For annual reports indicate by check mark the information filed with this Form:

þ Annual information form þ Audited annual financial statements

Indicate the number of outstanding shares of each of the issuer 's classes of capital or common stock as of the close of the period covered by the annual report:

There were 128,537,742 common shares with no par value outstanding as of December 31, 2014.

Indicate by check mark whether the Registrant (1) has filed all reports to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes þ No o

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

Yes o No o

EXPLANATORY NOTE

Fortuna Silver Mines Inc. (the "Company" or the "Registrant") is a Canadian issuer eligible to file its annual report pursuant to Section 13(a) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), on Form 40-F pursuant to the Multijurisdictional Disclosure System. The Company is a "foreign private issuer" as defined in Rule 3b-4 under the Exchange Act and Rule 405 under the Securities Act of 1933, as amended (the "Securities Act"). Equity securities of the Company are therefore exempt from Sections 14(a), 14(b), 14(c), 14(f) and 16 of the Exchange Act pursuant to Exchange Act Rule 3a12-3.

The Company prepares its consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS"). All information is stated in U.S. dollars unless otherwise noted.

FORWARD-LOOKING STATEMENTS

This annual report on Form 40-F and the documents attached hereto contain "forward-looking statements" within the meaning of applicable securities laws. These statements appear in a number of different places and include statements regarding the intent, belief or current expectations of management and our directors or officers, primarily with respect to our future market size, our business, and our future operating performance. When the words such as "expects", "is expected", "anticipates", "believes", "plans", "projects", "estimates", "assumes", "intends", "strategies", "targets", "goals", "forecasts", "objectives", "budgets", "schedules", "potential" or variations thereof or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are used, they are not statements of historical fact and are intended to identify forward-looking statements. Forward-looking statements relate to, among other things:

- •mineral "reserves" and "resources" as they involve the implied assessment, based on estimates and assumptions that the reserves and resources described exist in the quantities predicted or estimated and can be profitably produced in the future;
- timing of the completion of construction activities at the Company's properties and their completion on budget;
- production rates at the Company's properties;
- cash cost estimates;
- timing for delivery of materials and equipment for the Company's properties;
- the sufficiency of the Company's cash position and its ability to raise equity capital or access debt facilities;
- the Company's planned processing and estimated major investments for mine development, plant expansion, tailings filter facility and dry-stack disposal project, and brownfields exploration at the San Jose property during 2015;
- the Company's planned processing and estimated major investments for mine development, plant optimization and brownfields exploration at the Caylloma property during 2015;
- maturities of the Company's financial liabilities, finance leases and other contractual commitments;
- expiry dates of bank letters of guarantee;
- estimated mine closure costs; and
- management's expectation that any investigations, claims, and legal, labor and tax proceedings arising in the ordinary course of business will not have a material effect on the results of operations or financial condition of the Company.

You are cautioned that any such forward-looking statements are not guarantees that any of our projects or business operating units, divisions, subsidiaries, or affiliates will achieve any particular financial results. Our actual results may differ from those contained in the forward-looking statements due to risks or uncertainties facing us or due to facts differing from the assumptions underlying our predictions. Some of those risks and assumptions are set out under "Risk Factors" outlined in the Company's Annual Information Form for the year ended December 31, 2014, a copy of which is attached as Exhibit 99.1 hereto, and include, but are not limited to:

- that all required third party contractual, regulatory and governmental approvals will be obtained for the exploration, development, construction and production of its properties,
- there being no significant disruptions affecting operations, whether relating to labor, supply, power, damage to equipment or other matters;
- permitting, construction, development and expansion proceeding on a basis consistent with the Company's current expectations;
- expected trends and specific assumptions regarding metal prices and currency exchange rates;
- prices for and availability of fuel, electricity, parts and equipment and other key supplies remaining consistent with current levels;
- production forecasts meeting expectations; and
- the accuracy of the Company's current mineral resource and reserve estimates.

and such other assumptions as set out in the Annual Information Form. The Company advises you that the cautionary remarks included under the heading "Preliminary Notes – Cautionary Statement-Forward Looking Statements" in the Annual Information Form for the year ended December 31, 2014 expressly qualify, in their entirety, all forward-looking statements attributable to the Company or persons acting on its behalf. Unless required by law, the Company does not assume any obligation to update forward-looking statements, whether based on unanticipated events, changes in expectations, or otherwise. You should not place undue reliance on any forward-looking statements, which apply only as of

the date of this annual report.

CAUTIONARY NOTES TO UNITED STATES READERS

Differences in United States and Canadian Reporting Practices

The Company is permitted, under the Multijurisdictional Disclosure System, to prepare this annual report on Form 40-F in accordance with Canadian disclosure requirements, which are different from those of the United States. The Company prepares its financial statements, which are filed with this annual report on Form 40-F, in accordance with IFRS, and they are subject to Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). They may not be comparable to financial statements of United States companies.

Resource and Reserve Estimates

The Company is a Canadian "foreign private issuer" as defined in Rule 3b-4 under the U.S. Securities Exchange Act of 1934, as amended (the "U.S. Exchange Act"), which is permitted to prepare the technical information contained herein in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of U.S. securities laws. The terms "mineral resource," "measured resource," "indicated resource" and "inferred resource" used in the Company's disclosure are Canadian mining terms that are defined in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") Best Practice Guidelines for the Estimation of Mineral Resources and Mineral Reserves (the "CIM Standards"), adopted by the CIM Council on November 23, 2003. These terms, however, are not recognized by SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the United States Securities and Exchange Commission (the "SEC"). In particular, the term "resource" does not equate to the term "reserve". Under U.S. standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of "contained ounces" in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC Industry Guide 7 standards as in place tonnage and grade without reference to unit measures. The requirements of NI 43-101 for identification of "reserves" are also not the same as those of the SEC.

Accordingly, information contained in this annual report on Form 40-F and the documents included herein containing descriptions of the Company's mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

PRINCIPAL DOCUMENTS

The following documents have been filed as part of this annual report on Form 40-F as Exhibits hereto:

A. Annual Information Form

The Annual Information Form of the Company for the year ended December 31, 2014, is included as Exhibit 99.1 of this annual report on Form 40-F.

B. Audited Annual Financial Statements

The Company's audited consolidated financial statements for the years ended December 31, 2014 and 2013, including the Report of Independent Registered Public Accounting Firm with respect thereto, are included as Exhibit 99.2 of this annual report on Form 40-F.

C. Management's Discussion and Analysis

The Company's Management's Discussion and Analysis for the year ended December 31, 2014 is included as Exhibit 99.3 of this annual report on Form 40-F.

TAX MATTERS

Purchasing, holding, or disposing of securities of the Company may have tax consequences under the laws of the United States and Canada that are not described in this annual report on Form 40-F.

DISCLOSURE REGARDING CONTROLS AND PROCEDURES

Disclosure Controls and Procedures.

Disclosure controls and procedures are defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act as those controls and procedures designed to ensure that information required to be disclosed in the Company's annual filings and interim filings and other reports filed or

submitted under the Exchange Act is duly recorded, processed, summarized and reported, within the time periods specified in SEC rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the Company's reports and filings is accumulated and communicated to management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") as appropriate, to allow timely decisions regarding required disclosure.

The Company evaluated, with the participation of its CEO and CFO, the effectiveness of its disclosure controls and procedures as of December 31, 2014. Based on that evaluation, the CEO and the CFO have concluded that, as of the end of the period covered by this annual report on Form 40-F, the disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the Company's annual filings and interim filings and other reports filed or submitted under the Exchange Act, is recorded, processed, summarized and reported within time periods specified in SEC rules and forms and is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Notwithstanding the foregoing, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that the Company's disclosure controls and procedures will detect or uncover every situation involving the failure of persons within the Company and its subsidiaries to disclose material information otherwise required to be set forth in the Company's periodic reports. The Company's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objective of ensuring that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is communicated to management to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Controls Over Financial Reporting.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting (as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act) and has designed such internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with IFRS.

In designing and evaluating the Company's internal controls over financial reporting, the Company's management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its reasonable judgment in evaluating the cost-benefit relationship of possible controls and procedures. Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management assessed the effectiveness of the Company's internal controls over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control - Integrated Framework (1992).* Based on this assessment, management believes that, as of December 31, 2014, the Company's internal controls over financial reporting were effective based on those criteria.

Attestation Report of the Registered Public Accounting Firm. This annual report on Form 40-F does not include an attestation report of the Company's registered public accounting firm because the Company is exempt from such requirement due its status as an "emerging growth company" under the Jumpstart Our Business Startups Act.

Changes in Internal Controls Over Financial Reporting. During the fiscal year ended December 31, 2014, there were no changes in the Registrant's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the Registrant's internal controls over financial reporting.

NOTICES PURSUANT TO REGULATION BTR

None.

IDENTIFICATION OF THE AUDIT COMMITTEE

The Registrant has a separately-designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Exchange Act. The members of the audit committee are: Messrs. Robert Gilmore, Thomas Kelly and David Farrell. The board of directors has determined that each of Messrs. Robert Gilmore, Thomas Kelly and David Farrell is independent, as that term is defined in Rule 10A-3 under the Exchange Act and the Listed Company Manual of the New York Stock Exchange.

AUDIT COMMITTEE FINANCIAL EXPERT

The board of directors of the Registrant has determined that Robert Gilmore, a member of the Registrant's audit committee, qualifies as an audit committee financial expert for purposes of paragraph (8) of General Instruction B to Form 40-F. The SEC has indicated that the designation of Robert Gilmore as an audit committee financial expert does not make him an "expert" for any purpose, impose any duties, obligations or liabilities on him that are greater than those imposed on members of the audit committee and the board of directors who do not carry this designation or affect the duties, obligations or liabilities of any other member of the audit committee or the board of directors.

CODE OF ETHICS

The Registrant has adopted a "code of ethics" (as that term is defined in Form 40-F), entitled the "Code of Business Conduct and Ethics and Whistle-Blower Policy", that applies to all of its directors, officers, employees, and consultants including its principal executive officer, principal financial officer, principal accounting officer or controller, and persons performing similar functions.

The Code of Business Conduct and Ethics and Whistle-Blower Policy is available for viewing on the Registrant's website at www.fortunasilver.com under "About Fortuna / Corporate Governance".

PRINCIPAL ACCOUNTANT FEES AND SERVICES

Deloitte LLP served as the Company's Independent Registered Public Accounting Firm for the fiscal years ended December 31, 2014 and 2013. Aggregate fees (in Canadian dollars) billed to the Company for professional services rendered by Deloitte LLP during the fiscal years ended December 31, 2014 and 2013 are as follows:

	2014	2013
Audit Fees	$507,462	$443,073
Audit-Related Fees	Nil	Nil
Tax Fees	$150,805	$151,725
All Other Fees	Nil	Nil
	$658,267	$594,798

"Audit Fees" are the aggregate fees billed for the audit of the Company's consolidated annual financial statements, review of the interim financial statements and management's discussion and analysis, or services that are normally provided in connection with statutory and regulatory filings or engagements.

"Audit-Related Fees" are fees charged for assurance and related services that are reasonably related to the performance of the audit or review of the Company's financial statements and are not reported under "Audit Fees".

"Tax Fees" are fees for professional services rendered for tax compliance, tax advice on actual or contemplated transactions, and tax planning.

"All Other Fees" are for amounts not included in the categories above.

PRE-APPROVAL POLICIES AND PROCEDURES

The auditors of the Company obtain, as necessary, the pre-approval of the Audit Committee for any anticipated additional services required of the auditors for the coming fiscal year. If other service requirements arise during the year, the Audit Committee will pre-approve such services at that time, prior to the commencement of such services. Of the total aggregate fees paid by the Company to its auditors during the fiscal year ended December 31, 2014, $nil or 0% of the fees were approved by the Audit Committee pursuant to the de minimus exception provided by Section (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

OFF-BALANCE SHEET ARRANGEMENTS

The required disclosure is included in Notes 16(d) and 23 of the Company's audited consolidated financial statements for the fiscal years ended December 31, 2014 and 2013, filed as part of this annual report on Form 40-F in Exhibit 99.2, and under the headings "Financial Instruments and Related Risks – Liquidity Risk" and "Off-Balance Sheet Arrangements" in the Company's Management's Discussion and Analysis for the fiscal year ended December 31, 2014, filed as part of this annual report on Form 40-F in Exhibit 99.3.

TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS

The required disclosure is included under the heading "Contractual Obligations" of the Company's Management's Discussion and Analysis for the fiscal year ended December 31, 2014, filed as part of this annual report on Form 40-F in Exhibit 99.3.

MINE SAFETY DISCLOSURE

The Company is not required to disclose the information required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

NYSE CORPORATE GOVERNANCE

The Company's common shares are listed on the NYSE. Sections 103.00, 303A.00 and 303A.11 of the NYSE Listed Company Manual permit foreign private issuers to follow home country practices in lieu of certain provisions of the NYSE Listed Company Manual. A foreign private issuer that follows home country practices in lieu of certain provisions of the NYSE Listed Company Manual must disclose any significant ways in which its corporate governance practices differ from those followed by domestic companies either on its website or in the annual report that it distributes to shareholders in the United States. A description of the significant ways in which the Company's governance practices differ from those followed by domestic companies pursuant to NYSE standards is disclosed on the Company's website at www.fortunasilver.com under About Fortuna/Corporate Governance/NYSE.

The Company's corporate governance practices, as described on its website, are consistent with the laws, customs and practices in Canada.

INTERACTIVE DATA FILE

The Company is not currently required to submit to the SEC, or post to its corporate website, an Interactive Data File.

UNDERTAKING

The Company undertakes to make available, in person or by telephone, representatives to respond to inquiries made by the SEC staff, and to furnish promptly, when requested to do so by the SEC staff, information relating to: the securities registered pursuant to Form 40-F; the securities in relation to which the obligation to file an annual report on Form 40-F arises; or transactions in said securities.

CONSENT TO SERVICE OF PROCESS

A Form F-X signed by the Company and its agent for service of process has been previously filed with the SEC together with the Company's Registration Statement on Form 40-F (File 001-35297) in connection with its securities registered on such form.

Any changes to the name or address of the agent for service of process of the Company shall be communicated promptly to the SEC by an amendment to the Form F-X referencing the file number of the Company.

SIGNATURE

Pursuant to the requirements of the Exchange Act, the Company certifies that it meets all of the requirements for filing on Form 40-F and has duly caused this annual report to be signed on its behalf by the undersigned, thereunto duly authorized.

PRELIMINARY NOTES

Cautionary Statement – Forward-Looking Statements

Certain statements contained in this Annual Information Form ("AIF") and any documents incorporated by reference into this AIF constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 and Section 21E of the United States Securities Exchange Act of 1934, as amended, and forward-looking information within the meaning of applicable Canadian securities legislation (collectively, "forward-looking statements"). Forward-looking statements express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, identified using words or phrases such as "expects", "is expected", "anticipates", "believes", "plans", "projects", "estimates", "assumes", "intends", "strategies", "targets", "goals", "forecasts", "objectives", "budgets", "schedules", "potential" or variations thereof or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) and are not statements of historical fact. Forward-looking statements relate to, among other things:

- mineral "reserves" and "resources" as they involve the implied assessment, based on estimates and assumptions that the reserves and resources described exist in the quantities predicted or estimated and can be profitably produced in the future;
- timing of the completion of construction activities at the Company's properties and their completion on budget;
- production rates at the Company's properties;
- cash cost estimates;
- timing for delivery of materials and equipment for the Company's properties;
- the sufficiency of the Company's cash position and its ability to raise equity capital or access debt facilities;
- the Company's planned processing and estimated major investments for mine development, plant expansion, tailings filter facility and dry-stack disposal project, and brownfields exploration at the San Jose property during 2015;
- the Company's planned processing and estimated major investments for mine development, plant optimization and brownfields exploration at the Caylloma property during 2015;
- maturities of the Company's financial liabilities, finance leases and other contractual commitments;
- expiry dates of bank letters of guarantee;
- estimated mine closure costs; and
- management's expectation that any investigations, claims, and legal, labor and tax proceedings arising in the ordinary course of business will not have a material effect on the results of operations or financial condition of the Company.

Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company as at the date of such statements, are inherently subject to significant business, economic, social, political and competitive uncertainties and contingencies and other factors that could cause actual results or events to differ materially from those projected in the forward-looking statements. The estimates and assumptions of the Company contained or incorporated by reference in this AIF which may prove to be incorrect, include, but are not limited to,

- that all required third party contractual, regulatory and governmental approvals will be obtained for the exploration, development, construction and production of its properties,
- there being no significant disruptions affecting operations, whether relating to labor, supply, power, damage to equipment or other matters;
- permitting, construction, development and expansion proceeding on a basis consistent with the Company's current expectations;

- expected trends and specific assumptions regarding metal prices and currency exchange rates;
- prices for and availability of fuel, electricity, parts and equipment and other key supplies remaining consistent with current levels;
- production forecasts meeting expectations; and
- the accuracy of the Company's current mineral resource and reserve estimates.

In addition, there are known and unknown risk factors which could cause the Company's actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by the forward-looking statements. Known risk factors include, risks associated with mineral exploration and project development; the need for additional financing; operational risks associated with mining and mineral processing; uncertainty relating to concentrate treatment charges and transportation costs; uncertainty relating to capital and operating costs, production schedules, and economic returns; uncertainties relating to general economic conditions; the Company's substantial reliance on the Caylloma and San Jose mines for revenues; risks related to the integration of businesses and assets acquired by the Company; risks associated with entering into commodity forward and option contracts for base metals production; potential conflicts of interest involving the Company's directors and officers; the risk that monies allotted for land reclamation may not be sufficient; risks associated with potential legal proceedings; changes in national and local government legislation, taxation, controls, regulations and political or economic developments in Canada, Mexico, the United States, Peru or other countries in which the Company does or may carry on business; the possibility of cost overruns or unanticipated expenses; fluctuations in silver, lead, zinc and copper prices; title matters; uncertainties and risks related to carrying on business in foreign countries; environmental liability claims and insurance; reliance on key personnel; currency exchange rate fluctuations; competition; and other risks and uncertainties, including those described in the "Risk Factors" section in this AIF.

Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. These forward-looking statements are made as of the date of this AIF. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers are cautioned not to place undue reliance on forward-looking statements. Except as required by law, the Company does not assume the obligation to revise or update these forward looking-statements after the date of this document or to revise them to reflect the occurrence of future unanticipated events.

CAUTIONARY NOTE TO U.S. INVESTORS

The Company is a Canadian "foreign private issuer" as defined in Rule 3b-4 under the U.S. Securities Exchange Act of 1934, as amended (the "U.S. Exchange Act"), which is permitted to prepare the technical information contained herein in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of U.S. securities laws. The terms "mineral resource," "measured resource," "indicated resource" and "inferred resource" used in the Company's disclosure are Canadian mining terms that are defined in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") Best Practice Guidelines for the Estimation of Mineral Resources and Mineral Reserves (the "CIM Standards"), adopted by the CIM Council on November 23, 2003. These terms, however, are not recognized by SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the United States Securities and Exchange Commission (the "SEC"). In particular, the term "resource" does not equate to the term "reserve". Under U.S. standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of "contained ounces" in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC Industry Guide 7 standards as in place tonnage and grade without reference to unit measures. The requirements of NI 43-101 for identification of "reserves" are also not the same as those of the SEC.

Accordingly, information contained in this AIF containing descriptions of the Company's mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

Documents Incorporated by Reference

The information provided in this AIF is supplemented by disclosure contained in the documents listed below which are incorporated by reference into this AIF. These documents must be read together with the AIF in order to provide full, true and plain disclosure of all material facts relating to Fortuna Silver Mines Inc. (referred to herein as the "Company" or "Fortuna"). The documents listed below are not contained within or attached to this document. The documents may be accessed on SEDAR at www.sedar.com under the Company's profile, Fortuna Silver Mines Inc.:

CORPORATE STRUCTURE

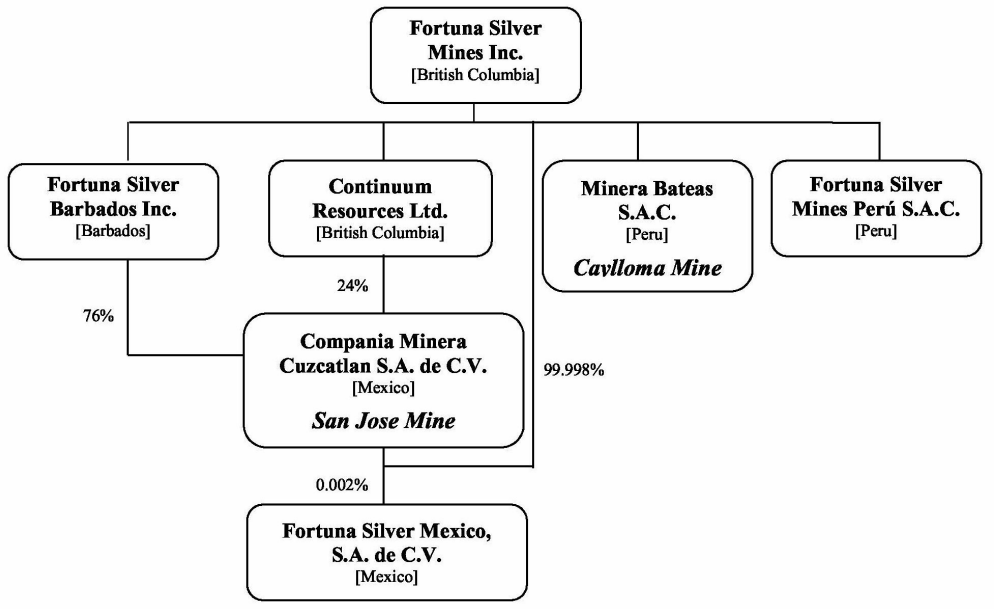

Name, Address and Incorporation

The Company was incorporated on September 4, 1990 pursuant to the Company Act (British Columbia) under the name Jopec Resources Ltd. and subsequent transitioned under the Business Corporations Act (British Columbia). On February 3, 1999, the Company changed its name to Fortuna Ventures Inc. and on June 28, 2005 to Fortuna Silver Mines Inc.

The management head office of the Company is located at Piso 5, Av. Jorge Chávez #154, Miraflores, Lima, Peru. The corporate head and registered office of the Company is located at 200 Burrard Street, Suite 650, Vancouver, BC V6C 3L6.

Intercorporate Relationships

The Company carries on a significant portion of its business through a number of 100%-owned subsidiaries, held either directly or indirectly, as follows:

GENERAL DEVELOPMENT OF THE BUSINESS

Three-Year History and Recent Developments

San Jose Mine, Mexico

Located in the state of Oaxaca in southern Mexico, the 100% owned San Jose property covers a high-grade silver-gold bearing epithermal vein system.

Commercial production of the San Jose mine commenced on September 1, 2011 at an initial rate of 1,000 tpd. In 2012, San Jose completed its first full year of operation, producing 1,949,178 ounces of silver and 17,918 ounces of gold. This was 15% and 19%, respectively, above annual production guidance. The increased production resulted from mining higher grade ore ahead of schedule on level 1350, which contributed

approximately 47% of mined ore in the period. By accelerating completion of the main access ramp and preparing levels 1350 and 1300 ahead of plan, the Company added operational flexibility to the mine that will help to sustain production in the face of potential ore variability and to secure the ramp-up of production to 1,500 tpd planned for the third quarter of 2013. Mine preparation peaked in Q4 2012 at 1,127 meters of underground development, compared to 614 meters, on average, during the first three quarters of the year. In Q4 2012, silver and gold head grades decreased compared to the first nine months of 2012 because of higher production of lower grade development ore from level 1300.

The San Jose processing plant performed within design parameters during 2012, with silver and gold recoveries of 88% and 87%, respectively, and average ore throughput of 1,055 tpd. Cash cost per tonne of processed ore for 2012 was $74.10, or 6% above forecast as a result of accelerated mine preparation in the fourth quarter and certain non-recurring items. Cash cost per payable ounce of silver for 2012 was $3.76, net of by-product credits. Capital expenditures at San Jose in 2012 were $14.3 million, which is lower than the $30.8 million budgeted mainly due to the postponement of the dore plant project.

In 2013, the Company produced at San Jose 2.5 million ounces of silver and 19,031 ounces of gold, an increase over 2012 of 30% and 6%, respectively. The increased production resulted from the ramp-up to 1,800 tpd in the fourth quarter of 2013.

Cash cost per tonne of processed ore at San Jose for 2013 was $71.41, a decrease of 4% from 2012 and 3% higher than forecast. The decrease resulted mainly from the ramp-up of production to 1,800 tpd in the fourth quarter of 2013. Cash cost per payable ounce of silver for 2013 was $6.53, net of by-product credits, compared to $3.76 in the prior year, mainly due to lower gold credits related to lower gold prices.

In 2014, the Company produced at San Jose 4.4 million ounces of silver and 33,496 ounces of gold, an increase over 2013 of 74% and 76%, respectively. The increases are the result of higher throughput of 48% and of higher head grade for silver and gold of16% and 18%, respectively. The San Jose mine and processing plant were expanded to 2,000 tpd in April 2014. Compared to guidance for the year, silver and gold production were 10% and 9% higher, respectively.

Cash cost per tonne of processed ore at San Jose for 2014 was $62.99/t, or 12% below the cost in the prior year due mainly to higher throughput, a 4% devaluation of the peso, and lower mining cost related to support and preparation, and below the annual guidance of $67.10/t. All-in sustaining cash cost per payable ounce of silver, net of by-product credits, was $12.07 for 2014, below the annual guidance of $14.43.

Capital expenditures at San Jose were $29.0 million in 2014, in line with forecast. Main capital projects for 2014 included $12.3 million for tailings dam expansion and evaporation control, $6.0 million for brownfields exploration, and $4.8 million for mine development.

During 2015, the Company plans to process at San Jose 700,000 tonnes of ore averaging 214 g/t Ag and 1.66 g/t Au. Capital investments for 2015 are estimated to be $56.5 million. Of this amount, the major investments are anticipated to include $28.3 million for tailings filter facility and dry stack deposit; $12.6 million for 3,000 tpd mill expansion; $8.3 million for mine development; and $3.5 million for brownfields exploration.

The budget for the 2015 brownfields exploration program at the San Jose mine includes 12,000 meters of drilling. The program at the mine's 64,400 hectare concession package is focusing on three main initiatives: i) continue exploring through underground drilling an additional 300 meters of the northern extent of the Trinidad North zone outside the shell of existing inferred resources, drill testing on approximate 100 meter centers, ii) subject to community agreements, drill test from surface the northern strike projection of the vein system beyond Trinidad North, and iii) evaluation and target generation work on multiple prospects within the property package: Veta Maria, La Noria, San Jose West, San Dionisio Ocotlan, Los Ocotes and El Portillo.

Caylloma Mine, Peru

The Company owns a 100% interest in the Caylloma mine and related mining concessions located in southern Peru.

In 2012, despite higher ore production (up 3%) and silver head grades (up 4%), silver production at Caylloma increased just 1% over 2011 primarily because of a 5% decrease in metallurgical recoveries. Metallurgical recoveries were affected by the oxide content of ore mined in level 6 of the Animas Vein, which contributed 30% of ore production during the year. In the fourth quarter of 2012, after extensive testing, the Company implemented recommendations to improve metallurgical recoveries. Positive results were achieved in November and December, with silver recoveries improving to 80%. Lower lead and zinc head grades and recoveries resulted in a year-over-year reduction in lead and zinc production of 9% and 4%, respectively.

Cash cost per tonne of processed ore at Caylloma for 2012 was $87.28, an increase of 26% from 2011, but only 1% higher than forecast. The increase resulted mainly from higher contractor tariffs and labor costs. Cash cost per payable ounce of silver for 2012 was $8.07, net of by-product credits, compared to negative $0.78 in the prior year.

Capital expenditures at Caylloma were $16.8 million in 2012, compared to $25.0 million budgeted for the year. The lower expenditures were due mainly to reducing the scope of and postponing refurbishment of the processing plant, postponing until 2013 the energy project, and delaying moderately the mine camp project. The new tailings facility was commissioned in January 2013.

In 2013, the Company produced at Caylloma 2.1 million ounces of silver and 2,212 ounces of gold. Silver production was 3% higher year over year in spite of 2% lower head grades, mainly due to improved metallurgical recoveries of 82% versus 77% the previous year. Higher zinc head grades and recovery resulted in a 13% year over year increase in zinc production, while 4% lower lead head grade, offset by 4% higher recovery resulted in a 1% year over year reduction in lead production.

Cash cost per tonne of processed ore at Caylloma for 2013 was $91.23, an increase of 5% from 2012 and 1% higher than forecast. The increase resulted mainly from higher community relations expense related to the completion of Caylloma's Mini Colliseum and higher distribution costs related to lower base metal concentrate grades. Cash cost per payable ounce of silver for 2013 was $7.65, net of by-product credits, compared to $8.07 in the prior year.

Capital expenditures at Caylloma were $22.1 million in 2013, in line with forecast. Main capital projects for 2013 included $4.0 million for brownfields exploration, $5.4 million for mine camp, and $4.1 million for tailings dam expansion.

In 2014, the Company produced at Caylloma 2.2 million ounces of silver and 1,820 ounces of gold. Silver production was 5% above production in the prior year due to higher metallurgical recovery and slightly higher head grade. Zinc production increased 9% as a result of higher head grade and higher metallurgical recoveries. Lead production decreased 9% because of reduced head grade. Caylloma exceeded its annual production guidance of 2.0 million ounces of silver.

Cash cost per tonne at Caylloma for 2014 was $90.57 per tonne of processed ore, a decrease of 1% from the prior year and 3% above annual guidance. All-in sustaining cash cost per payable ounce of silver, net of by-product credits, at Caylloma for 2014 was $14.13, 17% below the annual guidance of $17.01.

Capital expenditures at Caylloma were $9.9 million in 2014, in line with forecast. Main capital projects for 2014 included $5.1 million for mine development, $4.0 million for equipment and infrastructure, and $0.8 million for brownfields exploration.

During 2015, the Company plans to process at Caylloma 464,100 tonnes averaging 175 g/t silver. 21% of mill feed in the plan is estimated to come from current inferred resources which are planned to be converted to measured and indicated categories during the year. Capital expenditures for 2015 are estimated to be $14.0 million. Of this amount, the major investments are anticipated to include $6.1 million for mine development; $4.3 million for plant optimization; and $0.7 million for brownfields exploration.

The Company has allocated a modest exploration budget for 2015 at Caylloma as the Company has built over the years a sufficient resource and reserve base which permits a reduction in exploration drilling for a year without compromising short or medium term production plans. The main exploration initiative for 2015 is the evaluation of the concessions located in the southern portion of the district, where Compañia de Minas Buenaventura is developing the high-grade Tambomayo silver and gold project.

