in Corporate. These activities are seen as potential growth areas that may have a strategic fit with existing operations or present the opportunity to enhance activity levels in existing operating segments. Approximately 198 individuals are employed by Enbridge in the Corporate segment.

CORPORATE SOCIAL RESPONSIBILITY

Enbridge defines Corporate Social Responsibility (CSR) as conducting business in a socially responsible and ethical way, protecting the environment and health and safety of people, supporting human rights and engaging, respecting and supporting the communities and cultures with which the Company works.

A comprehensive system of stewardship and accountability is in place and functioning among Directors, management and employees. Examples include compliance with Sarbanes-Oxley requirements and the Canadian equivalent rules, internal and external audits of operations throughout the Company, employee compliance with Enbridge's Statement of Business Conduct and a majority of independent Directors on the Company's Board as well as plain and open communication with stakeholders.

Environmental initiatives include pursuing alternative and renewable energy technologies such as wind power, preventing pipeline leaks by conducting on-going inspection and maintenance programs as part of

the comprehensive integrity management of pipelines and facilities, and the development of a strategy to reduce greenhouse gas emissions. This strategy involves initiatives such as improving the energy efficiency of pipelines, encouraging the efficient use of natural gas by customers and replacing older cast iron pipe with new polyethylene mains at EGD. Enbridge engages employees on health and safety issues through training, communication programs and the establishment of local and regional environmental, health and safety committees.

Stakeholder relations involve developing positive relationships with government agencies, environmental groups, landowners, business partners and local communities. Initiatives include early-stage project consultation with a variety of stakeholders on organic growth projects and public awareness programs on pipeline safety.

Enbridge supports universal human rights and reinforces this with comprehensive policies and practices addressing human rights. For example, Enbridge was one of the first Canadian companies to adopt the Voluntary Principles on Security and Human Rights, which stress the importance of promoting and protecting human rights throughout the world and the constructive role business can play in advancing these goals.

Enbridge makes voluntary contributions to charitable organizations in the areas of: education, health, environment, social services, arts and culture, civic leadership and volunteer resources in order to contribute to the economic and social development of communities where Enbridge employees live and work.

While Enbridge is focused on generating long-term value for investors, Corporate Social Responsibility defines the Company's commitment to achieving and sustaining that objective in a socially and environmentally responsible way.

RISK FACTORS

A discussion of the Company's risk factors is contained in the following subsections of the Management's Discussion and Analysis for the year ended December 31, 2006, which are incorporated herein by reference (the page references below are to the Company's 2006 Management's Discussion and Analysis filed on SEDAR at www.sedar.com):

Liquids Pipelines – Business Risks (page 18);
Gas Pipelines – Business Risks (pages 20-21);
Sponsored Investments – Business Risks (pages 26-27; 29);
Gas Distribution and Services – Business Risks (pages 34-35);
International – Business Risks (page 41);
Overall Risk Management (pages 45-48).

DIVIDENDS

DIVIDENDS PAID

(Canadian dollars per share)	**2006**	2005	2004
Preferred Shares, Series A	**1.375**	1.375	1.375
Common Shares	**1.150**	1.038	0.915

Dividends on common shares are paid quarterly as determined by the Company's Board of Directors. The Company is targeting to pay out approximately 60% to 70% of earnings as dividends, balancing its future capital reinvestment requirements and investors' preferences for income. Dividends on the preferred shares, Series A, are fixed and are paid quarterly.

There are no restrictions that currently prevent the Company from paying dividends. However, in the event of liquidation, dissolution or winding-up of the Company, the preferred shareholders have priority in the payment of dividends over the common shareholders. As well, should the Company fail to make payments

on certain financial obligations, the Company could be precluded from paying dividends on its common and preferred shares.

DESCRIPTION OF CAPITAL STRUCTURE

GENERAL DESCRIPTION OF CAPITAL STRUCTURE

At December 31, 2006, the Company's capital structure consists of 351.8 million common shares with a book value of $2,416.1 million and 5.0 million preferred shares, Series A with a book value of $125.0 million.

Common Shares

The authorized share capital of the Company consists of an unlimited number of common shares with no par value and an unlimited number of preferred shares. Each common shareholder is entitled to one vote for each share held at all such meetings of shareholders.

Under the dividend reinvestment and share purchase plan, registered shareholders may reinvest their dividends in additional common shares of the Company or make optional cash payments to purchase additional common shares, in either case, free of brokerage or other charges.

The Company has a Shareholder Rights Plan that is designed to encourage the fair treatment of shareholders in connection with any take-over offer for the Company. Rights issued under the plan become exercisable when a person, and any related parties, acquires or announces the intention to acquire 20% or more of the Company's outstanding common shares without complying with certain provisions set out in the plan or without approval of the Board of Directors. Should such an event occur, each rights holder, other than the acquiring person and related parties, will have the right to purchase common shares of the Company at a 50% discount to the market price at that time.

Preferred Shares

The 5,000,000 5.5% Cumulative Redeemable Preferred Shares, Series A are entitled to fixed, cumulative, quarterly preferential dividends of $1.375 per share per year. Subsequent to December 31, 2006, the Company may, at its option, redeem all or a portion of the outstanding preferred shares for $25.25, if redeemed on or prior to December 1, 2007; $25.00, if redeemed thereafter, in each case all accrued and unpaid dividends will be paid on redemption.

RATINGS

The following table sets forth the ratings assigned to the Company's Preference Shares, Series A, Preferred Securities, Commercial Paper and Unsecured Debt by Dominion Bond Rating Service Limited (DBRS), Standard & Poor's Ratings Services (S&P) and Moody's Investor Services, Inc. (Moody's):

	DBRS	S&P	Moody's
Preferred Shares, Series A	Pfd-2 (low)[1]	BBB[3]	Baa2[5]
Preferred Securities	Pfd-2y[1]	BBB[3]	Baa1[5]
Unsecured Debt	A[2]	A-[4]	A3[5]
Commercial Paper	R-1 (low)[2]	A-1 (low)[4]	Not Rated
Rating Outlook	Stable	Stable	Under Review[6]

Notes:

1. DBRS' rating of preferred securities and preferred shares is on a rating scale that ranges from a high of 'Pfd-1' to a low of 'D'. The 'y' modifier is used to indicate a hybrid security. Each rating category is denoted by the subcategories "high" and "low". The absence of either a "high" or "low" designation indicates the rating is in the middle of the category.
2. DBRS rates debt instruments by rating categories from a high of 'AAA' to a low of 'D'. Each rating category, other than AAA, is denoted by the subcategories "high" and "low". The absence of either a "high" or "low" designation indicates the rating is in the middle of the category. DBRS' rating of commercial paper is on a rating scale that ranges from a high of 'R-1' to a low of 'R-3'. DBRS applies modifiers 'high', 'middle', and 'low' to designate relative standing within a particular rating category.
3. S&P rates preferred shares and preferred securities using a long-term debt rating scale that ranges from a high of 'AAA' to a low of 'D'.

4. S&P rates debt instruments by rating categories from a high of 'AAA' to a low of 'D'. The ratings from 'AA' to 'CCC' may be modified by the addition of a 'plus' or 'minus' to show relative standing in the major rating categories. S&P's rating of commercial paper is on a rating scale that ranges from a high of 'A-1' to a low of 'D'.
5. Moody's rates securities, shares and debt instruments by rating categories from a high of 'Aaa' to a low of 'C'. Moody's applies modifiers 1, 2 and 3, which indicate where the obligation ranks in its generic rating category. Modifier 1 is higher end, modifier 2 is mid-range and modifier 3 is low end ranking of the generic rating category.
6. Moody's placed Enbridge's credit ratings under review for possible downgrade on December 13, 2006.

The credit ratings accorded by these rating agencies are not recommendations to purchase, hold or sell the shares or securities and such ratings do not comment as to market price or suitability for a particular investor. There is no assurance that any rating will remain in effect for any given period of time or that any rating will not be revised or withdrawn entirely by a rating agency in the future if, in its judgment, circumstances so warrant.

MARKET FOR SECURITIES

The common shares of the Company are traded on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the United States under the symbol ENB. The Toronto Stock Exchange is the principal market for Enbridge's common shares. The Preference Shares, Series A are traded on the Toronto Stock Exchange under the symbol ENB.PR.A and the preferred securities, series 7.8%, are traded on the Toronto Stock Exchange under the symbol ENB.PR.D. On December 18, 2006 the Company announced its intention to redeem all 8,000,000 Preferred Securities. The redemption price is $25.00 per Preferred Security plus accrued and unpaid interest of $0.2458 per security for the period covering from the last interest payment date of December 31, 2006 to the redemption date of February 15, 2007.

The following table sets forth the monthly price range and volume traded for each of the Company's publicly traded securities for each month during the most recently completed financial year.

Enbridge Gas Distribution Inc.	$175 million	4.77%	December 19, 2006	December 17, 2021	$ 99.958

DIRECTORS AND OFFICERS

DIRECTORS

The following table sets forth the names of the Directors of Enbridge Inc. as of February 21, 2007, their municipalities of residence, their respective principal occupations within the five preceding years and the year from which they first became a Director of the Company (except where otherwise noted). Each Director elected holds office until the next annual meeting of shareholders or until a successor is duly elected or appointed. Enbridge does not have an Executive Committee. As required, the Company has an Audit, Finance & Risk Committee (AFR Committee).

Name and Municipality of Residence	Principal Occupation for the Five Preceding Years	Director Since[1]
DAVID A. ARLEDGE[4, 5] Naples, Florida U.S.A.	Corporate Director; Chair of the Board of Directors of Enbridge Inc. since 2005. Vice Chairman of the Board of Directors of El Paso Corporation (integrated energy company) in 2001; prior thereto, Chairman, President and/or Chief Executive Officer of the Coastal Corporation since 1994.	2002
JAMES J. BLANCHARD[3, 4, 6] Beverly Hills, Michigan U.S.A.	Chairman, Government Affairs, DLA Piper U.S., LLP (law firm), since June, 2006; prior thereto, Senior Partner, DLA Piper U.S., LLP (law firm) since 1996; prior thereto, United States Ambassador to Canada.	1999
J. LORNE BRAITHWAITE[3, 5] Dublin, Ireland	Corporate Director; President & Chief Executive Officer of Cambridge Shopping Centres Limited (developer and manager of retail shopping malls in Canada) from 1978 to 2001.	1989
PATRICK D. DANIEL Calgary, Alberta Canada	President & Chief Executive Officer of Enbridge since January 2001; prior thereto, President & Chief Operating Officer from September to December 2000.	2000
J. HERB ENGLAND Naples, Florida U.S.A.	President & Chief Executive Officer of Stahlman-England Irrigation Inc. (contracting company) since January 2000; prior thereto, Chairman, President & Chief Executive Officer of Sweet Ripe Drinks Ltd. (fruit beverage manufacturing company) from 1993 to 1997.	2007
E. SUSAN EVANS[3, 5] Calgary, Alberta Canada	Corporate Director.	1996

Name and Municipality of Residence	Principal Occupation for the Five Preceding Years	Director Since[1]
DAVID A. LESLIE[2, 4] Toronto, Ontario Canada	Corporate Director; Chairman and Chief Executive Officer of Ernst & Young LLP from 1999 to 2004.	2005
ROBERT W. MARTIN[2, 5, 7] Toronto, Ontario Canada	Corporate Director.	1992
GEORGE K. PETTY[2, 4] San Luis Obispo, California U.S.A.	Corporate Director; President & Chief Executive Officer of Telus Corporation (telecommunications company) from 1994 to 1999.	2001
CHARLES E. SHULTZ[2, 5] Calgary, Alberta Canada	Chairman & Chief Executive Officer of Dauntless Energy Inc. (private oil and gas corporation) since 1995; Chairman of Canadian Oil Sands Limited (a subsidiary of Canadian Oil Sands Trust, a public oil and gas trust) since 1996; Chair and member of Compensation Committee and Lead Director of Newfield Exploration since 1994.	2004
DONALD J. TAYLOR[3, 4] Jacksons Point, Ontario Canada	Corporate Director; Chair of the Board of Directors of Enbridge Inc. from 1996 to 2005.	1979
DAN C. TUTCHER[3, 4] Houston, Texas U.S.A.	Corporate Director; Group Vice President, Transportation South of Enbridge Inc., President of Enbridge Energy Company, Inc. and Enbridge Energy Management L.L.C. from 2001 to 2006; prior thereto, Chairman of the Board, President & Chief Executive Officer of Midcoast Energy Resources, Inc. from 1992 to 2001.	2006

Notes:

1. "Director Since" refers to the year the person named was elected or appointed as a Director of the Company or of its predecessor parent, Interprovincial Pipe Line Inc. Herb England joined the Board of Directors on January 1, 2007 and at February 21, 2007, he was not a member of any Committees of the Board.
2. Member of the Audit, Finance & Risk Committee of the Board of Directors.
3. Member of the Corporate Social Responsibility Committee of the Board of Directors.
4. Member of the Governance Committee of the Board of Directors.
5. Member of the Human Resources & Compensation Committee of the Board of Directors.
6. On April 10, 2006, the Ontario Securities Commission (the "Commission") issued a temporary cease trade order against Bennett Environmental Inc. ("Bennett"), and subsequently a cease trade order on April 24, 2006, after Bennett failed to file its annual financial statements and related management's discussion and analysis for the year ended December 31, 2005. Under such orders, certain directors, officers and insiders of Bennett, including Governor Blanchard, were prohibited from trading Bennett securities until the Commission was in receipt of the necessary filings. Bennett made the requisite filings on or about May 30, 2006 and the cease trade order lapsed on June 19, 2006. Governor Blanchard resigned from Bennett on August 7, 2006.
7. On December 2, 2003, the Commission issued a temporary cease trade order against Atlas Cold Storage Income Trust ("Atlas"), and subsequently a cease trade order on December 15, 2003, after Atlas failed to file its interim financial statements for its nine-month period ended September 30, 2003. Under such orders, certain trustees, including Mr. Martin, were prohibited from trading Atlas trust units until the Commission was in receipt of the necessary filings. Atlas made the requisite filings on January 27, 2004 and the cease trade order lapsed on February 2, 2004. Mr. Martin did not stand for re-election as a Trustee of Atlas at the Atlas annual meeting held in June 2004.

OFFICERS

The following table sets forth the names of the executive officers, their current office with the Company effective December 31, 2006, unless otherwise noted, their municipality of residence and their principal occupations for the five preceding years.

Name, Position and Municipality of Residence	Position and Principal Occupations for the Five Preceding Years
PATRICK D. DANIEL President & Chief Executive Officer Calgary, Alberta Canada	President & Chief Executive Officer since January 2001; prior thereto, President & Chief Operating Officer from September to December 2000.
J. RICHARD BIRD Executive Vice President, Liquids Pipelines Calgary, Alberta Canada	Executive Vice President, Liquids Pipelines since May, 2006; prior thereto, Group Vice President, Liquids Pipelines since May 2005; prior thereto, Group Vice President, Transportation North since May 2001.
STEPHEN J.J. LETWIN Executive Vice President, Gas Transportation & International Woodlands, Texas Canada	Executive Vice President, Gas Transportation & International since May 2006; prior thereto, Group Vice President, Gas Strategy & Corporate Development since April 2003; prior thereto, Group Vice President, Distribution & Services since September 2000.
STEPHEN J. WUORI Executive Vice President, Chief Financial Officer & Corporate Development Calgary, Alberta Canada	Executive Vice President, Chief Financial Officer & Corporate Development since May 2006; prior thereto, Group Vice President & Chief Financial Officer since April 2003; prior thereto, Group Vice President, Planning & Development since September 2000.
BONNIE D. DUPONT Group Vice President, Corporate Resources Calgary, Alberta Canada	Group Vice President, Corporate Resources since September 2000.
DAVID T. ROBOTTOM Group Vice President, Corporate Law Calgary, Alberta Canada	Group Vice President, Corporate Law since June 2006; prior thereto, partner, Stikeman Elliott LLP from February 2004 to May 2006; prior thereto, partner, Fraser Milner Casgrain LLP to January, 2004 and was also Chief Executive Officer, Fraser Milner Casgrain LLP from February 1999 to February 2003.

Name, Position and Municipality of Residence	Position and Principal Occupations for the Five Preceding Years
JAMES A. SCHULTZ Senior Vice President, New Ventures Calgary, Alberta Canada	Senior Vice President, New Ventures since September 2006; prior thereto, Senior Vice President since April 2003 and President of Enbridge Gas Distribution Inc. since June 2001.
JOHN K. WHELEN Senior Vice President, Corporate Development Calgary, Alberta Canada	Senior Vice President, Corporate Development since September 2006; prior thereto, Vice President & Treasurer from February 2002 to August 2006; prior thereto, Assistant Treasurer from December 1997 to January 2002.

As at December 31, 2006, the directors and all officers of the Issuer (including the Executive Officers listed above) beneficially owned, directly or indirectly, 1,394,473 common shares of the Company, representing approximately 3.96% of the issued and outstanding common shares on that date. The information as to shares beneficially owned or over which control or direction is exercised, not being within the knowledge of the Company, has been furnished by the respective directors and officers individually. The directors and officers do not beneficially own, directly or indirectly, any voting securities of any subsidiary of the Company.

AUDIT, FINANCE & RISK COMMITTEE – FURTHER INFORMATION

GENERAL INFORMATION

Enbridge is required by law to have an audit committee and to disclose certain information concerning that committee pursuant to MI 52-110.

The Board has established the AFR Committee, which at December 31, 2006 was comprised: Robert W. Martin (Chair), David A. Leslie, George K. Petty and Charles E. Shultz. The Board of Directors has determined that each of the members is “independent” and “financially literate”, within the meaning of MI 52-110.

MANDATE

A summary of the AFR Committee’s mandate and responsibilities is set forth under the “Report of the Audit, Finance & Risk Committee” in the Management Information Circular for the May 2007 meeting of Shareholders. The AFR Committee’s Terms of Reference are available on the Company’s website.

RELEVANT EDUCATION AND EXPERIENCE OF MEMBERS

The following is a brief summary of the education or experience of each member of the AFR Committee that is relevant to the performance of his responsibilities as a member of the AFR Committee, including any education or experience that has provided the member with, among other things, an understanding of the accounting principles used by Enbridge to prepare its annual and interim financial statements.

Robert W. Martin

Mr. Martin acquired significant financial experience and exposure to accounting and financial issues as President, Chief Executive Officer and director of various corporations and in various finance positions. He was the President & Chief Executive Officer of Consumers Gas Company (now Enbridge Gas Distribution Inc.) where he was responsible for financial aspects related to that corporation. He has acted as a member and Chair of other audit committees, and currently serves as Chair of the audit committee of HSBC Bank Canada.

David A. Leslie, F.C.A.

Mr. Leslie is a chartered accountant and in his career of over 30 years, he was, among other things, personally involved in, and then actively supervised persons engaged in, preparing, auditing, analyzing and evaluating financial statements. He is the former Chairman and Chief Executive Officer of Ernst & Young LLP. He is also a director and member of the audit committee of Sobeys Inc.

George K. Petty

Mr. Petty acquired significant financial experience and exposure to accounting and financial issues during his lengthy career, including being President & Chief Executive Officer of Telus Corporation from 1994 to 1999. He has acted as a member of other audit committees.

Charles E. Shultz

Mr. Shultz acquired significant financial experience as a business executive and board member of several large Canadian and United States public companies. He served as President & Chief Executive Officer of Gulf Canada Resources Limited from 1990 to 1995 and has served as a director and Chairman of Canadian Oil Sands Limited since its inception.

PRE-APPROVAL POLICIES AND PROCEDURES

On October 30, 2003, the AFR Committee adopted a policy that requires pre-approval by the Committee of any services to be provided by the auditors, whether audit or non-audit services. The policy prohibits the Corporation from engaging the auditors to provide the following non-audit services:

(a) bookkeeping or other services related to accounting records and financial statements;

(b) financial information systems design and implementation;

(c) appraisal or valuation services, fairness opinions, or contribution-in-kind reports;

(d) actuarial services;

(e) internal audit outsourcing services;

(f) management functions or human resources;

(g) broker or dealer, investment adviser, or investment banking services;

(h) legal services; and

(i) expert services unrelated to the audit.

The AFR Committee believes that the policy will protect the Corporation from the potential loss of independence of the external auditors.

A copy of the policies and procedures applicable to the pre-approval of non-audit services by the Company's external auditors may be obtained from the Corporate Secretary of the Corporation by sending a written request to #3000, 425 – 1st Street S.W., Calgary, Alberta, T2P 3L8, by faxing a written request to (403) 231-5929, by calling (403) 231-3900 or by sending an e-mail request to **corporatesecretary@enbridge.com**.

The AFR Committee has also adopted a policy which prohibits the Company from hiring former employees of the auditors who provided more than 10 hours of audit, review or attest services for the Company or its subsidiaries within the one year preceding the commencement of the audit of the current year's financial statements.

EXTERNAL AUDITOR SERVICES – FEES

The following table sets forth all services rendered by the auditors (PWC) by category, together with the corresponding fees billed by the auditors for each category of service for the financial years ended December 31, 2005 and 2006.

	Year ended December 31	
	2006	2005
Audit Fees 1	**$3,688,620**	**$1,658,869**
Audit-Related Fees 2	**248,645**	**166,552**
Tax Fees 3	**310,599**	**210,490**
All Other Fees 4	**388,444**	**32,360**
Total Fees	**$4,636,308**	**$2,068,271**

Notes:

(1) Represents the aggregate fees billed by the Company's auditors for audit services.

(2) Represents the aggregate fees billed for assurance and related services by the Corporation's auditors that are reasonably related to the performance of the audit or review of the Company's financial statements and are not included under "Audit Fees".

(3) Represents the aggregate fees billed for professional services rendered by the Company's auditors for tax compliance, tax advice and tax planning.

(4) Represents the aggregate fees billed for products and services provided by the Company's auditors other than those services reported under "Audit Fees", "Audit Related Fees" and "Tax Fees".

LEGAL PROCEEDINGS

The information, which is found under note 23 "Commitments and Contingencies" of the Company's audited consolidated financial statements, as at, and for the year ended, December 31, 2006, is incorporated by reference herein.

REGISTRAR AND TRANSFER AGENT

The registrar and transfer agent for the common shares is CIBC Mellon Trust Company at its principal offices in Vancouver, British Columbia; Calgary, Alberta; Toronto, Ontario; Montreal, Quebec; and Halifax, Nova Scotia. The co-registrar and co-transfer agent in the United States for the common shares is Mellon Investor Services at its principal office in Jersey City, New York.

The registrar and transfer agent for the Preference Shares, Series A is CIBC Mellon Trust Company at its principal offices in Vancouver, British Columbia; Calgary, Alberta; Toronto, Ontario; Montreal, Quebec; and Halifax, Nova Scotia.

INTERESTS OF EXPERTS

The consolidated financial statements of the Company, as at and for the years ended December 31, 2006, 2005 and 2004, have been examined by PWC, as detailed in their auditors' report dated February 21, 2007. PWC is independent of the Company in accordance with the auditor's rules of professional conduct in Canada.

ADDITIONAL INFORMATION

Additional information, including Directors' and Officers' remuneration and indebtedness, principal holders of the Company's securities and options to purchase Enbridge's securities, and the interest of insiders in material transactions, all as at December 31, 2006, is contained in Enbridge's Management Information Circular dated March 2, 2007 furnished in connection with the Annual and Special Meeting of Shareholders to be held on May 2, 2007 for the purpose of, among other things, the election of directors. Additional financial information is provided in the Company's comparative financial statements and management's

discussion and analysis for the year ended December 31, 2006. Additional information relating to the Company may be found on SEDAR at www.sedar.com.

Effective Date

Unless otherwise specifically herein provided, the information contained in this Annual Information Form is stated effective as at December 31, 2006.

**TERMS OF REFERENCE FOR THE
AUDIT, FINANCE & RISK COMMITTEE**

I. CONSTITUTION

There shall be a committee, to be known as the Audit, Finance & Risk Committee (the "Committee"), of the Board of Directors of Enbridge Inc.

II. MEMBERSHIP

Following each annual meeting of shareholders of the Corporation, the Board shall elect from its members, not less than three (3) Directors to serve on the Committee (the "Members"). The Members and the Chair of the Committee are elected by the Board following the nomination of Directors by the Governance Committee. No Member of the Committee shall be an officer or employee of the Corporation or any of the Corporation's affiliates. All members of the Committee shall, in the judgment of the Board, be unrelated and independent and shall satisfy applicable stock exchange and legal requirements. Determinations on whether a Director meets the requirements for membership on the Committee shall be made by the Board. At least one member of the Committee shall be a "financial expert" as determined by the Board and as defined by American legal or regulatory requirements. No Director may serve as a member of the Committee if such Director also serves on the audit committees of more than two other public entities unless the Board determines that such simultaneous service would not impair the ability of such Director to effectively serve on the Committee.

Any Member may be removed or replaced at any time by the Board and shall cease to be a Member upon ceasing to be a Director of the Corporation. Each Member shall hold office until the close of the next annual meeting of Shareholders of the Corporation or until the Member ceases to be a Director, resigns or is replaced, whichever first occurs. Vacancies may be filled by the Board with nominees approved by the Governance Committee.

III. MEETINGS

The Committee shall convene at such times and places designated by its Chair or whenever a meeting is requested by a Member, the Board, an officer, the internal auditor or the external auditors of the Corporation. A minimum of twenty-four (24) hours notice of each meeting shall be given to each Member and to the internal and external auditors.

A majority of the committee shall be duly convened if all Members are present, or at least a majority of the Members are present. A quorum at a meeting shall consist of at least a majority of Members. Where the Members consent, and proper notice has been given or waived, Members of the Committee may participate in a meeting of the Committee by means of such telephonic, electronic or other communication facilities as permit all persons participating in the meeting to communicate adequately with each other, and a Member participating in such a meeting by any such means is deemed to be present at that meeting.

In the absence of the Chair of the Committee, the Members may choose one (1) of the Members to be the Chair of the meeting.

At the invitation of a Member, other Board members, officers or employees of the Corporation, the external auditors, external counsel and other experts or consultants may attend any meeting of the Committee.

Members of the Committee may meet separately with any member of management, the external auditors, the internal auditor, internal or external counsel or any other expert or consultant.

Minutes shall be kept of all meetings of the Committee.

IV. FUNDING

The Corporation shall provide appropriate funding, as determined by the Committee, for the payment of compensation to the external auditors and any independent counsel, experts or advisors employed by the Committee and administrative expenses of the Committee.

V. REVIEW OF CHARTER

The Committee shall review and reassess the adequacy of its Terms of Reference at least annually and propose recommended changes to the Board.

VI. DUTIES AND RESPONSIBILITIES OF THE CHAIR

The Chair is responsible for:

A. convening Committee meetings and designating the times and places of those meetings;

B. ensuring Committee meetings are duly convened and that quorum is present when required;

C. working with Management on the development of agendas and related materials for the Committee meetings;

D. ensuring Committee meetings are conducted in an efficient, effective and focused manner;

E. ensuring the Committee has sufficient information to permit it to properly make decisions when decisions are required;

F. providing leadership to the Committee and to assist the Committee in reviewing and monitoring its responsibilities; and

G. reporting to the Board on the recommendations and decisions of the Committee.

VII. DUTIES AND RESPONSIBILITIES

The Committee provides assistance to the Board in fulfilling its oversight responsibility to the shareholders, the investment community and others, relating to the integrity of the Corporation's financial statements and the financial reporting process, the management information systems and financial controls, the internal audit function, the external auditors' qualifications, independence, performance and reports, the Corporation's compliance with legal and regulatory requirements and the risk identification, assessment and management program. In so doing, it is the Committee's responsibility to maintain an open avenue of communication between the Committee, the external auditors, the internal auditors and management of the Corporation.

Management is responsible for preparing the interim and annual financial statements and financial disclosure of the Corporation and for maintaining a system of internal controls to provide reasonable assurance that assets are safeguarded and that transactions are authorized, executed, recorded and reported properly. The Committee's role is to provide meaningful and effective oversight and counsel to management without assuming responsibility for management's day-to-day duties.

In performance of its duties and responsibilities, the Committee shall have the right as it determines necessary to carry out its duties to engage independent counsel, experts and other advisors, to inspect any and all of the books and records of the Corporation, its subsidiaries and affiliates, and to discuss with the officers of the Corporation, its subsidiaries and affiliates, the internal auditor and the external auditors, such accounts, records and other matters as any Member considers appropriate.

The Committee shall have the following specific duties and responsibilities:

A. DUTIES AND RESPONSIBILITIES RELATED TO THE EXTERNAL AUDITORS.

The Committee shall:

(i) (a) be responsible for the appointment, compensation, oversight, retention and termination of the external auditors who shall report directly to the Committee, provided that the appointment of the auditor shall be subject to shareholder approval; and

(b) be responsible for the appointment, compensation, oversight, retention and termination of any other registered public accounting firm for audit, review or attestation services;

(ii) review and approve the terms of the external auditors' annual engagement letter, including the proposed audit fees;

(iii) review and approve all engagements for audit services and non-audit services to be provided by the external auditors and, as necessary, consider

the potential impact of such services on the independence of the external auditors;

(iv) review and discuss with the external auditors all relationships that the external auditors and their affiliates have with the Corporation and its affiliates in order to determine the external auditors' independence;

(v) at least annually, obtain and review a report by the external auditors describing the firm's internal quality-control procedures, any material issues raised by the most recent internal quality-control review or peer review of the firm or by any inquiry or investigation by governmental or professional authorities within the preceding five years respecting one or more independent audits carried out by the external auditors and any steps taken to deal with any such issues and all relationships between the external auditors and the Corporation;

(vi) resolve disagreements, if any, between management and the external auditors regarding financial reporting;

(vii) inform the external auditors and management that the external auditors shall have access directly to the Committee at all times, as well as the Committee to the external auditors and that the external auditors are ultimately accountable to the Committee as representatives of the shareholders of the Corporation;

(viii) discuss with management and the external auditors any correspondence from or with regulators or governmental agencies, any employee complaints or any published reports that raise material issues regarding the Corporation's financial statements or accounting policies; and

(ix) establish hiring policies for employees or former employees of the external auditors.

B. DUTIES AND RESPONSIBILITIES RELATED TO AUDITS AND FINANCIAL REPORTING.

The Committee shall:

(i) review the engagement terms and the audit plan with the external auditors and with the Corporation's management;

(ii) review with management and the Corporation's external auditors the Corporation's financial reporting in connection with the annual audit and the preparation of the financial statements, including, without limitation, the judgment of the external auditors as to the quality, not just the acceptability of, and the appropriateness of the Corporation's accounting principles as applied in its financial reporting and the degree of aggressiveness or

conservatism of the Corporation's accounting principles and underlying estimates;

(iii) review with management and the external auditors and make recommendations to the Board on all financial statements and financial disclosure which require approval by the Board including:

(a) the Corporation's annual financial statements including the notes thereto and "Management's Discussion and Analysis";

(b) any report or opinion to be rendered in connection therewith;

(c) any change or initial adoption in accounting policies and their applicability to the business;

d) any audit problems or difficulties and management's response;

(e) all significant adjustments proposed by the external auditors; and

(f) satisfying itself that there are no unresolved issues between management and the external auditors that could reasonably be expected to materially affect the financial statements.