Updated Reserve and Resource Estimates – Caylloma and San Jose Mines

The Company released Mineral Reserve and Mineral Resource estimates for Caylloma in March 2013 and for San Jose in October 2013, as set forth in the Caylloma Report and the San Jose Report described below under "Description of the Business - Material Mineral Properties". Updated Mineral Reserve and Mineral Resource estimates for San Jose as at June 30, 2014 were released on September 30, 2014, and for both Caylloma and San Jose as at December 31, 2014 were released in March 2015. A summary of the December 31, 2014 estimates is as follows:

Highlights of Reserve and Resource Update

- Combined Proven and Probable Reserves for Caylloma and San Jose are reported at 6.8 Mt containing 41.3 Moz silver and 251.8 koz gold, representing year-over-year increases of 14 percent in contained silver ounces and 7 percent in contained gold ounces

- Combined Inferred Resources for Caylloma and San Jose are reported at 11.5 Mt containing an estimated 77.4 Moz silver and 483.9 koz gold, reflecting year-over-year increases of 31 percent in contained silver ounces and 30 percent in contained gold ounces

Mineral Reserves – Proven and Probable							Contained Metal	
Property	Classification	Tonnes (000)	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag (Moz)	Au (koz)
Caylloma Mine, Peru	Proven	508	142	0.42	1.56	2.24	2.3	6.8
	Probable	2,525	132	0.31	2.38	3.31	10.7	25.4
	Proven + Probable	3,033	134	0.33	2.24	3.13	13.0	32.3
San Jose Mine, Mexico	Proven	311	237	1.95	N/A	N/A	2.4	19.5

Mineral Resources – Inferred							Contained Metal	
Property	Classification	Tonnes (000)	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag (Moz)	Au (koz)
Caylloma Mine, Peru	Inferred	4,356	133	0.59	1.98	3.17	18.6	83.1
San Jose Mine, Mexico	Inferred	7,127	257	1.75	N/A	N/A	58.9	400.8
Total	**Inferred**	**11,483**	**210**	**1.31**	**N/A**	**N/A**	**77.4**	**483.9**

Notes:

1. Mineral Reserves and Mineral Resources are as defined by CIM Definition Standards on Mineral Resources and Mineral Reserves
2. Mineral Resources are exclusive of Mineral Reserves
3. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability
4. There are no known legal, political, environmental or other risks that could materially affect the potential development of the Mineral Resources or Mineral Reserves at Caylloma or San Jose
5. Mineral Resources and Mineral Reserves are estimated as of June 30, 2014 and reported as of December 31, 2014 taking into account production-related depletion for the period through December 31, 2014

6. Mineral Reserves for San Jose are estimated using a break-even cut-off grade of 143 g/t Ag Eq based on assumed metal prices of US$19/oz Ag and US$1,140/oz Au; estimated metallurgical recovery rates of 89% for Ag and 89% for Au and projected operating costs for year-end 2014. Mineral Resources are estimated at a Ag Eq cut-off grade of 100 g/t, with Ag Eq in g/t = Ag (g/t) + Au (g/t) * ((US$1,140/US$19) * (89/89))
7. Mineral Reserves for Caylloma are estimated using break-even cut-off grades based on estimated NSR values using assumed metal prices of US$19/oz Ag, US$1,140/oz Au, US$2,150/t Pb and US$2,300/t Zn; metallurgical recovery rates of 84% for Ag, 43% for Au, 92% for Pb and 90% for Zn; and projected operating costs for year-end 2014. Caylloma Mineral Resources are reported based on an NSR cut-off grade of US$50/t for wide veins and US$100/t for narrow veins used assumed metal prices and metallurgical recovery rates as detailed for Mineral Reserves with the exception of the Ramal Piso Carolina vein that uses metallurgical recovery rates of 84% for Ag and 75% for Au
8. Totals may not add due to rounding procedures
9. N/A = Not Applicable

San Jose Mine, Mexico

As of December 31, 2014 the San Jose Mine has Proven and Probable Mineral Reserves of 3.8 Mt containing 28.3 Moz of silver and 219.5 koz of gold, in addition to Inferred Resources of 7.1 Mt containing a further 58.9 Moz of silver and 400.8 koz of gold.

Year-over-year, the San Jose Mineral Reserves increased 5 percent in tonnes, 24 percent in contained silver and 12 percent in contained gold after production-related depletion and metal price reductions of 21 percent and 19 percent for silver and gold, respectively. Silver grades increased by 19 percent to 233 g/t and gold grades increased 7 percent to 1.81 g/t.

The largest gain in reserves for the San Jose Mine is located in the Stockwork Zone in the central part of the Trinidad deposit, where 1.1 Mt were upgraded to Measured and Indicated Resources through infill drilling and mine development activities. These upgraded resources have been converted to Mineral Reserves partially offset by production-related depletion.

Measured and Indicated Resources exclusive of Mineral Reserves increased 19 percent year-over-year to approximately 1.0 Mt, relating primarily to an increase in the breakeven cut-off grade used for estimating Mineral Reserves due to a reduction in metal prices.

Inferred Resources increased year-over-year by 32 percent in terms of tonnes, 27 percent in silver grade, 12 percent in gold grade, 68 percent in contained silver ounces and 48 percent in contained gold ounces. The year-over-year variation in Inferred Resources is primarily related to the expansion of Trinidad North (see Fortuna news release dated August 27, 2014) and reinterpretation of adjacent mineralized structures offset by the upgrading and conversion to Mineral Reserves of Inferred Resources in the Stockwork Zone of the main Trinidad Deposit as well as in a portion of Trinidad North.

The 2015 Brownfields exploration program at San Jose includes 12,000 meters of exploration drilling to further test the potential for extensions of the high-grade silver-gold mineralization identified at Trinidad North (see Fortuna news release dated January 21, 2015 for fourth quarter 2014 drill results).

An Infill drilling program of 9,200 meters for the upgrading of Inferred Resources into Measured or Indicated Resources is budgeted for the San Jose Mine. The cost of the infill drilling program is US$1.59 million.

Caylloma Mine, Peru

As of December 31, 2014, the Caylloma Mine has Proven and Probable Mineral Reserves of 3.0 Mt containing 13.0 Moz of silver and 32.3 koz of gold, in addition to Inferred Resources of 4.4 Mt containing a further 18.6 Moz of silver and 83.1 koz of gold.

Despite production-related depletion and a 21 percent reduction in silver price, year-over-year, the Caylloma Mineral Reserves decreased only 2 percent in tonnes and 4 percent in contained silver. This positive result is primarily due to the upgrading of 1.2 Mt of Inferred Resources into Measured or Indicated Resources at the Animas, Animas NE and Bateas veins; these resources were subsequently evaluated and converted to Mineral Reserves.

The silver grade in reserves decreased marginally to 134 g/t, lead grade increased 33 percent to 2.24 % and zinc grade increased 26 percent to 3.13 %. The increase in lead and zinc grades is attributed to the upgrading of 1.2 Mt averaging 3.03 % Pb and 4.02 % Zn to Measured and Indicated Resources and their subsequent conversion to reserves.

Measured and Indicated Resources exclusive of Mineral Reserves decreased year-over-year by approximately 15 percent to 1.7 Mt due primarily to an increase in the resource cut-off grade for narrow veins from US$50/t to US$100/t and an increase in mineral identified as non-accessible partially offset by a modest increase due to a reduction in metal prices.

Inferred Resources decreased 1.8 Mt or 30 percent to 4.4 Mt due primarily to a successful infill drilling program upgrading 1.2 Mt to Measured and Indicated Resources, as well as the aforementioned change in cut-off grade for reporting narrow vein resources. Inferred Resources increased in grade by 10 percent for Ag, 18 percent for gold and 7 percent for zinc while the average Pb grade decreased by 6 percent.

An Infill drilling program of 9,500 meters for the upgrading of Inferred Resources into Measured or Indicated Resources is budgeted for the Caylloma Mine. The cost of the infill drilling program is budgeted at US$0.83 million.

Qualified Persons

The Mineral Resource estimates have been prepared under the supervision of Eric Chapman, Mineral Resource Manager of the Company. The Mineral Reserve estimate and the Mineral Resource estimate exclusive of Mineral Reserves were prepared under the supervision of Boris Caro, technical consultant for the Company.

E. Chapman and B. Caro are Qualified Persons as defined by National Instrument 43-101. Mr. Caro is a Registered Member of Australasian Institute of Mining and Metallurgy (Membership No. 305462) and a Registered Member of the Chilean Mining Commission (Comisión Calificadora de Competencias en Recursos y Reservas Mineras, Registered Member No. 0229). Mr. Caro is responsible for ensuring that the information contained in this AIF relating to the updated Mineral Resources and Mineral Reserves is an accurate summary of the original reports and data provided to or developed by the Company.

NYSE Listing

The Company completed a listing application on the New York Stock Exchange and its common shares began trading on the NYSE on September 19, 2011 under the symbol FSM.

Credit Facility

In April 2013, the Company entered into an amended and restated credit agreement with the Bank of Nova Scotia for a $40 million senior secured revolving credit facility (the “Credit Facility”) to be refinanced or repaid on or within three years or before April 22, 2016. The Credit Facility is secured by a first ranking lien on the Company’s material subsidiaries and their assets, and bears interest and fees at prevailing market rates. In the event that utilization under the Credit Facility is less than $10 million, a commitment fee of 1.0% per annum is payable quarterly on the unutilized portion of the available credit facility. No funds have been drawn from the Credit Facility.

The Company plans to enter into an amended and restated credit agreement with the Bank of Nova Scotia for a $60 million senior secured financing (the “2015 Credit Facility”) consisting of a $40 million term credit facility with a 4 year term and a $20 million revolving credit facility for a two year period. The 2015 Credit Facility will be secured by a first ranking lien on the Company’s material subsidiaries and their assets, and bears interest and fees at prevailing market rates. In the event that utilization under the 2015 Credit Facility is less than $10 million, a commitment fee of 1.0% per annum is payable quarterly on the unutilized portion of the available credit facility.

DESCRIPTION OF THE BUSINESS

General

Summary. The Company is engaged in silver and gold mining and related activities, including exploration, extraction, and processing. The Company operates the Caylloma mine in Peru and the San Jose mine in Mexico.

The lead-silver, zinc, and gold-silver concentrates produced by the Company at its Caylloma mine in Peru and its San Jose mine in Mexico are

sold to international metals traders who in turn deliver the products to different clients around the world. The material sources of revenue for 2014 and 2013 are as follows:

By type of concentrate:	2014	2013
Ÿ Lead-silver concentrate	28%	41%
Ÿ Zinc concentrate	10%	10%
Ÿ Gold-silver concentrate	62%	49%

By metal contained in concentrate:	2014	2013
Ÿ Silver	64%	66%
Ÿ Lead	7%	7%
Ÿ Zinc	10%	9%
Ÿ Gold	19%	15%

The method of production both at Caylloma and San Jose consists of underground mining principally through cut and fill mechanized operations. Extracted ore is trucked to a conventional crushing, milling and flotation processing plant which consists of zinc, and lead-silver flotation circuits for Caylloma, and a gold-silver circuit for San Jose.

Specialized Skill and Knowledge. All aspects of the Company's business require specialized skills and knowledge. Such skills and knowledge include the areas of geology, mining, metallurgy, engineering, environment issues, permitting, social issues, and accounting. While increased activity in the resource mining industry has made it more difficult to locate and retain competent employees in such fields, the Company has been successful in finding and retaining personnel for the majority of its key processes.

Competitive Conditions. The Company competes with other mining companies, some of which have greater financial resources and technical facilities, for the acquisition of mineral property interests, as well as for the recruitment and retention of qualified employees.

Environmental Protection. The Company is currently in compliance with all material environmental regulations applicable to its exploration, development, construction and operating activities. The financial and operational effects of environmental protection requirements on the Company's capital expenditures, earnings, and competitive position during the fiscal year ended December 31, 2014 were not material. The Company has recorded in its financial statements for the year 2014 a provision for decommissioning and restoration liabilities which reflects future environmental obligations associated with the Caylloma and San Jose mine closure plans.

Employees. The Company and its subsidiaries have 697 direct employees and 953 indirect employees through contractors.

Foreign Operations. The Company's material mineral resource properties are located in Peru and Mexico, each of which has a stable government, and a mature mining industry and regulatory environment.

Health and Safety, Social and Environmental Policies . The Company is committed to maintaining the health and safety of its personnel by minimizing hazards and providing training and safe equipment. A strong safety culture is encouraged so that all employees are empowered to report and address safety issues.

The Company has built strong relationships with the communities in which it operates, and is dedicated to innovative, sustainable projects and partnerships that build company engagement in local communities while respecting their values, customs and traditions.

The Company is committed to complying in all material respects with all environmental laws and regulations applicable to its activities. It interacts proactively with authorities and communicates openly about its activities. The Company works directly and collaboratively with local communities to protect and preserve the environment.

Risk Factors

The Company's ability to generate revenues and profits from its natural resource properties is subject to a number of risks and uncertainties including, without limitation, the following:

Risks Related to the Caylloma and San Jose Mines

Operating hazards and risks. Mining operations generally involve a high degree of risk, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Hazards such as unusual or unexpected formations and other conditions can occur. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of precious and base metals, any of which could result in work stoppages, damage to or destruction of mines and other producing facilities, damage to life and property, environmental damage and possible legal liability for any or all damages. The Company may become subject to liability for pollution, cave-ins or hazards against which it cannot insure or against which it may elect not to insure. Any

compensation for such liabilities may have a material, adverse effect on the Company's financial position.

Concentrate treatment charges and transportation costs. The Company has entered into agreements to sell its concentrate production from the Caylloma and San Jose mines for 2015. Smelting and refining rates are similar to contract rates established for 2014. There is no assurance that the Company will be able to enter into smelting and refining contracts at similar competitive terms beyond 2015. The cost of transporting concentrate from the Mines to the smelters is dependent on, among other things, the concentrate destination. Transportation related costs have been volatile over the last several years and could continue to be volatile due to a number of factors, including changes in the price of oil, or a shortage in the number of vessels available to ship concentrate to smelters. Increases in these rates would have an adverse impact on the Company's results of operations and financial condition.

Risks Relating to the Company

Capital and operating costs, production schedules, and economic returns. The Company's expected operating costs and expenditures, production schedules, economic returns and other projections from a mining project which are contained in this document and in any technical reports, scoping studies, pre-feasibility studies and feasibility studies prepared for or by the Company are based on assumed or estimated future metals prices, cut-off grades, operating costs, capital costs, and expenditures and other factors any of which may prove to be inaccurate. Therefore, feasibility studies and other studies and reports may prove to be unreliable.

The Company's operating costs are affected by the cost of commodities and goods such as steel, cement, explosives, fuel, electrical power and supplies, including reagents. Management prepares its cost and production guidance and other forecasts based on its review of current and estimated future costs, and assumes that the materials and supplies required for operations will be available for purchase. As the Company relies on certain third-party suppliers and contractors, these factors can be outside our control and an increase in the costs of, or a lack of availability of, commodities and goods may have an adverse impact on the Company's financial condition.

General economic conditions. Turmoil in global financial markets in recent years has had a profound impact on the global economy. Many industries, including the precious and base metals mining industry, have been impacted by these market conditions. Some of the key impacts have included contraction in credit markets resulting in a widening of credit risk, devaluations and high volatility in global equity, commodity, foreign exchange and precious metal markets, and a lack of market liquidity. The sovereign debt crisis in Europe has been the most visible risk to world financial stability. A continued or worsened slowdown in economic conditions, including but not limited to, consumer spending, employment rates, business conditions, inflation, fuel and energy costs, consumer debt levels, lack of available credit, the state of the financial markets, interest rates, and tax rates may adversely affect the Company's growth and profitability. Specifically:

- Under a worst case scenario a new global credit/liquidity crisis could impact the cost and availability of financing and the Company's overall market liquidity;
- the volatility of metal prices could impact the Company's revenues, profits, losses and cash flow;
- volatile energy prices, commodity and consumables prices and currency exchange rates could impact the Company's production costs; and

- the devaluation and volatility of global stock markets, which are not related to the Company's operations or assets, could impact the valuation of the Company's equity and other securities.

These factors could have a material adverse effect on the Company's financial condition and results of operations.

Competition. The mining industry is intensely competitive in all of its phases, and such competition could adversely affect the Company's ability to acquire suitable resource properties in the future.

Substantial reliance on the Caylloma and San Jose Mines . All of the Company's revenues were generated by the Caylloma mine until September 2011 when commercial production commenced at the San Jose mine. For 2015, the Company anticipates that most if not all of its future revenue will come from the Caylloma and San Jose mines. Unless the Company develops or acquires additional properties or projects, the Company will remain largely dependent upon the operation of the Caylloma and San Jose mines for its revenue and profits, if any. If for any reason production at either mine was reduced or stopped, the Company's revenues and profits would decrease significantly.

Additional businesses and assets may not be successfully integrated. The Company undertakes evaluations of opportunities to acquire additional mining assets and businesses. Any acquisitions may be significant in size, may change the scale of the Company's business, and may expose the Company to new geographic, political, operating, financial and geological risks. The Company's success in its acquisition activities depends on its ability to identify suitable acquisition candidates, acquire them on acceptable terms, and integrate their operations successfully. Any acquisitions would be accompanied by risks such as a significant decline in the relevant metal price after the Company commits to complete an acquisition on certain terms; the quality of the mineral deposit acquired proving to be lower than expected; the difficulty of assimilating the operations and personnel of any acquired companies; the potential disruption of the Company's ongoing business; the inability of management to realize anticipated synergies and maximize the financial and strategic position of the Company; the failure to maintain uniform standards, controls, procedures and policies; the impairment of relationships with employees, customers and contractors as a result of any integration of new management personnel, and the potential unknown liabilities associated with acquired assets and businesses. There can be no assurance that any assets or business acquired will prove to be profitable or that the Company will be able to integrate the required businesses successfully, which could slow the Company's rate of expansion and the Company's business, results of operations and financial condition could suffer.

Fortuna may need additional capital to finance other acquisitions. If the Company obtains further debt financing, it will be exposed to the risk of leverage and its operations could become subject to restrictive loan and lease covenants and undertakings. If the Company obtains equity financing, existing shareholders may suffer dilution. There can be no assurance that the Company would be successful in overcoming these risks or any other problems encountered in connection with such financings.

Political and country risk. The Company conducts, or will conduct, exploration, development and production activity in a number of countries, namely Peru and Mexico and potentially others. The State of Oaxaca in Mexico has a history of social conflicts and political agitation which can lead to public demonstrations and blockades that can from time to time affect the Company's operations. The Company is not able to determine the impact of potential political, social, economic or other risks on its future financial position, which include:

- Cancellation or renegotiation of contracts;
- Changes in foreign laws or regulations;
- Changes in tax laws;
- Royalty and tax increases or claims by governmental entities;
- Retroactive tax or royalty claims;
- Expropriation or nationalization of property;
- Inflation of costs that is not compensated by a currency devaluation;
- Restrictions on the remittance of dividend and interest payments offshore;
- Environmental controls and permitting;
- Opposition from local community members or non-governmental organizations;
- Civil strife, acts of war, guerrilla activities, insurrection and terrorism, and
- Other risks arising out of foreign sovereignty over the areas in which the Company's operations are conducted.

Such risks could potentially arise in any country in which the Company operates. Furthermore, in the event of a dispute arising from such activities, the Company may be subject to the exclusive jurisdiction of courts outside North America or may not be successful in subjecting persons to the jurisdiction of the courts in North America, which could adversely affect the outcome of a dispute.

Metal prices and marketability. The marketability of any metals acquired or discovered may be affected by numerous factors which are beyond the Company's control and which cannot be accurately foreseen or predicted, such as market fluctuations, the global marketing conditions for precious and base metals, the proximity and capacity of milling facilities, metal markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting metals and environmental protection.

The price of the common shares of the Company, the Company's financial results and exploration, development and mining activities may in the future be significantly adversely affected by declines in the price of Ag, Au or other metals. The price of Ag, Au or other metals fluctuates widely and is affected by numerous factors beyond the Company's control such as the sale or purchase of metals by various central banks and financial institutions, interest rates, exchange rates, inflation or deflation, fluctuation in the value of the United States dollar and foreign currencies, global and regional supply and demand, the political and economic conditions of major metal-producing countries throughout the world, and the cost of substitutes, inventory levels and carrying charges. Future serious price declines in the market value of Ag, Au or other metals could cause continued development of and commercial production from the Company's properties to be impracticable. Depending on the price of Ag, Au and other metals, cash flow from mining operations may not be sufficient and the Company could be forced to discontinue production and may lose its interest in, or may be forced to sell, some of its properties. Future production from the Company's mining properties is dependent upon the prices of Ag, Au and other metals being adequate to make these properties economic.

In addition to adversely affecting the Company's reserve estimates and its financial condition, declining metal prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if the project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

Commodity forward and option contracts for base metals production. From time to time the Company may enter into agreements to receive fixed prices on any metal production to offset the risk of revenue losses if commodity prices decline; however, if commodity prices increase beyond the levels set in such agreements, the Company will not benefit from such increases.

Government regulation. Operations, development and exploration on the Company's properties are affected to varying degrees by political stability and government regulations relating to such matters as environmental protection, health, safety and labour, mining law reform, restrictions on production, price controls, tax increases, maintenance of claims, tenure, and expropriation of property. There is no assurance that future changes in such regulations, if any, will not adversely affect the Company's operations.

The activities of the Company require licenses and permits from various governmental authorities. While the Company currently has been granted the requisite licenses and permits to enable it to carry on its existing business and operations, there can be no assurance that the Company will be able to obtain all the necessary licenses and permits which may be required to carry out exploration, development and mining operations for its projects. In rare circumstances, the Company might find itself in situations where the state of compliance with regulation and permits can be subject to interpretation and challenge from authorities that could carry risk of fines or temporary stoppage.

Environmental matters. All phases of the Company's operations are subject to environmental regulation in the various jurisdictions in which it operates. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Company's operations. Environmental hazards may exist on the Company's properties which are unknown to the Company at present

which have been caused by previous or existing owners or operators of the properties.

Dependence on key personnel. The Company is dependent on a number of key management and employee personnel. The Company's ability to manage its exploration, development, construction and operating activities, and hence its success, will depend in large part on the ability to retain current personnel and attract and retain new personnel, including management, technical and unskilled employees. The loss of the services of one or more key management personnel, as well as a prolonged labor disruption, could have a material adverse effect on the Company's ability to successfully manage and expand its affairs.

The Company's ability to recruit and assimilate new personnel will be critical to its performance. The Company will be required to recruit additional personnel and to train, motivate and manage its employees. The international mining industry is very active and the Company is facing increased competition for personnel in all disciplines and areas of operation, including geology and project management, and there can be no assurance that it will be able to retain current personnel and attract and retain new personnel.

Director and officer conflicts of interest. Certain of the directors and officers of the Company also serve as directors and/or officers of other companies involved in natural resource exploration and development and consequently there exists the possibility for such directors and officers to be in a position of conflict. In such case, the Company's directors and officers comply with conflict of interest provisions in Canadian corporate law, including relevant securities regulatory instruments, in order to ensure that they exercise independent judgment in considering transactions and agreements in respect of which a director or officer has a material interest.

Title to properties. Although the Company has or will receive title opinions for any properties in which it has a material interest, there is no guarantee that title to such properties will not be challenged or impugned. The Company has not conducted surveys of the claims in which it holds direct or indirect interests and, therefore the precise area and location of the properties may be in doubt. The Company's properties may be subject to prior unregistered agreements or transfers or native land claims and title may be affected by unidentified or unknown defects. The Company has conducted as thorough investigation as possible on the title of properties that it has acquired or will be acquiring to be certain that there are no other claims or agreements that could affect its title to the properties.

Dilution from further equity financing. If the Company raises additional funding by issuing equity securities, such financing may substantially dilute the interests of existing shareholders of the Company and reduce the value of their investment.

Foreign currency. The Company's activities and operations in Mexico and Peru make it subject to foreign currency fluctuations. The Company's operating expenses are primarily incurred in Mexican pesos and Peruvian Sol, and the fluctuation of the US dollar in relation to these currencies will consequently have an impact upon the profitability of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks.

Exploration and development, and infrastructure. Development of the Company's non-producing properties will only follow upon obtaining satisfactory exploration results that confirm economically recoverable and saleable volumes of minerals and metal. The business of mineral exploration and development is speculative in nature and involve a high degree of risk, as few properties which are explored are ultimately developed into producing mines. There is no assurance that the Company's mineral exploration and development activities will result in any discoveries of reserves of commercial ore. The long-term profitability of the Company's operations will be in part directly related to the cost and success of its exploration programs, which may be affected by a number of factors.

Substantial expenditures are required to establish resources and reserves through drilling and development and for mining and processing facilities and infrastructure. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that the funds required for development can be obtained on a timely basis. Economic feasibility of a project is based on several other factors including anticipated metallurgical recoveries, environmental considerations and permitting, future metal prices, and timely completion of the development plan.

Completion of the development of the Company's advanced projects is subject to various requirements, including the availability and timing of acceptable arrangements for power, water, transportation, access and facilities. The lack of, or delay in, availability of any one or more of these items could prevent or delay development of the Company's advanced projects. There can be no assurance that adequate infrastructure, including road access, will be built, that it will be built in a timely manner or that the cost of such infrastructure will be reasonable or that it will sufficiently satisfy the requirements of the advanced projects. As well, accidents or sabotage could affect the provision or maintenance of adequate infrastructure.

The Company's operations require water, and its San Jose mine is located in a region where water is scarce. While the Company believes it holds sufficient water rights to support its current operations, future developments could limit the amount of water available to the Company. New water development projects, or climatic conditions such as extended drought, could adversely affect the Company. There can be no guarantee that the Company will be successful in maintaining adequate supplies of water for its operations.

Insurance. Where practical, a reasonable amount of insurance is maintained against risks in the Company's operations, but coverage has exclusions and limitations. There is no assurance that the Company's insurance will be adequate to cover all liabilities or that it will continue to be available and at terms that are economically acceptable. Losses from un-insured or under-insured events may cause the Company to incur significant costs that could have a material adverse effect on its financial performance.

Estimation of mineral resources and reserves and precious metal recoveries. There is a degree of uncertainty attributable to the estimation of resources and reserves and to expected mineral grades. Mineral resources and mineral reserves may require revision based on actual production experience. Market fluctuations in the price of metals, as well as increased production costs and reduced recovery rates, may render certain mineral reserves uneconomic and may ultimately result in a restatement of mineral resources and/or reserves. Short term

operating factors relating to the mineral resources and reserves, such as the need for sequential development of ore bodies may adversely affect the Company's profitability in any accounting period.

Reclamation. There is a risk that monies allotted for land reclamation may not be sufficient to cover all risks, due to changes in the nature of the waste rock or tailings and/or revisions to government regulations. Therefore, additional funds, or reclamation bonds or other forms of financial assurance may be required over the tenure of the project to cover potential risks. These additional costs may have material adverse impact on the financial condition and results of the Company.

Uncertainty of funding. The Company's operating cash flow from the Caylloma and San Jose mines may not be sufficient to cover the current costs of exploration and development of the Company's other, non-producing properties. Exploration and development activities may be dependent upon the Company's ability to obtain financing through joint venturing, equity or debt financing or other means, and although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that the Company will be able to obtain additional financing or that the terms of such financing will be favorable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of some of its projects.

Uncertainty of dividends on its common shares. The Company has paid no dividends on its common shares since incorporation and does not anticipate paying dividends in the foreseeable future. Payment of any future dividends will be at the discretion of the Company's board of directors after taking into account many factors, including the Company's operating results, financial condition and current and anticipated cash needs.

Legal Proceedings. Due to the nature of its business, the Company may be subject to numerous regulatory investigations, claims, lawsuits and other proceedings in the ordinary course of its business. The results of these legal proceedings cannot be predicted with certainty due to the uncertainty inherent in litigation, including the effects of discovery of new evidence or advancement of new legal theories, the difficulty of predicting decisions of judges and juries and the possibility that decisions may be reversed on appeal. There can be no assurances that these matters will not have a material adverse effect on the Company's business.

U.S. investors may have difficulty enforcing U.S. judgments against the Company. The Company is incorporated under the laws of British Columbia, Canada and the majority of the Company's directors and officers are not residents of the U.S. Consequently, it may be difficult for U.S. investors to effect service of process within the United States upon the Company or upon such persons who are not residents of the United States, or to realize in the United States upon judgments of U.S. courts predicated upon civil liabilities under U.S. securities laws. A judgment of a U.S. court predicated solely upon such civil liabilities may be enforceable in Canada by a Canadian court if the U.S. court in which the judgment was obtained had jurisdiction, as determined by the Canadian court, in the matter. There is substantial doubt whether an original action could be brought successfully in Canada against any of such persons or the Company predicated solely upon such civil liabilities.

Material Mineral Properties

The Company has two material mineral projects, described below.

Caylloma Mine, Peru

The Company owns a 100% interest in the Caylloma mine, Peru.

The following is the Summary from the technical report (the "Caylloma Report") entitled "Fortuna Silver Mines Inc.: Caylloma Property, Caylloma District, Peru" dated as of March 22, 2013, as amended April 15, 2013, prepared by Eric N. Chapman and Thomas Kelly. The full text of the Caylloma Report is available for viewing on SEDAR at www.sedar.com and is incorporated by reference in this AIF. Defined terms and abbreviations used herein and not otherwise defined shall have the meanings ascribed to such terms in the Caylloma Report.

Summary

This Technical Report refers to the Caylloma property, an operating underground mine located in the Caylloma Province, Peru. Since June 2005, the Caylloma property has been 100 % owned by Minera Bateas S.A.C. (Minera Bateas), a Peruvian subsidiary of Fortuna Silver Mines Inc. (Fortuna).

The Caylloma property is located in the Caylloma Mining District, 225 kilometers north-northwest of Arequipa, Peru. The property is within the historical mining district of Caylloma, northwest of the Caylloma caldera complex and southwest of the Chonta caldera complex. Host rocks at the Caylloma property are volcanic in nature, belonging to the Tacaza Group. Mineralization is in the form of low to intermediate sulfidation epithermal vein systems.

Epithermal veins at the Caylloma property are characterized by minerals such as pyrite, sphalerite, galena, chalcopyrite, marcasite, native gold, stibnite, argentopyrite, and silver-bearing sulfosalts (tetrahedrite, polybasite, pyrargyrite, stephanite, stromeyerite, jalpite, miargyrite and bournonite). These are accompanied by gangue minerals, such as quartz, rhodonite, rhodochrosite, johannsenite (manganese-pyroxene) and calcite.

There are two different types of mineralization at Caylloma; the first is comprised of silver-rich veins with low concentrations of base metals and includes the Bateas, Bateas Techo, La Plata, Cimoide La Plata, San Cristóbal, San Pedro, San Carlos, Paralela, and Ramal Paralela veins. The second type of vein is polymetallic in nature with elevated lead, zinc, copper, silver and gold grades and includes the Animas, Animas NE, Santa Catalina, Soledad, Silvia, Pilar, Patricia, and Nancy veins.

Underground operations are presently focused on mining the Animas and Bateas veins. Exploration in 2012 focused on the expansion and

delineation of the Animas and Animas NE veins as well as the exploration of the recently discovered Nancy vein.

The 2012 Mineral Resource update has relied on channel and drill hole sample information obtained by Minera Bateas since 2005. Mineralized domains identifying potentially economically extractable material were modeled for each vein and used to code drill holes and channel samples for geostatistical analysis, block modeling and grade interpolation by ordinary kriging or inverse distance weighting.

Mineral Resource and Mineral Reserve estimates for the Caylloma property are reported as of December 31, 2012 and detailed in Table 1.1 and Table 1.2.

Economic values (NSR) for each mining block take into account the commercial terms of 2012, the average metallurgical recovery, the average grade in concentrate and long term projected metal prices. Mineral Reserves have been reported above a break-even cut-off value calculated for each vein, based on NSR values and operating costs. Mineral Resources have been reported above a US$30/t cut-off value based on NSR values.

Mineral Resources are categorized as Measured, Indicated and Inferred. The criteria used for classification includes, the number of samples, spatial distribution, distance to block centroid, kriging efficiency (KE) and slope of regression (ZZ).

Mineral Reserve estimates have considered only Measured and Indicated Mineral Resources as only these categories have sufficient geological confidence to be considered Mineral Reserves (CIM, 2010). Subject to the application of certain economic and mining-related qualifying factors, Measured Resources may become Proven Reserves and Indicated Resources may become Probable Reserves.

Table 1.1 Mineral Reserves as of December 31, 2012

Vein type	Category	Tonnes (000)	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Contained Metal	
							Ag (Moz)	Au (koz)
Silver Veins	Proven	11	872	0.06	0.43	0.64	0.3	0.0
	Probable	246	386	0.96	0.31	0.51	3.1	7.6
	Proven +Probable	257	407	0.93	0.31	0.51	3.4	7.7
Polymetallic Veins	Proven	1,242	92	0.33	1.48	2.20	3.7	13.2
	Probable	2,809	121	0.33	1.66	2.27	10.9	30.2
	Proven +Probable	4,052	112	0.33	1.60	2.25	14.6	43.4
Combined-All Veins	Proven	1,253	99	0.33	1.47	2.19	4.0	13.2
	Probable	3,055	142	0.38	1.55	2.13	14.0	37.8
	Proven +Probable	4,308	130	0.37	1.52	2.15	17.9	51.1

Table 1.2 Mineral Resources as of December 31, 2012

Category	Tonnes (000)	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Contained Metal	
						Ag (Moz)	Ag (Moz)
Measured	431	72	0.30	0.88	1.53	1.0	4.2
Indicated	1,170	82	0.34	0.75	1.40	3.1	12.8
Measured + Indicated	1,601	79	0.33	0.79	1.43	4.1	17.0
Inferred	6,633	101	0.27	1.84	2.58	21.5	58.5

Notes

- Mineral Reserves and Mineral Resources are as defined by CIM Definition Standards on Mineral Resources and Mineral Reserves
- Mineral Resources are exclusive of Mineral Reserves

- Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability
- There are no known legal, political, environmental, or other risks that could materially affect the potential development of the Mineral Resources or Mineral Reserves at Caylloma or San Jose.
- Mineral Resources and Mineral Reserves are estimated as of June 30, 2012 and reported as of December 31, 2012 taking into account production-related depletion for the period of July 1, 2012 through December 31, 2012 with the exception of the Animas and Animas NE veins which were re-estimated using all exploration drilling information as of December 31, 2012
- Mineral Reserves are reported above a NSR breakeven cut-off of US$74.69/t for Animas, Animas NE, and San Cristóbal; US$226.77/t for Bateas, Cimoide La Plata, and La Plata; US$138.34/t for Soledad, Silvia, and Santa Catalina
- Mineral Resources are reported above a NSR cut-off of US$30/t

- Metal prices used in the NSR evaluation for Mineral Reserves are US$29.36/oz for silver, US$1,544/oz for gold, US$2,245/t for lead and US$2,139/t for zinc
- Metal prices used in the NSR evaluation for Mineral Resources are US$25.14/oz for silver, US$1,391.63/oz for gold, US$2,116/t for lead and US$2,006/t for zinc
- Metallurgical recovery values used in the NSR evaluation of sulfides are 82 % for silver, 45 % for gold, 93 % for lead, and 88 % for zinc; and of oxides are 64 % for silver, 45 % for gold, 46 % for lead, and 30 % for zinc
- Operating costs were estimated based on 2012 actual costs
- Tonnes are rounded to the nearest thousand
- The quantity and grade of the Inferred Resources reported in this estimation are conceptual in nature, and it is uncertain if further exploration will result in upgrading of Inferred Resources to Indicated or Measured Resource categories
- Totals may not add due to rounding

Minera Bateas continues to successfully manage the operation, mining 462,000 t of ore from underground to produce 2.0 Moz of silver, 2.8 koz of gold, 17.9 Mlbs of lead, and 22.4 Mlbs of zinc in 2012 while continuing to improve the mine infrastructure.

Fortuna believes there is good potential for a significant increase of the Mineral Resources at the Caylloma property particularly from the continuity of the current veins in operation as well as from the discovery of new veins. During 2012 important exploration projects were developed and new exploration targets were identified. Fortuna is committed in continuing its intensive exploration program, budgeting US$ 6.7 million to continue developing ongoing exploration projects over identified structures as well as the discovery of new targets. In addition to this US$ 4 million has been budgeted for work designed to upgrade Inferred Resources.

The construction of the first stage of the new tailings facility (N° 3) with 15 years life at a 1,300 tpd design capacity, as well as the granting of the operation permit by the Ministry of Energy and Mines in December 2012, has been a major milestone for Minera Bateas in order to assure available tailings disposal capacity for the coming years.

The mining operation has been developed under strict compliance of norms and permits required by public institutions associated with the mining sector. Furthermore, all work follows quality and safety international norms as set out in ISO 14001 and OHSAS 18000.

Minera Bateas continues developing sustainable programs to benefit the local communities including educational, nutritional and economical programs. The socio−environmental responsibilities of these programs contribute toward establishing a good relationship between the company and local communities.

This Technical Report represents the most accurate interpretation of the Mineral Reserve and Mineral Resource available at the effective date of this report. The conversion of Mineral Resources to Mineral Reserve was made using industry-recognized methods, actual operational costs, capital costs, and plant performance data. Thus, it is considered to be representative of actual and future operational conditions.

San Jose Mine, Mexico

The Company owns a 100% interest in the San Jose mine, Mexico.

The following is the Summary from the technical report (the "San Jose Report") entitled "Fortuna Silver Mines Inc.: San Jose Property, Oaxaca, México" dated as of November 22, 2013 prepared by Eric N. Chapman and Thomas Kelly. The full text of the San Jose Report is available for viewing on SEDAR at www.sedar.com and is incorporated by reference in this AIF. Defined terms and abbreviations used herein and not otherwise defined shall have the meanings ascribed to such terms in the San Jose Report.

Summary

This Technical Report has been prepared by Fortuna Silver Mines Inc. (Fortuna) in accordance with the disclosure requirements of Canadian National Instrument 43-101 (NI 43-101) to disclose recent information about the San Jose operation.

The San Jose mine is located in the central portion of the state of Oaxaca, Mexico. The project site is 47 km by road south of the city of Oaxaca and 0.8 km east of federal highway 175, the major highway between Oaxaca and Puerto Angel on the Pacific coast. The village of San José del Progreso is located 2 km to the southeast of the project site.

The San Jose mine is operated by Compania Minera Cuzcatlan S.A. de C.V., a Mexican subsidiary 100 percent owned by Fortuna.

The San Jose Mine area is underlain by a thick sequence of sub-horizontal andesitic to dacitic volcanic and volcaniclastic rocks of presumed Paleogene age. These units have been significantly displaced along major north- and northwest-trending extensional fault systems with the

precious metal mineralization being hosted in hydrothermal breccias, crackle breccias, and sheeted and stockwork-like zones of quartz/carbonate veins emplaced within zones of high paleopermeability associated with the extensional structures.

The mineralized structural corridor extends for more than 3 km in a north-south direction and has been subdivided into the Trinidad deposit area and the San Ignacio area. The Mineral Resource and Mineral Reserve estimates discussed in this Technical Report are located in the Trinidad deposit area.

The major mineralized structures or vein systems recognized in the Trinidad deposit area are the Trinidad and Bonanza vein systems. In addition to the major veins, secondary veins and zones of sheeted and stockworked quartz-carbonate veins are present between the Trinidad and Bonanza systems and locally in the hanging wall adjacent to the Bonanza vein system.

In the second half of 2012 and first half of 2013 an aggressive program of infill (delineation) drilling and exploration drilling was executed to define and expand the resources and reserves of the Trinidad Deposit.

Infill drilling targeted a Stockwork domain located between the Trinidad and Bonanza veins below the 1300 level. The new drilling results provided closer spaced intercepts enabling the geological interpretation to be refined and resulted in the upgrading of 1.3 Mt from an Inferred to an Indicated category with respect to the previous estimate reported as of December 31, 2012 (Fortuna, 2013b). The stockwork mineralization is characterized by moderate to high-grade material present over significant widths (averaging 27 m).

Exploration drilling targeted the Trinidad North discovery of the Trinidad Deposit with the majority of drilling being north of 1847200N and below 1200 m elevation. The drilling identified the continuation of the Bonanza and Trinidad veins, encountering numerous high-grade intercepts over significant intervals (Fortuna, 2013c; Fortuna, 2013d; Fortuna, 2013e; Fortuna, 2013g). The exploration drilling discovered 1.9 Mt of Inferred Resources averaging 269 g/t Ag and 1.67 g/t Au at a 70 g/t Ag Eq cut-off grade contributing 21.8 million silver equivalent ounces to the resource inventory.

To-date, drilling has defined the Trinidad and Bonanza vein systems over a strike length of approximately 1,000 meters and to depths exceeding 600 meters from the surface. The deposit remains open to the north and at depth.

Mineral Reserves and Mineral Resources as of July 4, 2013 are reported in Table 1.1 and Table 1.2 respectively.

Table 1.1 Mineral Reserves as of July 4, 2013

Classification	Tonnes (000)	Ag (g/t)	Au (g/t)	Contained Metal

Notes:

- Mineral Reserves and Mineral Resources are as defined by CIM Definition Standards on Mineral Resources and Mineral Reserves.
- Mineral Resources are exclusive of Mineral Reserves.
- Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.
- There are no known legal, political, environmental, or other risks that could materially affect the potential development of the Mineral Resources or Mineral Reserves at San Jose.
- Mineral Resources and Mineral Reserves are estimated and reported as of July 4, 2013.
- Mineral Reserves are estimated using break-even cut-off grades based on assumed metal prices of US$24.00/oz Ag and US$1,400.00/oz Au, estimated metallurgical recovery rates of 89% for Ag and 89% for Au and projected operating costs. Mineral Resources are estimated at a Ag Equivalent cut-off grade of 70 g/t, with Ag Eq in g/t = Ag (g/t) + Au (g/t)* ((US$1,391.63/US$25.14)* (89/89)).
- Mining, processing and administrative costs were estimated based on first half of 2013 actual costs.
- Totals may not add due to rounding.

Mineral Resource estimation involved the usage of drill hole and channel samples in conjunction with underground mapping to construct three dimensional wireframes to define individual vein structures. Samples were selected inside these wireframes, coded, composited and top cuts applied if applicable. Boundaries were treated as hard with statistical and geostatistical analysis conducted on composites identified in individual veins. Silver and gold grades were estimated into a geological block model representing each vein. Primary veins including Bonanza, Trinidad, Fortuna and the Stockwork Zone were estimated by Sequential Gaussian Simulation. Secondary veins were estimated by inverse power of distance. Estimated grades were validated globally, locally, and visually prior to tabulation of the Mineral Resources.

Mineral Reserve estimates have considered only Measured and Indicated Mineral Resources as only these categories have sufficient geological confidence to be considered Mineral Reserves (CIM, 2010). Subject to the application of certain economic and mining-related qualifying factors,

Measured Resources may become Proven Reserves and Indicated Resources may become Probable Reserves.

Mineral Reserves are estimated at 3.9 million tonnes as of July 4, 2013, which is sufficient for a 6.3 year life of mine considering 350 days in the year for production and a capacity rate of 1,800 tpd. Expectation is for an average annual production of approximately 3.5 million troy ounces of silver and 30 thousand troy ounces of gold based on an average 195 g/t Ag and 1.68 g/t Au head grade. Proven and Probable Reserves are estimated to contain 24.8 Moz silver and 215.1 koz gold, reflecting increases of 22 percent in contained silver ounces and 27 percent in contained gold ounces relative to the December 31, 2012 Mineral Reserves estimate. Variations from previously announced reserves and resources are the result of successful conversion of previously existing Inferred Resources to Indicated or Measured Resource categories through infill drilling partially offset by depletion through the extraction of ore during the period of Jan. 1st through June 30th of 2013. Alterations in the reserve estimation process have also led to improved spatial identification of reserves in three dimensions. Future increases in the mine life are anticipated through the upgrading of Inferred Resources in the Trinidad North discovery (planned for 2014) and their subsequent conversion to Mineral Reserves.

Minera Cuzcatlan commenced production at the San Jose mine in September 2011 and as of June 30, 2013 had produced 3.5 Moz of silver and 31 koz of gold. The mining method applied in the exploitation of the veins is overhand cut and fill using a mechanized extraction methodology. Production capacity at the mine has been increased to 1,800 tonnes per day through a plant expansion completed in September 2013. From January 1 to June 30, 2013 the operation had processed close to 200,000 tonnes of ore from its underground mining operation and produced approximately 1.07 Moz of silver and 8.6 koz of gold. Additionally, the tailings dam capacity has been increased with the successful completion of stage 2 of the construction project raising the storage capacity to 1,427,000 m^3.

Operating costs are estimated at US$68.14 per tonne of processed ore. This is a significant improvement from previous years where this value was over US$75.00 per milled tonne. The operating costs reduction is mainly explained by the expanded ore processing throughput to 1,800 tpd which allows for the decrease of the operating fixed costs component.

Recommended projects for 2014 include:

1) **Mine Development Program**. This activity is designed to prepare the high-grade mineralized Stockwork zone at 1,200 masl, which will sustain production in 2014. Additionally, the development will aim to reach the 1,100 level so as to complete the access and allow construction of the required infrastructure for the Trinidad North discovery area.
2) **Completion of Tailing Dam Stage 3a**. This is a core project that requires an investment of US$11.6 million during 2014 and is designed to raise the height of the tailings dam, increasing storage capacity in order to sustain the operation for the next two and a half years. Fortuna is also exploring alternative solutions for future tailings storage, including using the material as back fill underground, in an attempt to reduce future capital and operating expenditures.
3) **Delineation drilling**. Minera Cuzcatlan is planning to continue the delineation drilling from underground in 2014 including in the Trinidad North discovery area. The goal of the program is to convert a total of 641,000 t of Inferred Resource to the category of Indicated Resource representing an estimated 6.6 Moz Ag Eq. To achieve this 23 drill holes totaling 6,315 m have been planned at a budgeted cost of US$1.4 million.
4) **Brownfields exploration**. The Trinidad North exploration drilling campaign is planned to continue in the last quarter of 2013 and throughout 2014. To ensure the drill holes intercept the mineralized structures at a reasonable intersection angle, the drilling will be conducted from underground. An exploration crosscut and two drilling stations have been completed on the 1300 m level and drilling from the underground drill stations was initiated in late September of 2013 to further explore the extensions of this important mineralized shoot to depth and to the north. Fifteen drill holes are planned totaling 6,310 m of drilling at a budget cost of US$1 million with additional drilling being considered to further test the northern extensions of the mineralized structures.
5) **Water evaporation control system**. This has been identified as a key strategic project to increase the water available for the operations through reduction of evaporation losses of the tailings pond by seventy percent. This will reduce the amount of water required external to the operation and lead to a further decrease in operating costs. Additionally, extra water could also be used to facilitate future increases in production. Capital expenditure budgeted for this project in 2014 is US$1.89 million.

This Technical Report represents the most accurate interpretation of the Mineral Reserve and Mineral Resource available at the effective date of this report. The conversion of Mineral Resources to Mineral Reserves was made using industry-recognized methods, actual operational costs, capital costs, and plant performance data. Thus, it is considered to be representative of actual and future operational conditions. This report has been prepared with the latest information regarding environmental and closure cost requirements.

Fortuna believes there is excellent potential to further increase the Mineral Resource at the San José property with recent drilling demonstrating the continuation of high-grade mineralization in the Trinidad North discovery with the mineralization remaining open to the north and at depth.

DIVIDENDS

The Company has not to date paid any dividends on its common shares nor does it intend to pay any dividends on its shares in the immediate future as management anticipates that all available funds will be invested to finance further acquisition, exploration and development of its mineral properties.

DESCRIPTION OF CAPITAL STRUCTURE

The Company's authorized share capital is an unlimited number of common shares without par value. All common shares of the Company rank

equally as to dividends, voting powers and participation in assets and in all other respects.

Voting. The holders of common shares are entitled to receive notice of, attend and vote at any meeting of the shareholders of the Company. Each common share carries one vote per share.

Dividends. The holders of common shares are entitled to receive on a pro-rata basis such dividends as the Board of Directors from time to time may declare, out of funds legally available therefor.

Rights on Dissolution. In the event of a liquidation, winding-up or dissolution of the Company, whether voluntary or involuntary or for the purpose of a reorganization or otherwise or upon any distribution of capital, the holders of the common shares have the right to receive on a pro-rata basis all of the assets of the Company remaining after payment of all of the Company's liabilities.

Pre-emptive, Conversion and Other Rights. No pre-emptive, redemption, retraction, exchange, sinking fund or conversion rights are attached to the common shares, and the common shares, when fully paid, will not be liable to further call or assessment. No other class of shares may be created without the approval of the holders of the common shares.

MARKET FOR SECURITIES

The Company's common shares were listed and posted for trading on the TSX Venture Exchange ("TSXV") until January 18, 2010 when the Company graduated to the Toronto Stock Exchange ("TSX"). On September 19, 2011, the Company's common shares were listed and posted for trading on the New York Stock Exchange ("NYSE"). The Company's shares currently trade on the NYSE under the symbol "FSM", on the TSX under the symbol "FVI", on the Lima Stock Exchange in Peru under the symbol "FVI", and on the Frankfurt Open Market, the unofficial market organized by Deutsche Börse in Germany, under the symbol "F4S". The Company is in the process of voluntarily delisting from the Lima Stock Exchange as a very limited amount of trading of the Company's common shares occurs on such Exchange.

Trading Prices and Volume

The following table provides the high and low prices (in Canadian dollars) and volume for the Company's shares as traded on the TSX during the fiscal year ended December 31, 2014:

Period	High ($)	Low ($)	Volume
December 2014	5.43	4.44	17,703,600
November 2014	5.57	3.71	12,912,600
October 2014	5.40	3.74	12,558,800
September 2014	5.50	4.40	9,556,400
August 2014	6.45	5.26	6,614,400
July 2014	6.59	5.64	8,609,500
June 2014	6.10	4.01	7,932,200
May 2014	4.74	3.95	3,703,200
April 2014	4.63	4.04	5,634,400
March 2014	5.31	3.78	13,636,400
February 2014	5.15	4.01	8,058,200
January 2014	4.50	3.10	7,498,500

DIRECTORS AND EXECUTIVE OFFICERS

Name, Occupation and Shareholding

The Board of Directors presently consists of seven directors. Each director will hold office until the next annual general meeting of the Company or until his successor is elected or appointed, unless his office is earlier vacated in accordance with the Articles of the Company, or with the provisions of the British Columbia *Business Corporations Act*.

The following are the full name, place of residence, position with the Company, and principal occupation within the preceding five years of each of the directors and executive officers of the Company:

Name, Position and Residency (1)	Principal Occupation or Employment (1)	Period as a Director of the Company
JORGE GANOZA DURANT President, Chief Executive Officer & Director Lima, Peru	President & CEO of the Company.	December 2, 2004 to present
SIMON RIDGWAY Chairman and Director British Columbia, Canada	Chairman of the Company; President & CEO of Radius Gold Inc. (mineral exploration).	January 25, 2005 to present

MICHAEL IVERSON [3] [4] Director British Columbia, Canada	Executive Vice-President, December 2004 to present, and formerly Chairman & CEO, over five years, of Niogold Mining Corporation (mineral exploration); President of Triple K Ventures Inc. (private management).	March 30, 1998 to present
MARIO SZOTLENDER [3] [4] Director Caracas, Venezuela	Independent Consultant and Director of several public mineral exploration companies.	June 16, 2008 to present
ROBERT GILMORE [2] [4] Director Colorado, USA	Independent Certified Public Accountant; Independent Financial Consultant; Director of Eldorado Gold Corporation (mining); Director of Layne Christensen Company (diversified water and mineral services).	June 23, 2010 to present
THOMAS KELLY [2] Director Lima, Peru	Mining Engineer; Chief Operating Officer of Atico Mining Corp. (copper exploration & mining), March 2013 to present; CEO of Apurimac Ferrum (mineral exploration), 2011 to 2013; COO of Inca Pacific Resources, Inc. (mineral exploration), 2008 to 2010.	April 11, 2011 to present
DAVID FARRELL [2] [3] [4] Director British Columbia, Canada	President of Davisa Consulting (a private consulting company), 2011 to present; President of Cannon Point Resources Ltd. (mineral exploration), April 2013 to present; Managing Director of Mergers & Acquisitions at Endeavour Financial until October 2011.	July 15, 2013 to present
LUIS GANOZA DURANT Chief Financial Officer Lima, Peru	Chief Financial Officer of the Company.	N/A

Name, Position and Residency [1]	**Principal Occupation or Employment [1]**	**Period as a Director of the Company**
MANUEL RUIZ-CONEJO Vice-President, Operations Lima, Peru	Vice-President, Operations of the Company, August 2011 to present; formerly Vice-President, Project Development, July 2009 to August 2011, and Vice-President, Business Development of the Company, February 2008 to July 2009.	N/A
THOMAS VEHRS Vice-President, Exploration Colorado, USA	Vice-President, Exploration of the Company.	N/A
JOSE PACORA Vice-President, Project Development Lima, Peru	Vice-President, Project Development of the Company, November 2014 to present; Corporate Project Manager of the Company, February 2012 to November 2014; Project Manager of Pan American Silver Peru SAC (mining company), 2000 to January 2012.	N/A

Notes:
(1) The information as to country of residence, principal occupation, and shares held is not within the knowledge of the management of the Company and has been furnished by the respective individuals.
(2) Member of the Audit Committee of the Company.
(3) Member of the Compensation Committee of the Company.
(4) Member of the Corporate Governance and Nominating Committee of the Company.

As at the date hereof, the directors and executive officers of the Company beneficially own or have control or direction over, directly or indirectly, an aggregate of 769,860 common shares of the Company, representing approximately 0.6% of the issued shares of the Company.

Cease Trade Orders or Bankruptcies

As at the date of the AIF and during the 10 years prior to the date of the AIF, none of the directors or executive officers of the Company or a shareholder holding a sufficient number of securities of the Company to affect materially the control of the Company:

(a) is or has been a director or executive officer of any company (including the Company), that while that person was acting in that capacity:

(i) was the subject of a cease trade order or similar order or an order that denied the relevant company access to any exemption under securities legislation, for a period of more than 30 consecutive days, other than Simon Ridgway and Mario Szotlender, who are directors of a corporation that, in the past 10 years, had its registration under Section 12(g) of the U.S. Exchange Act revoked by the SEC for failure to keep its filings with the SEC up-to-date. Upon receipt of the SEC's notice of proposed revocation, the corporation filed a settlement agreement with the SEC consenting to the revocation as the corporation was dormant at the time. This corporation filed a registration statement with the SEC in January 2015 to re-register its common shares under Section 12(g) of the U.S. Exchange Act, which became effective in March 2015. The effectiveness of such registration statement removes the prior restrictions on market participants trading the corporation's shares in United States markets;

(ii) was subject to an event that resulted, after the director or executive officer ceased to be a director or executive officer, in the company being the subject of a cease trade or similar order or an order that denied the relevant company access to any exemption under securities legislation, for a period of more than 30 consecutive days; or

(iii) within a year of that person ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets; or

(b) has become bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or become subject to or instituted any proceedings, arrangement or compromise with creditors, or had a receiver, receiver manager or trustee appointed to hold the assets of the director, officer and shareholder.

Penalties or Sanctions

As at the date of the AIF and during the 10 years prior to the date of the AIF, none of the directors or officers of the Company or a shareholder holding a sufficient number of securities of the Company to affect materially the control of the Company has been subject to:

(a) any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority other than the settlement agreement described in paragraph (a)(i) under "Cease Trade Orders or Bankruptcies" above; or

(b) any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable investor making an investment decision.

Conflicts of Interest

There are no existing or potential material conflicts of interest between the Company or any of its subsidiaries and a director or officer of the Company or any subsidiary.

AUDIT COMMITTEE

Pursuant to the provisions of National Instrument 52-110 (the "Instrument"), the Company's Audit Committee has adopted a written charter (the "Charter") that sets out its mandate and responsibilities. The Charter is attached hereto as Schedule "A".

The Audit Committee is presently comprised of Robert Gilmore, Thomas Kelly and David Farrell. All members of the Committee are "independent" and "financially literate", within the meanings given to those terms in the Instrument.

The education and experience of each Audit Committee member that is relevant to the performance of his responsibilities as an audit committee member is as follows:

Audit Committee Member	Education and Experience
Robert Gilmore	Mr. Gilmore is a Certified Public Accountant and independent financial consultant with more than 30 years' experience working with resource companies. He is a graduate of the University of Denver with a Bachelor of Science degree in Business Administration, Accounting. He is Chairman of the Board and of the Audit Committee of Eldorado Gold Corporation, and is a director and Audit Committee Chairman of Layne Christensen Company. Mr. Gilmore has also served as Chairman of the Audit Committees of Global Med Technologies, MK Resources, Inc., Frontera Copper Corporation and Ram Power Corporation.

Audit Committee Member	Education and Experience

Thomas Kelly	Mr. Kelly has Bachelor and Masters Degrees in Mining Engineering from the Colorado School of Mines and is a Fellow of Aus.IMM and a Registered Member of SME. He has over 35 years of world-wide mineral industry experience including underground and open pit mining, project development, project management, corporate management and consulting services. Mr. Kelly has held senior positions with Freeport-McMoRan Copper & Gold Inc., AMEC Americas, Inca Pacific Resources Inc. and other recognized industry-leading companies. He is a recognized expert in project management/development and is fluent in Spanish.
David Farrell	David Farrell is President of Davisa Consulting, a private consulting firm working with junior to mid-tier global mining companies. He formerly was Managing Director, Mergers & Acquisitions at Endeavour Financial where he successfully closed over US$25 billion worth of mergers and acquisitions transactions for junior and mid-tier natural resource companies. Before his 12 years at Endeavour Financial, Mr. Farrell was a lawyer at Stikeman Elliott, working in Vancouver, Budapest and London. He graduated from the University of British Columbia with a B.Comm (Honours, Finance) and an LL.B and was called to the bar in both British Columbia and England. Mr. Farrell is currently a director and member of the audit committee for two other junior public companies. His background has given him the required experience to understand and assess the general application of the accounting principles used by the Company and to understand internal controls and procedures for financial reporting.

The auditors of the Company, Deloitte LLP, obtain, as necessary, the pre-approval of the Audit Committee for any anticipated additional services required of the auditors for the coming fiscal year. If other service requirements arise during the year, the Audit Committee will pre-approve such services at that time, prior to the commencement of such services. No services were performed by the auditors pursuant to the *De-Minimus Non-audit Services* exemption contained in the Instrument.

During the Company's most recently completed fiscal year, the Company's auditors performed certain non-audit services. Fees charged (in Canadian dollars) by the auditors during the last two fiscal years are as follows:

	2014	**2013**
Audit Fees	$507,462	$443,073
Audit-Related Fees	Nil	Nil
Tax Fees	$150,805	$151,725
All Other Fees	Nil	Nil
	$658,267	$594,798

"Audit Fees" are the aggregate fees billed for the audit of the Company's consolidated annual financial statements, and review of the interim financial statements and management discussion and analysis.

"Audit-Related Fees" are fees charged for assurance and related services that are reasonably related to the performance of the audit or review of the Company's financial statements and are not reported under "Audit Fees".

"Tax Fees" are fees for professional services rendered for tax compliance and tax advice on actual or contemplated transactions.

"All Other Fees" are amounts not included in the categories above.

LEGAL PROCEEDINGS

There are no known legal proceedings involving an amount exceeding 10% of the current assets of the Company to which the Company is a party or which any of its properties is the subject during the most recently completed financial year, or any such proceedings known to the Company to be contemplated.

TRANSFER AGENT AND REGISTRAR

The Company's transfer agent and registrar is Computershare Trust Company, at its offices in Vancouver, BC and Toronto, ON.

MATERIAL CONTRACTS

There are no contracts, other than those herein disclosed in this AIF and other than those entered into in the ordinary course of the Company's business, that are material to the Company and that were entered into during the most recently completed fiscal year ended December 31, 2014 or before the most recently completed financial year, but are still in effect as of the date of this AIF.

INTERESTS OF EXPERTS

Names of Experts

Eric N. Chapman and Thomas Kelly, each a Qualified Person as defined by NI 43-101, are the authors of the Caylloma Report and the San Jose Report. In these Reports, the Mineral Resource estimates were prepared under the supervision of Mr. Chapman, and the Mineral Reserve estimate and the Mineral Resource estimate exclusive of Mineral Reserves were prepared under the supervision of Mr. Kelly.

Eric N. Chapman and Boris Caro, each a Qualified Person, prepared and/or supervised the updated Mineral Resource and Mineral Reserve estimates for the Caylloma Mine and the San Jose Mine described in this AIF under the heading "General Development of the Business – Three-Year History and Recent Developments".

Thomas Vehrs, a Qualified Person, is responsible for ensuring that the technical information contained in this AIF is an accurate summary of the original reports and data provided to or developed by the Company.

Interests of Experts

To the knowledge of the Company, the experts named above did not have any registered or beneficial interest, direct or indirect, in any securities or other property of the Company when the experts prepared their reports, other than Eric N. Chapman who currently holds 15,658 options in the Company, Thomas Kelly who currently holds 19,760 options in the Company, and Thomas Vehrs who currently holds 525,000 shares and 497,092 options in the Company.

Deloitte LLP are the auditors of the Company and are independent within the meaning of the Rules of Professional Conduct of British Columbia.

ADDITIONAL INFORMATION

Additional information relating to the Company is available for viewing on SEDAR at www.sedar.com. Information regarding directors' and officers' remuneration and indebtedness, principal holders of the Company's securities and securities authorized for issuance under equity compensation plans, if applicable, is contained in the Company's Information Circular pertaining to its Annual General Meeting held on June 19, 2014. Additional financial information is provided in the Company's audited financial statements for the fiscal year ended December 31, 2014 and the management's discussion and analysis thereon.

SCHEDULE "A"

FORTUNA SILVER MINES INC.
(the "Company")

AUDIT COMMITTEE CHARTER

PURPOSE

The primary function of the Audit Committee is to assist the Board of Directors of the Company (the 'Board") in fulfilling its oversight responsibilities by reviewing the financial information to be provided to the shareholders and others, the systems of internal controls and management information systems established by the senior officers of the Company ("Management") and the Company's internal and external audit process and monitoring compliance with the Company's legal and regulatory requirements with respect to its financial statements.

The Audit Committee is accountable to the Board. In the course of fulfilling its specific responsibilities hereunder, the Audit Committee is expected to maintain an open communication between the Company's external auditors and the Board.

The Audit Committee does not plan or perform audits or warrant the accuracy or completeness of the Company's financial statements or financial disclosure or compliance with generally accepted accounting procedures as these are the responsibility of Management.

RESPONSIBILITIES

Subject to the powers and duties of the Board, the Board hereby delegates to the Audit Committee the following powers and duties to be performed by the Audit Committee on behalf of and for the Board. Nothing in this Charter is intended to or does confer on any member a higher standard of care or diligence than that which applies to the directors as a whole.

External Auditors

The Audit Committee has primary responsibility for the selection, appointment, dismissal, compensation and oversight of the external auditors, subject to the overall approval of the Board. For this purpose, the Audit Committee may consult with Management.

The external auditors shall report directly to the Audit Committee.

Also, the Audit Committee:

a. recommends to the Board:

    i. whether the current external auditors should be nominated for reappointment for the ensuing year and if applicable, select and

recommend a suitable alternative for nomination; and

ii. the amount of compensation payable to the external auditors;

b. resolves disagreements, if any, between Management and the external auditors regarding financial reporting;

c. provides the Board with such recommendations and reports with respect to the financial statements of the Company as it deems advisable;

d. takes reasonable steps to confirm the independence of the external auditors, including but not limited to pre-approving any non-audit related services provided by the external auditors to the Company or the Company's subsidiaries, if any;

---

e. confirms that the external auditors are a 'participating audit' firm for the purpose of National Instrument 52-108 *Auditor Oversight* and are in compliance with governing regulations;

f. reviews the plan and scope of the audit to be conducted by the external auditors of the Company;

g. reviews and evaluates the performance of the external auditors; and

h. reviews and approves the Company's hiring policy regarding partners, employees and former partners and employees of the Company's present and former external auditors.

Audit and Review Process and Results

The Audit Committee has a duty to receive, review and make any inquiry regarding the completeness, accuracy and presentation of the Company's financial statements to ensure that the financial statements fairly present the financial position and risks of the organization and that they are prepared in accordance with generally accepted accounting principles. To accomplish this, the Audit Committee:

a. considers the scope and general extent of the external auditors' review, including their engagement letter and major changes to the Company's auditing and accounting principles and practices;

b. consults with management regarding the sufficiency of the Company's internal system of audit and financial controls, internal audit procedures and results of such audits;

c. ensures the external auditors have full, unrestricted access to required information and have the cooperation of management;

d. reviews with the external auditors the audit process and standards, as well as regulatory or Company-initiated changes in accounting practices and policies and the financial impact thereof, and selection or application of appropriate accounting principles;

e. reviews with the external auditors and, if necessary, legal counsel, any litigation, claim or contingency, including tax assessments, that could have a material effect upon the financial position of the Company and the manner in which these matters are being disclosed in the financial statements;

f. reviews the appropriateness and disclosure of any off-balance sheet matters;

g. reviews disclosure of related-party transactions;

h. receives and reviews with the external auditors, the external auditors' audit report and the audited financial statements;

i. makes recommendations to the Board respecting approval of the audited financial statements;

j. meets with the external auditors separately from management to review the integrity of the Company's financial reporting, including the clarity of financial disclosure and the degree of conservatism or aggressiveness of the accounting policies and estimates, any significant disagreements or difficulties in obtaining information, adequacy of internal controls over financial reporting, adequacy of disclosure controls and procedures, and the degree of compliance by the Company with prior recommendations of the external auditors;

k. directs management to implement such changes as the Audit Committee considers appropriate, subject to any required approvals of the Board arising out of the review; and

l. meets at least annually with the external auditors, independent of management, and reports to the Board on such meetings.