(iv) review the Corporation's interim financial results, including the notes thereto and "Management's Discussion and Analysis" with management and the external auditors and approve the release thereof by management or recommend approval thereof to the Board for release by the Board;

(v) review annually the approach taken by management in the preparation of earnings press releases, as well as financial information and earnings guidance provided to analysts and rating agencies;

(vi) discuss with the external auditors their perception of the Corporation's internal audit and accounting personnel, and any recommendations which the external auditors may have;

(vii) review with management, the external auditors and, as necessary, internal and external legal counsel, any litigation, claim or contingency, including tax assessments, that could have a material effect upon the financial position of the Corporation, and the manner in which these matters may be, or have been, disclosed in the financial statements;

(viii) review with management and monitor the funding exposure of the Corporation under the Corporation's pension plans and review annually the annual report and financial statements applicable to each of the pension plans;

(ix) annually or more frequently as deemed necessary, meet separately with management and the external auditors, and at least annually with the internal

auditors, to review issues and matters of concern respecting audits and financial reporting processes;

(x) review with the Corporation's management and, as deemed necessary, review with the external auditors, any proposed changes in or initial adoption of accounting policies, the presentation and impact of significant risks and uncertainties, and key estimates and judgments of the Corporation's management that may be material to financial reporting;

(xi) review with the Corporation's management and, as deemed necessary, with the external auditors, significant financial reporting issues arising during the fiscal period, including the methods of resolution;

(xii) review any problems experienced by the external auditors in performing an audit, including any restrictions imposed by the Corporation's management or significant accounting issues on which there was a disagreement with the Corporation's management;

(xiii) review the post-audit or management letter containing the recommendations of the external auditors and the response of the Corporation's management, if any, including an evaluation of the adequacy and effectiveness of the internal financial controls of the Corporation (in respect of the scope of review of internal controls by the external auditors, the review is carried out to enable the external auditors to express an opinion on the Corporation's financial statements);

(xiv) review before release relevant public disclosure documents containing audited or unaudited financial information, including annual and interim earnings press releases, prospectuses, the Annual Information Form, and the Management's Discussion and Analysis disclosure;

(xv) review, in conjunction with the Human Resources & Compensation Committee, the appointment of the chief financial officer;

(xvi) inquire into and determine the appropriate resolution of conflicts of interest in respect of audit, finance or risk matters between or among an officer, Director, shareholder, the internal auditors, or the external auditors, which are properly directed to the Committee by the Chair of the Board, the Board, a shareholder, the internal auditors, the external auditors, or the Corporation's management; and

(xvii) as deemed necessary by the Committee, inquire into and examine matters relating to the financial affairs of the Corporation, its subsidiaries or affiliates, or any of them, including the review of subsidiary or affiliate Audit Committee reports.

C. DUTIES AND RESPONSIBILITIES RELATED TO FINANCIAL REPORTING PROCESSES AND INTERNAL CONTROLS

The Committee shall:

(i) review the adequacy and effectiveness of the accounting and internal control policies of the Corporation and procedures through inquiry and discussions with the external auditors, management, and the internal auditor;

(ii) review with management the Corporation's administrative, operational and accounting internal controls, including controls and security of the computerized information systems, and evaluate whether the Corporation is operating in accordance with prescribed policies, procedures and the Statement on Business Conduct;

(iii) annually or more frequently if deemed necessary, meet separately with the external auditor, the head of the internal audit group and management, to review issues and matters of concern respecting financial reporting processes and internal controls;

(iv) review with management and the external auditors any reportable conditions, material weaknesses and significant deficiencies affecting internal control;

(v) establish and maintain free and open means of communication between and among the Committee, the external auditors, the internal auditor and management;

(vi) review at least annually with the internal auditor the Corporation's internal control procedures, and the scope and plans for the work of the internal audit group; and

(vii) review the adequacy of resources of the internal auditor and ensure that the internal auditor has unrestricted access to all functions, records, property and personnel of the Corporation and inform the internal auditors and management that the internal auditors shall have unfettered access directly to the Committee at all times, as well as the Committee to the internal auditors.

D. DUTIES AND RESPONSIBILITIES RELATED TO FINANCE.

The Committee shall:

(i) review and as required, approve or recommend for approval to the Board, prospectuses and documents, where practicable, which may be incorporated by reference into a prospectus;

(ii) review the issuance of equity or debt securities by the Corporation, and if deemed appropriate, authorize the filing with securities regulatory authorities

of any prospectus, prospectus supplement or other documentation relating thereto; and

(iii) review and recommend for approval to the Board the annual management information circular with respect to matters related to the auditor, affecting the capital of the Corporation or principal risks to be managed by the Corporation.

E. DUTIES AND RESPONSIBILITIES RELATED TO RISK MANAGEMENT

The Committee shall:

(i) review at least annually with senior management, internal counsel and, as necessary, external counsel and the Corporation's internal and external auditors:

(a) the Corporation's method of reviewing major risks inherent in the Corporation's businesses, facilities, and strategic directions, including the Corporation's risk management and evaluation process (in respect of risk management evaluations and guidelines relating to environment, health and safety matters, the Committee shall consult with and, as deemed necessary, review the recommendations of the Environment, Health & Safety Committee);

(b) the strategies and practices applicable to the Corporation's assessment, management, prevention and mitigation of risks (including the foreign currency and interest rate risk strategies, counterparty credit exposure, the use derivative instruments, insurance and adequacy of tax provisions);

(c) the Corporation's annual insurance report including the risk retention philosophy and resulting uninsured exposure, if any,

(d) the loss prevention policies, risk management programs, disaster response and recovery programs, corporate liability protection programs for Directors and officers, and standards and accountabilities of the Corporation in the context of competitive and operational considerations.

F. OTHER DUTIES OF AUDIT, FINANCE & RISK COMMITTEE

The Committee shall, as required, or as deemed necessary by the Committee:

(i) review senior management's expense report summaries of the officers and Directors of the Corporation, and review senior management's report summaries concerning corporate aircraft usage;

(ii) meet separately with senior management, the internal auditors, the external auditors and, as is appropriate, internal and external legal counsel and

independent advisors in respect of issues not elsewhere listed concerning any other audit, finance and risk matters;

(iii) review incidents or alleged incidents as reported by senior management, audit services, the external auditor, the Corporate Secretary, the law department, or otherwise of fraud, illegal acts and conflicts of interest;

(iv) establish procedures for the receipt, retention and treatment of complaints received by the Corporation regarding accounting, internal accounting controls or auditing matters and the confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters;

(v) report to the Board after each Committee meeting, as required during the year, with respect to the Committee's activities and recommendations;

(vi) address any other matter properly referred to the Committee by the Chair of the Board, the Board, a Director, the internal auditors, the external auditors, the CEO, or the management of the Corporation or any other matter as may be required under stock exchange rules or by law;

(vii) in conjunction with the Governance Committee, conduct an annual performance evaluation of the Committee; and

(viii) the Committee shall, in conjunction with Management, coordinate the performance of its duties concerning:

(a) the external auditor;

(b) audits and financial reporting;

(c) financial reporting processes and internal controls;

(d) finance; and

(e) risk management

(f) with any audit committee of a subsidiary corporation, respecting the independence of such subsidiary directors and managing to ensure efficiency, effectiveness and consistency of approach with such subsidiary.

VIII. COMMITTEE TIMETABLE

The major annual activities of the Committee shall be outlined in an annual schedule.

IX. DELEGATION TO SUBCOMMITTEE

The Committee may, in its discretion, delegate all or a portion of its duties and

responsibilities to a subcommittee of the Committee. The Committee may, in its discretion, delegate to one or more of its members the authority to pre-approve any audit or non-audit services to be performed by the external auditors, provided that any such approvals are presented to the Committee at its next scheduled meeting.

Exhibit 99.4

ENBRIDGE INC.

Consolidated Financial Statements

December 31, 2006

MANAGEMENT'S REPORT

To the Shareholders of Enbridge Inc.

Financial Reporting

Management is responsible for the accompanying consolidated financial statements and all other information in this Annual Report. The consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles and necessarily include amounts that reflect management's judgment and best estimates. Financial information contained elsewhere in this Annual Report is consistent with the consolidated financial statements.

PricewaterhouseCoopers LLP, independent auditors appointed by the shareholders of the Company, conducts an examination of the consolidated financial statements in accordance with Canadian generally accepted auditing standards.

The Board of Directors and its committees are responsible for all aspects related to governance of the Company. The Audit, Finance & Risk Committee of the Board, composed of directors who are unrelated and independent, has a specific responsibility to oversee management's efforts to fulfil its responsibilities for financial reporting and internal controls related thereto. The Committee meets with management, internal auditors and independent auditors to review the consolidated financial statements and the internal controls as they relate to financial reporting. The Audit, Finance & Risk Committee reports its findings to the Board for its consideration in approving the consolidated financial statements for issuance to the shareholders.

Internal Control over Financial Reporting

Management is also responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting includes policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on the framework established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2006.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2006 has been audited by PricewaterhouseCoopers LLP, as required by the Sarbanes-Oxley Act, as stated in their report included herein.

Independent Auditors' Report

To the Shareholders of
Enbridge Inc.

We have completed an integrated audit of the consolidated financial statements and internal control over financial reporting of Enbridge Inc. as of December 31, 2006 and audits of its 2005 and 2004 consolidated financial statements. Our opinions, based on our audits, are presented below.

Consolidated financial statements

We have audited the accompanying consolidated statements of financial position of Enbridge Inc. as at December 31, 2006 and 2005, and the related consolidated statements of earnings, retained earnings and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit of the Company's financial statements as at December 31, 2006 and for the year then ended in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). We conducted our audits of the Company's financial statements as at December 31, 2005 and 2004 and for each of the two years in the period ended December 31, 2005 in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. A financial statement audit also includes assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as at December 31, 2006 and 2005 and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2006 in accordance with Canadian generally accepted accounting principles.

PricewaterhouseCoopers refers to the Canadian firm of PricewaterhouseCoopers LLP and the other member firms of PricewaterhouseCoopers International Limited, each of which is a separate and independent legal entity.

Internal control over financial reporting

We have also audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting, that the Company maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PRICEWATERHOUSECOOPERS

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2006 is fairly stated, in all material respects, based on criteria established in *Internal Control — Integrated Framework* issued by the COSO. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006 based on criteria established in *Internal Control — Integrated Framework* issued by the COSO.

Enbridge Inc. (Enbridge or the Company) is one of North America's largest energy transportation and distribution companies. Enbridge conducts its business through five operating segments: Liquids Pipelines, Gas Pipelines, Sponsored Investments, Gas Distribution and Services, and International. These operating segments are strategic business units established by senior management to facilitate the achievement of the Company's long-term objectives, to aid in resource allocation decisions and to assess operational performance.

Liquids Pipelines

Liquids Pipelines includes the operation of the Canadian common carrier pipeline and feeder pipelines that transport crude oil and other liquid hydrocarbons.

Gas Pipelines

Gas Pipelines consists of proportionately consolidated investments in natural gas pipelines including the U.S. portion of the Alliance Pipeline, Vector Pipeline and transmission and gathering pipelines in the Gulf of Mexico.

Sponsored Investments

Sponsored Investments consists of the Company's investments in Enbridge Energy Partners, L.P. (EEP), Enbridge Energy Management, L.L.C. (EEM), a 17.2% owned subsidiary which owns 100% of EEP's i-units, (collectively, the Partnership) and Enbridge Income Fund (EIF). The Partnership transports crude oil and other liquid hydrocarbons through common carrier and feeder pipelines and transports, gathers, processes and markets natural gas and natural gas liquids. EIF is a publicly traded income fund whose primary operations include a 50% interest in the Canadian portion of the Alliance Pipeline and a crude oil and liquids pipeline and gathering system.

Gas Distribution and Services

Gas Distribution and Services consists of gas utility operations which serve residential, commercial, industrial and transportation customers, primarily in central and eastern Ontario. It also includes natural gas distribution activities in Quebec, New Brunswick and New York State, and the Company's proportionately consolidated investment in Aux Sable, a natural gas fractionation and extraction business.

The Company's commodity marketing businesses are also included in Gas Distribution and Services. These businesses manage the Company's volume commitments on Alliance and Vector Pipelines as well as, offer commodity storage, transport, and supply management services.

International

The Company's International business consists of investments in energy delivery businesses, Compañía Logistica de Hidrocarburos CLH, S.A. (CLH) in Spain and Oleoducto Central, S.A. (OCENSA) in Colombia.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements of the Company are prepared in accordance with Canadian generally accepted accounting principles (Canadian GAAP). These accounting principles are different in some respects from United States generally accepted accounting principles (U.S. GAAP) and the significant differences that impact the Company's financial statements are described in Note 26. Amounts are stated in Canadian dollars unless otherwise noted.

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, as well as the disclosure of contingent assets and liabilities in the financial statements. Actual results could differ from these estimates.

Basis of Presentation

The consolidated financial statements include the accounts of Enbridge Inc., its subsidiaries and its proportionate share of the accounts of joint ventures. EIF is consolidated in the accounts of the Company as it is a variable interest entity. The Company is the primary beneficiary of EIF through a combination of a 41.9% equity interest and a preferred unit investment. Investments in entities which are not subsidiaries or joint ventures, but over which the Company exercises significant influence, are accounted for using the equity method. Other investments are accounted for using the cost method.

The Company's gas distribution activities within Gas Distribution and Services are conducted primarily through a wholly-owned subsidiary, Enbridge Gas Distribution Inc. (EGD). In 2004, EGD changed its fiscal year end to December 31 from September 30, and accordingly, the Company's financial statements for the year ended December 31, 2004 include 15 months of results for EGD and other gas distribution subsidiaries.

Regulation

Certain of the Company's Liquids Pipelines, Gas Pipelines, and Gas Distribution and Services businesses are subject to regulation by various authorities, including but not limited to, the National Energy Board (NEB), the Federal Energy Regulatory Commission (FERC), the Alberta Energy and Utilities Board (AEUB) and the Ontario Energy Board (OEB). Regulatory bodies exercise statutory authority over matters such as construction, rates and ratemaking, and agreements with customers. To recognize the economic effects of the actions of the regulator, the timing of recognition of certain revenues and expenses in these operations may differ from that otherwise expected under generally accepted accounting principles for non rate-regulated entities.

Revenue Recognition

Generally, revenues are recorded when products have been delivered or services have been performed. However, certain operations are subject to regulation and, accordingly, there are circumstances where revenues recognized do not match the cash tolls or the billed amounts, resulting in the recognition of regulatory assets and liabilities.

For the rate-regulated portion of the Company's main Canadian crude oil pipeline system, revenue is recognized in a manner that is consistent with the underlying agreements as approved by the NEB. Certain Liquids Pipelines revenues are recognized under the terms of a committed thirty year delivery contract rather than the cash tolls received.

For rate-regulated operations in Gas Pipelines and Sponsored Investments, transportation revenues include amounts related to expenses recognized in the financial statements that are expected to be recovered from shippers in future tolls. Revenue is not recognized in a given period for tolls received that do not relate to current period expenses. Differences between the recorded transportation revenue and actual toll receipts give rise to receivable or payable balances.

A significant portion of Gas Distribution and Services operations are subject to rate-regulation. Revenue is recognized in a manner that is consistent with the underlying rate-setting mechanism as mandated by the regulator. Gas distribution revenues are recorded on the basis of regular meter readings and estimates of customer usage from the last meter reading to the end of the reporting period.

Income Taxes

For non-regulated operations, the liability method of accounting for income taxes is followed. Future income tax assets and liabilities are recorded based on temporary differences between the tax bases of assets and liabilities and their carrying values for accounting purposes. Future income tax assets and liabilities are measured using the tax rate that is expected to apply when the temporary differences reverse.

The regulated activities of the Company recover income tax expense based on the taxes payable method when prescribed by regulators or in ratemaking agreements that are subject to regulatory approval. Therefore, rates do not include the recovery of future income taxes related to temporary differences. The Company expects that all unrecorded future income taxes will be recovered in rates when they become payable.

Foreign Currency Translation

The Company's U.S. dollar operations are primarily self-sustaining except for certain financing and investing operations. The Company also holds a self-sustaining Euro equity investment in a foreign operation in Spain.

The self-sustaining operations are translated into Canadian dollars using the current rate method. Under this method, assets and liabilities are translated using period-end exchange rates, with revenues and expenses translated using average rates for the period. Gains and losses arising on translation of these operations are included in the foreign currency translation adjustment.

Certain financing and investing operations, are integrated with those of the parent company and are translated into Canadian dollars using the temporal method. Under this method, monetary assets and liabilities denominated in foreign currencies are translated at exchange rates in effect at the balance sheet date. Non-monetary assets and liabilities denominated in foreign currencies are translated at exchange rates in effect on the dates the assets were acquired or liabilities were incurred. Revenues and expenses are translated at exchange rates prevailing on the transaction dates and gains and losses on translation are reflected in income when incurred.

Cash and Cash Equivalents

Cash and cash equivalents are recorded at cost and include short-term deposits with a term to maturity of three months or less when purchased.

Inventory

Inventory is primarily comprised of natural gas in storage, held in EGD. Natural gas in storage is recorded at the quarterly prices approved by the OEB in the determination of customer sales rates, adjusted for price risk management activities. The actual price of gas purchased may differ from the OEB approved price. The difference between the approved price and the actual cost of the gas purchased is deferred for future refund or collection as approved by the OEB Other inventory, consisting primarily of commodities held in storage is recorded at the lower of cost and net realizable value.

Property, Plant and Equipment

Expenditures for project development, construction, expansion, major renewals and betterments are capitalized; maintenance and repair costs are expensed as incurred. The Company capitalizes interest incurred during construction, and if approved, an allowance for equity funds used during construction for regulatory assets, at rates authorized by the regulatory authorities. Depreciation of property, plant and equipment is generally provided on a straight-line basis over the estimated service lives of the assets commencing when the asset is placed in service.

Deferred Amounts and Other Assets

Deferred amounts and other assets include costs which regulatory authorities have permitted or are expected to permit to be recovered through future rates, contractual receivables under the terms of long-term delivery contracts, and hedging costs. Deferred financing costs are amortized over the terms of the related debt. Other deferred charges are amortized on a straight-line basis over various periods depending on the nature of the charges.

Intangibles

Intangibles consist primarily of acquired long-term transportation contracts which are amortized on a straight-line basis over the expected lives of the contracts.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net identifiable assets upon acquisition of a business. Goodwill is not subject to amortization but is tested for impairment with a cash flow analysis, at least annually, and written down to fair value if impairment occurs.

Asset Retirement Obligations

The fair value of asset retirement obligations (AROs) associated with the retirement of long-lived assets are recognized as long-term liabilities in the period when they can be reasonably determined. The fair value approximates the cost a third party would charge in performing the tasks necessary to retire such assets and is recognized at the present value of expected future cash flows. AROs are added to the carrying value of the associated asset and depreciated over the asset's useful life. The corresponding liability is accreted over time through charges to earnings and is reduced by actual costs of decommissioning and reclamation. The Company's estimates of retirement costs could change as a result of changes in cost estimates and regulatory requirements.

For certain of the Company's assets it is not possible to make a reasonable estimate of AROs due to the indeterminate timing and scope of the asset retirements.

Depreciation expense for Gas Distribution and Services operations includes a provision for asset retirement obligations at rates approved by the regulator. Actual costs incurred are charged to accumulated depreciation.

Derivative Financial Instruments

The Company uses derivative financial instruments and foreign currency denominated debt to hedge currency risk related to net investments in foreign operations. These financial instruments are recognized in the financial statements of the Company at fair value and gains and losses are included in the foreign currency translation adjustment in shareholders' equity. Changes in the carrying amount related to exchange rate movements of foreign denominated debt designated as net investment hedges are also included in the foreign currency translation adjustment.

The Company applies settlement accounting to other derivative financial instruments. Under this method, gains and losses on derivative instruments that qualify for hedge accounting are not recorded until they are realized. Amounts received or paid related to derivative financial instruments used to hedge energy commodities prices are recognized as part of the cost of the underlying transaction on settlement. For other derivative financial instruments used to hedge interest costs or foreign exchange changes, amounts received or paid, including any gains and losses realized upon settlement, are recognized over the term of the hedged item. The notional amounts are not recorded as they do not represent amounts exchanged by the counterparties.

If a derivative instrument designated as a hedge ceases to be effective or is terminated, hedge accounting is discontinued and the gain or loss at that date is deferred and recognized concurrently with the related transaction. Subsequent gains and losses from the derivative instrument are recognized in earnings in the period they occur. If the anticipated transaction is no longer probable, the gain or loss is recognized immediately in earnings.

Post-Employment Benefits

The Company maintains pension plans which provide defined benefit and defined contribution pension benefits. Pension costs and obligations for the defined benefit pension plans are determined using the projected benefit method and are charged to earnings as services are rendered, except for the regulated operations of Gas Distribution and Services, where contributions made to the plan are expensed as paid, consistent with the recovery of such costs in rates. For the defined contribution plans, contributions made by the Company are expensed.

Pension plan assets are measured at fair value. The expected return on pension plan assets is determined using market related values. Market related values have been calculated using the fair value method. Adjustments arising from plan amendments and the transitional amounts recognized upon adoption of the accounting standard are amortized on a straight-line basis over the average remaining service period of the employees active at the date of amendment or transition. The excess of the net actuarial gain or loss over ten per cent of the greater of the benefit obligation and the fair value of plan assets is amortized over the average remaining service period of the active employees.

The Company also provides post-employment benefits other than pensions, including group health care and life insurance benefits for eligible retirees, their spouses and qualified dependants. The cost of such benefits is accrued during the years employees render service, except for the regulated operations of Gas Distribution and Services where the cost of providing these benefits is expensed as paid, consistent with the recovery of such costs in rates.

The measurement date used to determine the plan assets and the accrued benefit obligation was September 30, 2006.

Stock Based Compensation

Stock options granted after January 1, 2003 are recorded using the fair value method. Under this method, compensation expense is measured at fair value at the grant date using the Black-Scholes option pricing model and recognized on a straight-line basis over the shorter of the vesting period or the period to early retirement eligibility with a corresponding credit to contributed surplus. Balances in contributed surplus are transferred to share capital when the options are exercised. Stock options granted prior to January 1, 2003 do not result in the recognition of compensation expense and continue to be accounted for as capital transactions when the options are exercised.

Performance Stock Units (PSUs) and Restricted Stock Units (RSUs) vest at the completion of a three-year term and are settled in cash. During the term, a liability and expense are recorded based on the number of units outstanding

and the current market price of the Company's shares. The value of PSU's is also dependent on the Company's current performance relative to a specified peer group.

Comparative Amounts

Certain comparative amounts have been reclassified to conform with the current year's financial statement presentation.

2. CHANGES IN ACCOUNTING POLICIES

New Accounting Standards

Financial Instruments, Hedging Relationships and Other Comprehensive Income

New accounting standards will be in effect January 1, 2007 for hedge accounting, recognition and measurement of financial instruments and disclosure of comprehensive income. The adoption of these standards will result in the recognition of financial instruments and hedging relationships principally consistent with similar requirements in the United States, as currently reflected in the Company's United States Accounting Principles note.

The Company will recognize other comprehensive income in a separate financial statement and include accumulated other comprehensive income as a component of shareholders' equity. To the extent economic hedges do not qualify for hedge accounting, are ineffective, or are not documented as hedges in accordance with the new standards, gains and losses and any ineffectiveness will be charged to current period earnings.

If the Company were to adopt the standards at December 31, 2006, a payable to counterparties of $44.8 million, a due from ratepayers of $26.6 million, accumulated other comprehensive income of $30.6 million, a future tax liability of $16.8 million, and a charge to retained earning of $66.1 million would be recognized in the financial statements.

3. FINANCIAL STATEMENT EFFECTS OF RATE REGULATION

General Information on Rate Regulation and its Economic Effects

A number of businesses within the Company are subject to regulation where regulators exercise statutory authority over matters such as construction, operation, rates, ratemaking agreements with customers. The Company's significant regulated businesses and related accounting impacts are described below:

Enbridge System

The primary business activities of the Enbridge System are subject to regulation by the NEB. Tolls are set based on agreements with customers and are filed with the NEB for approval. In 2005, Enbridge and the Canadian Association of Petroleum Producers (CAPP) approved an incentive tolling settlement (ITS). The ITS is effective from January 1, 2005 to December 31, 2009 and defines the methodology for calculation of tolls and the revenue requirement on the core component of the Enbridge System in Canada. Toll adjustments, for variances from requirements defined in the ITS, are filed annually with the regulator for approval.

Athabasca Pipeline

The Athabasca Pipeline is regulated by the AEUB. Tolls are established based on long-term transportation agreements with individual shippers and taxes are recorded using the taxes payable method.

Vector Pipeline

Vector Pipeline is an interstate natural gas pipeline with a FERC approved tariff establishing rates, terms and conditions governing its service to customers. Rates are determined using a cost of service methodology. Tariff changes may only be implemented upon approval by the FERC. Tolls include a return on equity component of 12.96% (2005 -12.96%) before tax.

Alliance Pipeline

The US portion of the Alliance Pipeline (Alliance) is regulated by the FERC and the Canadian portion of the pipeline is regulated by the NEB. Shippers on Alliance entered into 15-year transportation contracts expiring in December 2015, with a cost of service toll methodology. Toll adjustments are filed annually with the regulator. The tolls include

a return on equity component of 10.85% (2005 – 10.85%) after tax for the US portion and 11.25% (2005 – 11.25%) after tax for the Canadian portion. Alliance tolls are based on a deemed 70% debt and 30% equity structure.

Enbridge Gas Distribution

EGD's gas distribution operations are regulated by the OEB. EGD's rates are set under a cost of service methodology with revenues charged to recover EGD's forecast costs and to earn a rate of return on common equity. Applications for changes to rates are made annually and are submitted for approval by the OEB.

Forecast costs include gas commodity and transportation, operation and maintenance, depreciation, municipal taxes, interest and income taxes. The rate base is the average investment of permitted assets used in gas distribution, storage and transmission and an allowance for working capital. EGD's 2006 approved rate of return on the rate base was 7.74% (2005 – 8.10%) after tax, and the approved rate of return on common equity was 8.74% (2005 – 9.57%) after tax based on a 35% deemed common equity.

Enbridge Gas New Brunswick

Enbridge Gas New Brunswick (EGNB) is regulated by the New Brunswick Board of Commissioners of Public Utilities Board (PUB) and follows a cost of service tolling methodology. An application for rate adjustments is filed annually for PUB approval. EGNB's rate of return on the rate base was 9.78% (2005 – 9.46%) before tax and the approved rate of return on equity was 13% (2005 – 13%) before tax, based on equity which is capped at 50%.

Regulatory Risk and Uncertainties Affecting Recovery or Settlement

The recognition of regulatory assets and liabilities is based on the actions, or an expectation of the future actions, of the regulator. To the extent that the regulator's actions differ from the Company's expectations, the timing and amount of recovery or settlement of regulatory balances could differ significantly from those recorded.

Financial Statement Effects

To recognize the actions or expected actions of the regulator, the timing and recognition of certain revenues and expenses may differ from that otherwise expected for non rate-regulated entities.

Regulatory assets represent amounts that are expected to be recovered from customers in future periods through rates. Regulatory liabilities represent amounts that are expected to be refunded to customers in future periods through rates. In the absence of rate regulation, GAAP would not permit the recognition of regulatory assets or liabilities and the earnings impact would be recorded in the period the expenses are incurred or revenues are earned. Long-term regulatory assets are recorded in Deferred Amounts and Other Assets whereas current regulatory assets are recorded in Accounts Receivable and Other. Regulatory liabilities are recorded in Accounts Payable and Other.

Accounting for rate-regulated entities has resulted in recording the following regulatory assets and liabilities:

(millions of dollars)			Estimated Settlement	Earnings Impact[1]	
December 31,	**2006**	2005	Period (years)	**2006**	2005
Regulatory Assets /(Liabilities)					
Liquids Pipelines					
Enbridge system tolling deferrals[2]	**166.2**	172.3	1	**(6.1)**	21.3
Gas Pipelines					
Deferred transportation revenue[3]	**203.8**	187.6	17-19	**9.8**	14.6
Transportation revenue adjustment[4]	**9.3**	11.7	1	**(1.4)**	(0.3)
Sponsored Investments					
Deferred transportation revenue[3]	**47.4**	30.0	19	**7.3**	0.1
Gas Distribution and Services					
EGNB regulatory deferral[5]	**101.8**	82.7	34	**12.4**	14.4
Deferred taxes recoverable[6]	**6.0**	14.0	1	**—**	—
Class action lawsuit settlement[7]	**22.0**	0.8	2	**13.5**	—
Gas distribution access rule [8]	**8.4**	0.4	2	**5.1**	0.3
Ontario hearing cost[9]	**9.2**	11.9	2	**(1.7)**	2.5
Purchased gas variance[10]	**(127.4)**	28.1	1	**(99.3)**	49.2
Unaccounted for gas variance[11]	**(11.7)**	3.0	1	**(9.4)**	23.2
Deferred rebates[12]	**(2.0)**	(11.6)	1	**—**	—
Transactional services deferral[13]	**(7.5)**	(13.1)	1	**—**	—

1. Represents the increase/(decrease) reflected in after tax earnings as a result of rate regulated accounting.
2. Tolls on the Enbridge System are calculated in accordance with the ITS, System Expansion Program (SEP) II and the Terrace agreements and are established each year based on capacity, the allowed revenue requirement and the Terrace agreement. Where actual volumes shipped on the pipeline do not result in collection of the annual revenue requirement, a receivable is recognized and incorporated into tolls in the subsequent year. However, recovery is dependent on volumes shipped since each shipper is only responsible for their pro-rata share of the increase in tolls. In addition, other tolling deferrals occur in accordance with the various agreements.
3. Deferred transportation revenue is related to the cumulative difference between GAAP depreciation expense of Alliance and Vector Pipelines and depreciation expense included in the regulated transportation rates. The Company expects to recover this difference over a number of years when depreciation rates in the transportation agreements are expected to exceed the GAAP depreciation rates, for Alliance beginning in 2011 and ending in 2025 and for Vector beginning in 2008 and ending in 2023. This regulatory asset is not included in the rate base.
4. The transportation revenue adjustment is the cumulative difference between actual expenses of Alliance US and estimated expenses included in transportation rates. The transportation revenue adjustment is recoverable under the long-term transportation agreements and is not included in the rate base.
5. A regulatory deferral account captures the difference between EGNB's distribution revenues and its cost of service revenue requirement during the development period. The regulatory deferral account balance will be amortized over a recovery period approved by the PUB commencing at the end of the development period, currently expected in 2010. In a January 2005 decision, the PUB indicated that the recovery period would end no sooner than December 31, 2040.
6. Deferred taxes recoverable relate to a former rental water heater program of EGD. On November 1, 2004, the OEB authorized EGD to collect $23.9 million after tax from ratepayers over a three-year period ending October 1, 2007. Collections are applied against the receivable and therefore do not impact earnings.

7. Class action lawsuit settlement deferral represents amounts paid towards the settlement of the class action lawsuit related to late payment penalties. This amount is expected to be recovered in future periods, subject to OEB approval.
8. Gas Distribution Access Rule (GDAR) receivable represents amounts that are expended for the GDAR implementation, mandated by the OEB, which includes costs relating to consulting services for system design and development. The amount will be recovered from ratepayers in future periods, in accordance with the OEB's approval.
9. Ontario hearing costs are incurred by EGD for the rate hearing process. EGD has historically been granted OEB approval for recovery of such hearing costs, generally within two years.
10. Purchased gas variance is the difference between the actual and approved cost of gas, including risk management costs. The approved cost of gas is reflected in rates. EGD has historically been granted approval for recovery or required refund of this variance within the year.
11. Unaccounted for gas variance represents the difference between the total gas distributed by EGD and the amount of gas billed or billable to ratepayers, to the extent it is different from the approved gas variance. EGD has deferred unaccounted for gas variance and has historically been granted approval for recovery or required refund of this amount in the subsequent year.
12. Deferred rebates are an accumulation of amounts required by the OEB to be refunded to EGD ratepayers but remain pending due to the inability to locate certain ratepayers. This amount will be refunded to ratepayers in the following year.
13. Transactional services deferral represents the ratepayer portion of excess earnings generated from optimization of storage and pipeline capacity. EGD has historically been required to refund the amount to ratepayers in the following year.

Other Items Affected by Rate Regulation

Future Income Taxes

The regulated operations of the Company recover tax expense using the taxes payable method when prescribed by regulators for ratemaking purposes or when stipulated in ratemaking agreements. Therefore, rates do not include the recovery of future income taxes related to temporary differences. Consequently, the Company does not record future income taxes for regulated activities as the Company expects that all future income taxes will be recovered in rates when they become payable. GAAP requires the recognition of future income tax liabilities and future income tax assets in the absence of rate regulation. In the absence of rate regulation, future income taxes liabilities of $584.0 million (2005 – $654.1 million) associated with certain assets, primarily property, plant and equipment, would be recorded.

Net future income tax liabilities of $32.9 million (2005 – $77.8 million) are recorded and relate to certain regulatory deferral accounts identified above. Accumulated unrecorded future income tax assets of $64.7 million (2005 – $71.9 million) relate to the remaining regulatory deferral accounts identified above. In the absence of rate regulation, regulatory deferrals would not be recorded nor would the associated future income tax liabilities. As a result of these tax impacts, earnings during the year would increase by $65.0 million (2005 – decrease $10.0 million).

Allowance For Funds Used During Construction (AFUDC) and Other Capitalized Costs

AFUDC is included in the cost of property, plant and equipment and is depreciated over future periods as part of the total cost of the related asset. AFUDC includes both an interest component and, if approved by the regulator, a cost of equity component. In the absence of rate regulation, GAAP would permit the capitalization of only the interest component. Therefore, the capitalized equity component, the corresponding earnings during the construction phase, and the subsequent depreciation would not be recognized.

Certain regulators prescribe the pool method where similar assets with comparable useful lives are grouped and depreciated as a pool. When those assets are retired or otherwise disposed of, gains and losses are not reflected in income, but are booked as an adjustment to accumulated depreciation. Entities not subject to rate regulation write off the net book value of the retired asset and include any resulting gain or loss in earnings. With the pool method, it is not possible to identify the carrying value of the equity component of AFUDC or its effect on depreciation. Similarly, gains or losses on the retirement of specific fixed assets in any given year cannot be identified or quantified.

Operating Cost Capitalization

With the approval of the regulator, EGD capitalizes a percentage of certain operating costs into the rate base. EGD is authorized to charge depreciation and earn a return on the net book value of such capitalized costs in future years. In the absence of accounting for the effects of rate regulation, such costs would be charged to current earnings.

EGD entered into a consulting contract relating to asset management initiatives. The majority of the costs are being capitalized to gas mains in accordance with regulatory approval. At December 31, 2006, $66.4 million (2005 – $48.1 million) was included in gas mains, which are depreciated over the average service life of 25 years. In the absence of accounting for the effects of rate regulation, the majority of these costs would be charged to current earnings.

Pension Plans

Contributions made to the defined benefit pension plan for the regulated operations of Gas Distribution and Services are expensed as paid, consistent with the recovery of such costs in rates. GAAP requires pension costs and obligations for defined benefit pension plans to be determined using the projected benefit method and charged to earnings as services are rendered. Had pension costs and obligations been recognized, the net pension asset would have increased by $157.1 million at December 31, 2006 (2005 – $191.8 million) and earnings would have decreased by $0.5 million (2005 – $0.9 million).

Post-Employment Benefits Other than Pensions

The cost of providing post-employment benefits other than pensions (OPEB) for the regulated operations of Gas Distribution and Services is expensed when paid, consistent with the recovery of such costs in rates. In the absence of accounting for the effects of rate regulation, the cost of such benefits is accrued during the years employees render service. Had these costs been accrued, the net OPEB liability would have increased by $67.1 million (2005 – $60.2 million) and earnings would have decreased by $5.5 million (2005 – $4.0 million).

4. SEGMENTED INFORMATION

Year ended December 31, 2006

The measurement basis for preparation of segmented information is consistent with the significant accounting policies described in Note 1.

1. Corporate includes new business development activities and investing and financing activities, including general corporate investments and financing costs not allocated to the business segments.
2. Gas Distribution and Services includes 15 months of results for EGD and other gas distribution businesses, for the year end December 31, 2004. This change eliminated the quarter lag basis of consolidation and resulted in additional earnings of $57.2 million.
3. Depreciation and amortization expense in Gas Distribution and Services includes a $12.4 million impairment loss on the Calmar Gas Plant.

		2,299.4	1,842.8

Equity investments include the unamortized excess of the purchase price over the underlying net book value of the investee's assets at the purchase date of $617.5 million at December 31, 2006 (2005 – $560.1 million). The excess is attributable to the value of property, plant and equipment within the investees based on estimated fair values and is amortized over the economic life of the assets. Consolidated retained earnings at December 31, 2006 include undistributed earnings from equity investments of $10.4 million (2005 – $12.3 million).

The Partnership

The Company has a combined 16.6% ownership in EEP, through a 2.0% interest in general partner units, a 5.0% interest in Class B units, a 6.9% interest in Class C units, and a 2.7% interest in EEP via a 17.2% investment in EEM, which owns 100% of EEP's i-units.

The aggregate Class B, Class C and general partner units are recorded at $560.5 million (2005 – $246.5 million). Although 82.8% of EEM is widely held, the Company has voting control, and therefore consolidates EEM, including its investment in EEP of $545.0 million (2005 – $491.6 million). As a result, in 2006, the Company recorded EEM's equity investment income of $52.2 million (2005 – $14.4 million) and non-controlling interests of $27.8 million (2005 – $12.4 million).

During the year, the Company acquired 5.4 million Class C units of EEP for $280.2 million. The Class C units have the same voting rights as Class A and B units and are entitled to quarterly distributions equal to those paid to Class A and B unitholders. Prior to August 15, 2009, distributions are paid in additional Class C units, where Class C units are valued at the market value of Class A units. After August 15, 2009, distributions will be paid in cash and, subject to the approval of existing Class A and Class B unitholders, Class C units will convert to Class A units on a one-to-one basis. If approval of the conversion is not received, the Class C units will receive cash distributions equal to 115% of those paid to Class A unitholders.

In 2005, EEP completed public issuances of partnership units. As the Company elected not to fully participate in these offerings, its effective interest in EEP was reduced to 10.9% from 11.6%, resulting in recognition of a dilution gain of $8.9 million (2004 – $7.6 million), net of tax and minority interest.

Noverco

The Company owns a cost investment in Noverco of $181.4 million (2005 – $181.4 million), which is entitled to a cumulative preferred dividend based on the average yield of Government of Canada bonds maturing in greater than 10 years plus 4.34%. The fair value of the investment approximates its carrying value as its return is based on a floating rate.

The Company also owns an equity investment in the common shares of Noverco of $37.0 million (2005 – $28.7 million). Noverco owns an approximate 9.5% reciprocal shareholding in the shares of the Company. As a result, the Company has an indirect pro-rata interest of 3.2% (2005 – 3.2%) in its own shares. Both the equity investment in Noverco and shareholders' equity have been reduced by the reciprocal shareholding of $135.7 million (2005 – $135.7 million). Noverco records dividends paid by the Company as dividend income and the Company eliminates these dividends from the earnings of Noverco. The Company records the pro-rata portion of dividends paid by the Company to Noverco as a reduction of dividends paid and an increase in the Company's investment in Noverco.

In 2005, the Company reclassified $51.2 million in dividends paid to Noverco representing the reciprocal portion of dividends paid to Noverco from September 1, 1997 to December 31, 2004. The reclassification increased equity investments and retained earnings by $51.2 million.

CLH

The Company owns a 25% equity interest in CLH of $662.2 million (2005 – $596.1 million), a refined products transportation and storage company in Spain.

OCENSA

The Company owns a cost investment in OCENSA, a crude oil export pipeline in Colombia of $223.3 million (2005 – $223.3 million), which earns a fixed rate of return. The fair value of this investment is approximately $245.9 million (2005 – $257.9 million), estimated using year-end market information.

Enbridge Income Fund

The Company owns 14.5 million subordinated units of EIF and 38.0 million preferred units of Enbridge Commercial Trust (ECT), a subsidiary of EIF, at December 31, 2006. The Company consolidates EIF in accordance with the accounting guideline for Consolidation of Variable Interest Entities, prior to January 1, 2005, EIF was accounted for as an equity investment and the ECT preferred units were accounted for as a cost investment. The market value of the subordinated units of EIF at December 31, 2006 is $191.4 million (2005 – $210.0 million).

At the request of the Company, subject to certain conditions, ECT will repurchase and cancel the ECT preferred units based on the net issue price realized from the sale (or that could be realized from the sale) of an ordinary trust unit to the public. The ECT preferred units have no voting rights and mature on June 30, 2033 at which time ECT is obligated to redeem all of the outstanding ECT preferred units for a price of ten dollars per unit. The economic

terms of these units are similar to those of ordinary common units. As such, the approximate fair value of these preferred units, valued at the December 31, 2006 closing price of $13.20 per ordinary trust unit (2005 – $14.48), is $501.9 million (2005 – $550.6 million).

9. DEFERRED AMOUNTS AND OTHER ASSETS

(millions of dollars)

December 31,	2006	2005
Regulatory deferrals	**395.9**	336.3
Contractual receivables	**142.8**	132.5
Long-term portion of hedge fair value changes	**205.1**	221.1
Deferred pension funding	**56.0**	61.7
Deferred financing charges	**52.7**	42.8
Other	**72.0**	56.3
	924.5	850.7

At December 31, 2006, deferred amounts of $146.8 million (2005 – $129.8 million) were subject to amortization and are presented net of accumulated amortization of $67.6 million (2005 – $62.1 million). Amortization expense in 2006 was $10.1 million (2005 – $12.5 million; 2004 – $13.9 million).

1. Primarily commercial paper borrowings.

2. Primarily commercial paper borrowings. Includes US$348.4 million (2005 – US$256.9 million).

Short-term debt of $1,519.1 million (2005 – $1,340.5 million) is supported by the availability of long-term committed credit facilities and has been classified as long-term debt.

Long-term debt maturities for the years ending December 31, 2007 through 2011 are $537.0 million, $602.7 million, $200.9 million, $601.1 million and $151.1 million, respectively. The Company's debentures and medium-term notes bear interest at fixed rates.

The Company has $200.0 million of 7.8% Preferred Securities outstanding. The Preferred Securities are redeemable on February 15, 2007. On December 18, 2006 the Company announced its intention to redeem all

8,000,000 Preferred Securities. The redemption price is $25.00 per Preferred Security plus accrued and unpaid interest of $0.2458 per security for the period covering from the last interest payment date of December 31, 2006 to the redemption date of February 15, 2007.

Interest Expense

(millions of dollars)

Year ended December 31,	**2006**	2005	2004
Long-term debt	**403.4**	382.8	442.8
Non recourse long-term debt	**104.9**	112.1	54.5

Capitalized	**(20.6)**	(9.0)	(4.2)
	567.1	539.2	525.3

In 2006, total interest paid was $563.3 million (2005 – $537.1 million; 2004 – $549.3 million).

Credit Facilities

(millions of dollars)

December 31, 2006	Expiry Dates	Available	Drawdowns
Liquids Pipelines	2007	150.0	—
Gas Distribution and Services	2007	1,005.8	2.7
Corporate	2007-2011	1,908.7	291.3
		3,064.5	294.0

Credit facilities carry a weighted average standby fee of 0.064% per annum on the unutilized portion and drawdowns bear interest at prevailing market rates. The credit facilities serve as a backstop to the commercial paper programs and the Company has the option to extend the facilities from 2007 to 2008.

13. NON – RECOURSE DEBT

(millions of dollars)

December 31,	Weighted Average Interest Rate	Maturity	**2006**	2005

Senior Notes of Alliance Pipeline Canada	6.80%	2015-2025	**733.7**	761.6
Fair value increment on Senior Notes acquired			**48.2**	53.5
Total Non -Recourse Debt			**1,682.1**	1,688.1
Current Maturities			**(60.1)**	(68.2)
Long -Term Non-Recourse Debt			**1,622.0**	1,619.9

Long-term debt maturities on non-recourse borrowings for the years ending December 31, 2007 through 2011 are $60.1 million, $65.0 million, $241.3 million, $79.3 million and $106.8 million, respectively.

Alliance Pipeline US

The Senior Notes bear interest at fixed rates, are payable semi-annually each June 30 and December 31. The credit facility is an extendible revolving facility with a five year term.

Enbridge Income Fund

The Medium Term Notes (MTNs) bear interest at fixed rates and are redeemable by EIF prior to maturity, in whole or in part, at the option of EIF. Interest on the MTNs is payable semi-annually in June and December. EIF has a three year revolving credit facility. Interest on the Senior Notes of Alliance Pipeline Canada bears interest at fixed rates, is payable semi-annually in June and December. Alliance Pipeline Canada's credit facility is an extendible revolving facility with a five year term.

14. NON – CONTROLLING INTERESTS

(millions of dollars)

December 31,	2006	2005
EEM	**398.5**	370.1
EGD preferred shares	**100.0**	100.0
EIF	**167.3**	165.5
EGNB	**39.8**	46.9
Other	**9.6**	8.5
	715.2	691.0

Non-controlling interest in EEM represents the 82.8% of the listed shares of EEM not held by the Company.

The Company owns 100% of the common shares of EGD; however, the 4,000,000 4.82% Cumulative Redeemable EGD Preferred Shares held by a third party are entitled to a claim on the assets of EGD prior to the common shareholder. Subsequent to July 1, 2009, EGD may, at its option, redeem all or a portion of the outstanding preferred shares for $25.00 plus all accrued and unpaid dividends to the redemption date. The preferred shares have no fixed maturity date.

Non-controlling interest in EIF represents the 58.1% held by ordinary unitholders. Non-controlling interest in EGNB represents 30.4% held by third parties.

15. SHARE CAPITAL

The authorized share capital of the Company consists of an unlimited number of common shares with no par value and an unlimited number of preferred shares.

Common Shares

(millions of dollars; number of common shares in millions)

December 31,	2006		2005		2004	
	Number of Shares	**Amount**	Number of Shares	Amount	Number of Shares	Amount
Balance at beginning of year	**348.9**	**2,343.8**	346.2	2,282.4	343.8	2,238.0
Exercise of stock options	**2.4**	**53.9**	2.1	40.0	2.0	33.4
Dividend Reinvestment and Share Purchase Plan	**0.5**	**18.4**	0.4	14.6	0.4	11.0
Issued for business acquisition	**—**	**—**	0.2	6.8	—	—
Balance at end of year	**351.8**	**2,416.1**	348.9	2,343.8	346.2	2,282.4

Preferred Shares

The 5,000,000 5.5% Cumulative Redeemable Preferred Shares, Series A are entitled to fixed, cumulative, quarterly preferential dividends of $1.375 per share per year. Subsequent to December 31, 2006, the Company may, at its option, redeem all or a portion of the outstanding preferred shares for $25.25, if redeemed on or prior to December 1, 2007; $25.00, if redeemed thereafter, in each case all accrued and unpaid dividends will be paid on redemption.

Earnings Per Common Share

Earnings per common share is calculated by dividing earnings applicable to common shareholders by the weighted average number of common shares outstanding. The weighted average number of shares outstanding has been reduced by the Company's pro-rata weighted average interest in its own common shares of 10.6 million shares (2005 – 10.6 million shares), resulting from the Company's reciprocal investment in Noverco.

The treasury stock method is used to determine the dilutive impact of stock options. This method assumes that any proceeds from the exercise of stock options would be used to purchase common shares at the average market price during the period.

(number of common shares in millions)

December 31,	**2006**	2005	2004
Weighted average shares outstanding	**340.0**	337.4	334.4
Effect of dilutive options	**3.3**	3.8	2.8
Diluted weighted average shares outstanding	**343.3**	341.2	337.2

For the year ended December 31, 2006, 1,548,900 anti-dilutive stock options (2005 – nil; 2004 – 1,750,800) with a weighted average exercise price of $36.47 (2004 – $25.73) were excluded from the diluted earnings per share calculation.

Dividend Reinvestment and Share Purchase Plan

Under the plan, registered shareholders may reinvest dividends in common shares of the Company and make additional optional cash payments to purchase common shares, free of brokerage or other charges.

Shareholder Rights Plan

The Shareholder Rights Plan is designed to encourage the fair treatment of shareholders in connection with any takeover offer for the Company. Rights issued under the plan become exercisable when a person, and any related parties, acquires or announces its intention to acquire 20% or more of the Company's outstanding common shares without complying with certain provisions set out in the plan or without approval of the Company's Board of Directors. Should such an acquisition occur, each rights holder, other than the acquiring person and related parties, will have the right to purchase common shares of the Company at a 50% discount to the market price at that time.

16. STOCK OPTION AND STOCK UNIT PLANS

The Company maintains three plans for mid to long-term incentive compensation: the Incentive Stock Option Plan (ISO), the Performance Stock Unit Plan (PSU) and the Restricted Stock Unit Plan (RSU). The Company's ISO Plan includes Fixed Stock Options (FSOs) and Performance Based Stock Options (PBOs). A maximum of 30 million common shares are reserved for issuance under the ISO plan. The PSU and RSU plans grant notional units equivalent to one Enbridge common share and are payable in cash.

Fixed Stock Options

Key employees are granted FSOs to purchase common shares at the market price on the grant date. Generally, FSOs vest in equal annual installments over a four-year period and expire ten years after the issue date. Compensation expense recorded for the year ended December 31, 2006 for FSOs is $10.5 million (2005 – $5.5 million; 2004 – $3.7 million).

Outstanding Fixed Stock Options

(options in thousands; exercise price in dollars)

December 31,	2006		2005		2004	
	Number	Weighted Average Exercise Price	Number	Weighted Average Exercise Price	Number	Weighted Average Exercised Price
Options at beginning of year	**9,434**	**22.09**	9,650	19.86	9,482	17.98
Options granted	**1,595**	**36.41**	1,533	31.70	1,782	25.74
Options exercised	**(1,698)**	**19.38**	(1,617)	17.51	(1,558)	15.04
Options cancelled or expired	**(145)**	**28.81**	(132)	26.39	(56)	23.65
Options at end of year	**9,186**	**24.97**	9,434	22.09	9,650	19.86
Options vested	**5,323**	**20.54**	5,248	18.74	5,042	17.21

The total intrinsic value of FSOs exercised during the year ended December 31, 2006 was $27.8 million (2005 – $21.3 million; 2004 – $17.2 million) and cash received on exercise was $32.9 million (2005 – $28.3 million; 2004 – $23.4 million). Intrinsic value represents the difference between the Company's share price and the exercise price, multiplied by the number of options.

The total intrinsic value of FSOs outstanding and vested at December 31, 2006 was $99.1 million and $81.0 million, respectively.

Fixed Stock Option Characteristics

(options in thousands; exercise price in dollars)

December 31, 2006	Options Outstanding			Options Vested	
Exercise Price Range	Number (000's)	Weighted Average Remaining Life (years)	Weighted Average Exercise Price	Number (000's)	Weighted Average Exercise Price
10.00-14.99	**692**	**2.5**	**13.20**	**692**	**13.20**
15.00-19.99	**1,613**	**2.9**	**18.18**	**1,613**	**18.18**
20.00-24.99	**2,459**	**5.3**	**21.26**	**2,008**	**21.36**
25.00-29.99	**1,484**	**6.9**	**25.74**	**679**	**25.74**
30.00-34.99	**1,433**	**8.0**	**31.79**	**331**	**31.70**

	9,186	**6.0**	**24.97**	**5,323**	**20.54**

Assumptions used to determine the fair value of the FSOs using the Black-Scholes model are as follows:

Year ended December 31,	2006	2005	2004
Fair value per option (dollars)	**6.30**	5.31	3.85
Valuation assumptions[1]			
Expected option term (years)	**8**	8	8
Expected volatility	**19%**	16%	15%
Expected dividend yield	**3.23%**	3.17%	3.54%
Risk-free interest rate	**4.16%**	4.40%	4.80%

1. The expected option term and the expected volatility are based on historical information.

Performance Based Options

PBOs are granted to executive officers and become exercisable when both performance targets and service requirements have been met. As of December 31, 2006, all performance targets have been met. Service requirements are fulfilled evenly over a five-year term ending September 2007. Outstanding PBOs will expire on September 16, 2010.

Outstanding Performance Based Options

(options in thousands; exercise price in dollars)

December 31,	**2006**		2005		2004	
	Number	**Weighted Average Exercise Price**	Number	Weighted Average Exercise Price	Number	Weighted Average Exercise Price
Options at beginning of year	**2,105**	**21.57**	2,555	20.68	2,992	20.03
Options exercised	**(645)**	**18.00**	(450)	16.51	(437)	16.20
Options cancelled	**(81)**	**23.15**	—	—	—	—

Options vested	**1,119**	**23.15**	1,457	20.87	936	16.41

The total intrinsic value of PBOs exercised during the year ended December 31, 2006 was $11.4 million (2005 – $7.8 million; 2004 – $4.3 million) and cash received on exercise was $11.6 million (2005 – $7.4 million; 2004 – $7.1 million).

The total intrinsic value of PBOs outstanding and vested at December 31, 2006 is $17.4 million and $14.1 million, respectively.

Contributed Surplus

(millions of dollars)

December 31,	**2006**	2005
Balance at beginning of year	**10.0**	5.4
Stock-based compensation	**10.5**	5.5
Option exercises	**(2.2)**	(0.9)
Balance at end of year	**18.3**	10.0

Pro Forma Compensation Expense

If the Company had used the fair value method to account for stock based compensation granted in fiscal 2002, earnings would have been $1.5 million lower for the year ended December 31, 2006 (2005 – $4.0 million; 2004 – $4.0 million), resulting in no reduction in basic earnings per share (2005 & 2004 – $0.01) and no reduction in diluted earnings per share (2005 & 2004 – $0.01).

Unrecognized Compensation Expense

As of December 31, 2006, unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the ISO plan was $13.4 million. The cost is expected to be recognized over a period of 2.5 years.

Performance Stock Units

The Company has a PSU Plan for senior officers where cash awards are paid following a three-year performance cycle. Awards are calculated by multiplying the number of units outstanding at the end of the performance period by the Company's current share price and by a performance multiplier as determined by the Company's total shareholder return over the three-year performance period relative to a specified peer group of companies. The performance multiplier ranges from 0, if the Company's performance fails to meet threshold performance levels, to a maximum of 2, if the Company outperforms its peer group. During the three-year period, the number of PSUs

outstanding is increased to include additional PSUs equal to the number of additional shares that would have been received had the PSUs been treated as shares enrolled in the Dividend Reinvestment Plan (DRIP).

Compensation expense recorded for the year ended December 31, 2006 for PSUs is $4.1 million (2005 – $2.5 million; 2004 – $0.5 million). An estimated performance multiplier of 0.7, 1 and 1 has been used to calculate the expense based upon historical performance for the 2004, 2005 and 2006 grants, respectively.

Outstanding Performance Stock Units

December 31,	2006	2005	2004
Units at beginning of year	**200,652**	67,688	—
Units granted	**117,900**	130,130	65,950
Units cancelled	**—**	(3,265)	—
DRIP	**10,164**	6,099	1,738
Units at end of year	**328,716**	200,652	67,688

Of the PSUs outstanding at December 31, 2006, 71,991 units have a performance period ending March 8, 2007, 135,063 units have a performance period ending January 1, 2008 and 121,662 units have a performance period ending January 1, 2009. The total intrinsic value of PSUs outstanding at December 31, 2006 is $12.4 million.

Restricted Stock Units

On September 1, 2006, the Company granted 181,882 RSUs to certain non-executive employees of the Company. The RSUs mature on November 30, 2008 at which time the RSU holders will receive cash equal to the Company's current share price for each RSU held. During the vesting period, the number of RSUs outstanding is increased to include additional units equal to the number of additional shares that would have been received had the RSUs been treated as shares enrolled in the DRIP. Compensation expense recorded for the year ended December 31, 2006 for RSUs is $0.8 million.

Outstanding Restricted Stock Units

December 31,	2006
Units at beginning of year	**—**
Units granted	**181,882**
DRIP	**1,371**
Units at end of year	**183,253**

The total intrinsic value of RSUs outstanding at December 31, 2006 is $7.4 million.

Unrecognized Compensation Expense

As of December 31, 2006, unrecognized compensation expense related to non-vested units granted under the PSU and RSU plans was $11.3 million, expected to be recognized over a period of 1.8 years.

17. FINANCIAL INSTRUMENTS

Derivative Financial Instruments Used for Risk Management

The Company is exposed to movements in foreign currency exchange rates, interest rates and the price of energy commodities. In order to manage these exposures, the Company utilizes derivative financial instruments to create offsetting financial positions to specific exposures. These exposures include the following:

Foreign Exchange

The Company has exposure to foreign currency exchange rates, arising from its Euro and U.S. dollar denominated investments, where both carrying values and earnings are subject to foreign exchange risk. The Company utilizes par forward contracts and cross currency swaps to manage a portion of the foreign exchange exposure related to changes in carrying values. Cross currency swaps of US$117.0 million (2005 – US$117.0 million) hedge the Company's exposure on its U.S. dollar denominated senior term notes. In addition, long-term fixed rate debt of

US$300.0 million (2005 – US$300.0 million) hedges the carrying value of U.S. dollar denominated investments. The Company also utilizes foreign exchange contracts to manage exposure related to foreign currency denominated receivables and payables. The fair value of foreign exchange derivatives that are designated as hedges of foreign investments are recognized on the balance sheet, while foreign exchange derivative instruments that are designated as cash flow hedges are accounted for on a settlement basis.

Interest Costs

The Company enters into interest rate agreements such as swaps and collars to convert floating rate debt to a fixed rate in order to hedge against the effect of future interest rate movements on its interest expense. In addition, the Company has entered into fixed to floating interest rate swaps, with an aggregate notional amount of $nil (2005 – $300.0 million), to manage its balance of fixed and floating rate debt.

Energy Commodity Costs

The Company uses gas price swaps, futures, options and collars to manage the value of commodity purchases and sales that arise from capacity commitments on the Alliance and Vector pipelines. The Company also uses derivative instruments to fix the value of variable price exposures that arise from commodity storage arrangements and natural gas supply agreements.

The Company uses over-the-counter swap agreements to convert the price of power in Alberta from a floating rate to a fixed rate per megawatt hour (MW/H) or convert fixed rate power to a floating rate.

Natural Gas Supply Management

The Company hedges a portion of the cost of future natural gas supply requirements of EGD, on behalf of its ratepayers, as permitted by the regulator. Amounts paid or received under the agreements are recognized as part of the cost of the natural gas purchases and are recovered through the ratemaking process. At December 31, 2006, the Company had entered into natural gas price swaps and options to manage the price for approximately 20.8%, or 28.0 billion cubic feet (bcf), of its forecast fiscal 2007 system gas supply.

Credit Risk

Entering into derivative financial instruments can give rise to additional credit risks. Credit risk arises from the possibility that a counterparty will default on its contractual obligations and is limited to those contracts where the Company would incur a loss in replacing the instrument. The Company minimizes credit risk by entering into risk management transactions only with institutions that possess high investment grade credit ratings or have provided the Company with an acceptable form of credit protection. The Company has no significant concentration with any single counterparty. For transactions with terms greater than five years, the Company may also require a counterparty that would otherwise meet the Company's credit criteria to provide collateral. The Company has credit risk of $267.3 million (2005 – $352.4 million) related to its derivative counterparties.

Trade receivables include amounts due from companies operating in the oil and gas industry and are collateralized by the commodities contained in the Company's pipelines and storage facilities. Where shippers fail to maintain specified credit ratings, they are required to provide letters of credit or other suitable security. Credit risk in the Gas Distribution and Services segment is reduced by the large and diversified customer base and the ability to recover an estimate for doubtful accounts through the ratemaking process. Included in accounts receivable is an allowance for doubtful accounts of $50.6 million at December 31, 2006 (2005 – $41.4 million). For customers of our non-regulated businesses, credit exposure is minimized through the use of credit monitoring processes, contractual agreements with collateral requirements, master netting agreements, and credit exposure limits.

Fair Values

The fair values of derivatives have been estimated using year-end market information. These fair values approximate the amount that the Company would receive or pay to terminate the contracts.

(millions of dollars unless otherwise noted)

December 31,	2006 Notional Principal or Quantity	2006 Fair Value Receivable/ (Payable)	2006 Maturity	2005 Notional Principal or Quantity	2005 Fair Value Receivable/ (Payable)	2005 Maturity
Foreign exchange						
U.S. cross currency swaps	**307.3**	**(0.5)**	2007-2022	307.3	(2.9)	2007-2022
Euro cross currency swaps	**447.6**	**(9.9)**	2007-2019	447.6	39.6	2006-2019
Forwards (cumulative exchange amounts)	**1,536.7**	**231.3**	2007-2022	1,640.1	241.6	2006-2022
Interest rates						
Interest rate swaps	**1,947.3**	**(17.2)**	2007-2029	1,104.4	0.1	2006-2029
Energy commodities						
Energy commodity (bcf)	**100.1**	**(12.9)**	2007-2011	130.5	18.1	2006-2011
Natural gas supply (bcf)	**29.1**	**(26.6)**	2007	27.3	(6.7)	2006
Power (MW/H)	**25.8**	**(8.3)**	2007-2024	28.0	0.8	2006-2017

In addition, the Company has Canadian to U.S. dollar forward foreign exchange contracts with a notional principal of Canadian $91.0 million that expire in 2007 (2005 – $91.0 million). The contracts are not effective hedges for accounting purposes but provide an economic hedge of an exposure related to income taxes on foreign currency gains or losses on Canadian dollar debt of a U.S. subsidiary. These instruments are recorded at fair value in deferred amounts and have a fair value payable of $14.5 million as at December 31, 2006 (2005 – $14.3 million).

The fair value of financial instruments, other than derivatives, represents the amounts that would have been received from or paid to counterparties to settle these instruments at the reporting date. The carrying amount of all financial instruments classified as current approximates fair value because of the short maturities of these instruments. The fair value of other financial instruments reflect the Company's best estimates of market value based on generally accepted valuation techniques or models.