Interim Financial Statements

The Audit Committee:

a. reviews and determines the Company's practice with respect to review of interim financial statements by the external auditors;

b. conducts all such reviews and discussions with the external auditors and Management as it deems appropriate; and

c. makes recommendations to the Board respecting approval of the interim financial statements.

Involvement with Management

The Audit Committee has primary responsibility for overseeing the actions of management in all aspects of financial management and reporting. The Audit Committee:

a. reviews the Company's annual and interim financial statements, Management's Discussion and Analysis and earnings press releases, if any, before the Company publicly discloses this information;

b. reviews all of the Company's public disclosure of financial information extracted from the Company's financial statements, if such financial statements have not previously been reviewed by the Committee, prior to such information being made public by the Company and for such purpose, the CFO assumes responsibility for providing the information to the Audit Committee for its review;

c. reviews material financial risks with Management, the plan that Management has implemented to monitor and deal with such risks and the success of Management in following the plan;

d. consults annually and otherwise as required with the Company's CEO and CFO respecting the adequacy of the internal controls over financial reporting and disclosure controls and procedures and reviews any breaches or deficiencies;

e. obtains such certifications of annual and interim filings by the CEO and CFO attesting to internal controls over financial reporting and disclosure controls and procedures as deemed advisable;

f. reviews Management's response to significant written reports and recommendations issued by the external auditors and the extent to which such recommendations have been implemented by Management;

g. reviews with Management the Company's compliance with applicable laws and regulations respecting financial reporting matters, and any proposed regulatory changes and their impact on the Company; and

h. reviews as required with Management and approves disclosure of the Audit Committee Charter, and Audit Committee disclosure required in the Company's Annual Information Form, Information Circular and on the Company's website.

PROCEDURAL MATTERS

The Audit Committee:

a. invites the Company's external auditors, the CFO, and such other persons as deemed appropriate by the Audit Committee to attend meetings of the Audit Committee;

b. reports material decisions and actions of the Audit Committee to the Board, together with such recommendations as the Committee may deem appropriate;

c. has the power to conduct or authorize investigations into any matter within the scope of its responsibilities;

d. has the right to engage independent counsel and other advisors as it determines necessary to carry out its duties and the right to set the compensation for any advisors employed by the Audit Committee;

e. has the right to communicate directly with the CFO and other members of Management who have responsibility for the internal and external audit process, as well as to communicate directly with the internal and external auditors; and

f. pre-approves non-audit services to be performed by the external auditors.

COMPOSITION

The Audit Committee is composed of a minimum of three directors, all of whom are independent and have relevant skills and/or experience in the Audit Committee's areas of responsibility as may be required by the securities laws applicable to the Company, including those of any stock exchange on which the Company's securities are traded.

Appointment of Committee Members and Vacancies

Members of the Audit Committee are appointed or confirmed by the Board annually and hold office at the pleasure of the Board. The Board fills any vacancy on, or any additional members to, the Audit Committee.

Committee Chair

The Board appoints a Chair for the Audit Committee.

STRUCTURE AND OPERATIONS

Meetings

The Chair of the Audit Committee or the Chair of the Board or any two of its members may call a meeting of the Audit Committee. The Audit Committee meets at least four times each fiscal year, and at such other times during each year as it deems appropriate.

Quorum

A majority of the members appointed to the Audit Committee constitutes a quorum.

Notice of Meetings

The Chair of the Audit Committee arranges to provide notice of the time and place of every meeting in writing (including by facsimile) to each member of the Audit Committee at least two (2) business days prior to the time fixed for such meeting, provided, however, that a member may in any manner waive a notice of a meeting. Attendance of a member at a meeting constitutes a waiver of notice of the meeting, except where a member attends a meeting for the express purpose of objecting to the transaction of any business on the grounds that the meeting is not lawfully called. The Chair also ensures that an agenda for the meeting and all required materials for review by the members of the Audit Committee are delivered to the members with sufficient time for their review, or that such requirement is waived.

Absence of Committee Chair

If the Chair of the Audit Committee is not present at any meeting of the Audit Committee, the other members of the Audit Committee will be chose a Chair to preside at the meeting.

Secretary of Committee

At each meeting the Audit Committee appoints a secretary who need not be a director of the Company.

Attendance of the Company's Officers at Meetings

The Chair of the Audit Committee or any two members of the Audit Committee may invite one or more officers of the Company to attend any meeting of the Audit Committee.

Delegation

The Audit Committee may, in its discretion and where permitted by National Instrument 52-110 – Audit Committees, delegate all or a portion of its duties and responsibilities to a subcommittee, management or, to the extent otherwise permitted by applicable plans, laws or regulations, to any other body or individual.

Procedure and Records

Subject to any statute or constating documents of the Company, the Audit Committee determines its own procedures at meetings and may conduct meetings by telephone and keeps records of its proceedings.

COMPLAINTS

The Audit Committee has established a Whistle Blower Policy which sets out the procedures for:

a. the receipt, retention and treatment of complaints received by the Company regarding accounting, internal accounting controls, or auditing matters; and

b. the confidential, anonymous submission to the Company of concerns regarding questionable accounting or auditing matters.

The Audit Committee reviews the Whistle Blower Policy annually.

REPORTING AND ASSESSMENT

The Audit Committee reports to the Board of Directors, and on an annual basis, presents to the Board a Committee Annual Report consisting of the Audit Committee's review of its charter, the Committee's and its Chair's performance over the past year, and any recommendations the Audit Committee makes in respect thereto.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
Fortuna Silver Mines Inc.

We have audited the accompanying consolidated financial statements of Fortuna Silver Mines Inc. (the "Company"), which comprise the consolidated statements of financial position as at December 31, 2014 and December 31, 2013 and the consolidated statements of net income (loss), consolidated statements of comprehensive income (loss), consolidated statements of cash flows, and consolidated statements of changes in equity for the years then ended December 31, 2014 and December 31, 2013, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material

misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Fortuna Silver Mines Inc. as at December 31, 2014 and December 31, 2013 and its financial performance and its cash flows for the years then ended December 31, 2014 and December 31, 2013 in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

FORTUNA SILVER MINES INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2014 AND 2013
(All amounts in US$'000's unless otherwise stated)

---

1. Corporate Information

Fortuna Silver Mines Inc. ("Fortuna" or the "Company") is engaged in silver mining and related activities in Latin America, including exploration, extraction, and processing. The Company operates the Caylloma silver, lead, and zinc mine ("Caylloma") in southern Peru and the San Jose silver and gold mine ("San Jose") in southern Mexico.

Fortuna is a publicly traded company incorporated and domiciled in Canada. Its common shares are listed on the New York Stock Exchange under the trading symbol FSM; on the Toronto Stock Exchange and Lima Stock Exchange, both under the trading symbol FVI; and on the Frankfurt Stock Exchange under the trading symbol F4S.F.

The Company's registered office is located at Suite 650, 200 Burrard Street, Vancouver, British Columbia, Canada, V6C 3L6.

2. Basis of Consolidation and Summary of Significant Accounting Policies

a) Statement of Compliance

These consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). The policies applied in these consolidated financial statements are based on IFRS issued and effective as at December 31, 2014. The Board of Directors approved these financial statements for issue on March 12, 2015.

b) Basis of Consolidation

These Financial Statements include the accounts of the Company and its subsidiaries. All significant inter-company transactions, balances, revenues, and expenses have been eliminated upon consolidation.

Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from the entity's activities. Control is normally achieved through ownership, directly or indirectly, of more than 50% of the voting power. Control can also be achieved through power over more than half the voting rights by virtue of an agreement with other investors or through the exercise of de facto control.

For non-wholly owned subsidiaries, the net assets attributable to outside equity shareholders are presented as "non-controlling interests" in the equity section of the consolidated statements of financial position. Net income for the period that is attributable to non-controlling interests is calculated based on the ownership of the minority shareholders in the subsidiary.

Subsidiaries are included in the consolidated financial results of the Company from the effective date of acquisition up to the effective date of disposition or loss of control. The principal subsidiaries of the Company and their geographic locations at December 31, 2014 were as follows:

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

b) Basis of Consolidation (continued)

Name	Entity Type at December 31, 2014	Location	Economic Interest at December 31, 2014	Principal Activity	Method
Minera Bateas S.A.C. ("Bateas")	Subsidiary	Peru	100%	Caylloma Mine	Consolidation
Fortuna Silver Mines Peru S.A.C. ("FSM Peru")	Subsidiary	Peru	100%	Service company	Consolidation
Compania Minera Cuzcatlan SA ("Cuzcatlan")	Subsidiary	Mexico	100%	San Jose Mine	Consolidation
Fortuna Silver Mexico, S.A. de CV. ("FS Mexico")	Subsidiary	Mexico	100%	Exploration company	Consolidation
Fortuna Silver (Barbados) Inc. ("Barbados")	Subsidiary	Barbados	100%	Holding company	Consolidation
Continuum Resources Ltd. ("Continuum")	Subsidiary	Canada	100%	Holding company	Consolidation

As at December 31, 2014, the Company has no joint arrangements or associates.

c) Revenue Recognition

Revenue arising from the sale of metal concentrates is recognized when title or the significant risks and rewards of ownership of the concentrates have been transferred to the buyer. The passing of title to the customer is based on the terms of the sales contract. Final commodity prices are set in a period subsequent to the date of sale based on a specified quotational period, either one, two, or three months after delivery. The Company's metal concentrates are provisionally priced at the time of sale based on the prevailing market price.

Variations between the price recorded at the delivery date and the final price set under the sales contracts are caused by changes in market prices, and result in an embedded derivative in accounts receivable. The embedded derivative is recorded at fair value each period until final settlement occurs, with changes in fair value classified as provisional price adjustments and included in sales in the consolidated statement of income. Sales of metal concentrates are net of refining and treatment charges.

Revenues from metal concentrate sales are subject to adjustment upon final settlement of metals prices, weights, and assays as of a date that is typically one, two, or three months after the delivery date. Typically, the adjustment is based on an inspection of the concentrate by the customer and in certain cases an inspection by a third party. The Company records adjustments to revenues monthly based on quoted spot prices for the expected settlement period. Adjustments for weights and assays are recorded when results are determinable or on final settlement.

d) Cash and Cash Equivalents

Cash and cash equivalents are designated as fair value through profit or loss ("FVTPL"). Cash and cash equivalents include cash on hand, demand deposits, and money market instruments, with maturities from the date of acquisition of 90 days or less, which are readily convertible to known amounts of cash and are subject to insignificant changes in value. Transaction costs are expensed when incurred through profit or loss.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

e) Mineral Properties, Plant and Equipment

Costs directly related to construction projects are capitalized to work-in-progress until the asset is available for use in the manner intended by management. Completed property, plant and equipment are recorded at cost, net of accumulated depreciation and accumulated impairments. Assets, other than capital work in progress, will be depreciated to their residual values over their estimated useful lives as follows:

Land and buildings		
Land	Not depreciated	
Mineral properties	Units of production	
Buildings, located at the mine	Life of mine	
Buildings, others	6 – 20 years	Straight line
Leasehold improvements	7 – 8 years	Straight line
Plant and equipment		
Machinery and equipment	3 – 15 years	Straight line
Furniture and other equipment	3 – 13 years	Straight line
Transport units	4 – 5 years	Straight line
Capital work in progress	Not depreciated	

Equipment under finance lease is initially recorded at the present value of minimum lease payments at the inception of the lease and depreciated as above. Spare parts and components included in machinery and equipment, depending on the replacement period of the initial component, are depreciated over 8 to 18 months.

Borrowing costs attributed to the construction of qualifying assets are capitalized to mineral properties, plant and equipment are included in the carrying amounts of related assets until the asset is available for use in the manner intended by management.

Costs associated with commissioning activities on constructed plants are deferred from the date of mechanical completion of the facilities until the date the assets are ready for use in the manner intended by management.

On an annual basis, the depreciation method, useful economic life and the residual value of each component asset is reviewed, with any changes recognized prospectively over its remaining useful economic life.

FORTUNA SILVER MINES INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2014 AND 2013
(All amounts in US$'000's unless otherwise stated)

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

e) Mineral Properties, Plant and Equipment (continued)

i. Exploration and Evaluation Assets

Significant payments related to the acquisition of land and mineral rights are capitalized as incurred. Prior to acquiring such land or mineral rights, the Company makes a preliminary evaluation to determine that the property has significant potential to develop an economic ore body. The time between initial acquisition and full evaluation of a property's potential is dependent on many factors including: location relative to existing infrastructure, the property's stage of development, geological controls and metal prices.

The Company defers the cost of acquiring, maintaining its interest, exploring and developing mineral properties as exploration and evaluation assets when future inflow of economic benefits from the properties is probable and until such time as the properties are placed into development, abandoned, sold or considered to be impaired in value.

If a mineable ore body is discovered, exploration and evaluation costs are reclassified to mining properties. If no mineable ore body is discovered, such costs are expensed in the period in which it is determined the property has no future economic value.

Proceeds received from the sale of interests in evaluation and exploration assets are credited to the carrying value of the mineral properties, with any excess included in income as gain or loss on disposal of mineral properties, plant and equipment.

Write-downs due to impairment in value are charged to income. The cash-generating unit for assessing impairment is a geographic region and shall be no larger than the operating segment.

Exploration costs that do not relate to any specific property are expensed as incurred.

ii. Operational Mining Properties and Mine Development

For operating mines, all exploration within the mineral deposit is capitalized and amortized on a unit-of-production basis over proven and probable reserves and the portion of resources expected to be extracted economically as part of the production cost.

Costs of producing properties are amortized on a unit-of-production basis over proven and probable reserves and the portion of resources expected to be extracted economically, and costs of abandoned properties are written-off.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

e) Mineral Properties, Plant and Equipment (continued)

iii. Commercial Production

Capital work in progress consists of expenditures for the construction of future mines and includes pre-production revenues and expenses prior to achieving commercial production. Commercial production is a convention for determining the point in time in which a mine and plant has completed the operational commissioning and has operational results that are expected to remain at a sustainable commercial level over a period of time, after which production costs are no longer capitalized and are reported as operating costs. The determination of when commercial production commences is based on several qualitative and quantitative factors including but not limited to the following:

- all major capital expenditures to bring the mine to the condition necessary for it to be capable of operating in the manner intended by management have been completed;
- the mine or mill is operating within eighty percent of design capacity;
- metallurgical recoveries are achieved within eighty percent of projections; and,
- the ability to sustain ongoing production of ore at a steady or increasing level.

On the commencement of commercial production, depletion of each mining property will be provided on a unit-of-production basis. Any costs incurred after the commencement of production are capitalized to the extent they give rise to a future economic benefit.

f) Asset Impairment

Assets are reviewed and tested for impairment when an indicator of impairment is considered to exist. An assessment of impairment indicators is performed at each reporting period or whenever indicators arise. Even with no indicators present, the Company will test an intangible asset with an indefinite useful life or an intangible asset not yet available for use for impairment at least annually. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell ("FVLCTS") and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash inflows or cash generating units. These are typically individual mines or development projects. Brownfields exploration projects, located close to existing mine infrastructure, are assessed for impairment as part of the associated mine

cash generating unit.

Fair value models are used to determine the recoverable amount of cash generating units. When the recoverable amount is assessed using pre-tax discounted cash flow techniques, the resulting estimates are based on detailed mine and/or production plans. For value in use, recent cost levels are considered, together with expected changes in costs that are compatible with the current condition of the business. The cash flow forecasts are based on best estimates of expected future revenues and costs, including the future cash costs of production, sustaining capital expenditure and reclamation and closures costs.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

f) Asset Impairment (continued)

Where a fair value less cost to sell model is used the cash flow forecast includes net cash flows expected to be realized from extraction, processing and sale of mineral resources that do not currently qualify for inclusion in proven or probable reserves and the portion of resources expected to be extracted economically.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of recoverable amount, but not beyond the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized into earnings immediately.

g) Borrowing Costs

Interest and other financing costs incurred that are attributable to acquiring and developing exploration and development stage mining properties and constructing new facilities ("qualifying assets") are capitalized and included in the carrying amounts of qualifying assets until those qualifying assets are ready for their intended use.

Capitalization of borrowing costs incurred commences on the date the following three conditions are met:

- expenditures for the qualifying asset are being incurred;
- borrowing costs are being incurred; and,
- activities that are necessary to prepare the qualifying asset for its intended use are being undertaken.

Borrowing costs incurred after the qualifying assets are ready for their intended use are expenses in the period in which they are incurred.

Borrowing costs, comprised of legal fees and upfront commitment fee, associated with the credit facility for general working capital and future expansion are recorded as Accounts Receivable and Other Assets and amortized over the term of the credit facility.

All other borrowing costs are expensed in the period in which they are incurred.

h) Provisions

i. Decommissioning and restoration provisions

Future obligations to retire an asset, including dismantling, remediation and ongoing treatment and monitoring of the site related to normal operations are initially recognized and recorded as a liability based on estimated future cash flows discounted at the risk-free rate.

The decommissioning and restoration provision ("DRP") is adjusted at each reporting period for changes to factors including the expected amount of cash flows required to discharge the liability, the timing of such cash flows and the risk-free discount rate.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

h) Provisions (continued)

i. Decommissioning and restoration provisions (continued)

The liability is accreted to full value over time through periodic charges to income. This accretion of provisions is charged to finance costs in the consolidated statements of income.

The amount of the DRP initially recognized is capitalized as part of the related asset's carrying value and amortized to income (loss). The method of amortization follows that of the underlying asset. The costs related to a DRP are only capitalized to the extent that the amount meets the definition of an asset and can bring about future economic benefit. For a closed site or where the asset which generated a DRP no longer exists, there is no longer future benefit related to the costs and as such, the amounts are expensed. For operating sites, a revision in estimates or a new disturbance will result in an adjustment to the liability with an offsetting adjustment to the capitalized retirement cost. For closed sites, adjustments to the DRP that are required as a result of changes in estimates are charged to income in the period in which the adjustment is identified.

ii. Environmental disturbance restoration provisions

During the operating life of an asset, events such as infractions of environmental laws or regulations may occur. These events are not related to the normal operation of the asset and are referred to as environmental disturbance restoration provisions ("EDRP"). The costs associated with an EDRP are accrued and charged to earnings in the period in which the event giving rise to the liability occurs. Any subsequent adjustments to an EDRP due to changes in estimates are also charged to earnings in the period of adjustment. These costs are not capitalized as part of the long-lived asset's carrying value.

iii. Other provisions

Provisions are recognized when a present legal or constructive obligation exists, as a result of past events, and it is probable that an outflow of resources that can be reliably estimated will be required to settle the obligation. Where the effect is material, the provision is discounted using an appropriate current market-based pre-tax discount rate.

i) Inventories

Inventories include metals contained in concentrates, stockpiled ore, materials, and supplies. The classification of metals inventory is determined by the stage in the production process. Product inventories are sampled for metal content and are valued based on the lower of actual production costs incurred or estimated net realizable value based upon the period ending prices of contained metal.

Ore stockpile and finished goods inventories are valued at the lower of production cost and net realizable value. Materials and supplies are valued at the lower of average cost and net realizable value. Production costs include all mine site costs.

(All amounts in US$'000's unless otherwise stated)

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

j) Assets Held for Sale

A non-current asset is classified as held for sale when it meets the following criteria:

- the non-current asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets; and,
- the sale of the non-current asset is highly probable. For the sale to be highly probable:
  - the appropriate level of management must be committed to a plan to sell the asset;
  - an active program to locate a buyer and complete the plan must have been initiated;
  - the non-current asset or disposal group must be actively marketed for sale at a price that is reasonable in relation to its

current fair value;
- the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification as held for sale (with certain exceptions); and,
- actions required to complete the plan should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Assets held for sale are not depreciated. When the sale of assets held for sale is expect to occur beyond one year, the assets are measured at the lower of its carrying amount and fair value less costs to sell. Any gain or loss from initial measurement and subsequent measurement are recorded in other comprehensive income but not in excess of cumulative impairment losses.

k) Income Taxes

Income tax expense consists of current and deferred tax expense. Income tax is recognized in the consolidated statement of income.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax assets and liabilities are recognized for deferred tax consequences attributable to unused tax loss carry forwards, unused tax credits and differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using the enacted or substantially enacted tax rates expected to apply when the asset is realized or the liability settled.

The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income or loss in the period that substantive enactment occurs.

A deferred tax asset is recognized to the extent that it is probable that future taxable income will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that deferred tax asset will be recovered, the deferred tax asset is reduced.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

k) Income Taxes (continued)

The following temporary differences do not result in deferred tax assets or liabilities:

- the initial recognition of assets or liabilities, not arising in a business combination, that does not affect accounting or taxable income;
- goodwill; and,
- investments in subsidiaries, associates and jointly controlled entities where the timing of reversal of the temporary differences can be controlled and reversal in the foreseeable future is not probable.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to the offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

l) Share-Based Payments

The fair value method of accounting is used for share-based payment transactions. Under this method, the cost of share options and other equity-settled share-based payment arrangements are recorded based on the estimated fair value at the grant date and charged to earnings over the vesting period. Where awards are forfeited because non-market based vesting conditions are not satisfied, the expense previously recognized is proportionately reversed in the period the forfeiture occurs.

Share-based payment expense relating to cash-settled awards, including deferred and restricted share units is accrued over the vesting period of the units based on the quoted market value of Company's common shares. As these awards will be settled in cash, the expense and liability are adjusted each reporting period for changes in the underlying share price.

i. Stock Option Plan

The Company applies the fair value method of accounting for all stock option awards. Under this method, the Company recognizes a compensation expense for all stock options awarded to employees, based on the fair value of the options on the date of grant which is determined by using the Black-Scholes option pricing model. The fair value of the options is expensed over the graded vesting period of the options.

ii. Deferred Share Unit ("DSU") Plan

The Company's DSU compensation liability is accounted for based on the number of units outstanding and the quoted market value of the Company's common shares at the financial position date. The year-over-year change in the deferred share unit compensation liability is recognized in income.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

l) Share-Based Payments (continued)

iii. Restricted Share Unit ("RSU") Plan

The Company's RSU compensation liability is accounted for based on the number of units outstanding and the quoted market value of the Company's common shares at the financial position date. The Company recognizes a compensation cost in operating income on a graded vesting basis for each RSU granted equal to the quoted market value of the Company's common shares at the date of which RSUs are awarded to each participant prorated over the performance period and adjusts for changes in the fair value until the end of the performance date. The cumulative effect of the change in fair value is recognized in income in the period of change.

m) Earnings per Share

Basic earnings per share is computed by dividing net income for the year by the weighted average number of common shares outstanding during the year.

The diluted earnings per share calculation is based on the weighted average number of common shares outstanding during the year, plus the effects of dilutive common share equivalents. This method requires that the dilutive effect of outstanding options issued should be calculated using the treasury stock method. This method assumes that all common share equivalents have been exercised at the beginning of the year (or at the time of issuance, if later), and that the funds obtained thereby were used to purchase common shares of the Company at the average trading price of the common shares during the year, but only if dilutive.

n) Foreign Currency Translation

The presentation currency of the Company is the United States Dollar ("US$").

The functional currency of each of the entities in the group is the US$, with the exception of the parent entity and certain holding companies which have a Canadian dollar functional currency.

Transactions in foreign currencies are initially recorded in the functional currency at the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange at each financial position date. Foreign exchange gains or losses on translation to the functional currency of an entity are recorded in income. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction.

For entities with a functional currency different from the presentation currency of the Company, translation to the presentation currency is required. Assets and liabilities are translated at the rate of exchange at the financial position date. Revenue and expenses are translated at the average rate for the period. All resulting exchange differences are recognized in other comprehensive income.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

o) Financial Instruments

i. Financial Assets

The Company classifies all financial assets as either fair value through profit or loss ("FVTPL"), held-to-maturity ("HTM"), loans and receivables, or available-for-sale "(AFS"). The classification is determined at initial recognition and depends on the nature and purpose of the financial asset.

a) Financial Assets at Fair Value Through Profit or Loss

Financial assets are classified as FVTPL when the financial asset is held-for-trading or it is a designated FVTPL on initial recognition. A financial asset is classified in this category if acquired principally for the purpose of selling in the short-term.

Financial assets classified as FVTPL are stated at fair value with any resulting gain or loss recognized in income or loss in the period in which they arise. Transaction costs related to financial assets classified as FVTPL are recognized immediately in net income (loss).

Derivatives are not being accounted for as hedges and are categorized as held-for-trading. Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Fair value of the Company's recognized commodity-based derivatives are based on the forward prices of the associated market index. Gains or losses are recorded in the consolidated statement of income.

b) Held-to-Maturity ("HTM")

HTM investments are recognized on a trade-date basis and are initially measured at fair value, including transaction costs. The Company does not have any assets classified as HTM investments.

c) Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are initially measured at fair value, net of transaction costs and are classified as current or non-current assets based on their maturity date. They are carried at amortized cost less any impairment. The impairment loss of receivables is based on a review of all outstanding amounts at each reporting period. Interest income is recognized by applying the effective interest rate, except for short term receivables when the recognition of interest would not be significant.

FORTUNA SILVER MINES INC.

FOR THE YEARS ENDED DECEMBER 31, 2014 AND 2013
(All amounts in US$'000's unless otherwise stated)

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

o) Financial Instruments (continued)

i. Financial Assets (continued)

d) Available-For-Sale ("AFS") Assets

AFS financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories.

AFS financial assets are measured at fair value, determined by published market prices in an active market, except for

investments in equity instruments that do not have quoted market prices in an active market which are measured at cost. Changes in fair value are recorded in other comprehensive income (loss) until realized through disposal or impairment. Investments classified as available-for-sale are written down to fair value through income whenever it is necessary to reflect prolonged or significant decline in the value of the assets. Realized gains and losses on the disposal of available-for-sale securities are recognized in the consolidated statement of income.

The Company does not have any assets classified as AFS.

e) Impairment of Financial Assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at each reporting period. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted.

Objective evidence of impairment could include the following:

- significant financial difficulty of the issuer or counterparty;
- default or delinquency in interest or principal payments; or
- it has become probable that the borrower will enter bankruptcy or financial reorganization.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the financial asset's original effective interest rate.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

o) Financial Instruments (continued)

i. Financial Assets (continued)

e. Impairment of Financial Assets (continued)

The carrying amount of all financial assets at amortized cost, excluding trade receivables, is directly reduced by the impairment loss. The carrying amount of trade receivables is reduced through the use of an allowance account. When a trade receivable is considered uncollectable, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in income or loss.

With the exception of AFS equity instruments, if in a subsequent period, the amount of the impairment loss decreases and the decrease relates to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through income or loss. On the date of impairment reversal, the carrying amount of the financial asset cannot exceed its amortized cost had an impairment not been recognized.

f) Derecognition of Financial Assets

A financial asset is derecognized when:

- the contractual right of the asset's cash flows expire; or
- if the Company transfers the financial asset and substantially all risks and reward of ownership to another entity.

ii. Financial Liabilities

Derivatives are categorized as held-for-trading. Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Fair value of the Company's recognized commodity-based derivatives are based on the forward prices of the associated market index. Gains or losses are recorded in the consolidated statement of income.

Long term debt and other financial liabilities are recognized initially at the fair value, net of transaction costs incurred, and are

subsequently stated at amortized cost. Any difference between the amounts originally received (net of transaction costs) and the redemption value is recognized in the consolidated statement of income over the period to maturity using the effective interest method.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

o) Financial Instruments (continued)

iii. Classification and Subsequent Measurements

The Company has designated each of its significant categories of financial instruments as follows:

Financial Instrument	Classification	Measurement
Cash and Cash Equivalents	FVTPL	Fair value
Short Term Investments	FVTPL	Fair value
Derivative Assets	FVTPL	Fair value
Trade Receivable from Concentrate Sales	FVTPL	Fair value
Other Accounts Receivables	Loans and receivables	Amortized cost
Due from Related Parties	Loans and receivables	Amortized cost
Long Term Receivables	Loans and receivables	Amortized cost
Trade and Other Payables	Other liabilities	Amortized cost
Due to Related Parties	Other liabilities	Amortized cost
Derivative Liabilities	FVTPL	Fair value
Income Tax Payable	Other liabilities	Amortized cost
Lease and Long Term Liabilities	Other liabilities	Amortized cost

iv. Effective Interest Method

The effective interest method calculates the amortized cost of a financial instrument and allocates interest income or expense over the corresponding period. The effective interest rate is the rate that discounts estimated future cash receipts or payments over the expected life of the financial instrument, or where appropriate, a shorter period, to the net carrying amount on initial recognition. Income or expense is recognized on an effective interest basis for instruments other than those financial instruments classified as FVTPL.

p) Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Refer to Note 16. a).

FORTUNA SILVER MINES INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2014 AND 2013
(All amounts in US$'000's unless otherwise stated)

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

q. Segment Reporting

The Company's operating segments are based on the reports reviewed by the senior management group that are used to make strategic decisions. The Chief Executive Officer considers the business from a geographic perspective considering the performance of the Company's business units.

A geographical segment is a distinguishable component of the entity that is engaged in providing products or services within a particular economic environment and is subject to risks and returns that are different than those of segments operating in other economic environments.

The business operations comprise the mining and processing of silver-lead, zinc, and silver-gold and the sale of these products.

r) Leases

A lease is a finance lease when substantially all of the risks and rewards incidental to ownership of the leased asset are transferred from the lessor to the lessee by the agreement. The leased assets are initially recorded at the lower of the fair value and the present value of the minimum lease payments and are depreciated over the shorter of the asset's useful lives and the term of the lease. Interest on the lease instalments is recognized as interest expense over the lease term using the effective interest method. Leases for land and buildings are recorded separately if the lease payments can be allocated accordingly.

Leases that do not transfer all the risks and rewards of ownership are classified as operating leases. Payments are recorded in the income statement using the straight line method over their estimated useful lives.

s) Share Capital

Common shares are classified as equity. Incremental costs directly attributable to the issue of shares are shown in equity as a deduction from the proceeds. Share-based payments including stock option plan, deferred share unit plan, and restricted share unit plan are discussed in Note 2. l).

t) Related Party Transactions

Parties are considered to be related if one party has the ability directly, or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control, related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

u) Significant Accounting Judgments and Estimates

The preparation of these Financial Statements requires management to make judgments and estimates that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these judgments and estimates. The Financial Statements include judgments and estimates which, by their nature, are uncertain. The impacts of such judgments and estimates are pervasive throughout the Financial Statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both current and future periods.

Significant assumptions about the future and other sources of judgments and estimates that management has made at the statement of financial position date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

i. Critical Judgments

- The analysis of the functional currency for each entity of the Company. In concluding that the United States dollar functional currency for its Peruvian and Mexican entities and the Canadian and Barbados entities have a Canadian dollar functional currency, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates. As no single currency was clearly dominant the

Company also considered secondary indicators including the currency in which funds from financing activities are denominated and the currency in which funds are retained.