Total Debt

Gas Distribution and Services	**2,258.2**	**2,613.8**	1,786.7	2,184.2
Corporate	**4,177.2**	**4,294.0**	3,854.2	4,076.3
	7,591.0	**8,209.4**	6,680.3	7,461.9

The fair value of debt does not include the effects of hedging. Non-recourse debt has a carrying value of $1,682.1 million (2005 – $1,688.1 million) and a fair value of $1,786.6 million (2005 – $1,775.1 million).

Interest Rate Management

The derivative instruments used to manage interest rate risk and the associated debt related to these instruments are as follows:

(millions of dollars)

December 31, 2006	Maturity	Effective Interest Rate[1]	Notional Amounts
Liquids Pipelines			
Commercial paper (floating to fixed interest swap)	2029	6.0%	25.4
Corporate			
Commercial paper (floating to fixed interest swap)	2007	4.1%	600.0
Commercial paper (floating to fixed interest swap)	2008-2019	4.4%	US$ 169.0
Senior term notes (cross currency swap)	2007	7.5%	US$ 117.0

1. After giving effect to the derivative financial instruments.

18. INCOME TAXES

Income Tax Rate Reconciliation

(millions of dollars)

Year ended December 31,	2006	2005	2004
Earnings before income taxes	**814.6**	784.2	941.4
Combined statutory income tax rate	**34.4%**	35.2%	35.5%
Income taxes at statutory rate	**280.2**	276.0	334.2
Increase/(decrease) resulting from:			
Tax rate changes on future income tax balances	**(63.0)**	1.2	42.7
Future income taxes related to regulated operations	**(10.5)**	(15.3)	(13.7)
Non-taxable items, net	**(21.4)**	(44.1)	(72.7)
Lower foreign tax rates	**(6.7)**	(9.6)	(15.1)
Large Corporations Tax in excess of surtax	**—**	15.1	10.0
Other	**13.7**	(2.0)	3.8
Income Taxes	**192.3**	221.3	289.2
Effective income tax rate	**23.6%**	28.2%	30.7%

In 2006, income taxes paid amounted to $182.6 million (2005 – $150.3 million; 2004 – $243.2 million).

Components of Future Income Taxes

(millions of dollars)

December 31,	2006	2005
Future Income Tax Liabilities		
Differences in accounting and tax bases of property, plant and equipment	**639.8**	572.8
Differences in accounting and tax bases of investments	**375.6**	356.1
Other	**201.7**	224.8
	1,217.1	1,153.7
Future Income Tax Assets		
Loss carryforwards	**257.9**	230.2
Other	**96.8**	49.4
	354.7	279.6
Total Net Future Income Tax Liability	**862.4**	874.1

At December 31, 2006, the Company has recognized the benefit of unused tax loss carryforwards of $760.6 million (2005 – $660.8 million). Unused tax loss carryforwards expire as follows: 2007 – $0.5 million; 2008 – $15.9 million; 2009 – $7.2 million; 2010 – $2.2 million; 2014 – $1.7 million; and 2015 – $5.9 million and 2019 and beyond – $727.2 million.

Geographic Components of Pretax Earnings and Income Taxes

19. POST — EMPLOYMENT BENEFITS

Pension Plans

The Company has three basic pension plans, which provide either defined benefit or defined contribution pension benefits, or both to employees of the Company. The Liquids Pipelines and Gas Distribution and Services pension plans provide Company funded defined benefit pension and/or defined contribution benefits to Canadian employees of Enbridge. The Enbridge U.S. pension plan provides Company funded defined benefit pension benefits for U.S. based employees. The Company has four supplemental pension plans, which provide pension benefits in excess of the basic plans for certain employees.

Defined Benefit Plans

Benefits payable from the defined benefit plans are based on members' years of service and final average remuneration. These benefits are partially inflation indexed after a member's retirement. Contributions by the Company are made in accordance with independent actuarial valuations and are invested primarily in publicly-traded equity and fixed income securities. The effective dates of the most recent actuarial valuations and the next required actuarial valuations for the basic plans are as follows:

	Effective Date of Most Recently Filed Actuarial Valuation	Effective Date of Next Required Actuarial Valuation
Liquids Pipelines	January 1, 2004	January 1, 2007
Enbridge U.S.	January 1, 2006	January 1, 2007
Gas Distribution and Services	January 1, 2005	January 1, 2008

The defined benefit pension plan costs have been determined based on management's best estimates and assumptions of the rate of return on pension plan assets, rate of salary increases and various other factors including mortality rates, terminations and retirement ages.

Defined Contribution Plans

Contributions are generally based on the employee's age, years of service and remuneration. For defined contribution plans, pension costs equal amounts required to be contributed by the Company. Pension costs in respect of these plans during the year were $3.0 million (2005 – $2.4 million; 2004 – $2.3 million).

Post-employment Benefits Other than Pensions

Post-employment benefits other than pensions (OPEB) primarily include supplemental health, dental, health spending account and life insurance coverage for qualifying retired employees.

The following tables detail the changes in the benefit obligation, the fair value of plan assets and the recorded asset or liability for the Company's defined benefit pension plans and OPEB plans using the accrual method.

(millions of dollars)	OPEB		Pension Benefit	
	2006	2005	**2006**	2005
Change in accrued benefit obligation				
Benefit obligation, January 1	**191.6**	170.3	**1,039.3**	847.9
Service cost	**5.2**	4.4	**37.5**	25.5
Interest cost	**10.0**	10.5	**54.2**	52.7
Amendments	**—**	(5.8)	**2.9**	—
Employee contributions	**0.4**	0.4	**—**	—
Actuarial loss (gain)	**(7.7)**	20.4	**17.3**	159.0
Benefits paid	**(6.2)**	(5.8)	**(42.5)**	(41.7)
Effect of exchange rate changes	**(0.1)**	(2.8)	**0.3**	(4.1)
Benefit obligation, December 31	**193.3**	191.6	**1,109.0**	1,039.3
Change in plan assets				
Fair value of plan assets, January 1	**43.3**	40.2	**1,191.1**	1,061.8
Actual return on plan assets	**1.5**	1.0	**78.8**	161.9
Employer's contributions	**11.0**	8.7	**0.7**	14.2
Employee's contributions	**0.4**	0.4	**—**	—
Benefits paid	**(6.2)**	(5.8)	**(42.5)**	(41.7)
Other	**—**	—	**(1.1)**	(0.9)
Effect of exchange rate changes	**0.2**	(1.2)	**0.1**	(4.2)
Fair value of plan assets, December 31	**50.2**	43.3	**1,227.0**	1,191.1
Funded Status				
Benefit Obligation, December 31	**(193.3)**	(191.6)	**(1,109.0)**	(1,039.3)
Fair value of plan assets, December 31	**50.2**	43.3	**1,227.0**	1,191.1
Overfunded/(Underfunded) status, December 31	**(143.1)**	(148.3)	**118.0**	151.8
Contribution after measurement date	**0.4**	0.8	**16.7**	—
Unamortized prior service cost	**—**	—	**15.5**	14.5
Unamortized transitional obligation/(asset)	**13.4**	14.7	**(19.8)**	(22.0)
Unamortized net loss	**46.0**	57.2	**93.1**	118.3
Net amount recognized December 31	**(84.1)**	(75.6)	**223.5**	262.6

The amounts recognized include all of the Company's plans. However, the Gas Distribution and Services plans are funded through regulated rates on a cash basis and are not recorded as net pension assets or liabilities. Excluding Gas Distribution and Services plans, the Company's plans using the accrual method provide for a net pension asset of $66.4 million (2005 – $70.8 million) and a net OPEB liability of $17.0 million (2005 – $15.4 million). These net assets or liabilities are recorded on the balance sheet in Deferred Amounts and Other Assets with the current portion recorded in working capital accounts.

The weighted average assumptions made in the measurement of the projected benefit obligations of the pension plans and OPEB are as follows:

	OPEB			Pension Benefits		
Year ended December 31,	**2006**	2005	2004	**2006**	2005	2004
Discount rate	**5.37%**	5.30%	6.21%	**5.27%**	5.24%	6.26%
Average rate of salary increases				**5.00%**	4.44%	4.00%

Net Pension Plan and OPEB Costs Recognized

(millions of dollars)

Year ended December 31,	2006	2005	2004
Benefits earned during the year	**45.7**	32.3	29.0
Interest cost on projected benefit obligations	**64.2**	63.2	58.8
Actual return on plan assets	**(80.3)**	(162.9)	(111.7)
Difference between actual and expected return on plan assets	**(3.4)**	87.3	41.1
Amortization of prior service costs	**2.0**	2.3	2.3
Amortization of transitional obligation	**(0.8)**	0.2	0.1
Amortization of actuarial loss	**15.3**	9.6	12.2
Special Termination Benefits	**—**	—	3.3
Amount charged to EEP	**(10.5)**	(10.2)	(7.8)
Pension and OPEB cost recognized	**32.2**	21.8	27.3

The table reflects the pension and OPEB cost for all of the Company's benefit plans on an accrual basis. Using the cash basis for Gas Distribution and Services rate regulated plans and the accrual method for all other plans, the Company's pension cost was $20.1 million (2005 – $11.6 million; 2004 – $11.6 million), and its OPEB cost was $7.0 million for 2006 (2005 – $5.9 million; 2004 – $5.8 million)

The weighted average assumptions made in the measurement of the cost of the pension plans and OPEB are as follows:

	OPEB			Pension Benefits		
Year ended December 31,	2006	2005	2004	2006	2005	2004
Discount rate	**5.30%**	6.21%	6.31%	**5.24%**	6.26%	6.29%
Average rate of salary increases				**4.44%**	4.00%	4.00%
Average rate of return on pension plan assets	**4.50%**	4.50%	4.50%	**7.31%**	7.31%	7.32%

Medical Cost Trend Rates

The assumed rates for the next year used to measure the expected cost of benefits are as follows:

	Medical Cost Trend Rate Assumption for Next Fiscal Year	Ultimate Medical Cost Trend Rate Assumption	Year in which Ultimate Medical Cost Trend Rate Assumption is Achieved
Canadian Plans			
Drugs	10%	5%	2016
Other Medical and Dental	5%	5%	2006
Enbridge U.S.	10%	5%	2012

A one percent increase in the assumed medical and dental care trend rate would result in an increase of $30.0 million in the accumulated post-employment benefit obligations and an increase of $2.8 million in benefit and interest costs. A one percent decrease in the assumed medical and dental care trend rate would result in a decrease of $24.1 million in the accumulated post-employment benefit obligations and a decrease of $2.2 million in benefit and interest costs.

Major Categories of Plan Assets

(millions of dollars)	OPEB				Pension Benefit			
Year ended December 31,		**2006**		2005		**2006**		2005
	Target	**%**	**Amount**	%	Target	**%**	**Amount**	%
Equity securities	**—**	**—**	**—**	—%	**60%**	**61.1%**	**799.5**	58.8%
Fixed income securities	**100%**	**86.9%**	**43.6**	84.8%	**40%**	**34.0%**	**436.4**	31.7%
Other	**—**	**13.1%**	**6.6**	15.2%	**—**	**4.9%**	**68.0**	9.5%
Total Assets	**100%**	**100%**	**50.2**	100.0%	**100%**	**100%**	**1,303.9**	100%
Assets attributable to former Affiliates			**—**				**(76.9)**	
			50.2				**1,227.0**	

Plan assets are invested primarily in readily marketable investments with constraints on the credit quality of fixed income securities.

Expected Rate of Return on Plan Assets

	OPEB		Pension Benefit	
Year ended December 31,	**2006**	2005	**2006**	2005
Canadian Plans	4.5%	4.50%	7.25%	7.25%
United States Plan	4.5%	4.50%	7.25%	7.75%

The Company manages the investment risk of its pension funds by setting a long term asset mix policy for each pension fund after consideration of: (i) the nature of pension plan liabilities; (ii) the investment horizon of the plan; (iii) the going concern and solvency funded status and cash flow requirements of the plans; (iv) the operating environment and financial situation of the Company and its ability to withstand fluctuations in pension contributions; and (v) the future economic and capital markets outlook with respect to investment returns, volatility of returns and correlation between assets. The overall expected rate of return is based on the asset allocation targets with estimates for returns on equity and debt securities based on long term expectations.

Plan Contributions by the Company

(millions of dollars)	OPEB		Pension Benefit	
Year ended December 31,	**2006**	2005	**2006**	2005

Year ended December 31,	**2006**	2005	2004
Alliance Pipeline US	**6.9**	7.1	7.6
Vector Pipeline	**16.5**	9.5	9.8
	23.4	16.6	17.4

Tidal Energy Marketing Inc., a subsidiary of the Company, purchases and sells commodities at prevailing market prices with EEP and a subsidiary of EEP as follows:

(millions of dollars)

Year ended December 31,	**2006**	2005	2004
Purchases	**17.0**	9.7	—
Sales	**(6.7)**	—	(2.3)
	10.3	9.7	(2.3)

Receivable from Affiliate

The receivable from affiliate of $158.8 million (2005 – $177.0 million) resulted from the sale of Enbridge Midcoast Energy to EEP. The receivable, denominated in U.S. dollars, bears interest at 6.6% and matures in 2007 and is included in Accounts Receivable and Other. The balance on December 31, 2006 was US$136.2 million (2005 – US$151.9 million). Interest income related to the note was $11.8 million (US$10.0 million), $11.7 million (US$9.4 million), and $11.8 million (US$9.0 million), in 2006, 2005 and 2004, respectively. The fair value of the receivable at December 31, 2006 is $158.6 (2005 – $176.8 million).

The Company also provides limited consulting and other services to investees as required. Market prices are charged for these services where they are reasonably determinable. Where no market price exists, a cost-based price is charged. The Company may also purchase consulting and other services from affiliates, prices are determined on the same basis as services provided by the Company. The Company and affiliates invoice on a monthly basis and amounts are due and paid on a quarterly basis.

23. COMMITMENTS AND CONTINGENCIES

Enbridge Gas Distribution Inc.

Bloor Street Incident

EGD has been charged under both the Ontario Technical Standards and Safety Act (TSSA) and the Ontario Occupational Health and Safety Act (OHSA) in connection with an explosion that occurred on Bloor Street West in Toronto on April 24, 2003. The maximum possible fine upon conviction on all charges would be $5.0 million in aggregate. EGD has also been named as a defendant in a number of civil actions related to the explosion. A Coroner's Inquest in connection with the explosion has also been called, but the proceedings are stayed pending resolution of the TSSA and OHSA matters. The Ontario Court of Justice have not yet ruled upon any of the charges laid under the TSSA or the OHSA, and thus it is not possible at this time to predict or comment upon the potential outcome. The trial in respect of these charges commenced in January 2006 and is not expected to be completed until late 2007 at the earliest. EGD does not expect the outcome of these civil actions to result in any material financial impact.

Remediation of Discontinued Manufactured Gas Plant Sites

EGD may incur future costs due to claims relating to alleged coal tar contamination at or near former manufactured gas plant (MPG) sites. In October 2002, a claim was filed for $55.0 million in damages relating to a certain MPG site. EGD filed a statement of defence in June 2003 denying liability. Although the Company believes that it has a valid defence to this claim, certain risks exist. The probable overall cost cannot be determined at this time due to uncertainty about the presence and extent of damage in addition to the potential alternative remediation approaches which vary in cost. EGD expects that costs, if any, not recovered through insurance may be recovered through rates. As such, EGD does not believe that the outcome will have any material financial impact.

CAPLA Claim

The Canadian Alliance of Pipeline Landowners' Associations (CAPLA) and two individual landowners have commenced a class action against the Company and TransCanada PipeLines Limited. The claim relates to restrictions in the National Energy Board Act on crossing the pipeline and the landowners' use of land within a 30-metre control zone on either side of the pipeline easements. The Plaintiffs filed a motion to establish a cause of action which is one of the requirements to have the motion certified as a class action under the *Class Proceedings Act* (Ontario). The motion was dismissed by the Ontario District Court in late 2006. The Plaintiff has since appealed the decision and the appeal is expected to be heard by the Court of Appeal during the first half of 2007. The Company believes it has a sound defence and intends to defend the claim. Since the outcome is indeterminable, the Company has made no provision at this time for any potential liability.

Enbridge Energy Company, Inc.

Enbridge Energy Company, Inc. (EEC), a subsidiary of the Company, is the general partner of EEP. EEC's former subsidiary Enbridge Midcoast Energy Inc. (Midcoast) has been assessed by the U.S. Internal Revenue Service (IRS) for US$4.5 million in taxes, interest and penalties for its 1999 through 2001 taxation years. Midcoast has paid all amounts and has filed a claim for refund of the full amount. The IRS has challenged Midcoast's tax treatment of its 1999 acquisition of several partnerships that owned a natural gas pipeline system in Kansas (these assets were sold to EEP in 2002). The IRS position, if sustained, could decrease the U.S. tax basis for the pipeline assets, which could reduce Enbridge's earnings by up to approximately US$60.0 million, although the immediate cash tax impact would be significantly less. Enbridge believes the tax treatment of the acquisition and related tax deductions claimed were appropriate. Enbridge initiated proceedings in U.S. District Court (Houston) in 2006 to litigate this matter and depositions are underway. The trial is scheduled for October 2007.

Enbridge and its subsidiaries maintain tax liabilities related to uncertain tax positions. While fully supportable in the Company's view, these tax positions, if challenged by tax authorities, may not be fully sustained on review.

Commitments

The Company has commitments of approximately $214 million for materials related to the construction of Liquids Pipeline projects during 2007. The minimum cancellation charge related to these contracts is approximately $127 million.

24. GUARANTEES

EEC, as the general partner of EEP, has agreed to indemnify EEP from and against substantially all liabilities including liabilities relating to environmental matters, arising from operations prior to the transfer of its pipeline operations to EEP in 1991. This indemnification does not apply to amounts that EEP would be able to recover in its tariff rates if not recovered through insurance, or to any liabilities relating to a change in laws after December 27, 1991.

In addition, in the event of default, EEC, is subject to recourse with respect to US$155.0 million of EEP's long-term debt at December 31, 2006 (2005 – US$186.0 million).

The Company has also agreed to indemnify EEM for any tax liability related to EEM's formation, management of EEP and ownership of i-units of EEP. The Company has not made any significant payment under these tax indemnifications. The Company does not believe there is a material exposure at this time.

In the normal course of conducting business, Enbridge, enters into a wide variety of agreements which provide for indemnification to third parties. Enbridge cannot reasonably estimate the maximum potential amounts that could become payable to third parties under these agreements however historically, Enbridge has not made any significant payments under these indemnification provisions. While many of these agreements may specify a maximum potential exposure, or a specified duration to the indemnification obligation, there are circumstances where the amount and duration are unlimited. Examples where such indemnification obligations have been issued include:

Sale Agreements for Assets or Businesses

- breaches of representations, warranties or covenants;
- loss or damages to property;
- environmental liabilities;
- changes in laws;
- valuation differences;
- litigation; and
- contingent liabilities.

Provision of Services and Other Agreements

- breaches of representations, warranties or covenants;
- changes in laws;
- intellectual property rights infringement; and
- litigation.

When disposing of assets or businesses, the Company may indemnify the purchaser for certain tax liabilities incurred while the Company owned the assets or for a misrepresentation related to taxes that result in a loss to the purchaser. Similarly, the Company may indemnify the purchaser of assets for certain tax liabilities related to those assets.

25. SUBSEQUENT EVENTS

On February 2, 2007, the Company closed the public issuance of 13.5 million common shares at $38.75 per common share. The Company also closed a private placement issuance of common shares to Noverco at the same price, allowing Noverco to maintain its approximate 9.5% interest in the Company. The Board of Directors also increased the dividend to $0.3075 from $0.2875 per common share, payable on March 1, 2007 to shareholders of record on February 15, 2007.

26. UNITED STATES ACCOUNTING PRINCIPLES

These consolidated financial statements have been prepared in accordance with Canadian GAAP. The effects of significant differences between Canadian GAAP and U.S. GAAP for the Company are described below.

Earnings and Comprehensive Income

(millions of dollars, except per share amounts)

Year ended December 31,	**2006**	2005	2004
Earnings under Canadian GAAP	**615.4**	556.0	645.3
Stock-based compensation[1]	—	(16.6)	—
Earnings under U.S. GAAP	**615.4**	539.4	645.3
Other Comprehensive Income			
Unrealized net gain/(loss) on cash flow hedges[4]	**(64.2)**	72.3	(32.9)
Foreign currency translation adjustment[4]	**38.1**	(20.7)	2.4
Comprehensive income	**589.3**	591.0	614.8
Earnings per common share	**1.81**	1.60	1.93
Diluted earnings per common share	**1.79**	1.58	1.92

1. Stock-based Compensation

Effective January 1, 2006, the Company adopted Financial Accounting Standard 123 Revised 2004 (FAS 123R), Share Based Payment, on a modified prospective basis for U.S. GAAP purposes. FAS 123R requires the use of the fair value method to measure compensation expense for the Company's Fixed Stock Options (FSOs) and Performance Based Options (PBOs) issued after January 1, 2006, as well as for the portion of awards for which the requisite service has not been performed that are outstanding as of January 1, 2006. FAS 123R also requires the use of the fair value method for awards settled in cash, including the Company's Performance Stock Units (PSUs) and Restricted Stock Units (RSUs).

The Company had previously adopted the fair value recognition provisions of the former FAS 123, Share Based Payment, effective January 1, 2003, resulting in the recognition of stock based compensation expense using the fair value method for FSOs and PBOs issued subsequent to that date.

2. *Future Income Taxes*

Under U.S. GAAP, deferred income tax liabilities are recorded for rate-regulated operations, which follow the taxes payable method for ratemaking purposes. As these deferred income taxes are expected to be recoverable in future revenues, a corresponding regulatory asset is also recorded. These assets and liabilities are adjusted to reflect changes in enacted income tax rates. A deferred tax liability of $648.7 million (2005 – $727.6 million) is recorded for U.S. GAAP purposes and reflects the difference between the carrying value and the tax basis of property, plant and equipment and regulatory deferrals. Regulated companies following the taxes payable method are not required to record this additional tax liability under Canadian GAAP. To recover the additional deferred income taxes recorded under U.S. GAAP through the ratemaking process, it would be necessary to record incremental revenue of $926.7 million (2005 – $1,119.4 million).

3. *Accounting for Joint Ventures*

U.S. GAAP requires the Company's investments in joint ventures to be accounted for as investments using the equity method, as opposed to proportionately consolidated. However, under an accommodation of the U.S. Securities and Exchange Commission, the accounting for a joint venture need not be reconciled from Canadian to U.S. GAAP if this joint venture is jointly controlled by all owners. Joint ventures in which all owners do not share joint control are reconciled to U.S. GAAP. The different accounting treatment affects only display and classification and not earnings or shareholders' equity.

4. *Financial Instruments*

For U.S. GAAP purposes, FAS 133, Accounting for Derivative Instruments and Hedging Activities, requires that all derivatives be recorded on the balance sheet as either assets or liabilities at their fair value. Changes in the fair value of derivatives are recognized in current period earnings unless specific hedge accounting criteria are met.

The accounting for changes in the fair value of derivatives held for hedging purposes depends on their intended use. For fair value hedges, the effective portion of changes in the fair value of derivative instruments is offset in income against the change in the fair value attributed to the risk being hedged, of the underlying hedged asset, liability or firm commitment. For cash flow hedges, the effective portion of changes in the fair value of derivative instruments is offset through other comprehensive income until the variability in cash flows being hedged is recognized in earnings in future accounting periods. For certain regulated operations the effective portion of the changes in fair value of derivative instruments is deferred as an asset or liability until it is settled. Upon settlement the recognized gain or loss is recognized as a regulatory asset or liability and collected from/refunded to ratepayers in subsequent periods. At December 31, 2006 hedge losses of $26.6 million are deferred and offset by a receivable from ratepayers of $26.6 million.

5. *Accumulated Other Comprehensive Loss*

At December 31, 2006, Accumulated Other Comprehensive Loss of $193.2 million (2005 - $95.5 million) consists of an accumulated foreign currency translation balance of $111.7 million (December 30, 2005 – $149.8 million), net unrealized losses of $9.9 million (2005 – gains $54.3 million) on derivative financial instruments that qualify as cash flow hedges, and an underfunded pension status of $114.2 million.

Of the total Accumulated Other Comprehensive Loss of $193.2 million, the Company estimates that approximately $17.4 million, $13.2 million representing unrecognized net losses on derivative activities and $4.2 million representing the underfunded status pension and OPEB plans, at December 31, 2006, is expected to be reclassified into earnings during the next twelve months.

6. *Underfunded Pension Status*

The Company has adopted FAS 158, *Employers' Accounting for Defined Pension and Other Postretirement Plans*, effective December 31, 2006. FAS 158 requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan or OPEB as an asset or liability and to recognize changes in the funded status in the year in which they occur through comprehensive income. Adopting FAS 158 results in the Company recognizing a liability of $110.1 million for the underfunded status of the plans, a deferred tax asset of $38.5 million and accumulated other comprehensive loss of $71.6 million. As required by FAS 158, the Company will change the measurement date of its defined benefit pension plan from September 30, to December 31, effective the year ended 2008.

7. *Consolidation of a Limited Partnership*

In September 2005, the U.S. Emerging Issues Task Force (EITF), reached a consensus on EITF issue 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights* (EITF 04-5), addressing when a general partner, or general partners as a group, control and should therefore, consolidate a limited partnership.

Effective January 1, 2006, the Company adopted, without restatement of prior periods, EITF 04-5. As a result of adopting EITF 04-5, the Company is consolidating its 16.6% interest in Enbridge Energy Partners (EEP). The impact of adopting EITF 04-5, for U.S. GAAP purposes as at and for the year ended December 31, 2006, is outlined below.

New Accounting Standards

FASB Interpretation Number 48 – FASB issued FIN 48 ‘‘Accounting for Uncertainty in Income Taxes, an Interpretation of FAS 109.’’ This interpretation is effective January 1, 2007 and applies to all tax positions related to income taxes subject to FAS 109, including those acquired in business combinations. FIN 48 clarifies the accounting for income taxes by prescribing a minimum recognition threshold for recording a tax position including a contingent tax position. Management is currently evaluating the impacts of FIN 48.

Exhibit 99.5

Management's Discussion and Analysis
Enbridge Inc.

CONSOLIDATED RESULTS

FINANCIAL PERFORMANCE[1]

(millions of Canadian dollars, except per share amounts)	**2006**	2005	2004
Liquids Pipelines	**274.2**	229.1	219.9
Gas Pipelines	**61.2**	59.8	53.8
Sponsored Investments	**86.8**	64.8	66.2
Gas Distribution and Services [2]	**178.2**	178.8	313.1
International	**83.2**	87.4	73.6
Corporate	**(68.2)**	(63.9)	(81.3)
Earnings Applicable to Common Shareholders	**615.4**	556.0	645.3
Earnings Per Common Share	**1.81**	1.65	1.93
Diluted Earnings Per Common Share	**1.79**	1.63	1.91

1. Financial Performance data have been extracted from financial statements prepared in accordance with Canadian Generally Accepted Accounting Principles.

2. The reported results for the year ended December 31, 2004 include earnings for the 15 months ended December 31, 2004 for Enbridge Gas Distribution (EGD), Noverco and other gas distribution entities. This inclusion resulted from the elimination of the quarter lag basis of consolidation in 2004.

Earnings applicable to common shareholders were $615.4 million for the year ended December 31, 2006, or $1.81 per share, compared with $556.0 million, or $1.65 per share, in 2005. The $59.4 million increase in earnings was primarily the result of higher earnings from the Enbridge crude oil mainline system, strong results from Enbridge Energy Partners, LP (EEP) and from the Aux Sable natural gas fractionation facility. The 2006 results also included $48.9 million from the revaluation of future income tax balances due to tax rate reductions enacted in 2006. These positive factors were partially offset by a lower earnings contribution from Enbridge Gas Distribution (EGD), as the weather in the Ontario market was significantly warmer than normal during 2006.

Earnings applicable to common shareholders were $556.0 million for the year ended December 31, 2005, or $1.65 per share, compared with $645.3 million, or $1.93 per share, in 2004. The $89.3 million decrease in earnings was primarily the result of the sale of the investment in AltaGas in 2004, which resulted in an after-tax gain of $97.8 million as well as the absence of earnings from AltaGas after the sale. Earnings for 2004 also included 15 months of earnings for gas distribution utilities, reflecting the change in year end for those entities. Positive factors in 2005 included the earnings contribution from the Enbridge Offshore Pipelines, higher contribution from the gas distribution utility and lower interest expense.

FORWARD LOOKING INFORMATION

In the interest of providing Enbridge shareholders and potential investors with information about the Company and its subsidiaries, including management's assessment of Enbridge's and its subsidiaries' future plans and operations, certain information provided in this Management's Discussion and Analysis (MD&A) constitutes forward-looking statements or information (collectively, "forward-looking statements"). Forward-looking statements are typically identified by words such as "anticipate", "expect", "project", "estimate", "forecast", "plan", "intend", "target",

"believe" and similar words suggesting future outcomes or statements regarding an outlook. Although Enbridge believes that these forward-looking statements are reasonable based on the information available on the date such statements are made, such statements are not guarantees of future performance and readers are cautioned against placing undue reliance on forward-looking statements. By their nature, these statements involve a variety of assumptions, known and unknown risks and uncertainties and other factors, which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements.

Enbridge's forward-looking statements are subject to risks and uncertainties pertaining to operating performance, regulatory parameters, weather, economic conditions, exchange rates, interest rates and commodity prices, including but not limited to those risks and uncertainties discussed in this MD&A and in the Company's other filings with Canadian and United States securities regulators. The impact of any one risk, uncertainty or factor on a particular forward-looking statement is not determinable with certainty as these are interdependent and Enbridge's future course of action depends on management's assessment of all information available at the relevant time. Except to the extent required by law, Enbridge assumes no obligation to publicly update or revise any forward-looking statements made in this MD&A or otherwise, whether as a result of new information, future events or otherwise. All subsequent forward-looking statements, whether written or oral, attributable to Enbridge or persons acting on the Company's behalf, are expressly qualified in their entirety by these cautionary statements.

Non-GAAP Measures – Adjusted Operating Earnings

Management believes that the presentation of adjusted operating earnings provides useful information to investors and shareholders as it provides increased predictive value and performance trends. Adjusted operating earnings represent earnings applicable to common shareholders adjusted for significant non-operating factors. This measure does not have a standardized meaning prescribed by Canadian generally accepted accounting principles (GAAP) and is not considered a GAAP measure. Therefore, this measure may not be comparable with a similar measure presented by other issuers.