- In concluding when commercial production has been achieved, the Company considered the following factors:
- all major capital expenditures to bring the mine to the condition necessary for it to be capable of operating in the manner intended by management have been completed;
- the mine or mill is operating as per design capacity and metallurgical recoveries were achieved; and,
- the ability to sustain ongoing production of ore at a steady or increasing level.
- The identification of reportable segments, basis for measurement and disclosure of the segmented information.
- The determination of estimated useful lives and residual values of tangible and long lived assets and the measurement of depreciation expense.
- The identification of impairment indicators, cash generating units and determination of carrying value or fair value less cost to sell and the write down of tangible and long lived assets.
- Measurement of financial instruments involve significant judgments related to interpretation of the terms of the instrument, identification, classification, impairment and the overall measurement to approximate fair values.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

u) Significant Accounting Judgments and Estimates (continued)

ii. Estimates

- the recoverability of amounts receivable which are included in the consolidated statements of financial position;
- the estimation of assay grades of metal concentrates sold in the determination of the carrying value of accounts receivable which are included in the consolidated statements of financial position and included as sales in the consolidated statements of income;
- the determination of net realizable value of inventories on the consolidated statements of financial position;
- the estimated useful lives of property, plant and equipment which are included in the consolidated statements of financial position and the related depreciation included in the consolidated statements of income;
- the determination of mineral reserves and the portion of mineral resources expected to be extracted economically, carrying amount of mineral properties, and depletion of mineral properties included in the consolidated statements of financial position and the related depletion included in the consolidated statements of income;
- the review of tangible and intangible assets carrying value, the determination of whether these assets are impaired and the measurement of impairment charges or reversals which are included in the consolidated statements of income;
- the assessment of indications of impairment of each mineral property and related determination of the net realizable value and write-down of those properties where applicable;
- the determination of the fair value of financial instruments and derivatives included in the consolidated statements of financial position;
- the fair value estimation of share-based awards included in the consolidated statements of financial position and the inputs used in accounting for share-based compensation expense in the consolidated statements of income;
- the provision for income taxes which is included in the consolidated statements of income and composition of deferred income tax asset and liabilities included in the consolidated statement of financial position;
- the recognition of deferred income tax assets, amounts recorded for uncertain tax positions, the measurement of income tax expense and indirect taxes included in the consolidated statement of financial position;
- the inputs used in determining the net present value of the liability for provisions related to decommissioning and restoration included in the consolidated statements of financial position; and,
- the inputs used in determining the various commitments and contingencies accrued in the consolidated statements of financial position.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

v) Significant Changes Including Initial Adoption of Accounting Standards

The Company has adopted the following accounting standards along with any consequential amendments, effective January 1, 2014:

IAS 32 Financial Instruments - Presentation in Respect of Offsetting (Amendment); IFRIC 21 - Levies; and, IAS 36 - Impairment of Assets - Amendments for Recoverable Amount Disclosures for Non-Financial Asset.

The Company has adopted the following amendments, effective July 1, 2014:

IFRS 2 Share-based Payment - Definition of vesting condition (Amendment)
The amendment to IFRS 2 provides the definitions of vesting condition and market condition and adds definitions for performance condition and service condition. The amendment is effective for transactions with a grant date on or after July 1, 2014.

IFRS 3 Business Combinations – Contingent consideration (Amendment)
The amendment to IFRS 3 requires contingent consideration that is classified as an asset or a liability to be measured at fair value at each reporting date. The amendment is effective for transactions with acquisition dates on or after July 1, 2014.

The Company has adopted the above amendments which did not have a significant impact on the Company's Financial Statements.

w) New Accounting Standards

The Company is currently assessing the impact of adopting the following new accounting standards, noted below, on the Company's Financial Statements.

IFRS 10, Consolidated Financial Statements, and IAS 28, Investments in Associates and Joint Ventures (2011) (Amendment)
On September 11, 2014, the IASB issued narrow-scope amendments to IFRS 10, *Consolidated Financial Statements*, and IAS 28, *Investments in Associates and Joint Ventures* (2011). The amendments address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. The amendments will be effective from annual periods commencing on or after January 1, 2016.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

w) New Accounting Standards (continued)

IFRS 11 Joint Arrangements (Amendment)
The amendment to IFRS 11 *Joint Arrangements* adds new guidance on how to account for the acquisition of an interest in a joint operation that constitutes a business. The amendments specify the appropriate accounting treatment for such acquisitions. The amendments are effective for annual periods beginning on or after January 1, 2016, with earlier application permitted. Transactions before the adoption date are grandfathered.

IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets (Amendment)
The amendment to IAS 16 *Property, plant and equipment* and IAS 38 *Intangible assets* on depreciation and amortisation clarifies that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The amendment also clarified that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. The

amendment is effective for annual period starting on or after January 1, 2016, with earlier application permitted.

IFRS 15 Revenue from Contracts with Customers

IFRS 15, *Revenue from Contracts with Customers* specifies how and when revenue should be recognized as well as requiring more informative and relevant disclosures. The standard supersedes IAS 18 Revenue, IAS 11 Construction Contracts and a number of revenue-related interpretations. Application of the standard is mandatory and it applies to nearly all contracts with customers: the main exceptions are leases, financial instruments and insurance contracts. IFRS 15 is effective for annual periods starting on or after January 1, 2017, with earlier application permitted.

IFRS 9 Financial Instruments - Classification and Measurement

IFRS 9*, Financial Instruments:* IFRS 9 introduces the new requirements for the classification, measurement and de-recognition of financial assets and financial liabilities. The amendments are effective for annual periods beginning on or after January 1, 2018, with earlier application permitted.

IFRS 9 Financial Instruments (Hedge Accounting and amendments to IFRS 9, IFRS 7 and IAS 39) (Amendment)

The amendment to IFRS 9 *Financial Instruments* which includes the new hedge accounting requirements and some related amendments to IAS 39 *Financial Instruments; Recognition and Measurement* and IFRS 7 *Financial Instruments; Disclosures.* IFRS 9 (2013) also replicates the amendments in IAS 39 in respect of novations. The amendments allow for early adoption of the requirement to present fair value changes due to own credit on liabilities designated as at fair value through profit or loss to be presented in other comprehensive income. The amendments are effective for annual periods beginning on or after January 1, 2018, with earlier application permitted.

2. Basis of Consolidation and Summary of Significant Accounting Policies (continued)

w) New Accounting Standards (continued)

IFRS 9 Financial Instruments - Expected Credit Losses

On 24 July 2014, the International Accounting Standards Board (IASB) issued the final version of IFRS 9*Financial Instruments*, bringing together the classification and measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39 *Financial Instruments: Recognition and Measurement* and all previous versions of IFRS 9. The amendments are effective for annual periods beginning on or after January 1, 2018. Entities will also have the option to early apply the accounting for own credit risk-related fair value gains and losses arising on financial liabilities designated at fair value through profit or loss without applying the other requirements of IFRS 9.

3. Cash and Cash Equivalents

	December 31, 2014	December 31, 2013
Cash	**$ 15,234**	$ 11,066
Cash equivalents	**27,633**	20,638
	$ 42,867	$ 31,704

4. Short Term Investments

	December 31, 2014	December 31, 2013
Held for trading short term investments	**$ 34,391**	$ 17,411

5. Accounts Receivable and Other Assets and Deposits on Long Term Assets

The current accounts receivables and other assets are comprised of the following:

	December 31, 2014	December 31, 2013
Trade receivables from concentrate sales	**$ 16,573**	$ 9,797
Current portion of long term receivables	**209**	488
Current portion of borrowing costs	**244**	265
Advances and other receivables	**2,906**	3,883

GST/HST and value added tax receivable		**653**		2,607
Accounts receivable and other assets	**$**	**20,585**	$	17,040

5. Accounts Receivable and Other Assets and Deposits on Long Term Assets (continued)

Deposits on long term assets include non-current accounts receivable and other assets are comprised of the following:

		December 31, 2014		December 31, 2013
Long term receivables and borrowing costs	**$**	**542**	**$**	**1,322**
Less: current portion of long term receivables		**(209)**		**(488)**
Less: current portion of long term borrowing costs		**(244)**		**(265)**
Non-current portion of long term receivables		**28**		**237**
Non-current portion of borrowing costs		**61**		**332**
Deposits on equipment		**516**		**700**
Deposits paid to contractors		**1,358**		**411**
Other		**-**		**202**
Deposits on long term assets	**$**	**1,963**	**$**	**1,882**

As at December 31, 2014, the Company had $nil trade receivables (2013: $245) which were over 90 days with no impairment. The Company's allowance for doubtful accounts is $nil for all reporting periods.

As at December 31, 2014, the Company has capitalized $nil (2013: $796) of borrowing costs comprised of legal fees and upfront commitment fee in connection with the amended and restated credit agreement with the Bank of Nova Scotia. The borrowing costs are amortized over a period of 36 months. Refer to Note 16. d).

The aging analysis of these trade receivables from concentrate sales is as follows:

		December 31, 2014		December 31, 2013
0-30 days	**$**	**16,157**	$	9,552
31-60 days		**416**		-
over 90 days		**-**		245
	$	**16,573**	$	9,797

6. Inventories

		December 31, 2014		December 31, 2013
Concentrate stock piles	**$**	**1,575**	$	2,475
Ore stock piles		**4,992**		4,756
Materials and supplies		**8,370**		8,257
Total inventories	**$**	**14,937**	$	15,488

For the years ended December 31, 2014, $76,230 (2013: $64,284), respectively, of inventory was expensed in cost of sales and $121 (2013: $62) of material was written down to its net realizable value and recorded as an impairment of inventories.

7. Mineral Properties, Plant and Equipment

a) Tlacolula Property

Pursuant to an agreement dated September 14, 2009, as amended December 18, 2012 and November 10, 2014, the Company, through its wholly owned subsidiary, Cuzcatlan, holds an option (the "Option") to acquire a 60% interest (the "Interest") in the Tlacolula silver project ("property") located in the State of Oaxaca, Mexico, from Radius Gold Inc.'s wholly owned subsidiary, Radius (Cayman) Inc. ("Radius") (a related party by way of directors in common with the Company described further in Note 9. a)).

The Company can earn the Interest by spending $2,000 on exploration of the property, which includes a commitment to drill 1,500 meters within 12 months after Cuzcatlan has received a permit to drill the property, and by making staged payments totalling $300 cash and providing $250 in common shares of the Company to Radius according to the following schedule:

- Ø $20 cash and $20 cash equivalent in shares upon stock exchange approval;
- Ø $30 cash and $30 cash equivalent in shares by January 15, 2011;

- Ø $50 cash and $50 cash equivalent in shares by January 15, 2012;
- Ø $50 cash and $50 cash equivalent in shares by January 15, 2013;
- Ø $50 cash by January 19, 2015; and,

7. Mineral Properties, Plant and Equipment (continued)

a) Tlacolula Property (continued)

- Ø $100 cash and $100 cash equivalent in shares within 90 days after Cuzcatlan has completed the first 1,500 meters of drilling on the property.

Upon completion of the cash payments and share issuances and incurring the exploration expenditures as set forth above, the Company will be deemed to have exercised the Option and to have acquired a 60% interest in the property, whereupon a joint venture will be formed to further develop the property on the basis of the Company owning 60% and Radius 40%. Radius has the right to terminate the agreement if the option is not exercised by January 31, 2017.

As at December 31, 2014, the Company had issued an aggregate of 34,589 (2013: 34,589) common shares of the Company, with a fair market value of $150 (2013: $150), and paid $150 (2013: $150) cash according to the terms of the option agreement. Subsequent to December 31, 2014, the Company paid $50 under the option agreement. Refer to Note 9. a).

b) San Luisito Concessions

On February 26, 2013, the Company through its wholly owned subsidiary, Cuzcatlan, was granted an option with a third party on concessions in the San Luisito Project, Sonora, Mexico and made a cash payment of $50. During the second quarter of 2013, upon completion of the exploration program and given the current economic environment, the Company abandoned its interest in the option agreement resulting in a write-off of $376. Additional costs of $125 and $69 were written off in Q3 2013 and Q4 2013, respectively for a total write-off of $570.

c) Taviche Oeste Concession

On February 4, 2013, the Company, through its wholly owned subsidiary, Cuzcatlan, acquired, through an option agreement with Plata Pan American S.A. de C.V. ("Plata", a wholly owned subsidiary of Pan American Silver Corp.), a 55% undivided interest in the 6,254-hectare Taviche Oeste Concession ("concession") immediately surrounding the San Jose Mine in Oaxaca, Mexico. The Company made a cash payment of $4.0 million. On June 19, 2013, the Company made the final $6.0 million cash payment to purchase the remaining 45% undivided interest in the concession. This property is included in the San Jose depletable pool.

The concession is subject to a 2.5% net smelter royalty on ore production from this property.

d) Impairment of Mineral Properties, Plant and Equipment

Assets are reviewed and tested for impairment when events or changes in circumstances suggest that the carrying amount exceeds the recoverable amount. The recoverable amount is the higher of fair value less costs to sell and value in use. Assets are grouped at the lowest level for which there are separately identifiable cash flows or cash generating units. The Company's cash generating units ("CGU") have been identified as follows:

7. Mineral Properties, Plant and Equipment (continued)

d) Impairment of Mineral Properties, Plant and Equipment (continued)

i. ***Cuzcatlan CGU*** *includes the assets at San Jose, Taviche, Taviche Oeste, and Tlacolula properties in Mexico.*

ii. ***Bateas CGU*** *includes the assets at the Caylloma property in Peru. Bateas is considered as separate CGU within the Peru geographical area.*

The Company has determined that the Caylloma property represents a cash generating unit within the Peru geographic region.

The recoverable amounts of the Company's cash generating units ("CGUs"), which include mineral properties, plant and equipment are determined on an annual basis, or where facts and circumstances provide impairment indicators. The recoverable amounts are based on each CGUs future after-tax cash flows expected to be derived from the Company's mineral properties and represent each CGUs FVLCTS. The after-tax cash flows are determined based on life-of-mine ("LOM") after-tax cash flow projections which incorporate management's best estimates of future metal prices, production based on current estimates of recoverable reserves and resources, exploration potential, future operating costs and non-expansionary capital expenditures. Projected cash flow are discounted using a weighted average cost of capital. Management's estimate of the FVLCTS of its CGUs is classified as level 3 in the fair value hierarchy.

For December 31, 2014, the Company performed an annual review of the recoverable amounts of its CGU's which resulted in no impairment or reversal of previously recorded impairments.

For the year ended December 31, 2013, the Company performed an annual review of the recoverable amounts of its CGUs and recognized a $20,400, net of tax ($30,000, before tax) impairment charge, on the carrying value of net assets of $78,064, in respect to the Company's investment in Caylloma, which was driven by a reduction in silver prices. The impairment charge was allocated on a pro rata basis against the net book value of the mineral properties, plant and equipment of $79,413.

For December 31, 2014 and 2013, the key assumptions used for fair value less cost to sell calculations were as follows:

	December 31, 2014					
Metal Price Assumptions	**2015**	**2016**	**2017**	**2018**	**2019**	**2020-2021**
Gold price $ per ounce	$ 1,248.00	$ 1,261.00	$ 1,263.00	$ 1,270.00	$ 1,270.00	$ 1,270.00
Silver price $ per ounce	$ 17.98	$ 18.27	$ 19.39	$ 19.60	$ 19.60	$ 19.60
Lead price $ per tonne	$ 2,206.00	$ 2,294.00	$ 2,320.00	$ 2,062.00	$ 2,062.00	$ 2,062.00
Zinc price $ per tonne	$ 2,374.00	$ 2,533.00	$ 2,599.00	$ 2,200.00	$ 2,200.00	$ 2,200.00
Weighted average cost of capital	7.20%	7.20%	7.20%	7.20%	7.20%	7.20%

7. Mineral Properties, Plant and Equipment (continued)

d) Impairment of Mineral Properties, Plant and Equipment (continued)

	December 31, 2013					
Metal Price Assumptions	**2014**	**2015**	**2016**	**2017**	**2018**	**2019-2026**
Gold price $ per ounce	$ 1,361.50	$ 1,362.50	$ 1,392.50	$ 1,336.50	$ 1,336.50	$ 1,336.50
Silver price $ per ounce	$ 21.35	$ 22.66	$ 23.00	$ 22.40	$ 22.40	$ 22.40
Lead price $ per tonne	$ 2,212.49	$ 2,290.89	$ 2,340.63	$ 2,355.65	$ 2,373.00	$ 2,068.21
Zinc price $ per tonne	$ 2,028.25	$ 2,204.62	$ 2,385.50	$ 2,149.00	$ 2,149.00	$ 2,149.00
Weighted average cost of capital	7.42%	7.42%	7.42%	7.42%	7.42%	7.42%

Expected future cash flows to determine the FVLCTS in the impairment testing of non-current assets are inherently uncertain and could materially change over time. The cash flows are significantly affected by a number of factors including estimates of production levels, operating costs, and capital expenditures reflected in the Company's life of mine plans, as well as

economic factors beyond management's control, such as silver and gold prices, discount rates, and observable net asset valuation multiples. Should management's estimate of the future not reflect actual events, further impairments, or reversals of impairments may be identified.

8. Trade and Other Payables

		December 31, 2014		December 31, 2013
Trade accounts payable	**$**	**10,105**	$	9,928
Payroll payable		**8,005**		4,216
Restricted share unit payable		**1,386**		625
Other payables		**1,962**		1,128
	$	**21,458**	$	15,897

9) Related Party Transactions

a) Purchase of Goods and Services

The Company entered into the following related party transactions:

		Years ended December 31,		
Transactions with related parties		**2014**		2013
Salaries and wages [1,2]	**$**	**83**	$	86
Other general and administrative expenses [2]		**108**		130
	$	**191**	$	216

9. Related Party Transactions (continued)

a) Purchase of Goods and Services (continued)

[1] Salaries and wages includes employees' salaries and benefits charged to the Company based on a percentage of the estimated hours worked for the Company

[2] Radius Gold Inc. ("Radius") has directors in common with the Company and shares office space, and is reimbursed for general overhead incurred on behalf of the Company. Gold Group Management Inc. ("Gold Group"), which is owned by a director in common with the Company, provides various administrative, management, and other related services.

In 2013, the Company issued 11,415 common shares of the Company, at a fair market value of $4.38 per share and paid $50 cash to Radius, under the option to acquire a 60% interest in the Tlacolula silver project located in the State of Oaxaca, Mexico.

Subsequent to December 31, 2014, the Company paid $50 under the option agreement to Radius. Refer to Note 7. a).

b) Key Management Compensation

Key management includes all persons named or performing the duties of Vice-President, Chief Financial Officer, President, Chief Executive Officer, and non-executive Directors of the Company. The compensation paid and payable to key management for services is shown below:

		Years ended December 31,		
		2014		2013
Salaries and other short term employee benefits	**$**	**4,828**	$	2,849
Directors fees		**390**		409
Consulting fees		**163**		175
Share-based payments		**6,178**		2,683
	$	**11,559**	$	6,116

Consulting fees includes fees paid to two non-executive directors in both 2014 and 2013.

c) Period End Balances Arising From Purchases of Goods/Services

Amounts due to related parties	**December 31, 2014**	December 31, 2013
Owing to company(ies) with common directors[3]	**$ 9**	$ 20

[3] Owing to Gold Group Management Inc. ("Gold Group)" who has a director in common with the Company.

On October 10, 2012, the Company paid Gold Group Management Inc., which is owned by a director in common with the Company, a retainer of $61 representing three months deposit under a services agreement effective July 1, 2012.

10. Other Liabilities

Other liabilities are comprised of the following:

	December 31, 2014	December 31, 2013
Obligations under finance lease (a)	**$ -**	$ 227
Long term liabilities (b)	**38**	27
Deferred share units (Note 13. c))	**3,762**	2,030
Restricted share units (Note 13. d))	**861**	286
	4,661	2,570
Less: current portion		
Obligations under finance lease (a)	**-**	227
Other liabilities, non-current	**$ 4,661**	$ 2,343

a) Obligations under Finance Lease

The following is a schedule of the Company's future minimum lease payments. These are related to the acquisition of mining equipment, vehicles, and buildings.

Obligations under Finance Lease	**December 31, 2014**	December 31, 2013
Not later than 1 year	**$ -**	231
Less: future finance charges on finance lease	**-**	(4)
Present value of finance lease payments	**$ -**	$ 227

b) Long Term Liabilities

The Company's Mexican operation is required to provide a seniority premium to all employees as required under Mexican labor law. The seniority premium, equal to 12 days of salary for each year of services rendered and is subject to a salary limitation of up to twice the minimum wage, is payable to employees who: (i) voluntarily leave their employment after completing 15 years of service; (ii) leave their employment for just cause; (iii) are dismissed by the Company with or without just cause; or (iv) die during the labor relationship, in such event their beneficiaries must receive such premium. In addition, an employee dismissed without cause has the option to be reinstated to his or her former job instead of receiving the seniority payment, provided the employee does not work in a white-collar position.

10. Other Liabilities (continued)

b) Long Term Liabilities (continued)

A summary of the Company's long term liabilities are presented below:

At December 31, 2014	
Discount rate	**7.5%**
General wage increse	
Regular employees	**5.0%**
Unionized employees	**4.5%**
Increase in minimum wage	**4.0%**
Long term inflation rate	**4.0%**

Total seniority premium – December 31, 2012	$	19
Seniority premium expense		16
Foreign exchange differences		(1)
Cash payments		(7)
Total seniority premium – December 31, 2013	$	27
Less: current portion		-
Non current – December 31, 2013	$	27
Total seniority premium – December 31, 2013	$	**27**
Seniority premium expense		**18**
Foreign exchange differences		**(5)**
Cash payments		**(2)**
Total seniority premium – December 31, 2014	**$**	**38**
Less: current portion		**-**
Non-current – December 31, 2014	**$**	**38**

11. Provisions

A summary of the Company's provisions for decommissioning and restoration liabilities are presented below:

	Decommissioning and Restoration		
	Caylloma Mine	**San Jose Mine**	**Total**
At December 31, 2014			
Anticipated settlement date to	**2028**	**2026**	
Undiscounted value of estimated cash flow	$ **8,113**	$ **6,727**	$ **14,840**
Estimated mine life (years)	**7**	**9**	
Discount rate	**6.19%**	**5.80%**	
Inflation rate	**3.30%**	**4.08%**	
Total provisions – December 31, 2012	**$** 7,059	$ 3,368	$ 10,427
Increase to existing provisions	103	424	527
Accretion of provisions	291	247	538
Foreign exchange differences	(600)	(19)	(619)
Cash payments	(95)	(44)	(139)
Total provisions – December 31, 2013	$ 6,758	$ 3,976	$ 10,734
Less: current portion	(125)	(497)	(622)
Non current – December 31, 2013	$ 6,633	$ 3,479	$ 10,112
Total provisions – December 31, 2013	$ **6,758**	$ **3,976**	$ **10,734**
Increase to existing provisions	**695**	**1,863**	**2,558**
Accretion of provisions	**398**	**345**	**743**
Foreign exchange differences	**(553)**	**(613)**	**(1,166)**
Cash payments	**(111)**	**(60)**	**(171)**
Total provisions – December 31, 2014	$ **7,187**	$ **5,511**	$ **12,698**

Less: current portion	**(256)**	**(553)**	**(809)**
Non current – December 31, 2014	$ **6,931**	$ **4,958**	$ **11,889**

In view of the uncertainties concerning environmental reclamation, the ultimate cost of reclamation activities could differ materially from the estimated amount recorded. The estimate of the Company's decommissioning and restoration liability relating to the Caylloma and San Jose mines are subject to change based on amendments to laws and regulations and as new information regarding the Company's operations becomes available.

Future changes, if any, to the estimated liability as a result of amended requirements, laws, regulations, operating assumptions, estimated timing and amount of obligations may be significant and would be recognized prospectively as a change in accounting estimate. Any such change would result in an increase or decrease to the liability and a corresponding increase or decrease to the mineral properties, plant and equipment balance. Adjustments to the carrying amounts of the related mineral properties, plant and equipment balance can result in a change to the future depletion expense.

12. Income Tax

a) Income tax expense differs from the amount that would be computed by applying the Canadian statutory income tax rate of 26% (2013: 25.75%) to income before income taxes. The reasons for the differences are as follows:

	December 31, 2014	December 31, 2013
Income before tax	**$ 32,879**	$ (9,970)
Statutory income tax rate	**26.00%**	25.75%
Expected income tax	**$ 8,549**	$ (2,567)
Items non-deductible for income tax purposes	**1,665**	1,458
Difference between Canadian and foreign tax rates	**2,046**	407
Effect of change in tax rates	**(41)**	306
Impact of foreign exchange on tax assets and liabilities	**790**	1,244
Special Mining Royalty	**1,715**	7,677
Other items	**128**	(766)
Unused tax losses and tax offsets not recognized in tax asset	**2,425**	1,371
Total income taxes	**$ 17,277**	$ 9,130
Represented by:		
Current income tax	**$ 13,510**	$ 4,926
Deferred income tax	**3,767**	4,204
	$ 17,277	$ 9,130

The Canadian Federal corporate tax rate remained unchanged at 15% throughout 2013, and the British Columbia provincial tax rate increased from 10% to 11% effective April 1, 2013. For 2014, the overall increase in tax rates has resulted in an increase in the Company's statutory tax rate from 25.75% to 26%.

In the fourth quarter 2014, a tax rate change was enacted in Peru, reducing corporate income tax rates. The Company has a legal stability agreement with the Peruvian government and it is valid until 2017. The reduction in tax rate would impact the temporary difference that will reverse subsequent to 2017. This resulted in a deferred tax recovery of $34 due to recording the deferred tax liability in Peru at the lower rates. The Company will be subject to a Peruvian income tax rate of 27% in 2018 and 26% thereafter.

In December 2013, the Mexican President signed a bill approving significant tax reforms which have an effective date of January 1, 2014. These tax reforms include a tax-deductible special mining royalty of 7.5% on EBITDA and an extraordinary mining royalty of 0.5% on precious metals revenue. In addition, the Mexican corporate tax rate is to remain at 30%, while previously expected to decrease to 28% in 2015.

12. Income Tax (continued)

a) (continued)

The special mining royalty is an annual tax with the first payment due in March 2015 for 2014 activities. The Company recognized an initial deferred tax liability of $7,677 in 2013 related to the special mining royalty of 7.5%. The balance for 2014 is $5,870 resulting in a deferred tax recovery of $1,807 which offsets the current tax special mining royalty expense of $3,522 in 2014. The deferred tax liability will be drawn down to $nil as a reduction to tax expense over the life of mine as the mine and its related assets are depleted or depreciated.

Income taxes payable of $9,745 (December 31, 2013: $50) of which $6,223 relates to current taxes (December 31, 2013: $50) and $3,522 (December 31, 2013: $nil) relates to special mining royalty.

b) The tax effected items that give rise to significant portions of the deferred income tax assets and deferred income tax liabilities at December 31, 2014 and 2013 are presented below:

		December 31, 2014		December 31, 2013
Deferred income tax assets:				
Non-capital losses	**$**	**-**	$	6,148
Provisions and other		**3,889**		3,301
Equipment		**-**		-
Other		**2,515**		898
Net deferred income tax assets	**$**	**6,404**	$	10,347
Deferred income tax liabilities:				
Mineral properties – Peru	**$**	**(11,280)**	$	(10,393)
Mineral properties – Mexico		**(10,302)**		(8,241)
Special Mining Royalty		**(5,870)**		(7,677)

FORTUNA SILVER MINES INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2014 AND 2013
(All amounts in US$'000's unless otherwise stated)

12. Income Tax (continued)

a) The Company recognizes tax benefits on losses or other deductible amounts generated in countries where the probable criteria for the recognition of deferred tax assets has been met. The Company's unrecognized deductible temporary differences and unused tax losses for which no deferred tax asset is recognized consist of the following amounts:

		December 31, 2014		December 31, 2013
Non-capital losses	**$**	**46,166**	$	44,961
Provisions and other		**6,009**		2,941
Share issue cost		**639**		1,119

Mineral properties, plant and equipment		**1,704**		1,593
Capital losses		**1,004**		-
Unrecognized deductible temporary differences	**$**	**55,522**	$	50,614

The Company's unrecognized taxable temporary difference consists of the following amounts:

		December 31, 2014		December 31, 2013
Investment in subsidiaries	**$**	**22,775**	$	13,599
Unrecognized taxable temporary difference	**$**	**22,775**	$	13,599

The Company's tax losses have the following expiry dates:

			Expiry date
Non-capital losses, expiring as follows:			
Canada	$	45,634	2025 – 2034
Mexico		419	2021 – 2026
Barbados		113	2022 – 2023
	$	**46,166**	

13. Share Capital

a) Unlimited Common Shares Without Par Value

During the year ended December 31, 2014, the Company issued nil (2013: 11,415) common shares of the Company, at a fair market value of $nil (2013: $4.38) per share and paid $nil (2013: $50) cash to Radius, under the option to acquire a 60% interest in the Tlacolula silver project located in the State of Oaxaca, Mexico. (Refer to Note 7. a)).

13. Share Capital (continued)

a) Share Options

Shareholder approval of the Company's Stock Option Plan (the "Plan"), dated April 11, 2011, was obtained at the Company's annual general meeting held on May 26, 2011. The Plan provides that the number of common shares of the Company issuable under the Plan, together with all of the Company's other previously established or proposed share compensation arrangements, may not exceed 12,200,000 shares, which equals 9.92% of the current total number of issued and outstanding common shares of the Company, as at April 11, 2011. As at December 31, 2014, the number of common shares available for issuance under the Plan is 3,719,067.

Option pricing models require the input of highly subjective assumptions including the estimate of the share price volatility, risk-free interest rate and expected life of the options. Changes in the subjective input assumptions can materially affect the fair value estimate. The following is a summary of share option transactions:

	December 31, 2014		December 31, 2013	
	Shares (in 000's)	**Weighted average exercise price (CAD$)**	Shares (in 000's)	Weighted average exercise price (CAD$)
Outstanding at beginning of the year	**6,437**	**$ 3.42**	6,117	$ 3.42
Granted	**828**	**4.30**	1,153	3.38
Exercised	**(2,564)**	**3.68**	(694)	1.01
Forfeited	**(70)**	**5.26**	(84)	4.69
Expired	**(1,687)**	**4.55**	(55)	2.27
Outstanding at end of the year	**2,944**	**$ 3.25**	6,437	$ 3.42
Vested and exercisable at end of the year	**1,776**	**$ 2.80**	3,949	$ 3.55

During the year ended December 31, 2014, 828,242 share purchase options with a term of three years were granted with an exercise price of CAD$4.30, vesting 50% after one year and 100% after two years from the grant date.

During the year ended December 31, 2014, 2,563,776 share purchase options with exercise prices ranging from CAD$1.55 to CAD$4.46 per share were exercised, 70,255 share purchase options with exercise prices ranging from CAD$4.03 to CAD$6.67 per share were forfeited, 1,686,654 share purchase options with an exercise prices ranging from CAD$4.46 to CAD$6.67 per share expired, and 865,895 share purchase options were accelerated to expire as follows:

13. Share Capital (continued)

b) Share Options (continued)

Shares	Exercise price (CAD$)	Original Expiry Date	Accelerated Expiry Date
170,000$	4.03	May 29, 2015	July 13, 2014
79,038	3.38	May 29, 2016	July 13, 2014
60,307	4.30	March 23, 2017	July 13, 2014
37,500	4.03	May 29, 2015	July 27, 2014
65,510	6.67	February 20, 2017	August 29, 2014
71,134	3.38	May 29, 2016	January 20, 2015
108,553	4.30	March 23, 2017	January 20, 2015
253,853	3.79	July 31, 2017	January 20, 2015
20,000	4.03	May 29, 2015	February 8, 2015
865,895	**Total**		

During the year ended December 31, 2014, the Company recorded a share-based payment charge of $2,108 (2013: $2,734) in respect to options granted and vested.

The assumptions used to estimate the fair value of the share purchase options granted during the year ended December 31, 2014 and 2013 were:

	Years ended December 31,	
	2014	2013
Risk-free interest rate	**1.19%**	1.18%
Expected stock price volatility	**59.29%**	57.81%
Expected term in years	**3**	3
Expected dividend yield	**0%**	0%
Expected forfeiture rate	**4.15%**	4.15%

The expected volatility assumption is based on the historical volatility of the Company's Canadian dollar common share price on the Toronto Stock Exchange. The weighted average fair value per share purchase option was CAD$4.30 (2013: CAD$3.68).

FORTUNA SILVER MINES INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2014 AND 2013
(All amounts in US$'000's unless otherwise stated)

13. Share Capital (continued)

b) Share Options (continued)

The following table summarizes information related to stock options outstanding and exercisable at December 31, 2014:

Exercise price in CAD$	Number of outstanding share purchase options (in 000's)	Weighted average remaining contractual life of outstanding share purchase options (years)	Weighted average exercise price on outstanding share purchase options CAD$	Exercisable share purchase options (in 000's)	Weighted average exercise price on exercisable share purchase options CAD$
$0.85 to $0.99	270	3.8	$ 0.85	270	$ 0.85
$1.00 to $1.99	274	1.3	1.44	274	1.44
$2.00 to $2.99	250	2.0	2.22	250	2.22
$3.00 to $3.99	889	1.4	3.38	397	3.38
$4.00 to $4.99	1,212	1.4	4.18	552	4.03
$6.00 to $6.67	49	2.1	6.67	33	6.67
$0.85 to $6.67	2,944	1.7	$ 3.25	1,776	$ 2.80

The weighted average remaining life of vested share purchase options at December 31, 2014 was 1.5 years (December 31, 2013: 1.6 years).

Subsequent to December 31, 2014, 308,100 share purchase options with an exercise price of CAD$4.03 were exercised resulting in issued and outstanding shares of 128,845,842.

c) Deferred Share Units ("DSU") Cost

During 2010, the Company implemented a DSU plan which allows for up to 1% of the number of shares outstanding from time to time to be granted to eligible directors. All grants under the plan are fully vested upon credit to an eligible directors' account.

During the year ended December 31, 2014, the Company granted 244,188 (2013: 230,479) DSU with a market value of CAD$1,050 (2013: CAD$782), at the date of grants, to non-executive directors.

During the year ended December 31, 2014, the Company paid $514 (2013: $nil) on 127,063 (2013: nil) DSU to a former director of the Company.

As at December 31, 2014, there are 828,529 (2013: 711,944) DSU outstanding with a fair value of $3,762 (2013: $2,030). Refer to Note 10.

13. Share Capital (continued)

d) Restricted Share Units ("RSU") Cost

During 2010, the Company implemented a RSU plan for certain employees or officers. The RSU entitle employees or officers to a cash payment after the end of a performance period of up to three years following the date of the award. The RSU payment will be an amount equal to the fair market value of the Company's common share on the five trading days immediately prior to the end of the performance period multiplied by the number of RSU held by the employee.

During the year ended December 31, 2014, the Company granted 424,425 (2013: 582,846) RSU with a market value of CAD$1,825 (2013: CAD$1,970), at the date of grant, to an executive director and officer (103,721), officers (204,192), and employees (116,512), payable 20% after one year, 30% after two years, and the remaining 50% after three years from the date of grant.

During the year ended December 31, 2014, the Company cancelled 52,528 (2013: 39,201) RSUs, and paid $1,036 (2013: $nil) on 248,591 (2013: nil) RSUs to an executive director and officer, officers, employees, former officers, and a former employee.

As at December 31, 2014, there were 822,625 (2013: 699,319) RSU outstanding with a fair value of $2,247 (2013: $911). Refer to Note 8 and Note 10.

e) Earnings (Loss) per Share

i. Basic

Basic earnings per share is calculated by dividing the net income for the period by the weighted average number of shares outstanding during the period.

The following table sets forth the computation of basic earnings per share:

		Years ended December 31,	
		2014	2013
Income (loss) available to equity owners	**$**	**15,602**	$ (19,100)
Weighted average number of shares (in '000's)		**126,787**	125,553
Earnings (loss) per share - basic	**$**	**0.12**	$ (0.15)

13. Share Capital (continued)

ii. Diluted

Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all potentially dilutive shares. The following table sets forth the computation of diluted earnings per share:

		Years ended December 31,	
		2014	2013
Income (loss) available to equity owners	**$**	**15,602**	$ (19,100)
Weighted average number of shares ('000's)		**126,787**	125,553
Incremental shares from share options		**1,356**	995
Weighted average diluted shares outstanding ('000's)		**128,143**	126,548
Earnings (loss) per share - diluted	**$**	**0.12**	$ (0.15)

For the year ended December 31, 2014, excluded from the calculation were 49,084 (2013: 4,180,104) anti-dilutive options with exercise price of CAD$6.67 (2013: ranging from CAD$3.79 to CAD$6.67).

14. Supplemental Cash Flow Information

		Years ended December 31,	
	Note	**2014**	2013
Non-cash Investing and Financing Activities:			
Issuance of shares on purchase of mineral properties, plant and equipment	**7 a)**	**$ -**	$ 50

15. Capital Disclosure

The Company's objectives when managing capital are to provide shareholder returns through maximization of the profitable growth of the business and to maintain a degree of financial flexibility relevant to the underlying operating and metal price risks while safeguarding the Company's ability to continue as a going concern.

The capital of the Company consists of equity and available credit facility, net of cash. The Board of Directors has not established a quantitative return on capital criteria for management. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets.

The management of the Company believes that the capital resources of the Company as at December 31, 2014, are sufficient for its present needs for at least the next 12 months. The Company is not subject to externally imposed capital requirements.

The Company's overall strategy with respect to capital risk management remained unchanged during the year.

16. Management of Financial Risk

The Company is exposed to certain financial risks, including currency risk, credit risk, liquidity risk, interest risk, and price risk. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework and reviews the Company's policies on an ongoing basis.

a) Fair Value Measurements of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (interest rate, yield curves), or inputs that are derived principally from or corroborated observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

During the year ended December 31, 2014, there have been no transfers of amounts between Level 1, Level 2, and Level 3 of the fair value hierarchy.

i. Assets and Liabilities Measured At Fair Value on a Recurring Basis

Fair Value Measurements

At December 31, 2014	Quoted Prices in Active Markets for Identical Assets Level 1	Significant and Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3	Aggregate Fair Value
Cash and cash equivalents	$ 42,867	$ -	$ -	$ 42,867
Short term investments	34,391	-	-	34,391
Trade receivable from concentrate sales [1]	-	16,573	-	16,573
	$ 77,258	$ 16,573	$ -	$ 93,831

[1] Trade receivable from concentrate sales includes provisional pricing, and final price and assay adjustments. The fair value of trade receivable from concentrate sales resulting from provisional pricing reflect observable market commodity prices and thereby classified within Level 2 of the fair value hierarchy.

[1] The Company's trade receivables arose from provisional concentrate sales and are valued using quoted market prices based on the forward London Metal Exchange ("LME") for zinc and lead, the average London Bullion Market Association A.M. and P.M. fix ("London A.M. fix" and London P.M. fix") for gold and silver, and the London Bullion Market Association P.M. fix ("London P.M. fix") for gold and silver.

16. Fair Value Measurements of Financial Instruments (continued)

a) Fair Value Measurements of Financial Instruments (continued)

i) Assets and Liabilities Measured at Fair Value on a Recurring Basis (continued)

At December 31, 2013	Quoted Prices in Active Markets for Identical Assets Level 1	Significant and Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3	Aggregate Fair Value
Cash and cash equivalents	**$ 31,704**	**$ -**	**$ -**	**$ 31,704**
Short term investments	**17,411**	**-**	**-**	**17,411**
Trade receivable from concentrate sales [1]	**-**	**9,797**	**-**	**9,797**
	$ 49,115	**$ 9,797**	**$ -**	**$ 58,912**

ii. Fair Value of Financial Assets and Liabilities

	December 31, 2014		December 31, 2013	
	Carrying amount	**Estimated fair value**	Carrying amount	Estimated fair value
Financial assets				
Cash and cash equivalents [1]	**$ 42,867**	**$ 42,867**	$ 31,704	$ 31,704
Short term investments [1]	**34,391**	**34,391**	17,411	17,411
Trade receivable from concentrate sales [2]	**16,573**	**16,573**	9,797	9,797
Advances and other receivables	**2,906**	**2,906**	3,883	3,883
	$ 96,737	**$ 96,737**	$ 62,795	$ 62,795
Financial liabilities				
Trade and other payables [1]	**$ 20,072**	**$ 20,072**	$ 15,272	$ 15,272
Due to related parties [1]	**9**	**9**	20	20
Other liabilities [3]	**38**	**38**	254	258
Income tax payable [1]	**9,745**	**9,745**	50	50
	$ 29,864	**$ 29,864**	$ 15,596	$ 15,600

[1] Fair value approximates the carrying amount due to short term nature and historically negible credit losses.

[2] Trade receivable from concentrate sales includes provisional pricing, and final price and assay adjustments. The fair value of trade receivable from concentrate sales resulting from provisional pricing reflect observable market commodity prices and thereby classified within Level 2 of the fair value hierarchy.

[3] Other liabilities are recorded at amortized costs. The fair value of other liabilities are primarily determined using quoted market prices. Balance includes current portion of other liabilities.

16. Management of Financial Risk (continued)

c) Currency Risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates in Canada, Peru and Mexico and a portion of its expenses are incurred in Canadian dollars, nuevo soles, and Mexican pesos. A significant change in the currency exchange rates between the United States dollar relative to the other currencies could have a material effect on the Company's income, financial position, or cash flows. The Company has not hedged its exposure to currency fluctuations.

As at December 31, 2014, the Company is exposed to currency risk through the following assets and liabilities denominated in Canadian dollars, nuevo soles and Mexican pesos (all amounts are expressed in thousands of Canadian dollars, thousands of nuevo soles or thousands of Mexican pesos):

	December 31, 2014			December 31, 2013		
	Canadian Dollars	**Nuevo Soles**	**Mexican Pesos**	Canadian Dollars	Nuevo Soles	Mexican Pesos
Cash and cash equivalents	**$ 2,695**	**S/. 8,633**	**$ 56,739**	$ 2,699	S/. 619	$ 10,994
Short term investments	**7,696**	**-**	**-**	3,286	-	-
Accounts receivable and other assets	**897**	**4,190**	**15,692**	306	7,917	33,818

Deposits on long term assets and long term borrowing costs	**71**	**-**	**19,096**	355	-	-
Trade and other payables	**(2,220)**	**(12,387)**	**(117,848)**	(1,181)	(12,659)	(49,618)
Due to related parties	**(11)**	**-**	**-**	(22)	-	-
Provisions, current	**-**	**(767)**	**(8,138)**	-	(349)	(6,499)
Income tax payable	**-**	**(37)**	**(143,426)**	-	(2,213)	-
Other liabilities	**(5,376)**	**-**	**(563)**	(2,477)	-	(350)
Provisions	**-**	**(20,710)**	**(73,001)**	-	(18,544)	(45,499)
Total	**$ 3,752 S/.**	**(21,078)**	**$ (251,449)**	$ 2,966 S/.	(25,229)	$ (57,154)
Total US$ equivalent	**$ 3,226 $**	**(7,052)**	**$ (17,084)**	$ 2,773 $	(9,023)	$ (4,371)

Based on the above net exposure as at December 31, 2014, and assuming that all other variables remain constant, a 10% depreciation or appreciation of the US dollar against the above currencies would result in an increase or decrease, as follows: impact to other comprehensive income of $358 (2013: $308) and an impact to net income of $2,682 (2013: $1,489).

The sensitivity analyses included in the table above should be used with caution as the results are theoretical, based on management's best assumptions using material and practicable data which may generate results that are not necessarily indicative of future performance. In addition, in deriving this analysis, the Company has made assumptions based on the structure and relationship of variables as at the balance sheet date which may differ due to fluctuations throughout the year with all other variables assumed to remain constant. Actual changes in one variable may contribute to changes in another variable, which may amplify or offset the effect on earnings.

16. Management of Financial Risk (continued)

c) Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's cash and cash equivalents and short term investments are held through large Canadian, international, and foreign national financial institutions. These investments mature at various dates within one year. All of the Company's trade accounts receivables from concentrate sales are held with large international metals trading companies.

The Company's maximum exposure to credit risk as at December 31, 2014 is as follows:

	December 31, 2014	December 31, 2013
Cash and cash equivalents	**$ 42,867**	$ 31,704
Short term investments	**34,391**	17,411
Accounts receivable and other assets	**20,585**	17,040
	$ 97,843	$ 66,155

The carrying amount of financial assets recorded in the financial statements represents the Company's maximum exposure to credit risk. The Company believes it is not exposed to significant credit risk and overall, the Company's credit risk has not declined significantly from the prior year.

d) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk by continuing to monitor forecasted and actual cash flows. The Company has in place a planning and budgeting process to help determine the funds required to support the Company's normal operating requirements on an ongoing basis and its development plans. The Company strives to maintain sufficient liquidity to meet its short term business requirements, taking into account its anticipated cash flows from operations, its holdings of cash, short term investments, and its committed liabilities.

Expected payments due by period as at December 31, 2014				
Less than 1 year	1 - 3 years	4 -5 years	After 5 years	Total

Trade and other payables	$ 21,458	$ -	$ -	$ -	$ 21,458
Due to related parties	9	-	-	-	9
Income tax payable	9,745	-	-	-	9,745
Other liabilities	-	4,661	-	-	4,661
Operating leases	745	1,275	126	-	2,146
Provisions	871	902	1,620	11,447	14,840
	$ 32,828	**$ 6,838**	**$ 1,746**	**$ 11,447**	**$ 52,859**

Operating leases includes leases for office premises, computer and other equipment used in the normal course of business. Refer to Note 23. c).

16. Management of Financial Risk (continued)

d) Liquidity Risk (continued)

On April 23, 2013, the Company entered into an amended and restated credit agreement with the Bank of Nova Scotia for a $40 million senior secured revolving credit facility ("credit facility") to be refinanced or repaid on or within three years or before April 22, 2016. The credit facility is secured by a first ranking lien on Bateas, Cuzcatlan, Continuum, and Barbados, and their assets and bears interest and fees at prevailing market rates. In the event that utilization under the credit facility is less than $10 million, a commitment fee of 1.0% per annum is payable quarterly on the unutilized portion of the available credit facility. No funds were drawn from this credit facility.

Subsequent to December 31, 2014, the Company is pending to enter an amended and restated credit agreement with the Bank of Nova Scotia for a $60 million senior secured financing ("credit facility") consisting of a $40 million term credit facility with a 4 year term and a $20 million revolving credit facility for a two year period. The credit facility is to be secured by a first ranking lien on Bateas, Cuzcatlan, Continuum, and Barbados, and their assets and bears interest and fees at prevailing market rates. In the event that utilization under the credit facility is less than $10 million, a commitment fee of 1.0% per annum is payable quarterly on the unutilized portion of the available credit facility. No funds were drawn from this credit facility.

e) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value is limited because the balances are generally held with major financial institutions in demand deposit accounts.

A 10% change in interest rates would cause a $2 change in income on an annualized basis.

f) Metal Price Risk

The Company is exposed to metals price risk with respect to silver, gold, zinc, and lead sold through its mineral concentrate products. As a matter of policy, the Company does not hedge its silver production.

A 10% change in zinc, lead, silver, and gold prices would cause an $881, $607, $8,294, $2,910, respectively, change in net earnings on an annualized basis.

The Company also enters into provisional concentrate contracts to sell the silver-gold, zinc, lead-silver concentrates produced by the San Jose and Caylloma mines. For the year ended December 31, 2014, the impact of price adjustments was a loss of $539 (2013: loss $4,456).

17. Segmented Information

All of the Company's operations are within the mining sector, conducted through operations in three countries. Due to geographic and political diversity, the Company's mining operations are decentralized whereby management are responsible for achieving specified business results within a framework of global policies and standards. Country corporate offices provide support infrastructure to the mine in addressing local and country issues including financial, human resources, and exploration support.

Products are silver, gold, lead, zinc and copper produced from mines in Peru and Mexico, as operated by Bateas and Cuzcatlan, respectively. Segments have been aggregated where operations in specific regions have similar products, production processes, types of customers and economic environment.

The Company's operating segments are based on the reports reviewed by the senior management group that are used to make strategic decisions. The Chief Executive Officer considers the business from a geographic perspective considering the performance of the Company's business units. The segment information for the reportable segments for the years ended December 31, 2014 and 2013 are as follows:

Reportable Segments	**Corporate**	**Bateas**	**Cuzcatlan**	**Total**

	$ 25,225	$ 19,783

20. Exploration and Evaluation Costs

The exploration and evaluation costs for the years ended December 31, 2014 and 2013 are as follows:

	Years ended December 31,	
	2014	2013
Share-based payments	**$ -**	$ 22
Salaries, wages and benefits	**-**	312
Direct costs	**-**	84
	$ -	$ 418

21. Restructuring and Severance Costs

The restructuring and severance costs for the years ended December 31, 2014 and 2013 are as follows:

	Years ended December 31,	
	2014	2013
Restructuring costs		$ 493
Severance costs	**1,091**	-
	$ 1,091	$ 493

The restructuring and severance costs include the Company's cost-reduction program, and include all salaries and post-employment costs.

22. Net Finance (Expense) Income

The net finance (expense) income for the years ended December 31, 2014 and 2013 are as follows:

	Years ended December 31,	
	2014	2013
Finance income		
Interest income on FVTPL financial assets	**$ 281**	$ 591
Total finance income	**281**	591
Finance expenses		
Interest expense	**5**	21
Standby and commitment fees	**404**	373
Accretion of provisions (Note 11)	**743**	538
Total finance expense	**1,152**	932
Net finance (expense) income	**$ (871)**	$ (341)

23) Contingencies and Capital Commitments

a) Bank Letter of Guarantee

The Caylloma Mine closure plan was approved in November 2009 with total closure costs of $3,587 of which $1,756 is subject to annual collateral in the form of a letter of guarantee, to be awarded each year in increments of $146 over 12 years based on the estimated life of the mine. In March 2013 the closure plan was updated with total closure costs of $7,996 of which $4,167 is subject to annual collateral in the form of a letter of guarantee.

Scotiabank Peru, a third party, has established a bank letter of guarantee on behalf of Bateas in favor of the Peruvian mining regulatory agency in compliance with local regulation and to collateralize Bateas' mine closure plan, in the amount of $1,842 (2013: $1,204). This bank letter of guarantee expires on December 31, 2015.

23. Contingencies and Capital Commitments (continued)

a) Bank Letter of Guarantee (continued)

Scotiabank Peru, a third party, has established a bank letter of guarantee on behalf of Bateas in favor of the Peruvian Energy and Mining Ministry to collateralize Bateas's regulatory compliance with the electric transmission line project, in the amount of $3 (2013: $3). This bank letter of guarantee expires on December 6, 2015.

Scotiabank Peru, a third party, has established a bank letter of guarantee, for office rental, on behalf of Bateas in favor of Centro Empresarial Nuevo Mundo S.A.C., in the amount of $58. This bank letter of guarantee expires on July 18, 2015.

b) Capital Commitments

As at December 31, 2014, there are no capital commitments.

c) Other Commitments

The Company has a contract to guarantee the power supply at its Caylloma Mine. Under the contract, the seller is obligated

to deliver a "maximum committed demand" (for the present term this stands at 3,500 kW) and the Company is obligated to purchase subject to exemptions under provisions of "Force Majeure". The contract is automatically renewed every two years for a period of 10 years and expiring in 2017. Renewal can be avoided without penalties by notification 10 months in advance of the renewal date.

Tariffs are established annually by the energy market regulator in accordance with applicable regulations in Peru. The minimum committed demand is $19 per month and the average monthly charge for 2014 is $202.

Operating leases includes leases for office premises, computer and other equipment used in the normal course of business. Refer to Note 16. d).

The expected payments due by period as at December 31, 2014 are as follows:

23. Contingencies and Capital Commitments (continued)

c) Other Commitments (continued)

	Expected payments due by period as at December 31, 2014			
	Less than 1 year	1 - 3 years	4 -5 years	Total
Office premises – Canada	$ 132	$ 452	$ 126	$ 710

Total operating leases	**$ 745**	**$ 1,275**	**$ 126**	**$ 2,146**

d) Tax Contingencies

The Company has been assessed taxes and related interest and penalties, in Peru by SUNAT, for tax years 2010, 2011, and 2012, in the amounts of $1,161, $740, and $110, respectively, for a total of $2,011. The Company is currently appealing the assessments and believes the appeals with be ruled in favor of the Company. Subsequent to December 31, 2014, the Company has provided as a guarantee by way of letter bond in the amount of $776.

e) Other Contingencies

The Company is subject to various investigations, claims, legal, labor and tax proceedings covering matters that arise in the ordinary course of business activities. Each of these matters is subject to various uncertainties and it is possible that some of these matters may be resolved unfavorably for the Company. Certain conditions may exist as of the date the financial statements are issued that may result in a loss to the Company. In the opinion of management, none of these matters are expected to have a material effect on the results of operations or financial conditions of the Company.

MANAGEMENT'S DISCUSSION AND ANALYSIS

FOR THE

YEAR ENDED DECEMBER 31, 2014

As of March 12, 2015

(Dollar amounts expressed in US dollars, unless otherwise indicated)

FORTUNA SILVER MINES INC.
Management's Discussion and Analysis
For the year ended December 31, 2014
(Dollar amounts expressed in US dollars, unless otherwise indicated)

Management's discussion and analysis ("MD&A") is intended to help the reader understand the significant factors that have affected Fortuna Silver Mines Inc.'s and its subsidiaries' ("Fortuna's" or the "Company's") performance and factors that may affect its future performance. This MD&A was prepared as of March 12, 2015. It should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2014, and the related notes contained therewith. The Company reports its financial position, financial performance and cash flows in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). This MD&A refers to various non-GAAP financial measures, such as cash cost per tonne of processed ore, cash cost per payable ounce of silver, total production cost per tonne, all-in sustaining cash cost, all-in cash cost**,** adjusted net income, operating cash flow per share before changes in working capital, income taxes, and interest income, and mine operating earnings. These measures are used by the Company to manage and evaluate operating performance and ability to generate cash and are widely reported in the silver mining industry as benchmarks for performance. However, the measures do not have a standardized meaning and may differ from methods used by other companies with similar descriptions. The Company believes that certain investors use these non-GAAP financial measures to evaluate the Company's performance. Accordingly, non-GAAP financial measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. To facilitate a better understanding of these measures as calculated by the Company, we have provided detailed descriptions and reconciliations as required.

This document contains forward-looking statements. Please refer to the cautionary language under the heading "Cautionary Statement on Forward-Looking Statements."

Business of the Company

Fortuna Silver Mines Inc. ("Fortuna" or the "Company") is engaged in silver mining and related activities in Latin America, including exploration, extraction, and processing. The Company operates the Caylloma silver, lead, and zinc mine ("Caylloma") in southern Peru and the San Jose silver and gold mine ("San Jose") in southern Mexico.

Fortuna is a publicly traded company incorporated and domiciled in Canada. Its common shares are listed on the New York Stock Exchange under the trading symbol FSM; on the Toronto Stock Exchange and Lima Stock Exchange, both under the trading symbol FVI; and on the Frankfurt Stock Exchange under the trading symbol F4S.F.

The Company's registered office is located at Suite 650, 200 Burrard Street, Vancouver, British Columbia, Canada V6C 3L6.

The financial results include the accounts of the Company and its wholly owned subsidiaries: Minera Bateas S.A.C. ("Bateas"); Fortuna Silver (Barbados) Inc. ("Barbados"); Compania Minera Cuzcatlan SA ("Cuzcatlan"); Continuum Resources Ltd. ("Continuum"); Fortuna Silver Mines Peru S.A.C. ("FSM Peru"); and Fortuna Silver Mexico, S.A. de CV. ("FS Mexico").

2014 Highlights

Full-Year Financial and Operating Highlights

Net income for the year ended December 31, 2014 ("2014") improved to $15.6 million compared with a $19.1 million net loss for the year ended December 31, 2013 ("2013"), resulting in basic earnings per share of $0.12 (2013: loss $0.15).

For the year ended December 31, 2014, the Company's adjusted net income was $15.7 million (2013: $9.4 million) related to the non-cash impairment of inventories of $0.1 million (refer to non-GAAP financial measures).

Silver sold increased 45% to 6,694,552 ounces, while the realized silver price decreased 20% to $18.90 per ounce, from the prior year. Gold sold increased 70% to 35,758 ounces, while the realized gold price decreased 10% to $1,260.44 per ounce, from the prior year. Sales comprised 64% silver and 19% gold, compared with 65% and 14%, respectively, in the prior year.

Cash flow from operations, before changes in working capital, increased 46% to $59.8 million (2013: $40.9 million), reflecting a 27% higher sales and improved margins, from the prior year. Operating cash flow per share, before changes in working capital items, increased to $0.47 (2013: $0.33) (refer to non-GAAP financial measures). Cash and cash equivalent and short term investments increased $28.1 million (57%) to $77.3 million (2013: $49.1 million).

Silver production increased 42% to 6,599,300 ounces (2013: 4,631,264 ounces), and gold production increased 66% to 35,316 ounces (2013: 21,242 ounces).

Consolidated all-in sustaining cash cost per payable ounce of silver, net of by-product credits, was $14.48 and below our annual guidance of $17.14 for 2014 (refer to non-GAAP financial measures).

San Jose's all-in sustaining cash cost per payable ounce of silver, net of by-product credits, was $12.07 and below the annual guidance of $14.43 for 2014 (refer to non-GAAP financial measures).

Caylloma's all-in sustaining cash cost per payable ounce of silver, net of by-product credits, was $14.13 and below our annual guidance of $17.01 for 2014 (refer to non-GAAP financial measures).

Fourth Quarter 2014 Financial Highlights

Fourth quarter 2014 net income amounted to $0.1 million (Q4 2013: loss $14.9 million), resulting in basic earnings per share of $nil

(Q4 2013: loss $0.12). Net income in Q4 2014 was negatively affected by restructuring and severance costs of $1.1 million and higher mark-to-market effects on share-based compensation to $1.4 million compared to Q4 2013. Silver sold increased 16% to 1,611,313 ounces while the realized silver price decreased 21% to $16.33 per ounce from the same period in the prior year.

2015 Guidance and Outlook

2015 Production and Cash Cost Guidance

For 2015, the production and cash cost guidance is noted in the below table.

Mine	Silver (Moz)	Gold (koz)	Investments ($ M)	Cash Cost ($/t)	AISCC** ($/oz Ag)
San Jose, Mexico	4.3	33.3	56.5	62.71	16.27
Caylloma, Peru	2.2	1.9	14.0	90.29	12.78
Total	**6.5**	**35.3**	**70.6**		

**All-in sustaining cash cost ("AISCC") per ounce of silver is net of by-products gold, lead and zinc
All-in sustaining cash cost calculated using Au = $1,200/oz, Pb = $2,000/t and Zn = $2,200/t.
All-in sustaining cash cost is a non-GAAP financial measure

Total figures may not add due to rounding.

- The 2015 San Jose Mine AISCC of $16.27/oz Ag includes $5.96/oz Ag or $24.5 million attributed as sustaining capital investments related to the filter facility and dry stack tailings deposit
- Consolidated AISCC of $16.61, refer to the table below for details
- Caylloma Mine zinc and lead production forecast of 28.8 million pounds and 19.4 million pounds, respectively

San Jose Mine AISCC

Item	2015 Guidance ($/oz Ag)
Cash cost net of by-product credits	4.44
Government royalty and mining tax	0.66
Workers' participation	0.44
Selling, general and administrative expenses (operations)	0.97
Adjusted operating cash cost	6.50
Sustaining capital expenditures	8.92
Brownfields exploration expenditures	0.84
All-in sustaining cash cost	**16.27**

Caylloma Mine AISCC

Item	2015 Guidance ($/oz Ag)
Cash cost net of by-product credits	6.12
Government royalty and mining tax	0.28
Workers' participation	0.14
Selling, general and administrative expenses (operations)	1.58
Adjusted operating cash cost	8.12
Sustaining capital expenditures	4.34
Brownfields exploration expenditures	0.32
All-in sustaining cash cost	**12.78**

Consolidated AISCC

Item	2015 Guidance ($/oz Ag)
Cash cost net of by-product credits	5.01
Government royalty and mining tax	0.53
Workers' participation	0.34
Selling, general and administrative expenses (operations)	1.17
Adjusted operating cash cost	7.05
Selling, general and administrative expenses (corporate)	1.51
Sustaining capital expenditures	7.38
Brownfields exploration expenditures	0.67
All-in sustaining cash cost	**16.61**

2015 Outlook

San Jose Mine, Mexico

San Jose plans to process 700,000 tonnes of ore averaging 214 g/t Ag and 1.66 g/t Au. Capital investment for 2015 is estimated to be $56.5 million.

Major investments include:

Filter facility and dry stack tailings deposit:	$28.3 million
3,000 tpd mill expansion:	$12.6 million
Mine development:	$ 8.3 million
Exploration:	$ 3.5 million

On December 17, 2014, the company disclosed further details of capital investments related to the processing plant expansion, and filter facility and dry stack tailings deposit (refer to "Fortuna announces expansion of its San Jose Mine from 2,000 to 3,000 tpd" news release).

San Jose Mine expansion highlights include:

- Silver and gold production: Annual production rate ranging from 6.7 - 8.3 million ounces of silver and 52.0 - 56.7 thousand ounces of gold or 9.8 - 11.7 million silver equivalent* ounces
- Capital expenditure: $30 million
- Economics: 36% after-tax Internal Rate of Return ("IRR")**; payback period of 2 years
- All-in sustaining cash cost ("AISCC")**: Expansion will position San Jose´s AISCC in the range of $8 - 9/oz Ag, net of by-product gold

*Silver equivalent production estimated using silver-to-gold ratio of 60:1
**After-tax IRR and AISCC estimated using a flat price of US$16/oz Ag and US$1,200/oz Au

3,000 tpd mill expansion

The capital cost estimate for the plant expansion to 3,000 tpd is $30 million. The budget for 2015 is $12.6 million with the balance to be disbursed in 2016. The capital figures are based on a feasibility level capital estimate prepared by M3 Engineering, the same firm that carried out the EPCM for the on-time and on-budget construction of the processing plant in 2011.

Direct capital costs of major items include:

Crushing:	$2.5 million
Grinding:	$8.1 million
Flotation:	$3.9 million
Concentrate filter:	$1.7 million
Power supply:	$1.0 million

Project activities are scheduled to commence in the first quarter of 2015 with commissioning planned for mid-2016. The expansion project is permitted.

The mine is well ahead of production with a 2.8 year projection of developed reserves by the end of 2015; sufficient to comfortably source 3,000 tpd. No major infrastructure projects are required at the mine.

Dry stack tailings deposit and plant facility

The San Jose Mine will be shifting from conventional slurry tailings disposal to dry stack tailings deposit. The capital projection is $32 million based on basic engineering estimates prepared by M3 Engineering.

The project was initiated during the fourth quarter of 2014; $1.0 million has been spent to-date with the balance to be expended in 2015. Purchase orders for filters and other major equipment have already been placed.

Direct capital costs of major items include:

Filtration:	$13.7 million
Dry stack tailings deposit earthwork and preparation:	$ 2.3 million
Thickening:	$ 1.3 million
Backfill plant:	$ 1.4 million

Construction of the project started in February 2015. The layout of the project has been adjusted so as to allow commencement of construction in parcels for which it has the necessary permits. Full completion of the project will require regularization of the change in land use of a single outstanding parcel. Completion of the dry stack tailings deposit is projected for the fourth quarter of 2015.

Caylloma Mine, Peru

Caylloma plans to process 464,100 tonnes averaging 175 g/t Ag. Twenty-one per cent of mill feed in the plan is estimated to come from current inferred resource which are planned to be converted to measured and indicated categories during the year. Capital expenditure for 2015 is estimated to be $14.0 million.

Major investments include:

Mine development:	$6.1 million
Plant optimization:	$4.3 million
Exploration:	$0.7 million

Brownfields Exploration

At the San Jose Mine, the exploration budget for 2015 is $3.5 million, which includes 12,000 meters of drilling. The program at the mine's 64,400 hectare concession package is focusing on three main initiatives:

- Continue exploring through underground drilling an additional 300 meters of the northern extent of the Trinidad North zone outside the shell of existing inferred resources, drill testing on approximate 100 meter centers,
- Subject to community agreements, drill test from surface the northern strike projection of the vein system beyond Trinidad North, and,
- Evaluation and target generation work on multiple prospects within the property package: Veta Maria, La Noria, San Jose West, San Dionisio Ocotlan, Los Ocotes and El Portillo.