Adjusted Operating Earnings

(millions of Canadian dollars, except per share amounts)	**2006**	2005	2004
GAAP earnings as reported	**615.4**	556.0	645.3
Significant after-tax non-operating factors and variances:			
Sponsored Investments			
Dilution gains on the issue of EEP units	**—**	(8.9)	(7.6)
EEP non-cash derivative fair value losses/(gains)	**(6.5)**	5.0	—
Revalue future income taxes due to tax rate changes	**(6.0)**	—	—
Gas Distribution and Services			
Gain on sale of investment in AltaGas Income Trust	**—**	—	(97.8)
EGD calendar year basis adjustment[1]	**—**	—	(27.1)
Warmer/(colder) than normal weather	**36.9**	—	(21.3)
Impairment loss on Calmar gas plant	**—**	—	8.2
Dilution gain in Noverco (Gaz Metro unit issuance)	**(4.0)**	(7.3)	—
Dilution gain – AltaGas Income Trust	**—**	—	(8.0)
Revalue future income taxes due to tax rate changes	**(28.9)**	—	(0.6)
International			
Gain on land sale in CLH	**—**	(7.6)	—
Corporate			
Revalue future income taxes due to tax rate changes	**(14.0)**	—	—
Adjusted Operating Earnings	**592.9**	537.2	491.1
Adjusted Operating Earnings per Common Share	**1.74**	1.59	1.47

1. Effective December 31, 2004, EGD changed its fiscal year-end from September 30 to December 31. Consequently, the reported consolidated results for the year ended December 31, 2004 included EGD's results for the fifteen months ended December 31, 2004. The adjustment above deducts EGD's results for the three months ended December 31, 2003, to reflect EGD's 2004 earnings on the calendar basis, consistent with 2005 and 2006.

Each of the significant non-operating factors and variances is described in the Results of Operations sections for the respective business segment.

Significant operating factors affecting earnings in 2006 include:

- Enbridge crude oil mainline system earnings were higher primarily due to lower oil loss costs, higher earnings from Terrace and the Incentive Tolling Settlement (ITS).
- EEP earnings increased significantly with higher crude oil throughput, strong margins and increased volumes in the natural gas gathering and processing businesses.
- Aux Sable experienced strong natural gas processing margins throughout the year resulting in significant earnings under the upside sharing agreement.

Enbridge advanced several strategic initiatives during 2006:

- Commenced construction of the Southern Access Expansion;
- Completed the reversal of Spearhead Pipeline, which commenced operations in the first quarter of 2006;
- Received industry support for the Alberta Clipper Project;
- Received industry support for the Southern Lights Pipeline project; and
- Announced plans to construct a natural gas lateral to connect the deepwater Shenzi field to existing Gulf of Mexico pipelines.

CORPORATE STRATEGY

Corporate Vision and Key Objective

Enbridge is an energy delivery company that transports natural gas and crude oil, which are used to heat homes, power transportation systems, and provide fuel and feedstock for industries. The Company's vision is to be North America's leading energy delivery company and its key objective is to generate superior shareholder value. The key elements of this vision are to:

- focus on operational excellence, customers and communities;
- generate above industry-average annual earnings per share growth;
- maintain a strong risk-reward investment profile and financial position;
- deliver superior dividend growth and capital appreciation to shareholders; and
- position the Company for the energy environment of the future.

Competitive Advantage

The Company's ability to execute its strategy and realize its corporate vision depends on three key strengths, among others. These include the strategic position of the Company's major assets, the diversification of the business and the Company's consistent focus on customer service.

The Company's assets are well positioned in North America. In the liquids business, the Company operates a major conduit between U.S. markets and the oil sands reserves in Western Canada. Enbridge's existing right of way is valuable in developing major expansion projects due to the substantial capacity of its mainline system. Enbridge has economies of scale because of its multiple separate lines and has flexibility in terms of the types of products moved. Enbridge moves over 60 different grades of crude oil. Also, the Company serves a diversity of markets because of the extent and reach of its pipeline systems.

The Company's sources of earnings and growth are diversified among liquids pipelines, gas pipelines, gas distribution and international investments. As well, the Company is actively exploring new growth platforms that would further diversify the business.

The Company is focused on adding value for customers and improving customers' pricing. This focus has aligned the Company with supply-demand fundamentals, which has consistently formed a basis for the Company's strategy. Two of the ways that the Company seeks to provide value to customers are through providing customers with access to diverse markets and optionality with respect to the timing of project development. The Company has a number of organic growth projects designed to enable customers to reach new markets.

Organic Growth Projects

The thrust of the Company's strategy is growth through internally developed organic projects. The Company is advancing the development of a number of organic growth projects, some of which are summarized below and would support annual organic growth rates averaging 6% to 9% over the next five years. Enbridge will continue to pursue acquisitions that are accretive to earnings, on an opportunistic basis, as a supplementary source of growth.

Project	Estimated Capital Cost (Canadian dollars unless otherwise noted)	Expected Date of Completion
Liquids Pipelines		
Southern Access – Canadian portion	$0.2 billion	2006 – 2009, in stages
Alberta Clipper – Canadian portion	$1.5 billion (2006 dollars)	Late 2009 or 2010
Spearhead Pipeline Expansion	$0.1 billion	2009
Line 4 Extension	$0.3 billion	Late 2008
Waupisoo Oil Pipeline	$0.5 billion	Mid 2008
Athabasca Pipeline Expansions and Laterals	$0.2 billion	Early 2007
New Upstream Pipeline Opportunities	See project description	2010 – 2012
Southern Access Extension	US$0.4 billion	2009
U.S. Gulf Coast Initiatives	See project description	2010 – 2011
Eastern PADD II/Canada Initiatives	See project description	2010 – 2011
Gateway Condensate Import	See project description	2012 – 2014
Gateway Petroleum Export	See project description	2012 – 2014
Southern Lights Pipeline	US$1.3 billion	Mid 2010
Upstream Contract Terminaling	$0.6 billion	2007 – 2009
Downstream Contract Terminaling	US$0.2 billion	2007 – 2008
Common Carrier Terminaling	$0.1 billion	2008
Sponsored Investments (EEP)		
Project Clarity – East Texas	US$0.6 billion	2007 in stages
Various Gas Plants – Texas	US$0.1 billion	2007 – 2008
Southern Access – U.S. portion	US$1.3 billion	2008 – 2009 in stages
Alberta Clipper – U.S. portion	US$0.8 billion	2010
Downstream Contract Terminaling	US$0.1 billion	2007 – 2008
Common Carrier Terminaling	US$0.1 billion	2008
Gas Pipelines		
Neptune Offshore Laterals	US$0.1 billion	End of 2007
Vector Pipeline Expansion	US$0.1 billion	Late 2007
Gas Distribution and Services		
EGD Customer Additions & System Integrity	$1.5 billion	2007 – 2011
Ontario Wind Project	$0.5 billion	Late 2008
Rabaska LNG Facility	$0.3 billion by Enbridge	2010 - 2011

Risks related to the development and completion of organic growth projects are described under “Risk Management”.

Descriptions of each project are included in the strategy section of each core business.

Strategy

Enbridge has four key strategies to generate superior shareholder value.

1. **Expand Existing Core Businesses**

   The Company will expand its core asset platforms and existing businesses. Strategies for each core business are included in the sections below. The primary goal of this strategy will be organic growth initiatives that leverage advantages from existing assets and expand service into new markets.

2. **Focus on Operational Excellence and People**

   Enbridge will continue its focus on operational excellence, including cost efficiency, safety and reliability, customer relationships, protection of the environmental, innovation and effective stakeholder relations. Enbridge will also focus on managing human capital constraints resulting from the opportunities and growth in the energy industry.

3. **Capitalize on the Partnership/Trust Model**

   Enbridge owns investments in and manages Enbridge Income Fund (EIF) and EEP, which will develop or acquire energy infrastructure assets in North America and optimize the returns on assets they currently own.

4. **Develop New Growth Platforms**

   Enbridge believes it is also important to develop new growth platforms that complement the existing core asset base. Initiatives include liquefied natural gas (LNG) regasification, power generation and new energy technologies.

To successfully pursue these strategies, the Company must mitigate certain business risks. These risks, and the Company's strategies for managing them, are described under "Risk Management".

Dividends

The Company's dividend payout ratio reflects a strong and stable long-term outlook for the business. Balancing shareholders' preference for income and its own need for capital, the Company targets to pay out approximately 60% to 70% of adjusted operating earnings as dividends. The following chart shows dividends per share for the last 10 years and estimated dividends for 2007, based on the quarterly dividend of $0.3075 per common share declared by the Board of Directors on January 16, 2007.

Dividends per share

Corporate Social Responsibility

Enbridge defines Corporate Social Responsibility (CSR) as conducting business in a socially responsible and ethical way, protecting the environment and health and safety of people, supporting human rights and engaging, respecting and supporting the communities and cultures with which the Company works.

A comprehensive system of stewardship and accountability is in place and functioning among Directors, management and employees. Examples include compliance with Sarbanes-Oxley requirements and the Canadian equivalent rules, internal and external audits of operations throughout the Company, employee compliance with Enbridge's Statement of Business Conduct and a majority of independent Directors on the Company's Board as well as plain and open communication with stakeholders.

Environmental initiatives include pursuing alternative and renewable energy technologies such as wind power, preventing pipeline leaks by conducting on-going inspection and maintenance programs as part of the comprehensive integrity management of pipelines and facilities, and the development of a strategy to reduce greenhouse gas emissions. This strategy involves initiatives such as improving the energy efficiency of pipelines, encouraging the efficient use of natural gas by customers and replacing older cast iron pipe with new polyethylene mains at EGD. Enbridge engages employees on health and safety issues through training, communication programs and the establishment of local and regional environmental, health and safety committees.

Stakeholder relations involve developing positive relationships with government agencies, environmental groups, landowners, business partners and local communities. Initiatives include early-stage project consultation with a variety of stakeholders on organic growth projects and public awareness programs on pipeline safety.

Enbridge supports universal human rights and reinforces this with comprehensive policies and practices addressing human rights. For example, Enbridge was one of the first Canadian

companies to adopt the Voluntary Principles on Security and Human Rights, which stress the importance of promoting and protecting human rights throughout the world and the constructive role business can play in advancing these goals.

Enbridge makes voluntary contributions to charitable organizations in the areas of: education, health, environment, social services, arts and culture, civic leadership and volunteer resources in order to contribute to the economic and social development of communities where Enbridge employees live and work.

While Enbridge is focused on generating long-term value for investors, Corporate Social Responsibility defines the Company's commitment to achieving and sustaining that objective in a socially and environmentally responsible way.

Core Businesses

The Company's activities are carried out through five business units:

- Liquids Pipelines, which includes the operation of the Enbridge crude oil mainline system and feeder pipelines that transport crude oil and other liquid hydrocarbons;
- Gas Pipelines, which consists of the Company's interests in natural gas pipelines including Alliance Pipeline US, Vector Pipeline and Enbridge Offshore Pipelines;
- Sponsored Investments, which includes investments in EIF and EEP, both managed by Enbridge;
- Gas Distribution and Services, which consists of gas utility operations which serve residential, commercial, industrial and transportation customers, primarily in central and eastern Ontario, the most significant being Enbridge Gas Distribution (EGD). It also includes natural gas distribution activities in Quebec, New Brunswick and New York State, the Company's investment in Aux Sable, a natural gas fractionation and extraction business, and the Company's commodity marketing businesses; and
- International, which includes the Company's two energy-delivery investments outside of North America.

LIQUIDS PIPELINES

Liquids Pipelines consists of crude oil, natural gas liquids and refined products pipelines in Canada and the United States.

Earnings

(millions of Canadian dollars)	**2006**	2005	2004
Enbridge System	**202.3**	170.1	171.6
Athabasca System	**52.8**	48.6	42.8
Spearhead Pipeline	**6.3**	(1.1)	(0.4)
Olympic Pipeline	**6.5**	—	—
Feeder Pipelines and Other	**6.3**	11.5	5.9
	274.2	229.1	219.9

Liquids Pipelines earnings were $274.2 million in 2006 compared with $229.1 million in 2005. The increase resulted from strong results from the Enbridge System, the commencement of operations of the Spearhead Pipeline and the acquisition of the Olympic Pipeline.

Earnings from Liquids Pipelines were $229.1 million for the year ended December 31, 2005, an increase of $9.2 million from 2004. The increase was due to higher Athabasca System

earnings, consistent with the take or pay agreement with the major shipper, and improved earnings from Feeder Pipelines and Other, primarily Frontier Pipeline, which paid Federal Energy Regulatory Commission (FERC) ordered reparations in 2004.

Revenues in the Liquids Pipelines segment increased to $1,048.1 million in the year ended December 31, 2006 from $881.0 million in the year ended December 31, 2005. The increased revenue was due to a higher revenue requirement on the Enbridge System as well as the start up of Spearhead Pipeline, which commenced operations in the first quarter of 2006 and Olympic Pipeline, which was acquired in the first quarter of 2006.

Revenues in the Liquids Pipelines segment were $881.0 million in 2005 comparable with $872.7 million for 2004.

Enbridge System

The mainline system is comprised of the Enbridge System and the Lakehead System (the portion of the mainline in the United States that is operated by Enbridge and owned by EEP). Through five adjacent pipelines, the system transports crude oil from Western Canada to the Midwest region of the United States and Eastern Canada and serves all of the major refining centers in Ontario. Enbridge has operated, and frequently expanded, the mainline system since 1949.

Results of Operations

Enbridge System earnings were $202.3 million for the year ended December 31, 2006 compared with $170.1 million for the year ended December 31, 2005. This increase reflected higher earnings from a number of factors including lower oil loss costs, favourable ITS performance and, within Terrace, lower taxes, higher toll revenues and the impact of higher volumes generating surcharge revenue.

Enbridge System earnings were $170.1 million for the year ended December 31, 2005 compared with $171.6 million for the year ended December 31, 2004. The $1.5 million decrease was due to a lower earnings base from the ITS component of Enbridge System and higher taxes within the Terrace component. The decrease was partially offset with earnings from the reliability and service metrics under the ITS as well as savings from cost management programs.

Incentive Tolling

Tolls on the Enbridge System are governed by various agreements, which are subject to the approval of the National Energy Board (NEB). The NEB's jurisdiction over the Enbridge System includes statutory authority over matters such as construction, rates and ratemaking agreements and other contractual arrangements with customers. Significant agreements include the ITS applicable to the Enbridge mainline system (excluding Line 8 and Line 9), the Terrace agreement and the System Expansion Program (SEP) II Risk Sharing Agreement. Tolls on the core mainline system have been governed by incentive tolling settlements since 1995.

In 2005, Enbridge and the Canadian Association of Petroleum Producers (CAPP) approved the key terms of a new negotiated ITS, effective from January 1, 2005 to December 31, 2009. In January 2006, the NEB approved the ITS. The ITS continues the sharing of earnings in excess of a stipulated threshold and provides a fixed annual mainline integrity allowance. In addition to the incentive-based provisions in prior agreements, service and reliability metrics have been added to the new ITS to further align the Company's interests with its shippers. The Company

has the opportunity to increase earnings by achieving performance targets under the new performance metric provisions.

In conjunction with the Terrace Agreement, the new ITS continues the throughput protection provisions included in earlier incentive tolling arrangements, ensuring the Company is insulated from volume fluctuations beyond its control. The agreements govern both current and future shippers on the pipeline and establish tolls each year based on an agreed capacity and an allowed revenue requirement. Where actual volumes on the pipeline fall short of the agreed capacity and Enbridge is unable to collect its annual revenue requirement, such deficiency is rolled into the subsequent year's tolls for collection from toll payers at that time and a receivable is recognized. This basis may affect the timing of recognition of revenues compared with that otherwise expected under generally accepted accounting principles for companies that are not rate-regulated.

Athabasca System

The Athabasca System, a 540-kilometre (340-mile) synthetic and heavy oil pipeline, links the Athabasca oil sands in the Fort McMurray, Alberta region, to a pipeline transportation hub at Hardisty, Alberta. The Athabasca System also includes the MacKay River, Christina Lake, Surmont and Long Lake feeder lines, growing tankage facilities and the Company's interest in the Hardisty Caverns Limited Partnership, which provides crude oil storage services.

Results of Operations

Earnings for the year ended December 31, 2006 were $52.8 million, an increase of $4.2 million from 2005. Infrastructure additions contributed to the increase, partially offset by higher operating expenses.

Athabasca System earnings were $48.6 million for the year ended December 31, 2005, an increase of $5.8 million from 2004. The increase was consistent with the long-term contract with its major shipper as well as lower operating costs due to leak remediation costs in 2004.

The Company has a long-term (30 year) take-or-pay contract with the major shipper on the Athabasca System, which commenced in 1999. Revenue is recorded based on the contract terms negotiated with the major shipper, rather than the cash tolls collected. The contract provides for volumes and tolls that will achieve an underpinning return on equity, based on an assumed debt/equity ratio and level of operating costs. The committed volumes and the tolls specified in the contract do not generate sufficient cash revenues in the early years to compensate Enbridge for the debt and equity returns, as well as the cost of providing service. Therefore, Enbridge is recording a receivable in these years. This treatment ensures that the revenue recognized each period is in accordance with the contract. This receivable is contractually guaranteed by the shipper and will be collected in the later years of the contract.

Spearhead Pipeline

The Spearhead Pipeline commenced delivery of crude oil from Chicago, Illinois to Cushing, Oklahoma in March 2006. The performance of the Spearhead Pipeline has continued to surpass Enbridge's expectations with fourth quarter nominations exceeding the pipeline's 125,000 barrels per day (bpd) capacity. Enbridge is currently evaluating the potential to expand the Spearhead pipeline.

Olympic Pipeline

In February 2006, Enbridge acquired a 65% interest in the Olympic Pipeline from BP Pipelines. Olympic is the largest refined products pipeline in the State of Washington, transporting

approximately 290,000 bpd of gasoline, diesel and jet fuel. The pipeline system extends approximately 480 kilometers (300 miles) from Blaine, Washington to Portland, Oregon, connecting four Puget Sound refineries to terminals in Washington and Portland. The system consists of 640 kilometers (400 miles) of 6 to 20 inch diameter pipe, a 500,000-barrel terminal, 9 pumping stations and 21 delivery facilities. BP is the operator of the pipeline.

Olympic Pipeline has performed reliably and 2006 earnings were in line with expectations.

Feeder Pipelines and Other

Feeder Pipelines and Other primarily includes the NW System, which transports crude oil from Norman Wells in the Northwest Territories to Zama, Alberta, interests in a number of liquids pipelines in the United States (Frontier, Toledo, Mustang and Chicap), liquid storage facilities (Patoka) and business development costs related to Liquids Pipelines activities.

Earnings in Feeder Pipelines and Other were $6.3 million for the year ended December 31, 2006 compared with $11.5 million for the year ended December 31, 2005 primarily due to increased business development costs related to the Company's organic growth projects.

Feeder Pipelines and Other earnings for the year ended December 31, 2005 were $11.5 million compared with $5.9 million for the year ended December 31, 2004. The increase was due to the capitalization of Gateway condensate pipeline costs in 2005, as the criteria for capitalization were met, starting in 2005. In addition, Frontier Pipeline earnings were higher due to lower operating costs as well as FERC ordered reparations paid in 2004.

Strategy

The Company seeks to go beyond the traditional regulated utility business model to create additional value for customers. The Liquids Pipelines strategy focuses on meeting the needs of Western Canadian producers and is supported by the Company's estimates of supply and demand for Western Canadian crude oil.

Supply and Reserves

The vast resource of the Western Canadian Sedimentary Basin (WCSB) and its development, create the basis for the Liquids Pipelines growth strategy. Generally, development of the oil sands resource has more than offset declining conventional production. The NEB estimates that total Western Canada production will be 2.5 million bpd[1] at the end of 2006 (2005 – 2.3 million bpd). At the end of 2005, remaining established conventional oil reserves in Western Canada were estimated to be 3.8 billion barrels[2] and remaining established reserves from oil sands were estimated at 174 billion barrels[3]. Combined conventional and oil sands reserves put Canada second only to Saudi Arabia with 14% of the worldwide estimated proved reserves[4].

(4) Oil and Gas Journal's Worldwide Look at Reserves and Production, December 18, 2006

Demand for WCSB Crude

The Company's liquids pipelines are dependent upon the demand for crude oil and other liquid hydrocarbons produced from Western Canada. Deliveries from the pipeline system are made in the prairie provinces, the Province of Ontario and the Great Lakes, and Midwest regions of the United States, principally to refineries, either directly or through the connecting pipelines of other companies. Within these regions are located major refining centres near Sarnia, Nanticoke, and

Toronto, Ontario; the Minneapolis-St. Paul area of Minnesota; Superior, Wisconsin; Chicago, Illinois; the Patoka/Wood River, Illinois area; Detroit, Michigan; and Toledo, Ohio. Through Company initiatives, crude oil has started to penetrate markets in southern PADD II (the U.S. Midwest) with the Spearhead Pipeline to Cushing, Oklahoma; as well as the U.S. Gulf Coast (PADD III) via a third party pipeline system.

Historically, Canada has been the third largest supplier of crude to the U.S. However, for the past three years, Canada has surpassed both Mexico and Saudi Arabia to become the largest crude oil exporter to the U.S.[1]

Deliveries of WCSB crude into PADD II increased by 64,300 bpd over the last two years with increased WCSB crude oil supply in 2006 [2]. Over the same two-year period, deliveries into PADD IV (the U.S. Rocky Mountains) have increased by 6,700 bpd, PADD V (the Western U.S.) deliveries have increased by 6,000 bpd, and PADD III deliveries have increased by 63,800 bpd[2]. Western Canadian demand is served by local supply and has remained relatively flat over the last two years[2]. During 2006, greater volumes of Western Canadian crude were transported to Ontario[3], pushing back Atlantic Basin crude oil[2].

Key Components of the Liquids Pipelines Strategy

The Liquids Pipelines strategy is driven by the industry's need for export capacity alternatives, economic sources of diluent and U.S. refiners' need to maintain diversified sources of supply. The six key components of the Liquids Pipelines strategy are described below as well as progress made to date and future plans towards further advancing the strategy.

1. Capitalize on the Mainline ITS

The ITS rewards Enbridge for achieving certain targeted service levels and product attributes, which adds value for customers. To ensure returns on mainline operations are maximized, the Company will focus on cost efficiency, providing reliable capacity and predictable deliveries, and maintaining optimal batch quality.

The ITS service metrics establish financial bonuses and penalties for prescribed performance targets related to crude oil quality management and predictability of scheduled deliveries. The potential bonuses and penalties for the service metrics are limited to a maximum of $10 million after tax in 2005, escalating to $15 million in each of 2006 and 2007, and to $20 million in each of 2008 and 2009. The targets to achieve the maximum bonus under the ITS become increasingly difficult to achieve in successive years.

The reliability metric provides for bonuses and penalties associated with optimization of system capacity, which are calculated monthly relative to annual capacity targets. Practical constraints around pipeline capacity would limit the bonus for the reliability metric to approximately $12 million per year and penalties are limited to $10 million per year.

Enbridge achieved total metrics bonuses of approximately $10 million in 2006.

2. Mainline Capacity Expansion

The Chicago refining market has been a traditional destination for Western Canadian crude. The Company is working with shippers and refiners to further expand this market. The Southern Access Expansion and the Alberta Clipper Project are two projects that the Company is undertaking to meet this objective.

Southern Access Mainline Expansion

The Southern Access Mainline Expansion project is currently under construction and will ultimately add a total of 400,000 bpd incremental capacity to the mainline system. The U.S. segment of the expansion from the Canada/U.S. border to Flanagan, Illinois, is being undertaken by EEP and the Canadian segment from Hardisty, Alberta to the Canada/U.S. border is being undertaken by Enbridge.

The Canadian segment expansion schedule has been expedited with 120,000 bpd added in 2006, an additional 63,000 bpd expected in 2008 and another 85,000 bpd expected in 2009 in order to match the total additional capacity of 400,000 bpd being provided in the United States. With the support of industry, the proposed diameter of the Southern Access Expansion from Superior, Wisconsin to Flanagan, Illinois has been increased to 42 inches, increasing the estimated cost to US$1.3 billion on the U.S. segment, to be undertaken by EEP. The estimated cost of the Canadian segment, to be undertaken by Enbridge is $0.2 billion.

The FERC has approved an Offer of Settlement with respect to rates for the U.S. segment of the expansion. Enbridge filed a Southern Access Expansion surcharge methodology with the NEB in June 2006.

Alberta Clipper Project

The Alberta Clipper Project involves the construction of a new 36-inch diameter pipeline from Hardisty, Alberta to Superior, Wisconsin, in conjunction with additional pumping power applied to the new 42-inch pipe from Superior to Flanagan, Illinois, described above under Southern Access Expansion. The Alberta Clipper Project will interconnect with the existing mainline system in Superior where it will provide access to Enbridge's full range of delivery points and storage options, including Chicago, Toledo, Sarnia, Patoka, Wood River and Cushing.

The expected capacity of the pipeline has been increased from 400,000 bpd to 450,000 bpd. The Canadian segment of the line is expected to cost $1.5 billion (in 2006 dollars) and the U.S. segment, which will be undertaken by EEP, is expected to cost US$0.8 billion.

In January 2007, industry confirmed its support for the Alberta Clipper Project. Regulatory applications will be filed once commercial terms are finalized, which is expected to occur in the first quarter of 2007. The Alberta Clipper Project is expected to be in service in late 2009 or 2010.

Line 4 Extension Project

The Company obtained industry support for the extension of Line 4, part of the Enbridge mainline system, between Hardisty, Alberta and the Company's terminal at Edmonton, Alberta. The project is expected to cost $0.3 billion and, subject to receipt of required regulatory approvals, is targeted to be in service in late 2008.

3. Upstream Pipeline Development

Increasing oil sands production will require significant new infrastructure upstream of the mainline and the Company is developing a number of projects to support the development of the Alberta oil sands. Growth opportunities already secured include construction of the Waupisoo Pipeline and expansion of the Athabasca System, including the construction of Long Lake and Surmont laterals. In addition, a number of large new oil sands projects requiring substantial upstream pipeline facilities will be selecting a service provider in 2007, and the Company is well positioned to secure a significant portion of these growth opportunities.

Waupisoo Pipeline

The 30-inch diameter, 380-kilometer (236-mile) long Waupisoo Pipeline will transport crude oil from the Cheecham terminal, currently under construction on the Athabasca Pipeline, to the Edmonton, Alberta area. The initial capacity of the line will be 350,000 bpd and is expandable to a maximum of 600,000 bpd with additional pumping units.

Enbridge has filed an application for regulatory approval with the Alberta Energy and Utilities Board and other provincial government departments. Subject to timely receipt of regulatory approvals, expected in the first quarter of 2007, Enbridge will begin construction on the approximately $0.5 billion pipeline in 2007, with an expected in-service date of mid-2008.

The previously announced diluent line has been removed from the regulatory filing in order to expedite the crude oil line, which is needed earlier. Enbridge will continue discussion with all interested parties regarding the diluent line, with construction and an in-service date to be determined at a later date.

Athabasca Pipeline Expansion Projects

In 2006, the Company furthered several expansion projects on the Athabasca Pipeline. The expansion projects include the addition of pumping stations at Elk Point and Cheecham, as well as modifications to existing pumping stations. Construction is progressing and the projects are scheduled to be completed early 2007.

Surmont Oil Sands Project

The Surmont Oil Sands Project consists of pipeline and tank facilities required by the Surmont Project at the Cheecham Terminal on the Athabasca Pipeline. Enbridge has 25-year agreements with ConocoPhillips Surmont Partnership and Total E&P Canada Ltd. (the Surmont Shippers), to provide pipeline transportation services on the Athabasca Pipeline for an initial contract volume of up to 50,000 bpd of crude oil with the option to increase the contract volume to up to 220,000 bpd for future phases of production. The agreements also provide flexibility for the Surmont Shippers to transfer their production to the proposed Waupisoo Pipeline to the Edmonton area. Enbridge has completed construction and is awaiting first production.

Long Lake Oil Sands Project

The Company has agreements with Nexen Inc. and OPTI Canada Inc. (the Long Lake Shippers) to provide pipeline transportation services for the Long Lake Project. The agreements provide for an initial contract volume of up to 60,000 bpd of crude oil with provisions for volume increases. The Long Lake lateral agreement is for a term of 25 years and the agreement for service on the Athabasca Pipeline is for a 50-month term with extension provisions. Under the terms of the agreements, Enbridge will construct, own and operate the pipeline and tank facilities required by the Long Lake Project, as well as pipeline laterals and tank facilities at the Cheecham terminal on the Athabasca Pipeline. Construction of the laterals

and facilities is underway and expected to be in service in early 2007, to coincide with first production from the Long Lake Oil Sands Project.

4. New Market Access

The Company will develop new options to expand market access for Canadian crude. Specific initiatives include: extending the Mainline south of Chicago to Patoka, Illinois, expansion of the Spearhead Pipeline from Chicago to Cushing by 65,000 bpd, developing access to the Gulf Coast market directly from Alberta or through a combination of existing infrastructure and new pipelines, and accessing markets in Asia and California.

Southern Access Extension

The Southern Access Extension involves the construction of a new 36-inch diameter, 400,000 bpd pipeline extending the mainline from Flanagan, Illinois to Patoka at a cost of approximately US$0.4 billion to Enbridge. Discussions with shippers have been finalized and, with industry support for this project, a FERC Offer of Settlement was filed on September 1, 2006.

The initial Offer of Settlement proposing a rolled in toll design was not approved by the FERC. However, support for the project remains very strong and Enbridge is working with industry on an alternative tolling structure to address the initial opposition from the intervening parties. The Company expects that a second application will be filed with the FERC in the first quarter of 2007 to allow the project to continue on schedule, with an estimated 2009 in-service date.

U.S. Gulf Coast Initiatives

The Company continues to meet with industry to explore and develop various options to enhance access to the U.S. Gulf Coast for Canadian supply. Alternatives under discussion include the development of incremental pipeline capacity to the U.S. Gulf Coast, given the projected increase in Canadian production. This interest includes support for a project from Patoka to the U.S. Gulf Coast to deliver an incremental 400,000 bpd of Canadian crude; and a new 400,000 bpd pipeline, which could transport oil from Alberta directly to Texas. This pipeline would also connect to refining centers in Denver, Colorado and Cushing.

The Company is examining greenfield pipeline options as well as the use of existing pipelines that may be candidates for reversal or expansion. The development of a number of alternative large diameter pipeline initiatives allows shippers to choose the projects that best meet their needs.

Eastern PADD II / Eastern Canada

Enbridge is exploring options to provide approximately 300,000 bpd incremental pipeline capacity to the Eastern PADD II region from the Chicago area in conjunction with potential expansion of existing lines serving the Sarnia, Ontario market.

The Gateway Project

The Gateway Project includes both a condensate import pipeline and a petroleum export pipeline. The condensate line would transport imported diluent from Kitimat, British Columbia to the Edmonton, Alberta area. The petroleum export line would transport crude oil from the Edmonton area to Kitimat. The condensate line is expected have a 20-inch diameter and an initial capacity of 193,000 bpd. The petroleum export line would have a 36-inch diameter and an initial capacity of 525,000 bpd. Capital cost estimates will be completed once commercial terms are finalized.

Current shipper preferences to accelerate the development of capacity to traditional U.S. markets will likely result in the acceleration of the Alberta Clipper Project, such that it precedes the Gateway Pipeline project. The Company now estimates that the Gateway in-service date will be in the 2012 to 2014 timeframe. The decision to proceed with the regulatory filing for either pipeline is subject to commercial considerations, including satisfactory completion of shipper agreements, environmental assessment as well as public and Aboriginal consultation.

5. Diluent Supply Projects

Increasing heavy oil production requires new supplies of diluent, which is needed to dilute heavy oils for transport through pipelines. The Company is developing projects, to bring diluent to Alberta from the Midwest, as well as imported diluent supplies from the west coast of British Columbia, as described above in the Gateway Project.