At the Caylloma Mine, the Company has allocated a modest exploration budget of $0.7 million for 2015. Over the years the Company has built a sufficient resource and reserve base which permits a reduction in exploration drilling for a year without compromising short or medium term production plans. The main exploration initiative for 2015 is the evaluation of our concessions located approximately 25 kilometers to the south of the Caylloma District, where Compañia de Minas Buenaventura is developing the high-grade Tambomayo silver and gold project.

Results of Operations

Consolidated Metal Production

	QUARTERLY RESULTS					
	Three months ended December 31,					
	2014			2013		
Consolidated Metal Production	**Caylloma**	**San Jose**	**Consolidated**	Caylloma	San Jose	Consolidated

All-in sustaining cash cost (US$/oz Ag)*	**14.13**	**12.07**	**14.48**	20.83	15.89	20.45

*** Net of by-product credits from gold lead, and zinc**

The 2014 consolidated production highlights are as follows:

Silver and gold production were 10% and 9% respectively above 2014 production guidance
Silver production of 6,599,300 ounces; 42% increase over 2013
Gold production of 35,316 ounces; 66% increase over 2013
Zinc production of 27,360,530 pounds; 9% increase over 2013
Lead production of 16,152,285 pounds; 9% decrease from 2013

Compared with the prior year, silver and gold production increased 42% and 66%, respectively, explained largely by the commissioning of the San Jose plant expansion to 1,800 tpd in September 2013 and to 2,000 tpd in April 2014.

Consolidated Cash Cost per Payable Ounce of Silver

All-in sustaining cash cost per ounce of payable silver for 2014, net of by-product credits, decreased to $14.48 (2013: $20.45) per ounce as a result of higher payable ounces of silver operations (refer to non-GAAP financial measures). All-in sustaining cash cost per ounce of payable silver for 2014 was below the annual guidance.

San Jose Mine Review

San Jose is an underground silver-gold mine located in southern Mexico in the State of Oaxaca. The table below shows the main variables used by management to measure the operating performance of the mine: throughput, grade, recovery, gold and silver production, and unit costs.

	QUARTERLY RESULTS		YEAR TO DATE RESULTS	
	Three months ended December 31,		Years ended December 31	
	2014	2013	**2014**	2013

All-in sustaining cash cost (US$/oz Ag)*	**9.42**	10.78	**12.07**	15.89

*** Net of by-product credits from gold**

Production for the year ended December 31, 2014 was 4,396,760 ounces of silver and 33,496 ounces of gold, 74% and 76%, respectively, above the prior year's production. The increases are the result of higher throughput of 48% and of higher head grade for silver and gold of 17%. The San Jose Mine and processing plant were expanded to 2,000 tpd in April 2014 (see Fortuna news release of April 14, 2014). Compared to guidance for the year, silver and gold production were 10% and 9% higher, respectively.

Cash cost per tonne of processed ore for the year ended December 31, 2014 was $62.99/t, or 12% below the cost in the prior year due mainly to higher throughput, a 4% devaluation of the peso, and lower mining cost related to support and preparation, and below the annual guidance of $67.10/t. All-in sustaining cash cost per payable ounce of silver, net of by-product credits, was $12.07 for the year ended December 31, 2014 (refer to non-GAAP financial measures), below the annual guidance of $14.43.

Investments in property, plant and equipment and brownfields exploration, on a cash basis, were $29.0 million for the year ended December 31, 2014, and included $4.8 million for mine development, $1.4 million for infill drilling, $6.0 million for brownfields exploration, and $16.8 million for equipment and infrastructure, including $12.3 million for tailings dam expansion and evaporation control.

In light of the significant growth of resources over 2013 (see Fortuna news release dated September, 2014) the Company has made the decision to proceed with mill expansion from 2,000 to 3,000 tonnes per day and the construction of a filter facility and dry stack tailings deposit.

Cash cost per payable ounce of silver and cash cost per tonne of processed ore are non-GAAP financial measures (refer to non-GAAP financial measures for the reconciliation of cash cost to the cost of sales).

On January 21, 2015, the Company announced results for step-out drilling of the Trinidad North zone at the San Jose Mine in Oaxaca. Results are included for twenty-three drill holes completed subsequent to the Mineral Resource and Mineral Reserve estimates reported as of June 30, 2014 (see Fortuna news releases dated August 27, 2014 and September 30, 2014). The new drill results confirm that the Bonanza and Trinidad veins and the structurally and spatially related Trinidad North Stockwork Zone all remain open to the north and to depth along the strike and plunge of the ore shoots. See Fortuna news release dated January 21, 2015.

On March 10, 2015, the Company announced the updated Mineral Reserve and Mineral Resource estimate as of December 31, 2014 for the San Jose Mine located in Oaxaca, Mexico. See Fortuna news release dated March 10, 2015.

The 2015 Brownfields exploration program at San Jose includes 12,000 meters of exploration drilling to further test the potential for extensions of the high-grade silver-gold mineralization identified at Trinidad North (see Fortuna news release dated March 10, 2015, and January 21, 2015 for fourth quarter 2014 drill results).

An Infill drilling program of 9,200 meters for the upgrading of Inferred Resources into Measured or Indicated Resources is budgeted for the San Jose Mine. The cost of the infill drilling program is $1.59 million (see Fortuna news release dated March 10, 2015).

Caylloma Mine Review

Caylloma is an underground silver, lead, and zinc mine located in southern Peru, in the Arequipa Department. Its commercial products are silver-lead and zinc concentrates. The table below shows the main variables used by management to measure the operating performance of the mine.

	QUARTERLY RESULTS		YEAR TO DATE RESULTS

*** Net of by-product credits from gold, lead and zinc**

Silver production for the year ended December 31, 2014 was 5% above production in the prior year due to higher metallurgical recovery and slightly higher head grade. Zinc production increased 9% as a result of higher head grade and higher metallurgical recoveries. Lead production decreased 9% because of reduced head grade. Caylloma met its annual production guidance of 2.0 million ounces of silver.

Cash cost per tonne at Caylloma for the year ended December 31, 2014 was $90.57 per tonne of processed ore, a decrease of 1% from the prior year and 3% above annual guidance. All-in sustaining cash cost per payable ounce of silver, net of by-product credits, at Caylloma for the year ended December 31, 2014 was $14.13, below the annual guidance of $17.01 (refer to non-GAAP financial measures).

Investments in property, plant and equipment and brownfields exploration, on a cash basis, were $9.9 million for the year ended December 31, 2014, and included $5.1 million for mine development, $0.8 million for brownfields exploration, and $4.0 million for equipment and infrastructure, including $0.8 million for tailings dam.

On March 10, 2015, the Company announced the updated Mineral Reserve and Mineral Resource estimate as of December 31, 2014 for the Caylloma Mine located in Arequipa, Peru. See Fortuna news release dated March 10, 2015.

An Infill drilling program of 9,500 meters for the upgrading of Inferred Resources into Measured or Indicated Resources is budgeted for the Caylloma Mine. The cost of the infill drilling program is budgeted at $0.83 million.

Caylloma Mine and San Jose Mine Concentrates

Property Option Agreements

Tlacolula Property

Pursuant to an agreement dated September 14, 2009, as amended December 18, 2012 and November 10, 2014, the Company, through its wholly owned subsidiary Cuzcatlan, holds an option (the "option") to acquire a 60% interest (the "interest") in the Tlacolula silver project (the "property") located in the State of Oaxaca, Mexico, from Radius Gold Inc.'s wholly owned subsidiary, Radius (Cayman) Inc. ("Radius").

The Company can earn the interest by spending $2.0 million, which includes a commitment to drill 1,500 meters within 12 months after Cuzcatlan has received a permit to drill the property, and by making staged payments totaling $0.30 million cash and providing $0.25 million in common shares of the Company to Radius according to the following schedule:

- Ø $0.02 million cash and $0.02 million cash equivalent in shares upon stock exchange approval;
- Ø $0.03 million cash and $0.03 million cash equivalent in shares by January 15, 2011;

- Ø $0.05 million cash and $0.05 million cash equivalent in shares by January 15, 2012;
- Ø $0.05 million cash and $0.05 million cash equivalent in shares by January 15, 2013;
- Ø $0.05 million cash by January 19, 2015; and,
- Ø $0.10 million cash and $0.10 million cash equivalent in shares within 90 days after Cuzcatlan has completed the first 1,500 meters of drilling on the property.

Upon completion of the cash payments and share issuances and incurring the exploration expenditures as set forth above, the Company will be deemed to have exercised the option and to have acquired a 60% interest in the property, whereupon a joint venture will be formed to further develop the property on the basis of the Company owning 60% and Radius 40%. Radius has the right to terminate the agreement if the option is not exercised by January 31, 2017.

As of December 31, 2014, the Company had issued an aggregate of 34,589 common shares, with a fair market value of $0.15 million, and paid $0.15 million cash according to the terms of the option agreement. Subsequent to December 31, 2014, the Company paid $0.05 million under the option agreement.

Annual 2014 Financial Results

	Years Ended December 31,		
Expressed in $000's, except per share data	**2014**	2013	2012
Sales	**174,006**	137,394	161,020
Mine operating earnings	**60,253**	41,775	70,662
Operating income (loss)	**33,750**	(9,629)	45,168
Net income (loss)	**15,602**	(19,100)	31,463
Earnings (loss) per share, basic	**0.12**	(0.15)	0.25
Earnings (loss) per share, diluted	**0.12**	(0.15)	0.25
Total assets	**350,310**	302,215	316,983
Other liabilities	**4,661**	2,343	2,250

For the year ended December 31, 2014, net income was $15.6 million, compared with a loss of $19.1 million for the year ended December 31, 2013 ("2013"). Silver sold increased 45% to 6,694,552 ounces, while the realized silver price decreased 20% to $18.90 per ounce, from the prior year. Gold sold increased 70% to 35,758 ounces, while the realized gold price decreased 10% to $1,260.44 per ounce, from the prior year. Net income was negatively affected by a higher share-based compensation expense of $3.5 million compared to 2013 mostly related to mark-to-market effects, and restructuring and severance costs of $1.1 million.

For the year ended December 31, 2014, the Company's adjusted net income was $15.7 million (2013: $9.4 million) related to the non-cash impairment of inventories of $0.1 million (refer to non-GAAP financial measures).

For the year ended December 31, 2013, the Company's adjusted net income was $9.4 million after adjustments for the non-cash impairment charge related to the Caylloma Mine of $20.4 million, net of tax, a one-time non-cash income tax provision of $7.7 million resulting from the initial recognition of the Mexican mining tax reform, and a non-cash write-off of mineral properties, plant and equipment of $0.4 million, net of tax, related to the San Luisito concessions (refer to non-GAAP financial measures).

Mine operating earnings increased 44% over the prior year, while gross margins (mine operating earnings over sales) increased from 30% to 35% (refer to non-GAAP financial measures). The impact of lower metal prices on gross margins was offset to a large extent by significantly lower unit cash costs (12% lower at San Jose and 1% lower at Caylloma) and higher head grades and metal recovery for silver and gold.

Cash flow from operations, before changes in working capital, increased 46% to $59.8 million (2013: $40.9 million), reflecting 27% higher sales and improved margins, from the prior year.

Basic earnings per share were $0.12 (2013: loss $0.15). Operating cash flow per share, before changes in working capital items, increased to $0.47 (2013: $0.33) (refer to non-GAAP financial measures).

Sales for the year ended December 31, 2014, were $174.0 million (2013: $137.4 million). Silver and gold ounces sold increased 45% and 70%, respectively, while realized silver and gold prices decreased 20% and 10%, respectively. Sales at San Jose increased 66% to $108.0 million (2013: $65.1 million) as a result of higher production and a reduction of inventories, while sales at Caylloma decreased 9% to $66.0 million (2013: $72.3 million) mainly as a result of lower silver prices.

The Company's metal concentrates are provisionally priced at the time of sale based on the prevailing commodity market price. Final prices are set in a period subsequent to the date of sale based on a specified quotational period, either one, two, or three months after delivery. Under current sales contracts, final pricing for all concentrates takes place one month after the month of sale.

Our recorded sales during the year ended December 31, 2014, consisted of provisional sales of $176.0 million (2013: $146.9 million); final price and mark-to-market adjustments of negative $0.5 million (2013: negative $4.5 million); and negative assay adjustments of $1.5 million (2013: negative $5.0 million).

The net realized prices shown below are calculated based on provisional sales pricing and on contained metals in concentrate sold and after accounting for payable metal deductions, treatment, and refining charges before government royalties. To establish the net realized price for silver, treatment charges on our mineral concentrates are allocated to the base metals at Caylloma and to gold at San Jose. The Company has not hedged its exposure to metal price risks.

*** Adjustments consists of mark-to-market and final price adjustments, and final assay adjustments**

**** Based on provisional sales before final price adjustments**

***Net after payable metal deductions, treatment, and refining charges
Treatment charges are allocated to the base metals in Caylloma and to gold in San Jose.

Cost of sales for the year ended December 31, 2014, increased 19% to $113.8 million (2013: $95.6 million), driven by a 58% higher tonnage of concentrate sold. Direct mining costs increased $10.7 million to $85.4 million (2013: $74.7 million). Depletion and depreciation increased $3.6 million to $22.7 million (2013: $19.1 million).

Workers' participation for San Jose increased $3.5 million to $3.6 million (2013: $0.1 million).

(Refer to non-GAAP financial measures for the reconciliation of cash cost to the cost of sales.)

	Expressed in $ millions					
	Years ended December 31,					
	2014			2013		
	Caylloma	**San Jose**	**Total**	Caylloma	San Jose	Total

[1] Direct mining costs includes salaries and other short-term benefits, contractor charges, energy, consumables and production-related costs.

Selling, general and administrative expenses for the year ended December 31, 2014, increased 28%, or $5.4 million, to $25.2 million (2013: $19.8 million). The main driver for the increase was higher share-based payments to $6.7 million compared with the prior year, mostly related to mark-to-market effects, in particular the increase in share price, compared to the prior year.

Also explaining the increase were higher general and administrative expenses of $0.9 million and higher workers' participation of $0.8 million.

General and administrative expenses consist primarily of corporate office and subsidiary expenses, such as salaries and payroll-related costs for executives and management. These expenses include administrative, legal, financial, information technology, and human and organizational development, procurement, and professional service fees. General and administrative expenses for the year ended December 31, 2014, increased 6% to $17.6 million (2013: $16.7 million).

Loss on disposal of mineral properties, plant and equipment for the year ended December 31, 2014, amounted to $0.1 million (2013: $0.1 million) and pertained to the disposal of equipment.

Restructuring and severance costs for the year ended December 31, 2014, amounted to $1.1 million (2013: $0.5 million) and pertained to the Company's cost-reduction program, and include all salaries and post-employment costs.

Write-off of mineral properties, plant and equipment for the year ended December 31, 2014, amounted to $nil (2013: $0.6 million, pertaining to the San Luisito concessions).

Impairment of mineral properties, plant and equipment for the year ended December 31, 2014, amounted to $nil (2013: $30.0 million, related to the impairment of Caylloma Mine as a result of declining silver prices).

Impairment of inventories for the year ended December 31, 2014, amounted to $0.1 million (2013:$0.1 million) and pertained to the write-down of materials in inventory to their net realizable value.

Interest income for the year ended December 31, 2014, amounted to $0.3 million (2013: $0.6 million).

Interest expense for the year ended December 31, 2014, amounted to $1.2 million (2013: $0.9 million).

Income taxes for the year ended December 31, 2014, increased to $17.3 million (2013: $9.1 million) mainly due to the increase in current income taxes in Mexico even after accelerating the depletion of Mexico mining rights along with no further impact of the Mexico special mining royalty on deferred income tax.

In 2013, income taxes included a $9.6 million tax impact related to the impairment charge of Caylloma and to the deferred income provision of $7.7 million resulting from the Mexico special mining royalty, and a reduction of the tax base.

The following table summarizes the details of income taxes by region and component:

During Q4 2014, sales decreased 18%, or $8.6 million, from Q3 2014 as metal prices decreased. The Company's realized prices for silver and gold declined by 15% and 6%, respectively, to $16.33 and $1,192.86 per ounce, respectively. During the fourth quarter of 2014, the Company's operating income was negatively affected by the mark-to-market effects on share-based compensation expense of $1.4 million compared with a recovery of $0.8 million in Q3 2014. In addition, as a result of declining metal prices, the Company restructured its operations and took a restructuring and severance costs of $1.1 million during the fourth quarter of 2014 that negatively affected its operating income in the fourth quarter of 2014.

During Q3 2014, sales increased 5%, or $2.1 million, from Q2 2014 as a result of Caylloma's and San Jose's provisional sales increasing $1.9 million and $3.8 million, respectively, and being offset by negative price and mark-to-market adjustments that increased $1.0 million and $2.1 million, respectively. During Q3 2014, operating income increased 73% to $13.2 million from Q2 2014 as selling, general and administrative expenses decreased $5.1 million, or 60%, to $3.5 million. The decrease in selling, general and administrative expenses is mainly attributed to the positive effect of mark-to-market effects on share-based compensation of $4.1 million over Q2 2014.

During Q2 2014, sales decreased 3%, or $1.2 million, from Q1 2014 as a result of San Jose's provisional sales declining $1.9 million, offset by positive adjustments of $0.7 million. San Jose's provisional sales of silver and gold declined 2% and 5%, respectively, from Q1 2014, along with lower realized silver metal and gold prices of 3% and 1%, respectively.

During Q1 2014, sales increased 25% from Q4 2013 as a result of increases in silver and gold sold, of 17% and 29%, respectively, offset by a lower realized silver metal price of 2%. Mine operating earnings increased 66% from Q4 2013 because of increased sales and the Company's continuing efforts to contain costs. In Q4 2013, a net loss reflected a non-cash impairment charge of $10.2 million, net of tax (Q3 2013: $nil), and a non-cash income tax provision of $7.7 million resulting from Mexico's special mining royalty.

During Q3 2013, mine operating earnings increased from Q2 2013 in part as a result of the Company's implementation of efforts to contain costs. As part of the Company's cost-reduction program, the Company recorded a $0.5 million restructuring and severance costs in Q3 2013 covering 65 positions. In Q2 2013, the Company recorded a non-cash impairment charge, related to the Caylloma Mine, of $15.0 million before tax and a non-cash write-off of mineral properties, plant, and equipment of $0.4 million related to the San Luisito concessions that negatively affected operating income.

Fourth Quarter 2014 Financial Results

Fourth quarter 2014 net income amounted to $0.1 million (Q4 2013: loss $14.9 million), resulting in basic earnings per share of $nil (Q4 2013: loss $0.12). Net income in Q4 2014 was negatively affected by restructuring and severance costs of $1.1 million and higher mark-to-market effects on share-based compensation to $1.4 million compared to Q4 2013. Silver sold increased 16% to 1,611,313 ounces while the realized silver price decreased 21% to $16.33 per ounce from the same period in the prior year.

For the three months ended December 31, 2014, the Company's adjusted net income was $0.2 million (2013: $3.0 million) related to the non-cash impairment of inventories of $0.1 million (refer to non-GAAP financial measures). The decrease in adjusted net income was driven by lower silver price, a $1.1 million restructuring and severance costs and a higher share-based compensation expense.

For the three months ended December 31, 2013, the Company's adjusted net income was $3.0 million after adjustments for the non-cash impairment charge of $10.2 million, net of tax, and after a one-time non-cash income tax provision of $7.7 million resulting from the initial recognition of the Mexican mining tax reform.

Mine operating earnings decreased 4% from Q4 2013, while gross margins (mine operating earnings over sales) decreased from 29% to 26%. The impact of lower metal prices on gross margins was partially offset by lower unit cash costs at San Jose (down 5%), and by higher head grades for silver and gold.

Cash flow from operations, before changes in working capital, decreased 11% to $10.0 million (Q4 2013: $11.2 million) driven by lower metal prices.

Operating cash flow per share, before changes in working capital items, decreased to $0.08 (Q4 2013: $0.09) (refer to non-GAAP financial measures).

Sales for Q4 2014 were $37.8 million (Q4 2013: $36.4 million). Silver and gold ounces sold increased 16% and 29%, respectively, while realized prices for silver and gold decreased 21% and 6%, respectively. Sales at San Jose increased 15% to $23.0 million (Q4 2013: $20.0 million), as a result of higher production. Sales by Caylloma decreased 9% to $14.8 million (Q4 2013: $16.3 million), as a result of lower realized prices for silver.

Sales comprised 61% silver and 20% gold, compared with 66% and 16%, respectively, in the prior year.

The Company's metal concentrates are provisionally priced at the time of sale based on the prevailing commodity market price. Final prices are set in a period subsequent to the date of sale based on a specified quotational period, either one, two, or three months after delivery. Under current sales contracts, final pricing for all concentrates takes place one month after the month of sale. Our recorded sales during the fourth quarter consisted of provisional sales of $38.4 million (Q4 2013: $38.7 million); negative price and mark-to-market adjustments of $0.5 million (Q4 2013: negative $1.0 million); and negative assay adjustments of $0.1 million (Q4 2013: negative $1.3 million).

The net realized prices shown below are calculated based on provisional sales pricing and on contained metals in concentrate sold and after accounting for payable metal deductions, treatment, and refining charges before government royalties. To establish the net realized price for silver, treatment charges on our mineral concentrates are allocated to the base metals at Caylloma and to gold at San Jose. The Company has not hedged its exposure to metal price risks.

Cost of sales for Q4 2014 increased 7% to $27.8 million (Q4 2013: $26.0 million), driven by a 16% higher tonnage of concentrate sold. Direct mining costs increased $1.4 million to $21.5 million (Q4 2013: $20.1 million). Depletion and depreciation increased $0.1 million to $5.4 million (Q4 2013: $5.3 million).

Workers' participation for San Jose increased $0.4 million to $0.5 million (Q4 2013: $0.1 million).

(Refer to non-GAAP financial measures for the reconciliation of cash cost to the cost of sales.)

	Expressed in $ millions					
	Three months ended December 31,					
	2014			**2013**

	$ 13.1	**$ 14.7**	**$ 27.8**	$ 12.9	$ 13.1	$ 26.0

[1] Direct mining costs includes salaries and other short-term benefits, contractor charges, energy, consumables and production-related costs.

Selling, general and administrative expenses for Q4 2014 increased 46%, or $1.6 million, to $5.2 million (Q4 2013: $3.6 million). The main driver for the increase was the rise in share-based payments to $1.4 million, compared with the same period in the prior year, mostly related to mark-to-market effects, in particular the increase in share price.

General and administrative expenses consist primarily of corporate office and subsidiary expenses, such as salaries and payroll-related costs for executives and management. These expenses include administrative, legal, financial, information technology, and human and organizational development, procurement, and professional service fees. General and administrative expenses for Q4 2014 decreased 7% to $3.6 million (Q4 2013: $4.1 million).

	Expressed in $ millions								
	Three months ended December 31,								
	2014				2013				
	Corporate	**Bateas**	**Cuzcatlan**	**Total**	Corporate	Bateas	Cuzcatlan	Total	
General and administrative expenses	**$ 2.1**	**$ 0.9**	**$ 0.6**	**$ 3.6**	$ 2.6	$ 0.7	$ 0.8	$ 4.1	
Foreign exchange	**(0.3)**	**0.2**	**0.2**	**0.1**	(0.6)	-	-	(0.6)	
Share-based payments	**1.4**	**-**	**-**	**1.4**	0.1	-	-	0.1	
Workers' participation	**-**	**-**	**0.1**	**0.1**	-	-	-	-	
	$ 3.2	**$ 1.1**	**$ 0.9**	**$ 5.2**	$ 2.1	$ 0.7	$ 0.8	$ 3.6	

Restructuring and severance costs for Q4 2014 amounted to $1.1 million (Q4 2013: $nil) and pertained to the Company's cost-reduction program, and include all salaries and post-employment costs.

Write-off of mineral properties, plant and equipment for Q4 2014 amounted to $nil (Q4 2013: $0.1 million, pertaining to the San Luisito concessions).

Impairment of mineral properties, plant and equipment for Q4 2014 amounted to $nil (Q4 2013: $15.0 million related to the impairment of Caylloma as a result of declining silver prices recorded in Q4 2013).

Impairment of inventories for Q4 2014 amounted to $0.1 million (Q4 2013: $0.1 million) and related to the write-down of materials in inventory to their net realizable value.

Interest income for Q4 2014 amounted to $0.1 million (Q4 2013: $0.1 million).

Interest expense for Q4 2014 amounted to $0.3 million (Q4 2013: $0.2 million).

Income taxes for Q4 2014 decreased to $3.4 million (Q4 2013: $6.4 million) mainly because of no further impact of the Mexico special mining royalty on deferred income tax along with an increase in current taxes in Mexico even after accelerating the depletion of Mexico mining rights.

In Q4 2013, income taxes included a $4.8 million tax impact related to the impairment charge of Caylloma and to the deferred income provision of $7.7 million resulting from the Mexico special mining royalty.

The following table summarizes the details of income taxes by region and component:

	Expressed in $ millions					
	Three months ended December 31,

	$ 1.0	**$ 2.4**	**$ 3.4**	$ (3.1)	$ 9.5	$ 6.4

Non-GAAP Financial Measures

Cash cost per payable ounce of silver and cash cost per tonne of processed ore (non-GAAP financial measure)

Cash cost per payable ounce of silver and cash cost per tonne of processed ore are key performance measures that management uses to monitor performance. Management believes that certain investors also use these non-GAAP financial measures to evaluate the Company's performance. Cash costs are an industry-standard method of comparing certain costs on a per unit basis; however, they do not have a standardized meaning or method of calculation, even though the descriptions of such measures may be similar. These performance measures have no meaning under International Financial Reporting Standards ("IFRS"), and, therefore, amounts presented may not be comparable with similar data presented by other mining companies.

The following tables present a reconciliation of cash costs per tonne of processed ore and cash costs per payable ounce of silver to the cost of sales in the consolidated financial statements for the three months and the years ended December 31, 2014 and 2013:

Consolidated Mine Cash Cost	**Expressed in $'000's**		Expressed in $'000's

All-in cash cost per payable ounce of silver (non-GAAP financial measure)

The Company believes that "all-in sustaining costs" and "all-in costs" will better meet the needs of analysts, investors, and other stakeholders of the Company in understanding the costs associated with producing silver, the economics of silver mining, the Company's operating performance, and the Company's ability to generate free cash flow from current operations and on an overall company basis.

The Company, in conjunction with an initiative undertaken within the gold mining industry, has adopted an all-in sustaining cost-performance measure; however, this performance measure has no standardized meaning. Effective June 30, 2013, the Company conformed its all-in sustaining definition to that set out in the guidance note released by the World Gold Council ("WGC," a non-regulatory market development organization for the gold industry whose members comprise global senior gold mining companies) on June 27, 2013, and that came into effect January 1, 2014. The comparative periods have been restated accordingly.

All-in sustaining costs and all-in costs are intended to provide additional information only and do not have standardized definitions under the IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with the IFRS. These measures are not necessarily indicative of operating profit or cash flow from operations as determined under the IFRS. Although the WGC has published a standardized definition, companies may calculate these measures differently.

All-in sustaining costs include total production cash costs incurred at the Company's mining operations, which form the basis of the Company's by-product cash costs. Additionally, the Company includes sustaining capital expenditures, corporate selling, general and administrative expenses, and brownfields exploration expenditures. The Company believes that this measure represents the total costs of producing silver from operations and provides the Company and stakeholders of the Company with additional information on the Company's operational performance and ability to generate cash flows. As the measure seeks to reflect the full cost of silver production from operations, new project capital is not included. Certain other cash expenditures, including tax payments, dividends, and financing costs, are also not included. The Company reports this measure on a silver ounce sold basis.

The following tables provide a reconciliation of all-in sustaining costs per ounce to the consolidated financial statements for the three months and the years ended December 31, 2014 and 2013:

Consolidated Mine All-in Cash Cost	**Expressed in $'000's**		Expressed in $'000's

Adjusted net income (non-GAAP financial measure)

The Company uses the financial measures "adjusted net income" to supplement information in its consolidated financial statements. The Company believes that in addition to conventional measures prepared in accordance with IFRS, the Company and certain investors and analysts use this information to evaluate the Company's performance. The term "adjusted net income" does not have a standardized meaning prescribed by IFRS, and therefore the Company's definitions are unlikely to be comparable to similar measures presented by other companies.

Additional Measures (non-GAAP financial measures)

The Company uses other financial measures the presentation of which is not meant to be a substitute for other subtotals or totals presented in accordance with IFRS, but rather should be evaluated in conjunction with such IFRS measures. The following other financial measures are used: operating cash flow per share before changes in working capital, and mine operating earnings. The terms described below do not have standardized meaning prescribed by IFRS, and therefore the Company's definitions are unlikely to be comparable to similar measures presented by other companies. The Company's management believes that their presentation provides useful information to investors.

Liquidity and Capital Resources

Full-Year 2014 Liquidity and Capital Resources

The capital of the Company consists of equity and an available credit facility, net of cash. The Board of Directors has not established a quantitative return on capital criteria for management. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets.

The Company's cash and cash equivalents as at December 31, 2014, totaled $42.9 million (December 31, 2013: $31.7 million), and short term investments totaled $34.4 million (December 31, 2013: $17.4 million).

Working capital for the year ended December 31, 2014 increased $16.0 million, to $82.4 million (December 31, 2013: $66.4 million). This reflects the increases in cash and cash equivalents of $11.2 million, short term investments of $17.0 million, accounts receivable and other assets of $3.5 million, and a decrease in the current portion of other liabilities of $0.3 million. The increase in working capital was offset by a decrease in inventories of $0.6 million, and increases in trade and other payables of $5.6 million, provisions of $0.1 million, and income taxes payable of $9.7 million.

During the year ended December 31, 2014, cash and cash equivalents increased $11.5 million (2013: decreased $26.4 million). The increase was due to net cash provided by operating activities of $60.2 million, net cash used in investing activities of $57.0 million, and net cash provided by financing activities of $8.2 million. Exchange rate changes had a negative impact of $0.3 million on cash and cash equivalents. Compared with 2013, the Company's expenditures on mineral properties, plant and equipment decreased $21.6 million, net purchases of short-term investments increased $5.9 million, cash provided by operating activities increased $15.2 million, and exchange rate changes decreased $0.3 million.

During the year ended December 31, 2014, cash generated by operating activities before changes in non-cash working capital items, income taxes paid, and interest income paid and received was $59.8 million (2013: $40.9 million). Net cash provided by operating

activities amounted to $60.2 million (2013: $45.0 million). This includes income taxes paid and interest income paid and received of $3.1 million (2013: $3.8 million) and changes in non-cash working capital items of $0.4 million (2013: $4.0 million).

Cash used by the Company in investing activities for the year ended December 31, 2014, totaled $57.0 million (2013: $71.7 million) and comprised of the following:

- $18.0 million (2013: $12.1 million) in net purchases of short-term investments,
- $38.9 million (2013: $60.5 million) in expenditures on mineral properties, plant and equipment, and
- $0.1 million in net advances (2013: net receipts $0.9 million) on deposits on long-term assets.

Investing activities included $38.9 million of expenditures on mineral properties, plant and equipment that comprised of the following $20.8 million for plant and equipment, $1.4 million for infill drilling, $9.9 million for mine development, and $6.8 million for brownfields exploration.

During the year ended December 31, 2014, cash provided by financing activities totaled $8.2 million (2013: provided $0.3 million) and comprised the repayment of finance lease obligations of $0.3 million (2013: $0.4 million) and net proceeds on the issuance of common shares of $8.5 million (2013: $0.7 million).

Fourth Quarter 2014 Liquidity and Capital Resources

During the three months ended December 31, 2014, cash and cash equivalents increased $2.4 million (Q4 2013: increased $0.7 million). The increase was due to net cash provided by operating activities of $9.3 million, net cash used in investing activities of $11.7 million, and net cash provided by financing activities of $4.8 million. Exchange rate changes had no impact on cash and cash equivalents. Compared with Q4 2013, the Company's expenditures on mineral properties, plant and equipment decreased $1.7 million, net purchase of short-term investments decreased $4.2 million, cash provided by operating activities decreased $7.5 million, and exchange rate changes decreased by $0.3 million.