Southern Lights Pipeline

Following the successful closing of a binding open season in July 2006, Enbridge announced plans in December 2006 to proceed with the Southern Lights Pipeline to increase the availability of diluent in Alberta. When completed, this 180,000 bpd, 20-inch diameter pipeline will transport diluent from Chicago to Edmonton and is expected to be in service in mid 2010.

The Southern Lights Pipeline project involves reversing the flow of a portion of Enbridge's Line 13, an existing crude oil pipeline, from Clearbrook, Minnesota to Edmonton. The Canadian portion of Line 13 is currently part of the mainline system and the U.S. portion of Line 13 is owned by EEP. In order to replace the light crude capacity that would be lost through the reversal of Line 13, the Southern Lights Project also includes the construction of a new 20-inch diameter crude oil pipeline from Cromer, Manitoba to Clearbrook, and the expansion of existing Line 2. These changes to the existing crude oil system will ultimately increase southbound light crude system capacity by approximately 45,000 bpd. The capital cost of the Southern Lights project, including the new 20-inch diameter diluent pipeline, is estimated at approximately US$1.3 billion.

In the fourth quarter of 2006, Enbridge received industry endorsement for the Southern Lights Pipeline project including an acceleration of the light crude capacity replacement and a delay in the transfer of Line 13 from the mainline system to the Southern Lights project. The impact of this change will be to increase the light crude system capacity on the mainline system by 215,000 bpd until the earlier of the completion of construction of new capacity out of the Western Canadian basin or the middle of 2010. On this date, Line 13 will be transferred to the Southern Lights project. Also during the fourth quarter, EEP approved the exchange of the portion of Line 13 currently owned by EEP for a portion of the Cromer to Clearbrook crude oil pipeline to be constructed. Remaining regulatory applications are expected to be filed in the first quarter of 2007.

6. Terminaling and Storage Infrastructure

Based on producer interest, the Company plans to increase its investment in contract terminals over the next five years. Upstream contract storage projects include the Hardisty Terminal, the Stonefell Terminal near Fort Saskatchewan and expansion of the Athabasca Terminal. Downstream projects are under development or consideration by Enbridge or EEP at Flanagan, Patoka, Cushing and the U.S. Gulf Coast. The Company and EEP are also constructing significant additions to the capacity of the common carrier mainline terminals at Edmonton, Superior and Chicago.

Hardisty Terminal

The Company plans to proceed with the construction of a new crude oil terminal at Hardisty, Alberta. The terminal is expected to have a capacity of 7.5 million barrels and will cost approximately $0.4 billion. Enbridge has executed contracts for over 80% of the capacity and is close to closing contracts for the balance of the capacity. It is anticipated that the terminal will start to come into service early in 2008, with tanks being commissioned throughout 2008 and into 2009. An additional phase of development, which will increase the terminal's capacity by up to 3.4 million barrels, is planned and the Company is in discussions with customers who are seeking this additional capacity. Once complete, the Hardisty Terminal will be one of the largest crude oil terminals in North America.

Stonefell Terminal

BA Energy Inc. is building a bitumen upgrader near Fort Saskatchewan, Alberta for which Enbridge has agreed to provide pipeline and terminaling services. Based on initial scope and cost estimates, Enbridge expects to invest approximately $0.1 billion in new facilities to provide storage services at a new satellite terminal to be developed adjacent to the upgrader. Enbridge will also provide pipeline transportation for the upgrader's output from the new terminal to a refinery hub near Edmonton. These facilities are expected to be in service in mid-2008.

The Stonefell Terminal is also strategically located adjacent to several other proposed or operating upgrading facilities and pipeline systems and will be a focus for further development of contract terminaling infrastructure.

Downstream Terminaling

The Company continues to advance many downstream terminaling projects, including EEP-sponsored projects with an estimated US$0.1 billion cost for adding approximately 5 million barrels of storage at Cushing in 2007. Enbridge is pursuing several other terminaling projects estimated at US$0.2 billion with in-service dates of 2007 and 2008.

Capital Expenditures

Liquids Pipelines generally spends $80 to $100 million each year on ongoing capital improvements and core maintenance capital projects. In 2007, the Company expects to spend $150 million on capital maintenance and improvements. Expenditures for organic growth projects described above were $320 million in Canada for 2006. For 2007, the Company expects to spend $1.3 billion for the organic growth projects. Discussion of the Company's access to financing is included under Liquidity and Capital Resources.

Legal Proceeding — CAPLA Claim

The Canadian Alliance of Pipeline Landowners' Associations (CAPLA) and two individual landowners have commenced a class action against the Company and TransCanada PipeLines Limited. The claim relates to restrictions in the National Energy Board Act on crossing the pipeline and the landowners' use of land within a 30-metre control zone on either side of the pipeline easements. The Company believes it has a sound defence and intends to vigorously defend the claim. The Plaintiffs filed a motion to establish a cause of action, which is one of the requirements to have the motion certified as a class action under the *Class Proceedings Act* (Ontario). The motion was dismissed by the Ontario District Court in late 2006. The Plaintiff has since appealed the decision and the appeal is expected to be heard by the Court of Appeal during the first half of 2007. Since the outcome is indeterminable, the Company has made no provision at this time for any potential liability.

Business Risks

The risks identified below are specific to the Liquids Pipelines business. General risks that affect the Company as a whole are described under Risk Management.

Supply and Demand

The operation of the Company's liquids pipelines are dependent upon the supply of, and demand for, crude oil and other liquid hydrocarbons from Western Canada. Supply, in turn, is dependent upon a number of variables, including the availability and cost of capital and labour for oil sands projects, the price of natural gas used for steam production, and the price of crude oil. Demand is dependent, among other things, on weather, gasoline price and consumption, manufacturing, alternative energy sources and global supply disruptions.

ITS Metrics

The ITS governing the Enbridge System measures the Company's performance in areas key to customer service. If the Company fails to meet the baseline targets set out in the ITS, for all service and reliability metrics, the Company could be required to pay penalties to shippers up to a maximum of $25 million in 2007 and $30 million in 2008 and 2009.

Regulation

Earnings from the Enbridge System and other liquids pipelines are subject to the actions of various regulators, including the NEB. Actions of the regulators related to tariffs, tolls and facilities impact earnings from these operations. The NEB prescribes a benchmark multi-pipeline rate of return on common equity, which is 8.46% in 2007 (2006 – 8.88%). To the extent the NEB rate of return fluctuates, a portion of the Enbridge System and other liquids pipelines earnings will change. The Company believes that regulatory risk can be reduced through the negotiation of long-term agreements with shippers.

Competition

Competition among common carrier pipelines is based primarily on the cost of transportation, access to supply, the quality and reliability of service and contract carrier alternatives and proximity to markets. Other common carriers are available to producers to ship Western Canadian liquids hydrocarbons to markets in either Canada or the United States. As, well competition could arise from pipeline proposals that may provide access to market areas currently served by the Company's liquids pipelines. One such proposal is the Keystone Project put forward by TransCanada Corporation to ship Western Canadian crude oil into PADD II starting in 2009. The Company believes that its liquids pipelines are serving larger markets and provide attractive options to producers in the WCSB due to their competitive tolls and multiple delivery and storage points. Also, shippers are not required to enter into long-term shipping commitments on the mainline system. The Company's existing right of way provides a competitive advantage, as it can be difficult and costly to obtain new rights of way for new pipelines. This can act as a barrier to entry for other companies considering constructing new pipelines. The ITS and the Terrace Agreement on the Enbridge System provide throughput protection which insulates the Company from negative volume fluctuations beyond its control. The Lakehead System, owned by EEP, has no similar throughput protection and is exposed to volume fluctuations.

Increased competition could arise from new feeder systems servicing the same geographic regions as the Company's feeder pipelines.

GAS PIPELINES

Gas Pipelines activities consist of investments in Alliance Pipeline US, Vector Pipeline and Enbridge Offshore Pipelines. Enbridge has joint control over these investments with one or more other owners. Enbridge owns a 50% interest in the U.S. portion of the Alliance System, a 60% interest in Vector Pipeline and interests ranging from 22% to 100% in the pipelines comprising the Enbridge Offshore Pipelines.

Earnings

(millions of Canadian dollars)	**2006**	2005	2004
Alliance Pipeline US	**29.7**	32.1	37.4
Vector Pipeline	**13.4**	15.9	16.4
Enbridge Offshore Pipelines	**18.1**	11.8	—
	61.2	59.8	53.8

Earnings from Gas Pipelines were $61.2 million for the year ended December 31, 2006 compared with $59.8 million for the year ended December 31, 2005. The increase was due to improved results at Enbridge Offshore Pipelines in 2006, following two severe hurricanes in 2005. The increase was partially offset by the effects of the stronger Canadian dollar.

Earnings from Gas Pipelines were $59.8 million for the year ended December 31, 2005, an increase of $6.0 million from 2004. The increase in 2005 is due to incremental earnings from Enbridge Offshore Pipelines, acquired on December 31, 2004.

Revenues for the year ended December 31, 2006 were $345.9 million consistent with $364.3 million for the year ended December 31, 2005. Revenues for the year ended December 31, 2005 were $364.3 million compared with $271.7 million for the year ended December 31, 2004. The increase in revenues was due to the acquisition of Enbridge Offshore Pipelines on December 31, 2004.

Alliance Pipeline US

The Alliance System (Alliance), which includes both the Canadian and U.S. portions of the pipeline system, consists of an approximately 3,000-kilometre (1,875-mile) integrated, high-pressure natural gas transmission pipeline system and an approximately 730-kilometre (455-mile) lateral pipeline system and related infrastructure. Alliance transports liquids-rich natural gas from northeast British Columbia and northwest Alberta to Channahon, Illinois. The pipeline has firm service shipping contract capacity to deliver 1.325 billion cubic feet per day (bcf/d). Enbridge Income Fund, described under Sponsored Investments, owns 50% of the Canadian portion of the Alliance System.

Alliance connects with a natural gas liquids (NGL) extraction facility (Aux Sable) in Channahon, Illinois. The natural gas may then be transported to two local natural gas distribution systems in the Chicago area and five interstate natural gas pipelines, providing shippers with access to natural gas markets in the Midwestern and Northeastern United States and Eastern Canada. Enbridge owns 42.7% of Aux Sable and its results are included under Gas Distribution and Services.

Results of Operations

Alliance Pipeline earnings were $29.7 million for the year ended December 31, 2006 compared with $32.1 million for the year ended December 31, 2005. The decrease was primarily due to the stronger Canadian dollar.

Alliance Pipeline US earnings are $32.1 million for the year ended December 31, 2005 compared with $37.4 million for the year ended December 31, 2004. The moderate decrease is due to the stronger Canadian dollar in 2005

Transportation Contracts

Alliance has long-term take-or-pay contracts through 2015 to transport 1.305 bcf/d of natural gas or 98.5% of the total contracted capacity. Alliance has 20 mmcf/d of natural gas contracted on a short-term basis. These contracts permit Alliance to recover the cost of service, which includes operating and maintenance costs, cost of financing, an allowance for income tax, an annual allowance for depreciation, and an allowed return on equity. Each long-term contract may be renewed upon five years notice for successive one-year terms beyond the original 15-year primary term. Alliance Pipeline US operations are regulated by the FERC.

Depreciation expense included in the cost of service is based on negotiated depreciation rates contained in the transportation contracts while the depreciation expense in the financial statements is recorded on a straight-line basis of 4% per annum. The negotiated depreciated rates are generally less than the straight-line rates in the earlier years and higher than straight-line depreciation in later years of the shipper transportation agreements. This results in recognition of a long-term receivable, referred to as deferred transportation revenue, expected to be recovered from shippers in subsequent rates.

As at December 31, 2006 $159.8 million (2005 – $145.8 million) was recorded as deferred transportation revenue.

Vector Pipeline

The Company provides operating services to, and holds a 60% joint venture interest in, Vector Pipeline, which transports natural gas from Chicago to Dawn, Ontario. Vector Pipeline has the capacity to deliver a nominal 1.0 bcf/d and is operating at or near capacity. Vector Pipeline's primary sources of supply are through interconnections with the Alliance System and the Northern Border Pipeline in Joliet, Illinois. Approximately 70% of the long haul capacity of Vector Pipeline is committed to long-term, 15-year firm transportation contracts at rates negotiated with the shippers and approved by the FERC. The remaining capacity is sold at market rates and various term lengths. Transportation service is provided through a number of different forms of service agreements such as Firm Transportation Service and Interruptible Transportation Service.

Results of Operations

Vector Pipeline earnings were $13.4 million for the year ended December 31, 2006 compared with $15.9 million for the year ended December 31, 2005. The decrease reflected the stronger Canadian dollar and higher operating costs in the second and third quarters of 2006 due to scheduled integrity inspections required by the regulator within the first six years of operation.

Vector Pipeline earnings were $0.5 million lower for the year ended December 31, 2005 compared with the year ended December 31, 2004 resulting from the stronger Canadian dollar in 2005.

Business Risks

The risks identified below are specific to Alliance Pipeline US and Vector Pipeline. General risks that affect the entire Company are described under Risk Management.

Supply and Demand

Currently, pipeline capacity out of the WCSB exceeds supply. Alliance Pipeline US and Vector Pipeline have been unaffected by this excess capacity environment mainly because of long-term capacity contracts extending to 2015. Vector Pipeline's interruptible capacity could be negatively impacted by the basis (location) differential in the price of natural gas between Chicago and Dawn, Ontario relative to the transportation toll.

Exposure to Shippers

The failure of shippers to perform their contractual obligations could have an adverse effect on the cash flows and financial condition of Alliance Pipeline US and Vector Pipeline. To reduce this risk, Alliance Pipeline US and Vector Pipeline monitor the creditworthiness of each shipper and receive collateral for future shipping tolls should a shipper's credit position not meet tariff requirements. These pipelines also have diverse groups of long-term transportation shippers, which include various gas and energy distribution companies, producers and marketing companies, further reducing the exposure.

Competition

Alliance Pipeline US faces competition for pipeline transportation services to the Chicago area from both existing and proposed pipeline projects. Competing pipelines, with a combined transportation capacity of approximately 3.8 bcf/d provide natural gas transportation services from the WCSB to distribution systems in the Midwestern United States. In addition, there are several proposals to upgrade existing pipelines serving these markets. Any new or upgraded pipelines could either allow shippers greater access to natural gas markets or offer natural gas transportation services that are more desirable than those provided by the Alliance System. Shippers on Alliance Pipeline US have access to additional high compression delivery capacity at no additional cost, other than fuel requirements, serving to enhance Alliance Pipeline US's competitive position.

Vector Pipeline faces competition for pipeline transportation services to its delivery points from new or upgraded pipelines, which could offer transportation that is more desirable to shippers because of cost, supply location, facilities or other factors. Vector Pipeline has mitigated this risk by entering into long-term firm transportation contracts for approximately 70% of its capacity and medium-term contracts for the remaining capacity. These long-term firm contracts provide for additional compensation to Vector Pipeline if shippers do not extend their contracts beyond the initial term. The effectiveness of these mitigating factors is evidenced by the increased utilization of the pipeline since its construction, despite the presence of transportation alternatives.

Regulation

Both Vector Pipeline and Alliance Pipeline US operations are regulated by the FERC. On a yearly basis, Alliance Pipeline US files its annual rates with the FERC following consultation with shippers.

Enbridge Offshore Pipelines

Enbridge Offshore Pipelines (EOP) is comprised of 11 natural gas gathering and FERC-regulated transmission pipelines in five major corridors in the Gulf of Mexico, extending to deepwater frontiers. The operations were purchased December 31, 2004. These pipelines include almost 2,400 kilometers (1,500 miles) of underwater pipe and onshore facilities and transport more than half of all current deepwater Gulf of Mexico natural gas production. These pipelines currently transport approximately 2.0 bcf/d.

Results of Operations

Earnings for the year ended December 31, 2006 in Enbridge Offshore Pipelines were $18.1 million compared with $11.8 million for the year ended December 31, 2005. In 2006, volumes returned to 2005 pre-hurricane levels, resulting in increased earnings compared with 2005. The 2006 results were negatively impacted by the stronger Canadian dollar.

The Company continues to pursue the settlement of claims under its insurance policies for volume losses and additional costs the Company has incurred to restore the service capacity of these assets following hurricanes Rita and Katrina. A settlement of the insurance claim is anticipated in 2007.

Transportation Contracts

The primary shippers on the EOP systems are producers who execute life-of-lease commitments in connection with transmission and gathering service contracts. In exchange, EOP provides firm capacity for the contract term at an agreed upon rate. The throughput volume generally reflects the lease's maximum sustainable production.

The transportation contracts allow the shippers to define a maximum daily quantity (MDQ), which corresponds with the expected production life. The contracts typically have minimum throughput volumes which are subject to take-or-pay criteria but also provide the shippers with flexibility given advance notice criteria to modify the projected MDQ schedule to match current deliverability expectations.

The long-term transport rates established in the gathering and transmission service agreements are generally market-based but are established utilizing a cost-of-service methodology, which includes operating cost, projected revenue generation directly tied to production deliverability and the appropriate cost of capital.

Weather

Adverse weather, such as hurricanes, may impact EOP financial performance directly or indirectly. Direct impacts may include damage to EOP facilities resulting in lower throughput and inspection and repair costs. Indirect impacts include damage to third party production platforms, onshore processing plants and refineries that may decrease throughput on EOP systems.

The Company continues to maintain an active risk management program that includes comprehensive insurance coverage, notwithstanding a constrained insurance market. However costs have increased in the form of higher insurance premiums and deductibles as well as longer waiting periods for business interruption claims. It is expected that the incidence and severity of windstorm occurrences, and the Company's direct experience in the Gulf of Mexico, will dictate future costs and coverage levels in this region.

Competition

There is significant competition for new and existing business in the Gulf of Mexico. EOP has been able to capture key opportunities, extending its footprint, positioning it to more fully utilize existing capacity. EOP serves a majority of the strategically located deepwater host platforms and its extensive presence in the deepwater Gulf of Mexico has EOP well positioned to generate incremental revenues, with modest capital investment, by transporting production from sub-sea development of smaller fields tied back to existing host platforms. However, given

rates of decline, Offshore pipelines typically have available capacity resulting in significant and aggressive competition for new developments in the Gulf of Mexico.

Regulation

The transportation rates on many of EOP's transmission pipelines are generally based on a regulated cost-of-service methodology and are subject to regulation by the FERC. These rates may be subject to challenge.

Other Risks

Other risks directly impacting financial performance include underperformance relative to expected reservoir production rates, delays in project start-up timing and capital expenditures in excess of those estimated. Capital risk is mitigated in some circumstances by having area producers as joint venture partners and through cost of service tolling arrangements.

Strategy

The Company plans to continue to grow the Gas Pipelines segment to capitalize on regional supply and demand imbalances and infrastructure requirements through a combination of organic and acquisition opportunities. The Gas Pipelines strategy is based on the Company's forecast supply and demand for natural gas.

Supply and Demand for Natural Gas

North American natural gas demand is expected to grow at a modest rate for the next three to five years primarily driven by growth in power generation, which more than offsets declines in industrial demand. The re-emergence of coal as a generation source, due to advances in clean-coal technology, as well as the re-emergence of nuclear power as a source of electricity generation may reduce growth in the power related natural gas demand in the longer term. The development of oil sands projects in Alberta also increases the demand for natural gas, as various extraction and upgrading processes require the use of natural gas, however growth in this sector may also be tempered by alternative energy sources. Over time, the entry of new supplies from North Texas, the U.S. Rockies and the Alaska North Slope / Mackenzie Delta as well as Liquefied Natural Gas are expected to adequately supply the market and provide opportunities for Enbridge to deliver this natural gas to markets.

Specific strategies will be executed within two key geographic regions: Western Canadian/U.S. Midwest and Offshore Gulf Coast.

1. Western Canadian/U.S. Midwest Region

The Alliance and Vector Pipelines provide low cost expansion options to the Chicago/Dawn market and the Company plans to expand these systems and position Enbridge to participate in the Alaska gas pipeline. The Company also plans to develop takeaway capacity from Chicago to address the anticipated bottleneck from incremental Rockies and Arctic gas volumes. This could be accomplished through expansion of Vector Pipeline and potentially by developing a new route from Chicago to the U.S. Northeast.

Vector Pipeline Expansion

In 2005, Vector Pipeline announced plans to construct two additional compressor stations, which would expand Vector Pipeline's capacity from 1 bcf/d to 1.2 bcf/d. This expansion has been approved by the FERC and is scheduled to be in service in the fourth quarter of 2007.

2. Offshore Gulf Coast

EOP intends to grow through leveraging its existing asset position to attract new prospects including producer tie-backs as well as those requiring new laterals to be constructed by EOP. A significant number of new discoveries exist on the shelf, in deepwater and the ultra-deep areas of the Gulf of Mexico in the corridors where EOP has existing pipeline facilities. EOP is continually monitoring and pursuing these many prospects. Two such projects under construction are described below.

Neptune Pipeline Project

The Company plans to construct and operate both a natural gas lateral and a crude oil lateral to connect the deepwater Neptune oil and gas field in the Green Canyon Corridor to existing Gulf of Mexico pipelines, extending Enbridge's existing Gulf of Mexico infrastructure. The laterals are expected to cost a total of approximately US$0.1 billion and will have the capacity to deliver in excess of 200 million cubic feet per day (mmcf/d) of gas and approximately 50,000 bpd of oil. Construction of the natural gas and crude oil laterals is underway with sub-sea tie-ins scheduled for the second quarter of 2007 and throughput is expected to commence in the last half of 2007.

Shenzi Project

Enbridge also plans to construct a natural gas lateral to connect the new deepwater Shenzi field to existing Gulf of Mexico pipelines. The 11-mile lateral is expected to cost approximately US$45 million and to have a capacity of 100 mmcf/d. The Shenzi lateral will deliver natural gas through the Company's 22%-owned Cleopatra Pipeline, the 50%-owned Manta Ray Pipeline and the 50%-owned Nautilus Pipeline and is expected to be completed by the end of 2007, with the first gas expected by mid-year 2009. Construction scheduling has been accelerated to the second half of 2007 to secure a lay vessel, which are in high demand, and avoid interference with the producers' development construction in 2008.

Capital Expenditures

The Company expects to spend approximately $210 million in 2007 in the Gas Pipelines segment for ongoing capital improvements, core maintenance capital projects and expansion, including the projects described above. In 2006, the Company spent $110 million on capital expenditures in the Gas Pipelines segment. Discussion of the Company's access to financing is included under Liquidity and Capital Resources.

SPONSORED INVESTMENTS

Sponsored Investments includes the Company's 16.6% ownership interest in EEP and a 41.9% equity interest in EIF. Enbridge manages the day-to-day operations of, and develops and assesses opportunities for each, including both organic growth and acquisition opportunities.

Earnings

(millions of Canadian dollars)	**2006**	2005	2004
Enbridge Energy Partners	**43.0**	21.7	28.6
Enbridge Income Fund	**37.8**	34.2	30.0
Dilution gains	**—**	8.9	7.6
Revalue future income taxes due to tax rate changes	**6.0**	—	—
	86.8	64.8	66.2

Earnings from Sponsored Investments were $86.8 million for the year ended December 31, 2006 compared with $64.8 million in 2005. Earnings increased primarily because of strong results from EEP.

Earnings from Sponsored Investments were $64.8 million for the year ended December 31, 2005 compared with $66.2 million in 2004. EIF earnings increased due to allowance oil sales on the Saskatchewan System and collection of a notional tax in tolls on Alliance Canada. This increase was more than offset by EEP's non-cash unrealized mark-to-market losses on derivative instruments that are considered ineffective hedges for accounting purposes.

Revenues from Sponsored Investments include only revenues from EIF as the Company equity accounts for its interest in EEP. For the year ended December 31, 2006, revenues were $254.7 million consistent with $249.0 million for the year ended December 31, 2005.

Revenues for the year ended December 31, 2005 were $249.0 million compared with nil for the year ended December 31, 2004. The Company consolidates EIF under the variable interest entity rules, which came into effect on January 1, 2005. In 2004, the investment in EIF was accounted for as an equity investment.

Enbridge Energy Partners

EEP owns and operates crude oil and liquid petroleum transmission pipeline systems, natural gas gathering and related facilities and marketing assets in the United States. Significant assets include the Lakehead System, which is the extension of the Enbridge System in the U.S., natural gas gathering and processing assets in Texas, the mid-continent crude oil system, various interstate and intrastate natural gas pipelines and a crude oil feeder pipeline in North Dakota.

Results of Operations

EEP earnings were $43.0 million for the year ended December 31, 2006 compared with $21.7 million for the year ended December 31, 2005. The results improved significantly, despite the stronger Canadian dollar, and reflected considerably higher liquids throughput on the Lakehead System, higher margins and increased volumes in the natural gas gathering and processing businesses in addition to a higher Enbridge ownership interest. The 2006 results also included $6.5 million (net to Enbridge) of unrealized mark-to-market gains (2005 – $5.0 million of losses) on derivative financial instruments that did not qualify for hedge accounting treatment. While Enbridge believes the hedging strategies are sound economic hedging techniques, they do not qualify for hedge accounting and have been accounted for on a mark-to-market basis through earnings.

Earnings of $21.7 million for the year ended December 31, 2005 were down from 2004 earnings of $28.6 million primarily due to $5.0 million (net to Enbridge) of unrealized mark-to-market losses on derivative financial instruments, which did not qualify for hedge accounting treatment. In addition, EEP earnings were negatively affected by lower Lakehead System volumes, a stronger Canadian dollar and a lower ownership interest offset with higher earnings from the natural gas business.

EEP issued Class A partnership units in 2005 and 2004. Because Enbridge did not fully participate in the 2005 and 2004 offerings, dilution gains resulted. While new Class C units were issued by EEP in the third quarter of 2006, no dilution gains resulted as Enbridge participated in the offering, increasing Enbridge's ownership interest in EEP from 10.9% to 16.6%.

Distributions

EEP makes quarterly distributions of its available cash to its common unitholders, including Enbridge. Under the Partnership Agreement, Enbridge, as general partner, receives incremental incentive cash distributions, which represent incentive income, on the portion of cash distributions, on a per unit basis, that exceed certain target thresholds as follows.

	Unitholders	Enbridge
Quarterly Cash Distributions per Unit:		
Up to $0.59 per unit	98%	2%
First Target—$0.59 per unit up to $0.70 per unit	85%	15%
Second Target—$0.70 per unit up to $0.99 per unit	75%	25%
Over Second Target—Cash distributions greater than $0.99 per unit	50%	50%

During 2006, EEP paid quarterly distributions of $0.925 per unit (2005 – $0.925 per unit; 2004 – $0.925 per unit). Of the $43.0 million Enbridge recognized as earnings from EEP during 2006, 37% (2005 – 65%; 2004 – 50%) were incentive earnings while 63% (2005 – 35%; 2004 – 50%) were Enbridge's share of EEP's earnings.

Strategy

EEP intends to increase its distributions through the optimization of existing assets including increased throughput, the expansion of the existing liquids and gas midstream businesses, and the acquisition of complementary assets. EEP will focus on assets that generate stable cash flows including crude oil mainline, feeder system and mid-continent terminaling, interstate and intrastate gas pipelines and certain gas gathering and processing assets. EEP is benefiting from strong supply growth in both the liquids transportation and gas midstream businesses. Oil sands volume growth will increase throughput and generate opportunities such as the Southern Access expansion. High gas prices and improved technology are driving new capital investment and volume growth in EEP's principal gas regions. Tightening gas quality specifications are also increasing demand for EEP's treating and processing services. EEP's growing base of gas volumes will allow it to aggregate volumes to improve margins and potentially underpin a new take-away pipeline capacity project. Examples of this aggregation include the recent expansion and extension of the East Texas system in the construction of additional pipeline infrastructure and the Alberta Clipper Project.

East Texas Clarity Project

The East Texas Clarity project, undertaken by EEP, is a US$0.6 billion expansion of EEP's East Texas system and is progressing on-schedule to add 0.7 bcf/d of natural gas transportation capacity to the Texas intrastate market in 2007. The Clarity project will be completed in phases during the year with the first phase scheduled for completion in early 2007. This phase involves the construction of a natural gas treating facility and related mainline expansion. Additional phases of the project will be complete in mid-2007 and end of year 2007. When complete, the Clarity project will link growing natural gas production in East Texas, and third party storage assets in East Texas, with major third party pipelines and markets in the Beaumont, Texas area.

Business Risks

Supply and Demand

The profitability of EEP depends to a large extent on the volume of products transported on its pipeline systems.

The volume of shipments on EEP's Lakehead System depends primarily on the supply of Western Canadian crude oil and the demand for crude oil in the Great Lakes and Midwest regions of the United States and Eastern Canada. EEP expects significantly increased crude oil supplies from the oil sands projects in Alberta. In addition, Enbridge's future plans to provide access to new markets in the Southern United States are expected to increase demand for Western Canadian crude, resulting in increased volumes for EEP.

EEP's natural gas gathering assets are also subject to changes in supply and demand for natural gas, natural gas liquids and related products. Commodity prices impact the willingness of natural gas producers to invest in additional infrastructure to produce natural gas.

These assets are also subject to competitive pressures from third-party and producer owned gathering systems.

Regulation

In the U.S., the interstate and intrastate gas pipelines owned and operated by EEP are subject to regulation by the FERC or state regulators and their revenues could decrease if tariff rates were protested. While gas gathering pipelines are not currently subject to active regulation, proposals to more actively regulate intrastate gathering pipelines are currently being considered in certain of the states in which EEP operates.

Market Price Risk

EEP's gas processing business is subject to commodity price risk for natural gas and natural gas liquids. Historically, these risks have been managed by using physical and financial contracts, fixing the prices of natural gas and natural gas liquids. Certain of these financial contracts do not qualify for cash flow hedge accounting and EEP's earnings are exposed to mark-to-market valuation changes associated with certain of these contracts.

Enbridge Income Fund

EIF's primary assets include a 50% interest in Alliance Pipeline Canada and the Enbridge Saskatchewan System, both purchased from the Company in 2003. The Alliance Pipeline Canada, is the Canadian portion of the Alliance System, described in the Gas Pipelines segment above. The Enbridge Saskatchewan System owns and operates crude oil and liquids pipelines systems from producing fields in Southern Saskatchewan and Southwestern Manitoba connecting primarily with Enbridge's mainline pipeline to the United States.

EIF also owns interests in three wind power generation projects purchased from Enbridge in October, 2006 and a business that develops waste-heat power generation projects at Alliance Pipeline Canada compressor stations.

Results of Operations

EIF earnings were $37.8 million for the year ended December 31, 2006, comparable with the prior year, and reflected modest earnings growth at EIF. The increase in earnings reflected lower tax on distributions received from EIF.

EIF earnings were $34.2 million for the year ended December 31, 2005 compared with $30.0 million for the year ended December 31, 2004. The 2005 results include higher preferred unit distributions as well as higher incentive income consistent with EIF's cash distribution increases in 2004. EIF's operating results benefited from strong performance at both Alliance Pipeline Canada and the Saskatchewan System.