During the three months ended December 31, 2014, cash generated by operating activities before changes in non-cash working capital items, income taxes paid, and interest income paid and received was $10.0 million (Q4 2013: $11.2 million). Net cash provided by operating activities amounted to $9.3 million (Q4 2013: $16.8 million). This includes income taxes paid and interest income paid and received of $0.8 million (Q4 2013: $1.3 million) and changes in non-cash working capital items of $0.7 million (Q4 2013: $5.6 million).

Cash used by the Company in investing activities for the three months ended December 31, 2014, totaled $11.7 million (Q4 2013: $16.0 million) and comprised of the following:

- $3.2 million (Q4 2013: $7.4 million) in net purchases of short-term investments,
- $7.5 million (Q4 2013: $9.2 million) in expenditures on mineral properties, plant and equipment, and
- $1.0 million in net advances (Q4 2013: net receipts $0.6 million) on deposits on long-term assets.

Investing activities included $7.5 million of expenditures on mineral properties, plant and equipment that comprised of the following: $3.9 million for plant and equipment, $2.4 million for mine development, and $1.2 million for brownfields exploration.

During the three months ended December 31, 2014, cash provided by financing activities totaled $4.8 million (Q4 2013: $0.1 million) and comprised the repayment of finance lease obligations of $nil (Q4 2013: $0.1 million) and net proceeds on the issuance of common shares of $4.8 million (Q4 2013: $nil).

Contractual Obligations

The Company expects the following maturities of its financial liabilities (including interest), finance leases, and other contractual commitments:

Expressed in $ millions

	Expected payments due by period as at December 31, 2014				
	Less than 1 year	1 - 3 years	4 -5 years	After 5 years	Total
Trade and other payables	$ 21.5	$ -	$ -	$ -	$ 21.5
Income tax payable	9.7	-	-	-	9.7
Long term liabilities	-	4.7	-	-	4.7
Operating leases	0.7	1.3	0.1	-	2.1
Provisions	1.0	0.9	1.6	11.4	14.9
	$ 32.9	**$ 6.9**	**$ 1.7**	**$ 11.4**	**$ 52.9**

Operating leases includes leases for office premises, computer and other equipment used in the normal course of business.

Capital Commitments (expressed in $'000's)

As at December 31, 2014, there are no capital commitments.

Other Commitments (expressed in $'000's)

The Company has a contract to guarantee the power supply at its Caylloma Mine. Under the contract, the seller is obligated to deliver a "maximum committed demand" (for the present term this stands at 3,500 kW) and the Company is obligated to purchase subject to exemptions under provisions of "Force Majeure". The contract is automatically renewed every two years for a period of 10 years and expiring in 2017. Renewal can be avoided without penalties by notification 10 months in advance of the renewal date.

Tariffs are established annually by the energy market regulator in accordance with applicable regulations in Peru. The minimum committed demand is $19 per month and the average monthly charge for 2014 is $202.

Operating leases includes leases for office premises, computer and other equipment used in the normal course of business.

The expected payments due by period as at December 31, 2014 are as follows:

	Expressed in $'000's **Expected payments due by period as at December 31, 2014**			
	Less than 1 year	1 - 3 years	4 -5 years	Total

Total machinery	**$ -**	**$ 79**	**$ -**	**$ 79**
Total operating leases	**$ 745**	**$ 1,275**	**$ 126**	**$ 2,146**

Tax Contingencies (expressed in $'000's)

The Company has been assessed taxes and related interest and penalties, in Peru by SUNAT, for tax years 2010, 2011, and 2012, in the amounts of $1,161, $740, and $110, respectively, for a total of $2,011. The Company is currently appealing the assessments and believes the appeals with be ruled in favor of the Company. Subsequent to December 31, 2014, the Company has provided as a guarantee by way of letter bond in the amount of $776.

Other Contingencies

The Company is subject to various investigations, claims, legal, labor and tax proceedings covering matters that arise in the ordinary course of business activities. Each of these matters is subject to various uncertainties and it is possible that some of these matters may be resolved unfavorably for the Company. Certain conditions may exist as of the date the financial statements are issued that which may result in a loss to the Company. In the opinion of management, none of these matters are expected to have a material effect on the results of operations or financial conditions of the Company.

Guarantees and Indemnifications (expressed in $'000's)

The Company may provide guarantees and indemnifications in conjunction with transactions in the normal course of operations. These are recorded as liabilities when reasonable estimates of the obligations can be made. Indemnifications that the Company has provided include the obligation to indemnify the following:

- Ø directors and officers of the Company and its subsidiaries for potential liability while acting as a director or officer of the Company, together with various expenses associated with defending and settling such suits or actions due to association with the Company; and,
- Ø certain vendors of an acquired company for obligations that may or may not have been known at the date of the transaction.

The dollar value of guarantees and indemnifications cannot be reasonably estimated.

The Caylloma Mine closure plan was approved in November 2009 with total closure costs of $3,587 of which $1,756 is subject to annual collateral in the form of a letter of guarantee, to be awarded each year in increments of $146 over 12 years based on the estimated life of the mine. In March 2013 the closure plan was updated with total closure costs of $7,996 of which $4,167 is subject to annual collateral in the form of a letter of guarantee.

Scotiabank Peru, a third party, has established a bank letter of guarantee on behalf of Bateas in favor of the Peruvian mining regulatory agency in compliance with local regulation and to collateralize Bateas' mine closure plan, in the amount of $1,842 (2013: $1,204). This bank letter of guarantee expires on December 31, 2015.

Scotiabank Peru, a third party, has established a bank letter of guarantee on behalf of Bateas in favor of the Peruvian Energy and

Mining Ministry to collateralize Bateas's regulatory compliance with the electric transmission line project, in the amount of $3 (2013: $3). This bank letter of guarantee expires on December 6, 2015

Scotiabank Peru, a third party, has established a bank letter of guarantee, for office rental, on behalf of Bateas in favor of Centro Empresarial Nuevo Mundo S.A.C., in the amount of $58. This bank letter of guarantee expires on July 18, 2015.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements or commitments that are expected to have a current or future effect on the financial condition, results of operations, liquidity, capital expenditures, or capital resources that are material to investors, other than those disclosed in this MD&A and the consolidated financial statements and the related notes.

Related Party Transactions *(expressed in $'000's)*

a) Purchase of Goods and Services

The Company entered into the following related party transactions:

	Expressed in $'000's			
	Three months ended December 31,		Years ended December 31,	
Transactions with related parties	**2014**	2013	**2014**	2013
Salaries and wages [1,2]	**$ 15**	$ 15	**$ 83**	$ 86
Other general and administrative expenses [2]	**16**	21	**108**	130
	$ 31	$ 36	**$ 191**	$ 216

[1] Salaries and wages includes employees' salaries and benefits charged to the Company based on a percentage of the estimated hours worked for the Company.

[2] Radius Gold Inc. ("Radius") has directors in common with the Company and shares office space, and is reimbursed for general overhead costs incurred on behalf of the Company. Gold Group Management Inc. ("Gold Group"), which is owned by a director in common with the Company, provides various administrative, management, and other related services.

In 2013, the Company issued 11,415 common shares of the Company, at a fair market value of $4.38 per share and paid $50 cash to Radius, under the option to acquire a 60% interest in the Tlacolula silver project located in the State of Oaxaca, Mexico.

Subsequent to December 31, 2014, the Company paid $50 under the option agreement to Radius.

b) Key Management Compensation

Key management includes all persons named or performing the duties of Vice-President, Chief Financial Officer, President, Chief Executive Officer, and non-executive Directors of the Company. The compensation paid or payable to key management for services is shown below:

	Expressed in $'000's			
	Three months ended December 31,		Years ended December 31,	
	2014	2013	**2014**	2013
Salaries and other short term employee benefits	**$ 1,292**	$ 884	**$ 4,828**	$ 2,849
Directors fees	**97**	106	**390**	409
Consulting fees	**40**	43	**163**	175
Share-based payments	**1,437**	(14)	**6,178**	2,683
	$ 2,866	$ 1,019	**$ 11,559**	$ 6,116

Consulting fees includes fees paid to two non-executive directors in both 2014 and 2013.

c) Period End Balances Arising From Purchases of Goods/Services

On October 10, 2012, the Company paid Gold Group Management Inc., which is owned by a director in common with the Company, a retainer of $61 representing three months deposit under a services agreement effective July 1, 2012.

	Expressed in $'000's	
Amounts due to related parties	**December 31, 2014**	December 31, 2013
Owing to company(ies) with common directors [3]	**$ 9**	$ 20

[4] Owing to Gold Group Management Inc. ("Gold Group)" who has a director in common with the Company.

Significant Accounting Judgments and Estimates

The preparation of the unaudited condensed interim consolidated financial statements ("Financial Statements") requires management to make judgments and estimates that affect the reported amounts of assets and liabilities at the date of the Financial Statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these judgments and estimates. The Financial Statements include judgments and estimates which, by their nature, are uncertain. The impacts of such judgments and estimates are pervasive throughout the Financial Statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both current and future periods.

Significant assumptions about the future and other sources of judgments and estimates that management has made at the statement of financial position date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

i. Critical Judgments

- The analysis of the functional currency for each entity of the Company. In concluding that the United States dollar functional currency for its Peruvian and Mexican entities and the Canadian and Barbados entities have a Canadian dollar functional currency, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates. As no single currency was clearly dominant the Company also considered secondary indicators including the currency in which funds from financing activities are denominated and the currency in which funds are retained.
- In concluding when commercial production has been achieved, the Company considered the following factors:
- all major capital expenditures to bring the mine to the condition necessary for it to be capable of operating in the manner intended by management have been completed;
- the mine or mill is operating as per design capacity and metallurgical recoveries were achieved; and,
- the ability to sustain ongoing production of ore at a steady or increasing level.
- The identification of reportable segments, basis for measurement and disclosure of the segmented information.
- The determination of estimated useful lives and residual values of tangible and long lived assets and the measurement of depreciation expense.

- The identification of impairment indicators, cash generating units and determination of carrying value or fair value less cost to sell and the write down of tangible and long lived assets.
- Measurement of financial instruments involve significant judgments related to interpretation of the terms of the instrument, identification, classification, impairment and the overall measurement to approximate fair values.

ii. Estimates

- the recoverability of amounts receivable which are included in the consolidated statements of financial position;
- the estimation of assay grades of metal concentrates sold in the determination of the carrying value of accounts receivable which are included in the consolidated statements of financial position and included as sales in the consolidated statements of income;
- the determination of net realizable value of inventories on the consolidated statements of financial position;
- the estimated useful lives of property, plant and equipment which are included in the consolidated statements of financial position and the related depreciation included in the consolidated statements of income;
- the determination of mineral reserves and the portion of mineral resources expected to be extracted economically, carrying amount of mineral properties, and depletion of mineral properties included in the consolidated statements of financial position and the related depletion included in the consolidated statements of income;
- the review of tangible and intangible assets carrying value, the determination of whether these assets are impaired and the measurement of impairment charges or reversals which are included in the consolidated statements of income;
- the assessment of indications of impairment of each mineral property and related determination of the net realizable value and write-down of those properties where applicable;
- the determination of the fair value of financial instruments and derivatives included in the consolidated statements of financial position;
- the fair value estimation of share-based awards included in the consolidated statements of financial position and the inputs used in accounting for share-based compensation expense in the consolidated statements of income;
- the provision for income taxes which is included in the consolidated statements of income and composition of deferred income tax asset and liabilities included in the consolidated statement of financial position;
- the recognition of deferred income tax assets, amounts recorded for uncertain tax positions, the measurement of income tax expense and indirect taxes included in the consolidated statement of financial position;
- the inputs used in determining the net present value of the liability for provisions related to decommissioning and restoration included in the consolidated statements of financial position; and,
- the inputs used in determining the various commitments and contingencies accrued in the consolidated statements of financial position.

Financial Instruments and Related Risks *(expressed in $'000's)*

The Company is exposed to certain financial risks, including currency risk, credit risk, liquidity risk, interest risk, and price risk. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework and reviews the Company's policies on an ongoing basis.

a) Fair Value Measurements of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (interest rate, yield curves), or inputs that are derived principally from or corroborated observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

During the year ended December 31, 2014, there have been no transfers of amounts between Level 1, Level 2, and Level 3 of the fair value hierarchy.

i. Assets and Liabilities Measured At Fair Value on a Recurring Basis

Fair Value Measurements

	Expressed in $'000's			
	Quoted Prices in Active Markets for Identical Assets	**Significant and Other Observable Inputs**	**Significant Unobservable Inputs**	**Aggregate Fair**
At December 31, 2014	**Level 1**	**Level 2**	**Level 3**	**Value**
Cash and cash equivalents	**$ 42,867**	**$ -**	**$ -**	**$ 42,867**
Short term investments	**34,391**	**-**	**-**	**34,391**
Trade receivable from concentrate sales [1]	**-**	**16,573**	**-**	**16,573**
	$ 77,258	**$ 16,573**	**$ -**	**$ 93,831**

[1] Trade receivable from concentrate sales includes provisional pricing, and final price and assay adjustments. The fair value of trade receivable from concentrate sales resulting from provisional pricing reflect observable market commodity prices and thereby classified within Level 2 of the fair value hierarchy.

	Quoted Prices in Active Markets for Identical Assets	**Significant and Other Observable Inputs**	**Significant Unobservable Inputs**	**Aggregate Fair**
At December 31, 2013	**Level 1**	**Level 2**	**Level 3**	**Value**
Cash and cash equivalents	**$ 31,704**	**$ -**	**$ -**	**$ 31,704**
Short term investments	**17,411**	**-**	**-**	**17,411**
Trade receivable from concentrate sales [1]	**-**	**9,797**	**-**	**9,797**
	$ 49,115	**$ 9,797**	**$ -**	**$ 58,912**

ii. Fair Value of Financial Assets and Liabilities

	Expressed in $'000's			
	December 31, 2014		December 31, 2013	
	Carrying amount	**Estimated fair value**	Carrying amount	Estimated fair value
Financial assets				
Cash and cash equivalents [1]	**$ 42,867**	**$ 42,867**	$ 31,704	$ 31,704
Short term investments [1]	**34,391**	**34,391**	17,411	17,411
Trade receivable from concentrate sales [2]	**16,573**	**16,573**	9,797	9,797
Advances and other receivables	**2,906**	**2,906**	3,883	3,883
	$ 96,737	**$ 96,737**	$ 62,795	$ 62,795
Financial liabilities				
Trade and other payables [1]	**$ 20,072**	**$ 20,072**	$ 15,272	$ 15,272
Due to related parties [1]	**9**	**9**	20	20
Other liabilities [3]	**38**	**38**	254	258
Income tax payable [1]	**9,745**	**9,745**	50	50
	$ 29,864	**$ 29,864**	$ 15,596	$ 15,600

[1] Fair value approximates the carrying amount due to short term nature and historically negible credit losses.

[2] Trade receivable from concentrate sales includes provisional pricing, and final price and assay adjustments. The fair value of trade receivable from concentrate sales resulting from provisional pricing reflect observable market commodity prices and thereby classified within Level 2 of the fair value hierarchy.

[3] Other liabilities are recorded at amortized costs. The fair value of other liabilities are primarily determined using quoted market prices. Balance includes current portion of other liabilities.

b) Currency Risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates in Canada, Peru and Mexico and a portion of its expenses are incurred in Canadian dollars, nuevo soles, and Mexican pesos. A significant change in the currency exchange rates between the United States dollar relative to the other currencies could have a material effect on the Company's income, financial position, or cash flows. The Company has not hedged its exposure to currency fluctuations.

As at December 31, 2014, the Company is exposed to currency risk through the following assets and liabilities denominated in Canadian dollars, nuevo soles and Mexican pesos (all amounts are expressed in thousands of Canadian dollars, thousands of nuevo soles or thousands of Mexican pesos):

	Expressed in '000's					
	December 31, 2014			December 31, 2013		
	Canadian Dollars	**Nuevo Soles**	**Mexican Pesos**	Canadian Dollars	Nuevo Soles	Mexican Pesos
Cash and cash equivalents	**$ 2,695**	**S/. 8,633**	**$ 56,739**	$ 2,699	S/. 619	$ 10,994
Short term investments	**7,696**	**-**	**-**	3,286	-	-
Accounts receivable and other assets	**897**	**4,190**	**15,692**	306	7,917	33,818
Deposits on long term assets and long term borrowing costs	**71**	**-**	**19,096**	355	-	-
Trade and other payables	**(2,220)**	**(12,387)**	**(117,848)**	(1,181)	(12,659)	(49,618)
Due to related parties	**(11)**	**-**	**-**	(22)	-	-
Provisions, current	**-**	**(767)**	**(8,138)**	-	(349)	(6,499)
Income tax payable	**-**	**(37)**	**(143,426)**	-	(2,213)	-
Other liabilities	**(5,376)**	**-**	**(563)**	(2,477)	-	(350)
Provisions	**-**	**(20,710)**	**(73,001)**	-	(18,544)	(45,499)
Total	**$ 3,752**	**S/. (21,078)**	**$ (251,449)**	$ 2,966	S/. (25,229)	$ (57,154)
Total US$ equivalent	**$ 3,226**	**$ (7,052)**	**$ (17,084)**	$ 2,773	$ (9,023)	$ (4,371)

Based on the above net exposure as at December 31, 2014, and assuming that all other variables remain constant, a 10% depreciation or appreciation of the US dollar against the above currencies would result in an increase or decrease, as follows: impact to other comprehensive income of $358 (2013: $308) and an impact to net income of $2,682 (2013: $1,489).

The sensitivity analyses included in the table above should be used with caution as the results are theoretical, based on management's best assumptions using material and practicable data which may generate results that are not necessarily indicative of future performance. In addition, in deriving this analysis, the Company has made assumptions based on the structure and relationship of variables as at the balance sheet date which may differ due to fluctuations throughout the year with all other variables assumed to remain constant. Actual changes in one variable may contribute to changes in another variable, which may amplify or offset the effect on earnings.

c) Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's cash and cash equivalents and short term investments are held through large Canadian, international, and foreign national financial institutions. These investments mature at various dates within one year. All of the Company's trade accounts receivables from concentrate sales are held with large international metals trading companies.

The Company's maximum exposure to credit risk as at December 31, 2014 is as follows:

	Expressed in '000's	
	December 31, 2014	December 31, 2013
Cash and cash equivalents	**$ 42,867**	$ 31,704
Short term investments	**34,391**	17,411
Accounts receivable and other assets	**20,585**	17,040
	$ 97,843	$ 66,155

The carrying amount of financial assets recorded in the financial statements represents the Company's maximum exposure to credit

risk. The Company believes it is not exposed to significant credit risk and overall, the Company's credit risk has not declined significantly from the prior year.

d) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk by continuing to monitor forecasted and actual cash flows. The Company has in place a planning and budgeting process to help determine the funds required to support the Company's normal operating requirements on an ongoing basis and its development plans. The Company strives to maintain sufficient liquidity to meet its short term business requirements, taking into account its anticipated cash flows from operations, its holdings of cash, short term investments, and its committed liabilities.

On April 23, 2013, the Company entered into an amended and restated credit agreement with the Bank of Nova Scotia for a $40 million senior secured revolving credit facility ("credit facility") to be refinanced or repaid on or within three years or before April 22, 2016. The credit facility is secured by a first ranking lien on Bateas, Cuzcatlan, Continuum, and Barbados, and their assets and bears interest and fees at prevailing market rates. In the event that utilization under the credit facility is less than $10 million, a commitment fee of 1.0% per annum is payable quarterly on the unutilized portion of the available credit facility. No funds were drawn from this credit facility.

Subsequent to December 31, 2014, the Company is proposing to enter into an amended and restated credit agreement with the Bank of Nova Scotia for a $60 million senior secured financing ("credit facility") consisting of a $40 million term credit facility with a 4 year term and a $20 million revolving credit facility for a two year period. The credit facility is to be secured by a first ranking lien on Bateas, Cuzcatlan, Continuum, and Barbados, and their assets and bears interest and fees at prevailing market rates. In the event that utilization under the credit facility is less than $10 million, a commitment fee of 1.0% per annum is payable quarterly on the unutilized portion of the available credit facility. No funds were drawn from this credit facility.

(Refer to Contractual Obligations for the expected payments due as at December 31, 2014.)

Significant Changes, Including Initial Adoption of Accounting Standards

The Company has adopted the following accounting standards along with any consequential amendments, effective January 1, 2014:

IAS 32 Financial Instruments - Presentation in Respect of Offsetting (Amendment); IFRIC 21 - Levies; and, IAS 36 - Impairment of Assets - Amendments for Recoverable Amount Disclosures for Non-Financial Asset.

The Company has adopted the following amendments, effective July 1, 2014:

IFRS 2 Share-based Payment - Definition of vesting condition (Amendment)
The amendment to IFRS 2 provides the definitions of vesting condition and market condition and adds definitions for performance condition and service condition. The amendment is effective for transactions with a grant date on or after July 1, 2014.

IFRS 3Business Combinations – Contingent consideration (Amendment)
The amendment to IFRS 3 requires contingent consideration that is classified as an asset or a liability to be measured at fair value at each reporting date. The amendment is effective for transactions with acquisition dates on or after July 1, 2014.

The Company has adopted the above amendments which did not have a significant impact on the Company's Financial Statements.

New Accounting Standards

IFRS 10, Consolidated Financial Statements, and IAS 28, Investments in Associates and Joint Ventures (2011) (Amendment)
On September 11, 2014, the IASB issued narrow-scope amendments to IFRS 10, *Consolidated Financial Statements*, and IAS 28, *Investments in Associates and Joint Ventures* (2011). The amendments address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. The amendments will be effective from annual periods commencing on or after January 1, 2016.

IFRS 11 Joint Arrangements (Amendment)
The amendment to IFRS 11 *Joint Arrangements* adds new guidance on how to account for the acquisition of an interest in a joint operation that constitutes a business. The amendments specify the appropriate accounting treatment for such acquisitions. The amendments are effective for annual periods beginning on or after January 1, 2016, with earlier application permitted. Transactions before the adoption date are grandfathered.

IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets (Amendment)
The amendment to IAS 16 *Property, plant and equipment* and IAS 38 *Intangible assets* on depreciation and amortisation clarifies that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the

asset. The amendment also clarified that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. The amendment is effective for annual periods starting on or after January 1, 2016, with earlier application permitted.

IFRS 15 Revenue from Contracts with Customers

IFRS 15, *Revenue from Contracts with Customers* specifies how and when revenue should be recognized as well as requiring more informative and relevant disclosures. The standard supersedes IAS 18 Revenue, IAS 11 Construction Contracts and a number of revenue-related interpretations. Application of the standard is mandatory and it applies to nearly all contracts with customers: the main exceptions are leases, financial instruments and insurance contracts. IFRS 15 is effective for annual periods starting on or after January 1, 2017, with earlier application permitted.

IFRS 9 Financial Instruments - Classification and Measurement

IFRS 9*, Financial Instruments:* IFRS 9 introduces the new requirements for the classification, measurement and de-recognition of financial assets and financial liabilities. The amendments are effective for annual periods beginning on or after January 1, 2018, with earlier application permitted.

IFRS 9 *Financial Instruments (Hedge Accounting and amendments to IFRS 9, IFRS 7 and IAS 39) (Amendment)*

The amendment to IFRS 9 *Financial Instruments* which includes the new hedge accounting requirements and some related amendments to IAS 39 *Financial Instruments; Recognition and Measurement* and IFRS 7 *Financial Instruments; Disclosures.* IFRS 9 (2013) also replicates the amendments in IAS 39 in respect of novations. The amendments allow for early adoption of the requirement to present fair value changes due to own credit on liabilities designated as at fair value through profit or loss to be presented in other comprehensive income. The amendments are effective for annual periods beginning on or after January 1, 2018, with earlier application permitted.

IFRS 9 Financial Instruments - Expected Credit Losses

On 24 July 2014, the International Accounting Standards Board (IASB) issued the final version of IFRS 9*Financial Instruments*, bringing together the classification and measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39 *Financial Instruments: Recognition and Measurement* and all previous versions of IFRS 9. The amendments are effective for annual periods beginning on or after January 1, 2018. Entities will also have the option to early apply the accounting for own credit risk-related fair value gains and losses arising on financial liabilities designated at fair value through profit or loss without applying the other requirements of IFRS 9.

Other Data

Additional information related to the Company is available for viewing at www.sedar.com and the Company's website at www.fortunasilver.com.

Share Position and Outstanding Warrants and Options

The Company's outstanding share position as at March 12, 2015 is 128,845,842 common shares. In addition, 2,636,146 incentive stock options are currently outstanding as follows:

Type of Security	No. of Shares	Exercise Price (CAD$)	Expiry Date
Incentive Stock Options:	245,000	$4.03	May 29, 2015
	160,000	$1.35	February 5, 2016
	10,000	$1.75	May 8, 2016
	888,880	$3.38	May 29, 2016
	103,800	$1.55	July 5, 2016
	250,000	$2.22	January 11, 2017
	49,084	$6.67	February 20, 2017
	659,382	$4.30	March 23, 2017
	250,000	$0.85	October 5, 2018
	20,000	$0.85	November 5, 2018
TOTAL OUTSTANDING OPTIONS	**2,636,146**		

Other Risks and Uncertainties

For further information regarding the Company's operational risks, please refer to the section entitled "Description of the Business - Risk Factors" in the Annual Information Form available at www.sedar.com and www.sec.gov/edgar.shtml.

Controls and Procedures

Disclosure Controls and Procedures

The Company's management, with the participation of the Chief Executive Officer and the Chief Financial Officer, have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in the rules of the SEC and the Canadian Securities Administrators ("CSA") as of December 31, 2014, and have concluded that such disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 and Canadian securities laws is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and Canadian securities laws and (ii) accumulated and communicated to them Company's management, including its principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

Internal Control over Financial Reporting

The Company's management, with the participation of its CEO and CFO, are responsible for establishing a system of internal control over financial reporting to provide reasonable assurance regarding the reliability and integrity of the Company's financial information and the preparation of its financial statements in accordance with IFRS as issued by the IASB.

The Company's management, including its CEO and CFO, believe that due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Also, projection of any evaluation of the effectiveness of internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

There has been no change in the Company's internal control over financial reporting that occurred during the year that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

Management concludes that, as of December 31, 2014, the Company's internal control over financial reporting was effective and no material weaknesses were identified.

Qualified Persons

Thomas I. Vehrs, Ph.D., Vice President of Exploration, is a Qualified Person for Fortuna Silver Mines Inc. as defined by National Instrument 43-101. Dr. Vehrs is a Founding Registered Member of the Society for Mining, Metallurgy, and Exploration, Inc. (SME Registered Member Number 3323430RM) and is responsible for ensuring that the technical information contained in this Management's Discussion and Analysis is an accurate summary of the original reports and data provided to or developed by Fortuna Silver Mines Inc.

Cautionary Statement on Forward-Looking Statements

This MD&A and any documents incorporated by reference into this MD&A contain forward-looking statements which constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 and Section 21E of the United States Securities Exchange Act of 1934, as amended, and forward-looking information within the meaning of applicable Canadian securities legislation (collectively, "Forward-looking Statements"). All statements included herein, other than statements of historical fact, are Forward-looking Statements and are subject to a variety of known and unknown risks and uncertainties which could cause actual events or results to differ materially from those reflected in the Forward-looking Statements. The Forward-looking Statements in this MD&A include, without limitation, statements relating to:

- mineral "reserves" and "resources" as they involve the implied assessment, based on estimates and assumptions that the reserves and resources described exist in the quantities predicted or estimated and can be profitably produced in the future;
- timing of the completion of construction activities at the Company's properties and their completion on budget;
- production rates at the Company's properties;
- cash cost estimates;
- timing for delivery of materials and equipment for the Company's properties;
- the sufficiency of the Company's cash position and its ability to raise equity capital or access debt facilities;
- the Company's planned processing and estimated major investments for mine development, plant expansion, filter facility and dry stack tailings deposit project, and brownfields exploration at the San Jose property during 2015;
- the Company's planned processing and estimated major investments for mine development, plant optimization and brownfields exploration at the Caylloma property during 2015;

- management's expectation that there are no off-balance sheet arrangements or commitments that will have a material effect on the Company's financial condition other than those disclosed in this MD&A and the consolidated financial statements;
  - maturities of the Company's financial liabilities, finance leases and other contractual commitments;
  - expiry dates of bank letters of guarantee;

- estimated mine closure costs;
- management's expectation that any investigations, claims, and legal, labor and tax proceedings arising in the ordinary course of business will not have a material effect on the results of operations or financial condition of the Company; and,
- management's belief that there has been no change in the Company's internal control over financial reporting that occurred during 2014 that is reasonably likely to materially affect its internal control over financial reporting.

Often, but not always, these Forward-looking Statements can be identified by the use of words such as "anticipates", "believes", "plans", "estimates", "expects", "forecasts", "scheduled", "targets", "possible", "strategy", "potential", "intends", "advance", "goal", "objective", "projects", "budget", "calculates" or statements that events, "will", "may", "could" or "should" occur or be achieved and similar expressions, including negative variations.

Forward-looking Statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any results, performance or achievements expressed or implied by the Forward-looking Statements. Such uncertainties and factors include, among others:

- uncertainty of mineral resource and reserve estimates;
- risks associated with mineral exploration and project development;
- operational risks associated with mining and mineral processing;
- uncertainty relating to concentrate treatment charges and transportation costs;
- uncertainty relating to capital and operating costs, production schedules, and economic returns;
- uncertainties relating to general economic conditions;
- competition;
- substantial reliance on the Caylloma and San Jose mines for revenues;
- risks related to the integration of businesses and assets acquired by the Company;
- risks associated with potential legal proceedings;
- changes in national and local government legislation, taxation, controls, regulations and political or economic developments in countries in which the Company does or may carry on business;
- fluctuations in metal prices;
- risks associated with entering into commodity forward and option contracts for base metals production;
- environmental matters including potential liability claims;
- reliance on key personnel;
- potential conflicts of interest involving the Company's directors and officers;
- property title matters;
- dilution from further equity financing;
- currency exchange rate fluctuations;
- adequacy of insurance coverage;

- sufficiency of monies allotted for land reclamation ; and
- potential legal proceedings;

as well as those factors referred to in the "Risks and Uncertainties" section in this MD&A and in the "Risk Factors" section in the Company's Annual Information Form filed with the Canadian Securities Administrators and the U.S. Securities and Exchange Commission and available at www.sedar.com and www.sec.gov/edgar.shtml. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in Forward-looking Statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended.

Forward-looking Statements contained in this MD&A are based on the assumptions, beliefs, expectations and opinions of management, including but not limited to:

- all required third party contractual, regulatory and governmental approvals will be obtained for the exploration, development, construction and production of its properties;
- there being no significant disruptions affecting operations, whether relating to labor, supply, power, damage to equipment or other matter;
- permitting, construction, development and expansion proceeding on a basis consistent with the Company's current expectations;
- expected trends and specific assumptions regarding metal prices and currency exchange rates;
- prices for and availability of fuel, electricity, parts and equipment and other key supplies remaining consistent with current levels;
- production forecasts meeting expectations;
- the accuracy of the Company's current mineral resource and reserve estimates;

and such other assumptions as set out herein. Forward-looking Statements are made as of the date of this MD&A and the Company disclaims any obligation to update any Forward-looking Statements, whether as a result of new information, future events or results or otherwise, except as required by law. There can be no assurance that Forward-looking Statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on Forward-looking Statements.

EXHIBIT 99.9

CERTIFICATION PURSUANT TO RULE 13a-14 OR 15d-14 OF THE SECURITIES EXCHANGE ACT OF 1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Jorge Ganoza Durant, certify that:

1. I have reviewed this annual report on Form 40-F of Fortuna Silver Mines Inc. (the "issuer");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the issuer as of, and for, the periods presented in this report;

4. The issuer's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the issuer and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the issuer, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the issuer's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the issuer's internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the issuer's internal control over financial reporting; and

5. The issuer's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the issuer's auditors and the audit committee of the issuer's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the issuer's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the issuer's internal control over financial reporting.