Tax Fairness Plan

On October 31, 2006, the Canadian Government announced a “Tax Fairness Plan” that would, among other things, create a new tax regime for publicly traded income trusts including EIF. Under the proposed rules, the taxable portion of an income trust’s distributions would be subject to taxation in a manner similar to the treatment of taxable income within a corporation. For existing income trusts, the new rules would not become applicable until 2011 provided they limit their expansion to “normal growth” prior to that year. On December 15, 2006 the Government issued guidelines with respect to what it would consider “normal growth” for existing income trusts that wish to ensure that they do not become subject to the proposed tax rules until 2011. Under these guidelines, the amount of equity units that an income trust can issue to finance growth up to 2011 may not exceed the value of its publicly traded equity units on October 31, 2007 (subject to annual limits). The guidelines do not explicitly limit the amount of debt that an income trust can issue to fund growth, although as a practical matter this will be constrained by credit considerations and/or financial covenants.

On December 21, 2006, the Government released draft legislation for comment. Considerable uncertainty still exists as the draft legislation does not fully address all aspects of the tax regime introduced in the Tax Fairness Plan (including the “normal growth” guidelines). Further, the proposed legislation is now subject to review by a Parliamentary committee through an expedited public hearing process. Timing for enactment of the legislation by Parliament remains uncertain.

If enacted in their present form, the proposed tax changes would, all other things being equal, likely result in a reduction of cash available for distribution by the Fund commencing in 2011. With respect to the proposed limitations on equity unit issuances, EIF should be able to fund its currently identified growth plans. However, with the current uncertainty in the capital markets resulting from the proposed tax changes, there can be no assurance that sufficient capital will be available to fund further acquisitions or expansion projects. EIF is closely monitoring legislative developments and carefully assessing the impact of the proposed legislation on the business and financial outlook of EIF and its broader effect on the income trust sector as a whole, all with a view to adopting a strategy that will maximize value to unitholders going forward once legislative framework is finalized.

Incentive and Management Fees

Enbridge receives a base annual management fee of $0.1 million for management services provided to EIF plus incentive fees equal to 25% of annual cash distributions over $0.825 per trust unit. In 2006, the Company received incentive fees of $2.4 million (2005 – $2.1 million, 2004 – $0.8 million). The Company is the primary beneficiary of EIF through a combination of the voting units and a non-voting preferred unit investment and as such EIF is consolidated, starting January 1, 2005, under variable interest entity rules.

Strategy

EIF will maximize the efficiency and profitability of its existing assets through representation on the boards and/or management committees of EIF’s assets, pursue organic growth and expansion opportunities, invest in the Saskatchewan System expansion and Alliance Canada receipt facilities and expansions and pursue opportunities to acquire energy infrastructure investments or related assets.

Business Risks

Risks for Alliance Pipeline Canada are similar to those identified for the Alliance Pipeline US in the Gas Pipelines segment.

Saskatchewan System

The majority of the volumes shipped on the Saskatchewan and Westspur common carrier pipeline systems, key components of the Saskatchewan System, have no specific volume commitments. There is no assurance that shippers will continue to utilize these systems in the future or transport volumes on similar terms or at similar tolls. However, there is limited pipeline competition in this area. The main competition to the pipelines is from trucking.

EIF's liquids and natural gas pipelines are dependent upon the supply of and demand for crude oil and natural gas from Western Canada. Supply, in turn, is dependent upon a number of variables, including the level of exploration, drilling, reserves and production of crude oil and natural gas, the accessibility of Western Canadian crude oil and natural gas, the price and quality of crude oil and natural gas available from alternative Canadian and United States sources. In addition, the regulatory environments in Canada and the United States, including the continued willingness of the governments of both countries to permit the export of crude oil and natural gas from Canada to the United States on a commercially acceptable basis, could impact the supply of crude oil and natural gas.

GAS DISTRIBUTION AND SERVICES

Gas Distribution and Services consists of gas utility operations which serve residential, commercial, industrial and transportation customers, primarily in Central and Eastern Ontario, the most significant being Enbridge Gas Distribution (EGD). It also includes natural gas distribution activities in Quebec, New Brunswick and New York State, the Company's investment in Aux Sable, a natural gas fractionation and extraction business, and the Company's commodity marketing businesses.

Earnings

(millions of Canadian dollars)	**2006**	2005	2004

Revalue future income taxes due to tax rate changes	**28.9**	—	—
	178.2	178.8	313.1

[1] Results for the year ended December 31, 2004 include earnings for the 15 months ended December 31, 2004.

Earnings were $178.2 million for the year ended December 31, 2006 compared with $178.8 million for the year ended December 31, 2005. Earnings were comparable with 2005, reflecting a number of offsetting factors including higher earnings from the Aux Sable natural gas

fractionation facility due to upside sharing of positive fractionation margins under a new arrangement with BP and lower earnings from EGD resulting from warmer than normal weather and a lower allowed rate of return on common equity.

Earnings were $178.8 million for the year ended December 31, 2005 compared with $313.1 million for the year ended December 31, 2004. The 2004 earnings included 15 months of operations from the gas distribution operations as a result of the change in EGD's fiscal year end. Earnings for 2004 also included an after-tax gain of $97.8 million on the sale of the investment in AltaGas Income Trust.

Revenues for the year ended December 31, 2006 were $8,981.6 million compared with $6,947.1 million for the year ended December 31, 2005. The factors contributing to this increase were Tidal Energy commencing US operations in December 2005, resulting in a full year of revenues captured in 2006, as well as Tidal Energy earning higher revenues due to a higher average price of crude oil in 2006 and EGD's revenues increasing over 2005, as gas prices were high in Q1 of 2006, when the greatest sales volumes were generated.

Revenues for the year ended December 31, 2005 were $6,947.1 million compared with $6,631.1 million for the year ended December 31, 2004. Revenues increased due primarily to increased commodity prices in Tidal which is included in Other.

Enbridge Gas Distribution

EGD is a rate-regulated natural gas distribution utility serving customers in its franchise areas of central and eastern Ontario, including the City of Toronto and surrounding areas as well as the Niagara Peninsula, Ottawa and many other Ontario communities. EGD is Canada's largest natural gas distribution company and has been in operation for more than 150 years. It serves over 1.8 million customers in central and eastern Ontario, Southwestern Quebec, and parts of Northern New York State. EGD's operations in Ontario are regulated by the Ontario Energy Board (OEB).

Results of Operations

Earnings for the year ended December 31, 2006 were $61.8 million compared with $111.9 million for the year ended December 31, 2005. Warmer than normal weather in 2006 reduced earnings by $36.9 million compared with relatively normal weather in 2005 which did not significantly impact earnings. EGD earnings were also reduced by a lower allowed rate of return on common equity, partially offset by a higher rate base. EGD's earnings are also affected by variances from the forecast cost of service, including operating and maintenance costs. EGD's costs can vary due to many factors including weather, project timelines and the timing of operating and capital expenditures.

Earnings for the year ended December 31, 2005 were $111.9 million compared with $133.1 million for the year ended December 31, 2004. Earnings for the year ended December 31, 2004 included 15 months of earnings for EGD, as a result of the elimination of the quarter lag basis of consolidation. Earnings for the extra quarter, the three months ended December 31, 2003, were $11.5 million. Weather in 2004 was colder than normal resulting in an additional $21.3 million in earnings. The remaining EGD variance is the result of a higher rate base and a number of smaller positive variances across the utility in 2005.

Normal weather is the weather forecast by EGD in its annual rates application, in the Toronto area, including the impacts of both the long run and short run actual historical weather experience, more heavily weighted on the short run experience, and is subject to OEB approval.

This financial measure is unique to EGD and, due to differing franchise areas, is unlikely to be directly comparable to the impact of weather-normalized factors that may be identified by other companies. Moreover, normal weather may not be comparable year-to-year given that the forecasting model weights the degree-days from the most recent years more heavily to determine the estimate. This weather-normalized adjustment method is the same as the manner in which EGD calculates degree-days for regulatory purposes.

2007 Rate Application

In August 2006, EGD filed an application with the OEB for approval of the 2007 rates, under a cost of service rate-making methodology. In January 2007, EGD arrived at an agreement to settle certain major issues in its rate application with key stakeholders. This settlement was approved by the OEB on January 29, 2007 and will allow EGD to continue operating within its current environment. A final decision on this rate application is expected during the second quarter of 2007. As part of its 2007 rate application, EGD has requested an increase in the equity component of its deemed capital structure for regulatory purposes. The requested 38% equity level reflects changes in EGD's current business risk environment and financial risk position relative to the current approved deemed equity level of 35%. The rate of return on common equity is calculated with reference to a formula approved by the OEB that incorporates the long bond yield forecast. The rate of return of 8.74% was used in the 2007 rate application as a placeholder and reflected the OEB approved return embedded within 2006 rates. The allowed return on equity for 2007, calculated in accordance with the OEB formula is 8.39%. This rate of return on common equity will replace the placeholder used by the Company in its 2007 rate application and will be embedded in 2007 rates.

Given the OEB's scheduled plan to move to Incentive Regulation, the Company expects 2007 to become the base year for a potential four to five year rate capped plan. The details of such plan are expected to be known in 2007. A description of Incentive Regulation is included below under "Strategy".

The key elements of the 2007 application and the 2006 and 2005 decisions are summarized below:

Regulatory year	Requested 2007	Approved 2006	Approved 2005
Rate base (*millions of Canadian dollars*)	$ 3,801	$ 3,634	$ 3,422
Deemed common equity for regulatory purposes	38%	35%	35%
Rate of return on common equity	8.39%	8.74%	9.57%

The OEB released its decision relating to EGD's 2006 rate application on February 9, 2006. The new rates approved by the OEB's decision resulted in an overall increase in rates of approximately 1% for the average residential customer.

2006 and 2005 Rates

EGD's 2006 and 2005 rates were established pursuant to a cost of service methodology that allowed revenues to be set to recover EGD's forecast costs. Forecast costs included gas commodity and transportation, operation and maintenance, depreciation, municipal taxes, income taxes, and the debt and equity costs of financing the rate base. The rate base is EGD's investment in all assets used in gas distribution, storage and transmission, as well as an allowance for working capital. Under the cost-of-service model, it is EGD's responsibility to demonstrate to the OEB the prudence of the forecast costs.

The rate base is financed through a combination of debt and equity. The proportion of debt and equity, currently 65% and 35% respectively, is approved by the OEB. For the debt portion, interest expense incurred by the Company is recovered in rates. For the equity portion, the OEB sets the rate of return that EGD may recover in rates. The allowed rate of return on equity for EGD is based on the forecast yield on Canadian government long-term bonds.

For 2004, rates were set by increasing 2003 rates by 90 percent of the forecast Ontario consumer price index, resulting in an increase of 1.8 percent. The OEB also added a sharing mechanism to fiscal 2004, whereby if earnings on a weather-normalized basis exceeded the benchmark ROE, these excess earnings would be shared on a 50/50 basis between ratepayers and the Company's shareholders.

Effects of Rate Regulation

EGD is subject to rate-regulation, therefore there are circumstances where the revenues recognized do not match the amounts billed. Certain amounts are deferred for recovery or refund with the approval of the regulator and are not included in revenues or expenses that would otherwise be recognized in the income statement, in the absence of rate regulation. The regulator, allows certain variances between approved and actual expenses to be recovered from, or refunded to, customers in future periods. The deferred amounts are not included in the calculation of rates billed to customers. While there are numerous deferral accounts approved by the regulator, the difference between the price of gas approved by the regulator and the actual cost of gas purchased is the most significant such example. On refund or recovery of this difference, no earnings impact is recorded. Effectively, the income statement captures only the approved cost of gas and the related revenue rather than the actual cost of gas and related revenue. EGD has no exposure to changes in the cost of gas, as it is a flow through cost that is passed to the ratepayer.

Strategy

EGD's vision is to be North America's leading energy distribution company, providing safe and reliable distribution services to customers at fair and reasonable costs. To achieve this vision, EGD has outlined the following strategic objectives:

- to continue growth of the business through enhancement of infrastructure and storage facilities;
- improve opportunities for better returns through Incentive Regulation, which is expected to start in 2008;
- to be best-in-class in the safe and reliable operation of its gas distribution system;
- to be a leader in utility asset management; and
- enhance customer satisfaction by meeting customer commitments and enhancing value of services.

Customer Growth

A major strategic initiative is enhancing customer growth. EGD added over 47,000 new customers in the year ended December 31, 2006 (over 50,000 in the year ended December 31, 2005). The Company expects to continue to add 45,000 – 50,000 customers in 2007. New growth areas relating to construction heat, mass markets and distributed energy are also being pursued as part of a profitable utility growth portfolio. EGD will also lead research and development efforts into longer-term promising technologies that have the potential to retain and increase gas load and reduce operating costs while providing customer benefits. EGD has been successful in pursuing its industry facilitation strategy with the recent launch of

“EnergyLink”, a web-based tool that makes it easier for customers to find and install natural gas appliances.

Incentive Regulation

Improving the regulatory environment is also a key strategic thrust to provide greater operational and organizational flexibility. EGD will remain in a cost of service environment in 2007 but a change to Incentive Regulation (IR), is expected in 2008, with 2007 as the base year for a potential four to five year plan. Consultation with the OEB has commenced with respect to potential implementation of IR methodology for setting rates for services provided by EGD, which differs from the existing cost of service methodology. The potential impact on the future operating environment of EGD is not currently known, however EGD expects to obtain details on a proposed IR plan in the fourth quarter of 2007.

The following are the key anticipated parameters of IR:

- Inclusion of an appropriate annual adjustment mechanism to give effect to cost changes and productivity improvements, to ensure that benefits of efficiencies are shared with customers during the term of the plan;
- Mandatory cost of service rebasing at the end of each IR plan term and before a new plan is put in place to ensure that efficiency improvements will be identified and the benefits are passed onto customers through base rates for the following IR plan period;
- Earnings sharing mechanisms will not form part of IR plans, in order to provide a strong incentive to achieve sustainable efficiencies that can be shared with customers through the annual adjustment mechanism and rebasing; and
- IR term plans are expected to run between four and five years.

The objectives of IR are as follows:

- Reduce regulatory costs with less frequent hearings (maximum every 4 to 5 years) rather than every year under the current cost of service mechanism;
- Provide incentives for improved efficiency;
- Provide more flexibility for utility management; and
- Provide more stable rates.

Capital Expenditures

EGD’s capital expenditures in recent years have averaged approximately $300 million per year. The capital expenditure budget is approved annually by the OEB, under the current cost of service environment.

Legal Proceedings

Class Action Lawsuit – late payment penalties

In July 2006, culminating a 12-year legal case, EGD entered into a settlement agreement with respect to the repayment of a portion of amounts paid to it as late payment penalties. The total amount of late payment penalties billed between April 1994 and February 2002, when the late payment penalty was revised, was approximately $74 million.

Under a settlement agreement approved by the Ontario Superior Court of Justice (the Court) in December 2006, EGD will contribute $9 million to the Winter Warmth Fund (WWF), pay class counsel approximately $10 million for the plaintiff’s legal fees and expenses and pay approximately $2 million to the Class Proceedings Fund. The WWF provides eligible low-income customers of participating Ontario utilities with financial assistance for the payment of their natural gas and electricity bills. In accordance with the settlement agreement, EGD paid

$2 million to class counsel shortly after the settlement agreement was executed, which amount was held in trust by class counsel until the settlement became final. EGD paid the remaining settlement amount of approximately $19 million in January 2007. EGD has recorded a receivable from ratepayers for the total amount of $21 million and will apply to the OEB for recovery of payments resulting from the settlement.

Bloor Street Incident

EGD has been charged under both the Ontario Technical Standards and Safety Act (TSSA) and the Ontario Occupational Health and Safety Act (OHSA) in connection with an explosion that occurred on Bloor Street West in Toronto on April 24, 2003. The maximum possible fine upon conviction on all charges would be $5.0 million in aggregate. EGD has also been named as a defendant in a number of civil actions related to the explosion. A Coroner's Inquest in connection with the explosion has also been called, but the proceedings are stayed pending resolution of the TSSA and OHSA matters. The courts have not yet ruled upon any of the charges laid under the TSSA or the OHSA, and thus it is not possible at this time to predict or comment upon the potential outcome. The trial in respect of these charges commenced January 3, 2006 and is not expected to be completed until well into 2007, at the earliest. EGD does not expect the outcome of these civil actions to result in any material financial impact.

Business Risks

The risks identified below are specific to EGD. General risks that affect the Company as a whole are described under Risk Management.

The business risks inherent in the natural gas distribution industry impact the ability of EGD to realize the revenue level required to generate the allowed return on equity. These business risks include obtaining timely and adequate rate relief, as well as accuracy in forecasting and realizing natural gas distribution volumes.

Volume Risks

Since customers are billed on a volumetric basis, the ability to collect the total revenue requirement (the cost of providing service) depends on achieving the forecast distribution volume established in the annual ratemaking process. The probability of realizing such volume is contingent upon weather; economic conditions; the price of gas relative to competitive energy sources; and the number of customer additions.

Sales and transportation of gas for customers in the residential and commercial sectors account for approximately 77% (2005 – 78%) of total distribution volume. Weather during the year, measured in degree days, has a significant impact on distribution volume as a major portion of the gas distributed to these two markets is used ultimately for space heating. In 2006, the winter months were warmer than forecast, resulting in an unfavourable weather related volume variance of 27.4 bcf.

Distribution volume may also be impacted by the increased adoption of energy efficient technologies along with more efficient building construction that continues to place downward pressure on annual average consumption. Average annual gas usage has declined by 1.2% per annum over the last 10 years, reflecting consistent customer conservation efforts.

Sales and transportation service to large volume commercial and industrial customers is more susceptible to prevailing economic conditions. As well, the pricing of competitive energy sources affects volumes distributed to these sectors as some customers have the ability to

switch to an alternate fuel. Customer additions are important to all market sectors as continued expansion adds to the total consumption of natural gas.

Earnings from EGD are impacted to the extent that volumes sold differ from forecasted volumes. Key factors that affect the probability that EGD will distribute the forecast volumes include weather, economic conditions, gas prices and the prices of competing energy sources and the number of customers added. To the extent that these factors vary unfavourably compared with forecasts, EGD will not achieve the total revenue requirements established in the ratemaking process due to lower distribution volumes, thus resulting in lower earnings.

Distribution volume may also be impacted by the increased adoption of energy efficient technologies along with more efficient building construction that continues to place downward pressure on annual average consumption.

Even in those circumstances where EGD attains its total forecast distribution volume, it may not earn the approved return on equity due to other forecast variables such as the mix between the higher margin residential and commercial sectors, and lower margin industrial sector.

Rate Relief

The OEB has in the past, rendered decisions that have disallowed recovery of certain costs incurred by EGD. Through the regulatory process, the OEB approves the return on equity, which EGD is allowed to earn, in addition to various other aspects of utility operations.

Rate relief could be pursued for significant unforecasted amounts allowing EGD to recover the costs of providing and maintaining the quality of its service while achieving the allowed rate of return on rate base.

Forecasting Accuracy

EGD is exposed to forecasting accuracy risk as rates are established in advance, based on anticipated distribution volume by class of customer. Forecasts are also made for the future costs of debt and equity capital including the forecast yield rate for long-term Government of Canada Bonds used in the determination of the return on equity. Through the forecasting process, it is intended that any changes in cost of service, regardless of whether they are caused by inflation or by level of business activity, would be reflected in new rates applied for in the upcoming fiscal year.

Franchise Rights

EGD has an exclusive right to serve all end users within its franchise area, under its franchise agreements. Similar franchise agreements in adjacent areas are held by peer companies such as Union Gas Limited (UGL). On January 6, 2006, the OEB granted Greenfield Energy Corporation, a potential power-plant customer of UGL, the right to physically bypass UGL's distribution network within UGL's franchise area, in order to serve its own power-plant. The OEB's decision to not uphold exclusive franchise rights of a local distribution utility in Ontario was unprecedented. However, the OEB characterized this decision as transitional, and set up a rates proceeding which assessed the service requirements of gas fired generation in the province of Ontario. The OEB decision from this rates proceeding was issued in November 2006. EGD believes the new rates are robust and would make physical bypass of EGD's system unattractive to gas fired power generation plants. However, the OEB decision did not preclude any party from seeking approval from the OEB to build its own pipeline and bypass the local distribution utility. EGD objects strongly to the concept that any such franchise violation is acceptable and will object should any similar proposal arise in the EGD franchise area.

Noverco

Enbridge owns an equity interest in Noverco through ownership of 32% of the common shares and a cost investment in preferred shares. Noverco is a holding company that owns approximately 71% of Gaz Metro Limited Partnership (Gaz Metro), a gas distribution company operating in the province of Quebec and the state of Vermont. Gaz Metro also has a 50% interest in TQM Pipeline, which transports natural gas in Quebec, and is partnering with the Company on the Rabaska LNG project (described under “Strategy” below).

Noverco also has an investment in the common shares of Enbridge resulting in dividend and earnings elimination adjustments at Enbridge. Noverco receives dividends from Enbridge but because Enbridge owns part of Noverco, a portion of the dividends Noverco receives are effectively dividends that Enbridge has paid to itself. This portion of the dividends paid reduces the book value of Enbridge’s investment in Noverco.

Results of Operations

Noverco earnings were $22.7 million for the year ended December 31, 2006 compared with $28.3 million for the year ended December 31, 2005. Earnings decreased due to a $7.3 million dilution gain in 2005, which resulted from a Gaz Metro LP unit issuance in which Noverco did not participate, compared with a dilution gain of $4.0 million in 2006. Excluding dilution gains, earnings from Noverco were lower in 2006 as the prior year included a future income tax recovery stemming from the receipt of a significant cash dividend.

Noverco earnings were $28.3 million for the year ended December 31, 2005 compared with $32.3 million for the year ended December 31, 2004. The 2005 results included the $7.3 million dilution gain within Noverco on unit issuances by Gaz Metro. The 2004 results included 15 months of earnings as a result of the elimination of the quarter lag basis of consolidation. Earnings for the extra quarter, the three months ended December 31, 2003, were $13.6 million. The remaining variance reflected the future income tax recovery related to the receipt of cash dividends net of an adjustment for reciprocal dividends.

Weather variations do not affect Noverco’s earnings as Gaz Metro is not exposed to weather risk. A significant portion of the Company’s earnings from Noverco is in the form of dividends on its preferred share investment, which is based on the yield of 10-year Government of Canada bonds plus 4.34%.

CustomerWorks/ECS

CustomerWorks/ECS includes the operations of CustomerWorks and Enbridge Commercial Services (ECS). CustomerWorks is 70% owned by Enbridge and provides customer care services, including billing, collections, and operation of call centers primarily for; EGD, Direct Energy Essential Home Services and Terasen Gas (a gas distribution company in British Columbia). EGD is currently reviewing its customer care provider and expect to conclude this process in mid-2007. ECS owns the customer information services system that CustomerWorks uses under license to provide services to EGD.

Enbridge Gas New Brunswick

The Company owns 70% of, and operates, Enbridge Gas New Brunswick (EGNB), which owns the natural gas distribution franchise in the province of New Brunswick. EGNB is constructing a new distribution system and has approximately 5,600 customers. Approximately 565 kilometers (351 miles) of distribution main has been installed with the capability of attaching approximately 27,000 customers.

EGNB earnings were $9.8 million for the year ended December 31, 2006 compared with $6.1 million for the year ended December 31, 2005. Earnings were higher in 2006 as debt was settled through the issuance of equity, during the third and fourth quarters of 2005 resulting in a higher equity base throughout 2006.

Enbridge Gas New Brunswick earnings were $6.1 million for the year ended December 31, 2005 compared with $3.7 million for the year ended December 31, 2004. The increase is consistent with the settlement of debt through the issue of equity in 2005, resulting in a higher equity base.

EGNB is regulated by the New Brunswick Board of Commissioners of Public Utilities (PUB). As it is currently in the development period, EGNB's cost of service exceeds its distribution revenues. The PUB has approved the deferral of the difference between distribution revenues and the cost of service during the development period for recovery in future rates. This recovery period is expected to start in 2010 and end no sooner than December 31, 2040. On December 31, 2006, the regulatory deferral asset was $101.8 million (2005 – $82.7 million).

Other Gas Distribution Operations

Earnings from Other Gas Distribution Operations were $6.5 million consistent with $6.7 million for the year ended December 31, 2005.

Earnings from Other Gas Distribution Operations decreased $1.8 million in 2005, primarily because the 2004 results included 15 months of earnings as a result of the elimination of the quarter lag basis of consolidation. Earnings for the extra quarter, the three months ended December 31, 2003, were $2.0 million.

Aux Sable

Enbridge owns 42.7% of Aux Sable, a natural gas liquids (NGL) extraction and fractionation business near Chicago. Aux Sable owns and operates a plant, at the terminus of the Alliance System. The plant extracts NGL from the energy-rich natural gas transported on the Alliance System, as necessary, to meet the heat content requirements of local distribution companies, which require natural gas with less NGL, or lower heat content, and to take advantage of positive commodity price spreads.

Aux Sable has an agreement with BP Products North America Inc. to sell its NGL production to BP. In return, BP pays Aux Sable a fixed annual fee and a share of any net margin generated from the business in excess of specified natural gas processing margin thresholds. In addition, BP compensates Aux Sable for all operating, maintenance and capital costs associated with the Aux Sable facilities subject to certain limits on capital costs. BP supplies, at its cost, all make-up gas and fuel supply gas to the Aux Sable facilities and is responsible for the capacity on the Alliance Pipeline held by an Aux Sable affiliate, at market rates. The agreement is for an initial term of 20 years, commencing January 1, 2006 and may be extended by mutual agreement for 10-year terms. If cumulative losses exceed a certain limit, BP will have the option to terminate the agreement, however Aux Sable has the right to reduce such losses to avoid termination.

Earnings for the year ended December 31, 2006 were $25.8 million compared with earnings of $5.3 million for the year ended December 31, 2005. Fractionation margins were very positive throughout 2006 and as a result, earnings from the upside sharing mechanism account for the majority of earnings from Aux Sable.

Fractionation margins are expected to moderate but remain favourable in 2007, given high oil prices and relatively low gas prices.

Earnings for the year ended December 31, 2005 were $5.3 million compared with earnings of $7.3 million for the year ended December 31, 2004. The decrease was due to higher natural gas costs in 2005, which were not offset by product sales prices causing weak margins and therefore decreased production levels.

Gas Services

The Company's Gas Services business markets natural gas to optimize Enbridge's commitments on the Alliance and Vector Pipelines. It also has a growing business of providing fee for service arrangements for third parties, leveraging its marketing expertise. Capacity commitments as of December 31, 2006 were 31.6 mmcf/d on the Alliance Pipeline (2.4% of total capacity) and 159.2 mmcf/d on Vector Pipeline (15.9% of total capacity). In December 2005, capacity commitments on Vector Pipeline of 82.5 mmcf/d, previously held by EGD were assumed by the Gas Services business.

Earnings from Gas Services are dependent upon the basis (location) differentials between Alberta and Chicago, for Alliance Pipeline, and between Chicago and Dawn, for Vector Pipeline. To the extent that the cost of transportation on these two pipelines exceeds the gas commodity basis differential, earnings will be negatively affected.

Other

Other earnings were $5.4 million in 2006 compared with a loss of $2.9 million in 2005. The 2006 results included an increased contribution from Tidal Energy, which resulted from the expansion of the business into the U.S. at the end of 2005 and increased earnings from its physical storage program.

In 2005, Other included higher costs, compared with 2004, related to the development of the Rabaska LNG facility.

Tidal Energy

Tidal Energy (Tidal) provides crude oil and natural gas liquids marketing services for the Company and its customers in a full range of condensate and crude oil types including light sweet, light and medium sours and several heavy grades. Tidal transacts at many of the major North American market hubs and provides its customers with a variety of programs including flexible pricing arrangements, hedging programs, product exchanges, physical storage programs and total supply management, through the analysis and implementation of different transportation options, reduced quality differentials and tariff structures, and utilizing Risk Management Pricing options. Tidal's business involves buying, selling and storing large quantities of crude oil. Tidal is primarily a physical barrel marketing company and in the course of its market activities, physical receipt or delivery shortfalls can create modest commodity exposures. Any open positions created from this physical business are tightly monitored by, and must comply with, the Company's formal risk management policies. Earnings from Tidal are included in Other.

AltaGas

The Company sold its investment in AltaGas in the third quarter of 2004 for an after-tax gain of $97.8 million.

Strategy

Other Natural Gas Distribution Strategies

Enbridge intends to pursue natural gas business development opportunities complementary to the existing gas distribution and services businesses through:

- developing LNG regasification projects and related pipeline infrastructure,
- pursuing marketing and storage opportunities that optimize existing assets,
- continuing to develop and grow the wind power platform in a measured fashion,
- pursuing marketing and storage opportunities that optimize existing assets, and
- exploring gas-fired generation opportunities that are underpinned by long-term contracts and improve the utilization of existing assets. The approach is to slowly build this business and utilize partners to share development risks.

Further to this strategy, Enbridge is developing a number of projects, which are described below.

Rabaska LNG Facility

Enbridge, Gaz Metro and Gaz de France are continuing development of the previously announced Rabaska LNG terminal to be located on the St. Lawrence River in Levis, Quebec. The Levis municipal council is fully supportive of the project and a fiscal agreement has been executed. Options for all required land have been secured. Environmental and marine applications have been filed and are progressing. It is expected that all required permits would be obtained by early summer 2007. Discussions are in progress with potential LNG suppliers regarding long-term terminal use arrangements. The project is expected to cost approximately $840 million in total.

Ontario Wind Project

Enbridge is developing approximately 182 megawatts of wind power in the Municipality of Kincardine on the eastern shore of Lake Huron in Ontario. Construction will commence when final environmental and zoning approvals are obtained. The project is waiting for its Environmental Screening Report to be passed by the Ontario Ministry of Environment and its zoning laws to be approved by the Ontario Municipal Board. Total capital expenditures are expected to be approximately $0.5 billion. Enbridge has entered into a 20-year electricity purchase agreement with the Ontario Power Authority for all the power produced by the project. The Company expects the Ontario Wind Project to be in service in late 2008.

Capital Expenditures

Capital expenditures in other Gas Distribution and Services businesses, including the Ontario Wind Project, described above, are expected to be approximately $225 million in 2007.

INTERNATIONAL

International includes earnings from the Company's 25% interest in Compañia Logistica de Hidrocarburos CLH, S.A. (CLH), Spain's largest refined products transportation and storage business, and Oleoducto Central, S.A. (OCENSA), a crude oil pipeline in Colombia. Earnings also include fees earned from technology and consulting services provided by Enbridge Technology Inc.

Earnings

(millions of Canadian dollars)	**2006**	2005	2004
CLH	**54.5**	61.6	48.6
OCENSA/CITCol	**33.9**	32.8	33.0
Other	**(5.2)**	(7.0)	(8.0)
	83.2	87.4	73.6

Earnings for the year ended December 31, 2006 were $83.2 million compared with $87.4 million for the year ended December 31, 2005. Earnings from CLH for 2005 included a $7.6 million gain on the sale of land, recorded in the fourth quarter.

Earnings for the year ended December 31, 2005 were $87.4 million compared with $73.6 million for the year ended December 31, 2004. The increase results primarily from the $7.6 million gain on the sale of land in CLH. Operating results at CLH were also improved due to higher volumes and increased average tariffs and storage revenues.

Other includes administration and business development costs and the financial results of Enbridge Technology Inc.

CLH

The primary activity of CLH is the storage and shipment of refined products through a comprehensive distribution network located throughout Spain. Earnings are based on a fee for service tariff, adjusted annually for inflation, and are dependent on throughput volumes and storage levels.

CLH is the primary basic logistics distribution network for refined products in Spain and provides services on an open access basis. The system consists of over 3,400 kilometers (2,113 miles) of pipelines and 38 storage facilities located throughout the country. CLH provides product distribution to locations not connected to the pipeline system through its own fleet of tanker trucks and chartered tanker ships. CLH also offers secondary distribution services, the most significant being the services provided through CLH Aviation, which handles aviation fuel at airport locations throughout Spain. This business includes the storage of aviation fuel, loading of aircraft refueling units and the refueling of aircraft. New policies issued by the Spanish airport authority (AENA) to promote competition, allow for new non-CLH operators to enter the aircraft-refueling segment of this business. While CLH's share of this segment of the market may reduce over time, its participation in the aviation fuel business will continue. CLH's pipeline facilities are connected to the country's eight crude oil refineries and to major coastal port locations where most imports of crude oil and refined products into Spain are first delivered.

Earnings from CLH are directly impacted by the demand for refined products including gasoline, diesel, jet fuel and other transportation fuels. Economic growth in Spain over the last decade has been among the highest in the European Union, which has led to increasing demand for energy, including refined products. The central region of the country, in and around Madrid, has seen the largest growth in demand. CLH is in the process of expanding its system over the next several years in order to meet the continued growth expected in this region. This expansion, which includes an increase in storage capacity and looping of both the northern and southern main lines, will be constructed in phases to match the expected growth in volumes.

OCENSA/CITCol

The Company owns a 24.7% interest in OCENSA, a cost investment on which the Company earns a fixed return. OCENSA is one of two crude oil export pipelines within Colombia. Through a 100% owned entity, CITCol, the Company manages the pipeline and earns a fee for this service, which includes incentives for operating performance.

Strategy

The Company plans to increase International earnings contribution over the next several years by leveraging its North American operating expertise in midstream energy infrastructure and relationships with existing partners. The Company will pursue investment opportunities in regions or countries with attractive fundamentals of supply and market demand, in which operating and political risks are acceptable to the Company, and in which attractive risk adjusted returns are available.

Business Risks

The International business is subject to risks related to political and economic instability, currency volatility, market and supply volatility, government regulations, foreign investment rules, security of assets and environmental considerations. The Company assesses and monitors international regions and specific countries on an ongoing basis for changes in these risks. Risks are mitigated by a combination of Enbridge's governance involvement, contractual arrangements, influence in operation of the assets, regular analysis of country risk, as well as foreign currency hedging and insurance programs.

CORPORATE

(millions of Canadian dollars)	**2006**	2005	2004
Corporate	**(82.2)**	(63.9)	(81.3)
Revalue future income taxes due to tax rate changes	**14.0**	—	—
	(68.2)	(63.9)	(81.3)

The Corporate segment includes corporate financing costs, business development activities and other corporate costs not attributable to a specific business segment.

Corporate costs were $82.2 million for the year ended December 31, 2006 compared with $63.9 million for the year ended December 31, 2005. The increase in Corporate costs was due to a number of factors including higher interest expense as a portion of the Company's floating rate debt was repaid through the issuance of long-term fixed rate debt as well as higher business development activity and the impact of a strong labour market on compensation expense.

Corporate costs were $63.9 million for the year ended December 31, 2005 compared with $81.3 million for the year ended December 31, 2004. Corporate costs were lower in 2005 reflecting lower interest expense due to lower rates. Also, business development costs were higher in 2004.

LIQUIDITY AND CAPITAL RESOURCES

The Company's cash generated from operations, commercial paper issuances, available capacity under credit facilities and access to capital markets in Canada and the United States for the issuance of long-term debt, equity, or other securities are expected to be sufficient to

satisfy liquidity and capital expenditure requirements. Subsequent to December 31, 2006, the available capacity under credit facilities was increased to approximately $4.0 billion.

The Company continues to manage its debt to capitalization ratio to maintain a strong balance sheet. The debt to capitalization ratio at December 31, 2006, including short-term borrowings, but excluding non-recourse short and long-term debt, was 64.6%, compared with 64.5% at the end of 2005.

The Company's current liabilities routinely exceed current assets. Current liabilities include current maturities of long-term debt, which are typically refinanced with long-term debt. Excluding current maturities of long-term debt, the Company does not have a working capital deficit.

The Company's cash balance at the end of the year includes $7.2 million (2005 – $16.4 million; 2004 – $6.0 million) held in trust in joint ventures, pursuant to finance agreements within the joint ventures.

Operating Activities

Cash from operating activities increased to $1,297.7 million for the year ended December 31, 2006 from $947.0 million for the year ended December 31, 2005 and $886.7 million for the year ended December 31, 2004.

(millions of Canadian dollars)	**2006**	2005	2004
Earnings net of non-cash items	**1,171.0**	1,300.9	1,027.8
Changes in operating assets and liabilities	**126.7**	(353.9)	(141.1)
Cash Provided by Operating Activities	**1,297.7**	947.0	886.7

Cash provided by earnings net of non-cash items, was $1,171.0 million for the year ended December 31, 2006, compared with $1,300.9 million and $1,027.8 million for 2005 and 2004, respectively. In 2005, the Company received special dividends from Noverco totaling $70 million which resulted in most of the variance between 2005 and 2006.

Changes in operating assets and liabilities were $480.6 million higher in 2006 compared with 2005. The increase was due primarily to the impact of a declining trend in the price of natural gas in the latter half of 2006 compared with an increasing trend in 2005. This caused reductions in accounts receivable and gas inventories in the current year, compared to increases in the prior year, partially offset by a decrease in payables in the current year, compared with an increase in the prior year, all within EGD.

Changes in operating assets and liabilities were lower in 2005 compared with 2004. The majority of this change was in EGD where higher commodity prices in 2005 increased accounts receivable and inventory.

Since the Company's pension plans are adequately funded, no additional funding above usual levels is anticipated for 2007.

Investing Activities

Cash used for investing activities for the year ended December 31, 2006 was $1,580.0 million compared with $876.5 million in 2005, an increase of $703.5 million. The majority of the increase was due to expenditures on property, plant and equipment, including the commencement of capital expenditures on a number of Liquids Pipelines projects and a $280.2

million investment in EEP as well as the acquisition of a 65% interest in the Olympic Pipeline for $101.4 million.

In 2005, the majority of cash spent on investing was for additions to property, plant and equipment, primarily in EGD. The increase in additions to property, plant and equipment in 2005, compared with 2004, was due to increased expenditures on capital projects. In 2005, the Company also made contingent payments to the former owners of the Company's 25% interest in CLH because CLH met cumulative volume targets. In 2004, the Company also made smaller contingent payments to the former owners of the 25% interest in CLH.

In 2005, the Company made minor acquisitions throughout the year amounting to $88.6 million whereas, in 2004, $833.9 million was used for acquisitions including Enbridge Offshore Pipelines, acquired for $743.4 (net of cash acquired) and other minor acquisitions. Cash proceeds from the sale of the investment in AltaGas partially offset the use of cash for acquisitions in 2004.

Financing Activities

In 2006, the Company generated $268.1 million through financing activities compared with cash used for financing activities of $22.1 million in 2005 and cash generated during 2004 of $114.4 million.

During 2006, the Company issued $1,125.0 million of new long-term debt in the form of medium term notes and repaid $400.0 million in medium term notes which matured during 2006. Short-term borrowings at EGD are used primarily to finance working capital, including inventory. EGD's short-term borrowings decreased by $266.9 million in 2006, reflecting the impact of decreasing natural gas prices. This decrease in short-term borrowings was partially offset by an increase in short-term debt to finance capital expenditures and investments.

Throughout 2005, the Company issued $1,020.1 million new long-term debt. This new debt replaced higher interest rate medium-term notes, which matured during 2005, and short-term debt, primarily commercial paper. The repayment of short-term debt was partially offset by an increase in short-term borrowings at EGD. EGD's short-term borrowings were higher at the end of 2005 due to increased commodity prices.

Dividends on common shares have increased again in 2006 due to an increased number of common shares outstanding and a higher dividend rate.

In 2004, cash was generated through a net issuance of $788.0 million of debt, partially offset by the payment of dividends. The Company also repaid $350.0 million of preferred securities at the end of 2004.

Debt Covenants

Enbridge Inc. and all of its subsidiaries are in compliance with all debt covenants. However currently, EGD does not meet a new long-term debt issuance test contained in its trust indenture due primarily to significantly warmer weather and a decline in EGD's allowed return on equity. In order for EGD to issue new long-term debt, EGD requires a long-term debt interest coverage ratio of 2.0 times for 12 consecutive months out of the last 23 months. Although EGD cannot issue new long-term debt until it meets the test, EGD may refinance existing long-term debt or issue new short-term debt without having to meet the new issue test.

Equity Issuance

On February 2, 2007, Enbridge closed the issuance of 13.5 million common shares for $38.75 per share to the public and issued 1.5 million common shares to Noverco for $38.75 per share, which maintains Noverco's ownership interest in Enbridge at approximately 9.5%. Gross proceeds from both offerings were $581.2 million.

Preferred Securities

The Company has $200.0 million of 7.8% Preferred Securities outstanding. On December 18, 2006, the Company announced its intention to redeem all 8,000,000 Preferred Securities on February 15, 2007 for $25.00 per Preferred Security plus accrued and unpaid interest of $0.2458 per security for the period covering from the last interest payment date of December 31, 2006 to the redemption date of February 15, 2007.

Expected Capital Expenditures

The numerous potential organic growth projects and other growth initiatives described in the business unit sections will require capital funding. The Company also requires capital for ongoing core maintenance and capital improvements in many of its businesses. In total, Enbridge expects to spend approximately $2.5 billion during 2007 on capital projects and maintenance. The Company expects to finance these expenditures through cash from operating activities, the equity issuance described above and additional debt, if required.

The decision to finance with debt or equity is based on the capital structure for each business and the overall capitalization of the consolidated enterprise. Certain of the regulated pipeline and gas distribution businesses issue long-term debt to finance capital expenditures. This external financing may be supplemented by debt or equity injections from the parent company. Debt, and equity when required, has been issued to finance business acquisitions, investments in subsidiaries, and long-term investments. Funds for debt retirements are generated through cash provided from operating activities, as well as through the issue of replacement debt.

Payments due for contractual obligations over the next five years and thereafter are as follows:

(millions of Canadian dollars)	**Total**	**Less than 1 year**	**1-3 years**	**3-5 years**	**After 5 years**
Long-term debt	7,574.4	535.3	800.0	748.4	5,490.7
Non-recourse long-term debt	1,566.9	58.4	301.3	180.0	1,027.2
Capital and operating leases	85.6	7.4	14.2	12.3	51.7
Long term contracts[1]	1,306.1	454.2	309.1	256.6	286.2
Total Contractual Obligations	10,533.0	1,055.3	1,424.6	1,197.3	6,855.8

1. Approximately $214.4 million of these contracts are commitments for products related to the construction of Liquids Pipelines projects; the minimum cancellation charge related to these contracts is $127.2 million.

SENSITIVITY ANALYSIS

The Company's earnings will fluctuate with changes in the market prices and certain volumetric parameters, such as weather. Enbridge manages its financial market risks through an Earnings at Risk (EaR) metric. Under the Company's EaR policy, using a two standard deviation confidence interval, the maximum adverse change in 12 months forward earnings from movements in market prices over a 1 month period of time will not exceed 5% of earnings. On December 31, 2006, the Company's EaR was 2.9%.

The following table shows the effect of changes in certain key financial market variables on earnings. These sensitivities are approximations based on business conditions as of December 31, 2006 and may not be applicable to other periods, under other economic conditions or for greater magnitude changes.

Factor	Change	After-Tax Earnings Impact
Exchange rate (CAD Dollar to US Dollar)	CAD $0.01	$1.1 million
Exchange rate (CAD Dollar to Euro)	CAD $0.01	$0.3 million
Interest rates	0.5%	$4.0 million

Interest rate fluctuations are captured in the Company's EaR metric. However, under GAAP, the impact of foreign currency fluctuations on earnings from foreign subsidiaries cannot be hedged and as such, these fluctuations have been excluded from the Company's EaR metric. The Company hedges the foreign currency risk of dividends it receives from foreign currency denominated subsidiaries. Any unhedged foreign currency dividends are captured in the EaR metric.

Weather is a significant driver of delivery volumes at EGD, given that a significant portion of EGD's customers use natural gas for space heating. Weather, measured in terms of degree day deficiency, directly impacts EGD's earnings as noted below. Degree-day is a measure of coldness, calculated as the total number of degrees each day by which the daily mean temperature falls below 18 degrees Celsius.

Factor	Incremental change	Approximate incremental impact
Weather	18 degree days	1 billion cubic feet
Volume	1 billion cubic feet	$1.3 million (after-tax)

In 2006, weather negatively impacted earnings by a larger magnitude than the above sensitivities would suggest. This resulted from the unusual pattern of distribution degree days during the year and their relative effectiveness. Degree days are fully effective, typically in the peak winter months, when their occurrence directly impacts the consumption pattern by a similar magnitude.

RISK MANAGEMENT

The Company's business activities are subject to market price, credit, and operating risks. The Company has formal risk management policies and risk management systems designed to mitigate these risks.

Market Price Risk

Enbridge's earnings are subject to movements in interest rates, foreign exchange rates, and commodity prices (collectively Market Price Risk). Given the Company's desire to maintain a stable and consistent earnings profile, it has implemented a Board of Directors approved Market Price Risk Policy to minimize the likelihood that adverse earnings fluctuations arising from movements in market prices across all of its businesses will exceed a defined tolerance.

The Market Price Risk metric utilized within that policy is Earnings at Risk. It is an objective, statistically derived risk metric that measures the maximum earnings loss that could result from

adverse market price movements over a specified time horizon within a pre-determined level of statistical confidence, under normal market conditions.

The Company uses derivative financial instruments for risk management purposes. The following summarizes the types of market price risks to which the Company is exposed and the hedging programs implemented.

Foreign Exchange Risk

The Company has exposure to foreign currency exchange rates, primarily arising from its U.S. dollar and Euro denominated investments, where both carrying values and earnings are subject to foreign exchange risk. Furthermore, the Company is exposed to the economic risk on the conversion of the foreign currency denominated cash flows. The Company has a hedging policy to eliminate 50% to 70% of the long-term economic exposure related to its foreign currency denominated cash flows. It will also hedge shorter term anticipated foreign currency capital expenditures.

The Company hedges certain of its foreign currency denominated net equity investments with the use of cross currency swaps, par forward contracts, and foreign currency denominated debt. These long-term derivative contracts also serve to economically hedge a significant portion of the cash distributions from these equity investments. However, this does not eliminate the GAAP earnings volatility caused by exchange rate differences. During the year ended December 31, 2006, the Company received foreign currency denominated cash distributions and settled associated hedge transactions resulting in $17.1 million (2005 – $13.0 million) of incremental cash flows, which were not included in reported earnings.

Interest Rate Risk

Enbridge is exposed to interest rate fluctuations on variable rate debt. Floating to fixed interest rate swaps, collars and forward rate agreements are used to hedge against the effect of future interest rate movements. The Company monitors its debt portfolio mix of fixed and variable rate debt instruments to ensure that the consolidated portfolio of debt stays within its Board of Directors approved policy limit band of 15% to 25% floating rate debt as a percentage of total debt outstanding. Fixed to floating swaps are also used from time to time to manage this position and optimize the Company's debt portfolio. The Company is also exposed to fluctuations in interest rates ahead of anticipated fixed rate debt issuances. The Company may enter into interest rate derivatives to hedge a portion of the interest cost of these future debt issues.

Information about the debt portfolio itself is included in Notes 12 and 17 of the Company's consolidated financial statements for the year ended December 31, 2006.

Commodity Price Risk

The Company uses natural gas price swaps, futures and options to manage the value of commodity purchases and sales that arise from capacity commitments on the Alliance and Vector pipelines. The Company also uses natural gas, power, crude oil, and natural gas liquids derivative instruments to fix the value of variable price exposures that arise from commodity usage, storage and supply agreements.

Natural Gas Supply Management

Customers of EGD are exposed to changes in the price of the natural gas commodity. A portion of the future natural gas supply requirements is hedged using natural gas swaps and options that manage the price of natural gas, as allowed by the OEB. Since customers pay the cost of

the natural gas commodity, this risk mitigation strategy is for the benefit of customers. The OEB monitors the policies, procedures, and results of this hedging program.

Fair Values of Derivative Instruments

Information about the financial instruments outstanding at year end for the purposes of mitigating the risks as described above, including the fair values, notional or principal amounts and maturities are shown in Note 17 of the Company's Consolidated Financial Statements for the year ended December 31, 2006.

Credit Risk

Entering into derivative financial instruments can give rise to additional credit risks. Credit risk arises from the possibility that a counterparty will default on its contractual obligations and is limited to those contracts where the Company would incur a loss in replacing the instrument. The Company minimizes credit risk by entering into risk management transactions only with institutions that possess high investment grade credit ratings or have provided the Company with an acceptable form of credit protection. The Company has no significant concentration with any single counterparty. For transactions with terms greater than five years, the Company may also require a counterparty that would otherwise meet the Company's credit criteria to provide collateral.

Trade receivables include amounts due from companies operating in the oil and gas industry and are collateralized by the commodities contained in the Company's pipelines and storage facilities. Where shippers fail to maintain specified credit ratings they are required to provide letters of credit or other suitable security. Credit risk in the Gas Distribution and Services segment is reduced by the large and diversified customer base and the ability to recover an estimate for doubtful accounts through the ratemaking process. For customers of our non-regulated businesses, credit exposure is minimized through the use of credit monitoring processes, contractual agreements with collateral requirements, master netting agreements, and credit exposure limits.

Operating Risks

Environmental, Health and Safety Risk

The Company's operations, facilities and petroleum product shipments are subject to extensive national, regional and local environmental, health and safety laws and regulations governing, among other things, discharges to air, land and water, the handling and storage of petroleum compounds and hazardous materials, waste disposal, the protection of employee health, safety and the environment, and the investigation and remediation of contamination. The Company's facilities could experience accidents, malfunctions or other unplanned events that could result in spills or emissions in excess of permitted levels and result in personal injury, fines, penalties or other sanctions and property damage. The Company could also incur liability in the future for environmental contamination associated with past and present activities and properties. The facilities and pipelines must maintain a number of environmental and other permits from various governmental authorities in order to operate and these facilities are subject to inspection from time to time. Failure to maintain compliance with these requirements could result in operational interruptions, fines or penalties, or the need to install potentially costly pollution control technology. Finally, compliance with current and future environmental laws and regulations, which are likely to become more stringent over time, including those governing greenhouse gas emissions, may impose additional capital costs and financial expenditures and affect the demand for the Company's services, which could adversely affect operating results and profitability.

Enbridge is committed to protecting the health and safety of employees, contractors and the general public, and to sound environmental stewardship. The Company believes that prevention of accidents and injuries, and protection of the environment, benefits everyone and delivers increased value to shareholders, customers and employees. Enbridge has health and safety, and environmental management systems and has established policies, programs and practices for conducting safe and environmentally sound operations. Regular reviews and audits are conducted to assess compliance with legislation and company policy.

Pipeline Operating Risk

Pipeline leaks are an inherent risk of operations. Other operating risks include: the breakdown or failure of equipment, information systems or processes; the performance of equipment at levels below those originally intended (whether due to misuse, unexpected degradation or design, construction or manufacturing defects); failure to maintain adequate supplies of spare parts; operator error; labour disputes; disputes with interconnected facilities and carriers; and catastrophic events such as natural disasters, fires, explosions, fractures, acts of terrorists and saboteurs, and other similar events, many of which are beyond the control of the pipeline systems. The occurrence or continuance of any of these events could increase the cost of operating the Company's pipelines or reduce revenues, thereby impacting earnings. The Company has an extensive program to manage system integrity, which includes the development and use of predictive and detective in-line inspection tools. Maintenance, excavation and repair programs are directed to the areas of greatest benefit and pipe is replaced or repaired as required. The Company also maintains comprehensive insurance coverage for significant pipeline leaks and has a comprehensive security program designed to reduce security-related risks.

Regulation

Many of the Company's pipeline operations are regulated and are subject to regulatory risk. The nature and degree of regulation and legislation affecting energy companies in Canada and the United States has changed significantly in past years, and there is no assurance that further substantial changes will not occur. These changes may adversely affect toll structures or other aspects of pipeline operations or the operations of shippers.

Execution Risk

Cost escalation and internal and external resource shortages, including human resources, may adversely affect the Company's ability to develop and complete organic growth projects in a cost effective and timely manner. In addition, there are a number of competing projects, proposed by other companies, which could preclude the Company from developing one or more of the proposed projects.

CRITICAL ACCOUNTING ESTIMATES

Depreciation

Depreciation of property, plant and equipment, the Company's largest asset with a net book value at December 31, 2006 of $11,264.7 million, or 61% of total assets, generally is provided on a straight-line basis over the estimated service lives of the assets commencing when the asset is placed in service. When it is determined that the estimated service life of an asset does not reflect the expected remaining period of benefit, prospective changes are made to the estimated service life. In general, estimates of service lives are based on third party engineering studies, experience and industry practice. There are a number of assumptions inherent in estimating the service lives of the Company's assets including the level of development, exploration, drilling, reserves and production of crude oil and natural gas in the supply areas

served by the Company's pipelines as well as the demand for crude oil and natural gas and the integrity of the Company's systems. Changes in these assumptions could result in adjustments to the estimated service lives, which could result in material changes to depreciation expense in future periods in any of the Company's business segments, with the exception of the Corporate segment. Generally, revised assumptions have historically resulted in extending useful lives. For certain rate regulated operations, depreciation rates are approved by the regulator and the regulator may require periodic studies or technical updates on useful lives which may change depreciation rates.

Regulatory Assets and Liabilities

Certain of the Company's Liquids Pipelines, Gas Pipelines, and Gas Distribution and Services businesses are subject to regulation by various authorities, including but not limited to, the National Energy Board (NEB), the Federal Energy Regulatory Commission (FERC), the Alberta Energy and Utilities Board (AEUB) and the Ontario Energy Board (OEB). Regulatory bodies exercise statutory authority over matters such as construction, rates and ratemaking, and agreements with customers. To recognize the economic effects of the actions of the regulator, the timing of recognition of certain revenues and expenses in these operations may differ from that otherwise expected under generally accepted accounting principles for non rate-regulated entities. The Company also records regulatory assets and liabilities to recognize the economic effects of the actions of the regulator. Regulatory assets represent amounts that are expected to be recovered from customers in future periods through rates. Regulatory liabilities represent amounts that are expected to be refunded to customers in future periods through rates. As of December 31, 2006, the Company's regulatory assets totaled $574.1 million (2005 – $542.5 million) and regulatory liabilities totaled $148.6 million (2005 – $24.7 million). To the extent that the regulator's actions differ from the Company's expectations, the timing and amount of recovery or settlement of regulatory balances could differ significantly from those recorded.

Post-Employment Benefits

The Company maintains pension plans, which provide defined benefit and/or defined contribution pension benefits and post-employment benefits other than pensions to eligible retirees. Pension costs and obligations for the defined benefit pension plans are determined using the projected benefit method. This method involves complex actuarial calculations using several assumptions including discount rates, expected rates of return on plan assets, health-care cost trend rates, projected salary increases, retirement age, mortality and termination rates. These assumptions are determined by management and are reviewed annually by the Company's actuaries. Actual results that differ from assumptions are amortized over future periods and therefore could materially affect the expense recognized and the recorded obligation in future periods. See Note 19 to the 2006 annual consolidated financial statements for disclosure of the difference between the actual and the expected results for the past two years. Pension expense is recorded within all of the Company's business segments.

Impact of a 0.5% Change in Key Assumptions *(millions of dollars)*	**Pension Benefit**		**OPEB**	
	Obligation	**Expense**	**Obligation**	**Expense**
Decrease in Discount Rate	79.2	9.3	15.4	1.8
Decrease in expected return on assets	n/a	4.9	n/a	0.2
Decrease in rate of salary increase	(18.3)	(4.0)	—	—

Contingent Liabilities

Provisions for claims filed for damages against the Company are determined on a case by case basis. Case estimates are reviewed on a regular basis and are updated as new information is received. The process of evaluating claims involves the use of estimates and a high degree of management judgment. The final determination by the courts in respect of the claims outstanding could have a material impact on the financial results of the Company and certain of the Company's subsidiaries and investments including Enbridge Gas Distribution Inc. and Enbridge Energy Company, Inc. as disclosed in Note 23 of the 2006 annual consolidated financial statements.

Asset Retirement Obligations

The fair value of asset retirement obligations (AROs) associated with the retirement of long-lived assets are recognized as long–term liabilities in the period when they can be reasonably determined. The fair value approximates the cost a third party would charge in performing the tasks necessary to retire such assets and is recognized at the present value of expected future cash flows. AROs are added to the carrying value of the associated asset and depreciated over the asset's useful life. The corresponding liability is accreted over time through charges to earnings and is reduced by actual costs of decommissioning and reclamation. The present value of expected future cash flows is determined using assumptions such as the probability of abandonment in place versus removal and the estimated costs required upon abandonment in each case, the discount rate and the estimated time to abandonment. For the majority of the Company's assets it is not possible to make a reasonable estimate of AROs due to the indeterminate timing, the long-lived nature of the assets and the scope of the asset retirements. Therefore, changes in these assumptions could materially affect the asset and liability recognized in respect of asset retirement obligations as well as the resulting accretion of the liability and depreciation of the asset within any of the Company's business segments, with the exception of the Corporate segment.

CHANGE IN ACCOUNTING POLICIES

Financial Instruments, Hedging Relationships and Other Comprehensive Income

New accounting standards will be in effect January 1, 2007 for hedge accounting, recognition and measurement of financial instruments and disclosure of comprehensive income. The adoption of these standards will result in the recognition of financial instruments and hedging relationships principally consistent with similar requirements in the United States, as currently reflected in the Company's United States Accounting Principles note.

The Company will recognize other comprehensive income in a separate financial statement and include accumulated other comprehensive income as a component of shareholders' equity. To the extent economic hedges do not qualify for hedge accounting, are ineffective, or are not documented as hedges in accordance with the new standards, gains and losses and any ineffectiveness will be charged to current period earnings.

If the Company were to adopt the standards at December 31, 2006, a payable to counterparties of $43.1 million, a due from ratepayers of $26.6 million, accumulated other comprehensive income of $31.2 million, a future tax liability of $16.8 million, and a charge to retained earning of $64.5 million would be recognized in the financial statements.

CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in the rules of the Securities and Exchange Commission and the Canadian Securities Administrators) and concluded that the Company's disclosure controls and procedures were effective as of December 31, 2006 and in respect of the 2006 year-end reporting period.

Management's Report on Internal Controls over Financial Reporting

Management of Enbridge Inc. is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in the rule of the United States Securities and Exchange Commission and the Canadian Securities Administrators. The Company's internal control over financial reporting is a process designed under the supervision and with the participation of executive and financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with generally accepted accounting principles.

The Company's internal control over financial reporting includes policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

The Company's internal control over financial reporting may not prevent or detect all misstatements because of inherent limitations. Additionally, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or deterioration in the degree of compliance with our policies and procedures.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on the framework established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2006.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2006 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report included with the Company's audited financial statements.

QUARTERLY FINANCIAL INFORMATION[1]

(millions of Canadian dollars, except for per share amounts)

2006	First	Second	Third	Fourth	Total

1. Quarterly Financial Information has been extracted from financial statements prepared in accordance with generally accepted accounting principles.

Quarterly operating revenue fluctuates primarily due to the seasonality of the Company's gas distribution business. Typically, revenue peaks in the winter months during the first quarter and, to a lesser extent, in the fourth quarter when higher volumes are delivered and sold. Also, revenue and earnings are affected by variations in the weather, especially in the winter, when warmer or colder than normal temperatures can result in lower or higher distribution volumes, respectively.

Significant items that impacted 2006 and 2005 quarterly earnings are as follows:

- Fourth quarter 2006 earnings reflected higher earnings from the mainline system and Aux Sable, offset by lower earnings from EGD due primarily to warmer than normal weather and higher costs in the fourth quarter of 2006.
- Third quarter 2006 earnings reflected higher earnings from Enbridge System, increased earnings from the Company's investment in EEP and the initial recognition of upside sharing in Aux Sable which resulted from high fractionation margins.
- Second quarter earnings in 2006 included the impact of tax rate reductions, which increased earnings by a total of $48.9 million. Revenues in the second quarter of 2006 were higher than the second quarter of 2005 due to higher commodity prices and were offset by higher commodity costs, as EGD passes through to customers changes in the price of natural gas.
- First quarter earnings in 2006 reflected improved earnings in the Enbridge System more than offset by lower results from EGD, due primarily to warmer than normal weather. Revenues in the first quarter of 2006 were higher due to higher commodity prices and were offset by higher commodity costs.
- Fourth quarter earnings in 2005 include a gain of $7.6 million on the sale of land in CLH and a dilution gain of $4.3 million in EEP.
- Third quarter earnings in 2005 were negatively impacted by Hurricanes Katrina and Rita and by non-cash losses on the fair value of derivatives in EEP.
- First quarter earnings in 2005 include dilution gains in EEP and within Noverco totaling $11.9 million.

FOURTH QUARTER 2006 HIGHLIGHTS

Fourth quarter earnings for 2006 were $171.1 million, or $0.50 per share, compared with $174.0 million, or $0.52 per share, in 2005. The fourth quarter of 2006 reflected higher earnings from the Enbridge crude oil mainline system and Aux Sable, offset by lower earnings from EGD due primarily to warmer than normal weather and higher costs in the fourth quarter of 2006.

SELECTED ANNUAL INFORMATION

(millions of Canadian dollars, except per share amounts)	**2006**	2005	2004
Dividends Per Common Share	**1.15**	1.0375	0.92
Common Share Dividends	**403.1**	361.1	315.8
Total Assets	**18,379.3**	17,210.9	14,905.1
Total Long-Term Liabilities	**10,544.8**	9,690.7	8,182.5

Total assets and total long-term liabilities increased from 2005 to 2006 because of ongoing investments in core businesses and a $280 million investment in EEP, increasing the Company's interest from 10.9% to 16.6%.

Total assets and total long-term liabilities increased from 2004 to 2005 primarily because the Company began consolidating its 41.9% investment in EIF. This change was due to the adoption of Accounting Guideline 15, Consolidation of Variable Interest Entities (AcG-15). Under AcG-15, EIF is considered a variable interest entity and Enbridge is the primary beneficiary through a combination of a 41.9% equity interest and a preferred unit investment that has no voting rights, a stated par value and a 30-year maturity.

SUPPLEMENTARY INFORMATION

Outstanding Share Data	Number outstanding
Preferred Shares, Series A (non-voting equity shares)	5,000,000
Common shares – issued and outstanding (voting equity shares)	351,920,358
Total issued and outstanding stock options (7,558,307 vested)	11,643,157

Outstanding share data information is provided as at February 12, 2007.

RELATED PARTY TRANSACTIONS

Information about the Company's related party transactions is included in Note 22 to the Company's consolidated financial statements for the year ended December 31, 2006.
